Mr. PROXMIRE. Mr. President, I yield 10 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I would like to have the attention of the chairman of the Appropriations Committee so that I can ask him the meaning of the language to the MX missile.

I have just a few questions, but I think it is important to have the MX issue clarified to the extent we can, so that what the conference agreed to will be very clear.

It is my understanding that the conference report prohibits any production money for the MX missile. Is that the chairman's understanding?

Mr. HATFIELD. Yes, that is my understanding.

Mr. KENNEDY. And is it also correct that no R&D money can be used for production of MX missiles for deployment until Congress has approved a basing mode?

Mr. HATFIELD. That is correct.

Mr. KENNEDY. Does this mean, therefore, that the five missiles that would have been produced with the $988 million originaly in the Senate bill can no longer be produced,

Mr. HATFIELD. That is correct.

Mr. KENNEDY. So the administration cannot proceed with the production or deployment of the MX missile by calling it R&D?

Mr. HATFIELD. That is correct, until Congress has approved the basing mode.

Mr. KENNEDY. Is it correct to say that any missile developed as part of the R&D cannot be flight tested at all until a basing mode is approved by the Congress?

Mr. HATFIELD. That is correct.

Mr. KENNEDY. I thank the chairman. I think it is helpful for our understanding of the language printed on page 141 to have these responses. Otherwise, it may be interpreted in different ways. I thank the chairman of the Appropriations Committee, who has been very much involved with this report, along with the deputy Republican manager. I hope this interpretation will guide future policy action by the administration.

Mr. HATFIELD. If the Senator will yield, I would like to make one further comment. That is, that in the R&D there has to be some correlation between that and the need for the program. It is not a matter of using R&D as an excuse to go ahead into the production of missiles until approved by the Congress. I must emphasize the fact that those funds are strictly for R&D, prototypes, and what have you, and having a correlation, of course, for the need.

Mr. STEVENS. To make certain that we understand what we are saying, I am not disagreeing with what the chairman has said, but I hope that the Senator from Massachusetts understands what has been said. Rather than talk about missiles, let us talk about satellites. During the satellite program we had R&D money. We built satellites with that R&D money. When they were proven to be successful, we then went on and used the ones that were made during the R&D program and they are up there now. They worked. I am a Scotsman. I do not see any reason to say that the missiles that are produced during R&D cannot be deployed. We have convinced the House of that. The ones that are produced during R&D may be deployed when the House and the Senate have approved the basing mode. But they are not being produced for deployment. They are being produced for R&D. Once they have served their purpose and we have a missile that is a good one, there is no reason to go on and say, "We have to buy others because we cannot use these, they were built with R&D funds."

They were built with taxpayers' money, just as the satellites were. That is the feeling that I want to bring forth here. We are watching these dollars. There is over $4 billion in this program for R&D. When those missiles are built and the Congress has approved the basing mode, if the missiles prove successful they ought to be available for deployment. That is what we have said.

Mr. KENNEDY. I do not differ with the Senator from Alaska, but I think it is very important to understand that even under R&D, no MX missiles can be flight tested until a basing mode is approved by Congress.

Mr. STEVENS. That is correct, until the basing mode is approved.

Mr. KENNEDY. There will not be any flight testing of these missiles, even with R&D funds?

Mr. STEVENS. That is correct.

Mr. KENNEDY. I thank the Senators for their responses. The House and Senate bills contained different provisions. But the clear intent of both bodies was to place substantial restrictions on MX missile production. The administration cannot use R&D funds as a back door method of circumventing these restrictions. Congress has reached an important decision, and I think it is important that the administration not try to avoid the very clear understanding of the House, the Senate, and the conferees. The administration cannot nullify the intention of this law by using R&D funds for the purpose of producing MX missiles.

I think the responses by the manager of the bill and the deputy manager clarify that intention very well. I thank the Senators.

Mr. HATFIELD. Mr. President, I yield 15 minutes to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. TOWER. Mr. President, I take no pleasure in feeling compelled to say what I am about to say in registering my displeasure with the legislative process that has caused the situation which we find ourselves in with the conference report on the continuing resolution, House Joint Resolution 631.

During the last week, many of us, including members of the Appropriations Committee, have criticized the process of continuing appropriations bills. Personally, I see no reason why many more appropriations bills, including the defense bill, could not have been enacted. By the way, I do not blame the Appropriations Committee for that.

Nevertheless, we stood on the floor for many hours and offered amendments we believed were necessary to change the bill as reported by the Appropriations Committee. It was our right and duty to do so.

The amendments offered by myself and other members of the Armed Services Committee were chosen based on their importance to national security. They were amendments which the Congress had previously approved in substance in the fiscal year 1983 defense authorization bill.

The conferees have returned a conference report which, on national defense matters at least, has for the most part ignored the positions ratified by the Senate only 2 days ago. The report will have serious adverse consequences for U.S. national security policy and will needlessly jeopardize the mutual security relationships which we have enjoyed with our allies.

The most serious example of the conferees' indifference to the Senate position on major national security issues was the action taken with respect to MX missile production funding. My colleagues will recall that, in the early hours of last Friday, the Senate overwhelmingly rejected a motion offered by Senator CRANSTON designed to bring our version of the continuing resolution into conformity with the House position. The Cranston motion failed by a vote of 70–28.

Having decisively discarded an amendment which eliminated the production funding for MX in fiscal year 1983, the Senate went on to adopt by a vote of 56–42 an amendment offered by a bipartisan group which included among its sponsors the Chairman of the Defense Subcommittee of the Senate Committee on Appropriations.

This amendment differed substantially from the House stance on MX production funding. It appropriated $988 million to initiate production in fiscal year 1983.

Such production was, however, subject to a stringent legislative "fence" which insured that operational missile production would not start until both

Houses of Congress had considered and adopted resolutions releasing the fence under expedited procedures.

It was, and remains, my view that the Senate-passed provision represented the only possible way to address the controversial MX missile and related basing system. Since President Reagan, in response to a congressionally imposed mandate, submitted his plan for survivably deploying MX on November 22, 1982, not a single public hearing has been held by either House of Congress in which all the substantive details of the proposed system have been reviewed.

Instead, in a little over 3 weeks time and in the utter absence of detailed technical information, the Congress of the United States has yielded to unrelenting criticism of the program in the press and has, by its actions, effectively precluded fair and reasoned consideration by the next Congress of the President's proposal. Consider the manner in which this was done:

All production funds for operational MX missiles were eliminated by the conferees. Consequently, the option to proceed with the President's recommended program, should the Congress elect to do so pursuant to the review period called for in both the Jackson amendment and the conference report, is forclosed. Thus, the very integrity and objectivity of that review are called into question—if not impeached, before it even is begun.

The conferees stipulated that only $155 million of basing-related research and development is available. It is my understanding that this level of funding is inadequate to support the necessary pre-full scale engineering development RDT&E so as to preserve an option to meet the earliest achievable MX initial operational capability. In this way, the Congress future freedom of action is restricted.

What is more, the relevant authorizing committees of the Congress—the Committees on Armed Services—are denied the oversight responsibility assigned to them under the respective rules of each House. Unlike the amendment adopted by the Senate which directed that reports of the President and resolutions mandated by this resolution be referred to the Armed Services Committees of the Senate and House of Representatives, the conference report dictates that such materials and resolutions be submitted to the Appropriations Committees.

As a precedent, the exclusion of the substantive committee from such oversight is extremely troublesome. As legislative practice, this approach is seriously flawed. But most importantly, from the standpoint of providing for the national defense, serious damage to our national security may result from the exclusive consideration of these weighty matters by a committee the breadth of whose duties dictate that the committee must give relatively superficial consideration to any single issue.

The authorizing committees, by contrast, are constituted by the Congress to delve in detail into the complex and often arcane matters uniquely within their respective jurdictions. It is most disturbing that the Congress is being asked to endorse in the conference report a legislative mechanism which may seriously infringe upon the systematic and detailed analysis required by so important a decision as that of the MX.

In short, with respect to MX, the continuing resolution prejudges and constrains the review the public expects us to undertake before taking action on MX. In fact, it constitutes a taking of such action—by eliminating production funding and by severely constraining basing R&D—before the detailed examination of the serious implications of such action can be conducted.

In addition to the MX provisions, the conference report contains three glaringly unacceptable provisions directly inconsistent with Senate action.

First, both the House and Senate versions of the fiscal year 1983 defense appropriations bill specifically prohibited the use of funds to transport equipment to fill POMCUS division sets 5 and 6. However the full Senate accepted a Nunn-Tower-Percy amendment to the continuing resolution which simply permitted DOD to fund this program within the appropriations totals. The conference agreement rejects the Senate position. Filling POMCUS sets 5 and 6 is critical if the United States is to fulfill its formal commitment to deploy 10 divisions in Europe within 10 days of the onset of hostilities.

Second, both the House and Senate versions of the fiscal year 1983 defense appropriations bill eliminated virtually all of the U.S. share of the cost of the wartime host nation support agreement reached with West Germany. The full Senate accepted a Nunn-Tower-Percy amendment to the continuing resolution which simply permitted DOD to fund the U.S. share of $44.3 million within the appropriations total. The conference agreement rejects the Senate position. If Congress fails to fund its one-half share of WHNS, the United States risks losing the vital logistical support of 93,000 reservists to be provided by West Germany during hostilities.

Therefore, we endanger the lives and safety of Americans deployed there if we got into an immediate conflict.

With regard to specialty metals, the House and Senate versions of the fiscal year 1983 Department of Defense bill allowed DOD to purchase only weapons or weapons systems manufactured outside the United States which contain specialty metals of non-U.S. origin. The full Senate, however, adopted a Heinz-Tower compromise which would have allowed the United States to purchase defense items, and parts and components of defense items, which are manufactured outside the United States. The conference committee, however, rejected the Senate compromise. The House language imperils a defense trade balance which favored the United States in 1980 by 9 to 1. This language puts thousands of American jobs at risk. For instance, the language jeopardizes a sale of the M-1 tank to Switzerland which represented 6,000 to 12,000 American jobs.

In other words, what we have done is demagog on protectionism, to make some of the folks back at home in afflicted industries think we have done something for them when, in fact, we are jeopardizing more jobs than we are likely to save by legislation of this type. Loss of sale of M-1 tanks to Switzerland, however, will cost us 6,000 to 12,000 jobs.

Finally, I want my colleagues to know that—by voting for this conference report—they are wasting at least $800 million in budget authority to fund programs that was neither requested by the Department of Defense nor approved by the authorizing committees.

For instance, the conference report provides $357 million for the procurement of 20 A-10 aircraft despite the fact that the Air Force has made it clear that it does not want or need any more A-10 aircraft.

And yet, Mr. President, for the F-16 aircraft—a program which both the Air Force and the Congress agree is absolutely essential—and one which many foreign countries regard as essential, because it is in inventories almost throughout the world—the conferees failed to approve $82 million in long lead funding which, if approved, would permit us to achieve some economics of scale on the F-16. It eliminated funds that would result in savings on the per-unit cost of the F-16. I might note what has happened here is pretty clear to me. Since they provided the money for the A-10, they said that this money is available, it is all right to authorize, but required reprograming for the F-16 funds. The purpose for that, let me tell you, is leverage so that the Department and the Congress are, in effect, levered into funding an aircraft for which there is no further use—an aircraft which cannot survive in a high-density air defense environment—because it is produced in somebody's district.

To protect a little pork, we have to make it more difficult or hold hostage something for which there is a validated military requirement.

I am getting a little tired of this procedure around here. We have a lot of people complaining about defense and high defense spending, but I do not hear any complaints about congressional pork in the defense bill.

We better face up to it. The American people are beginning to hold the Congress in contempt. It is not just the Pentagon everybody is down on for defense spending, be assured. We are wasting a lot of defense dollars by funding pork-barrel projects. The A-10 is a splendid example—or I should say a horrible example, depending on how you look at it.

In addition, the conferees having agreed to fund C-17 R&D at $60 million, despite the fact the Department of Defense has not requested such funding, and by best estimates even if they had it is doubtful they could have spent $50 million.

Now, I ask the Senate, is it DOD or the Congress who is the real cause of waste in the defense budget? I submit that the Congress must take a major share of the blame.

I have had only a few minutes to review this lengthy conference report as it applies to defense. I think it is irresponsible of us to pretend that we are making an informed judgment on nearly $232 billion of defense programs.

I have already discussed my dissatisfaction with several provisions contained in the conference report. There may be other provisions contained in that report which are also not well thought out. These provisions will not be considered in the detail that they deserve. I intend to vote against the conference report, and my vote is against the process itself, the pork barrel that is contained in the bill and the MX.

Mr. STEVENS. Will the Senator yield?

Mr. PROXMIRE. Mr. President, I yield 3 minutes——

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I yield 3 minutes to the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts has 3 minutes.

Mr. KENNEDY. Mr. President, I want to make a parliamentary inquiry on the jobs issue. Both the Senate and the House of Representatives enacted a significant funding provision on this bill in order to help the unemployed. It seems to me that there is something wrong with the rules of the Congress when both Houses can pass separate job measures, and then the conferees ignore such action entirely. So I ask whether the conferees acted within the scope of their authority in eliminating the Senate and House jobs program?

The PRESIDING OFFICER. To whom is the Senator addressing his question?

Mr. KENNEDY. The Chair.

The PRESIDING OFFICER. The conferees are permitted to act within the language that is committed to them. Either House can recede to the other's language or less than the other's language, so that the conferees were acting within the scope of the conference.

Mr. KENNEDY. If I understand the response of the Chair, they can accept either House's language. That was not the case in this conference report, was it?

The PRESIDING OFFICER. They can accept either House's language or less. In this case they accepted less than either House had concurred in.

Mr. KENNEDY. Mr. President, for that reason I will oppose the conference report—because of its failure to include any funds at all for either the House or the Senate jobs initiative. I deplore the unwarranted, uncompromising, and insensitive position of the administration on this issue. I believe there is no clearer example of the let-them-eat-cake attitude of the administration than the harsh threat to veto even a single penny for jobs in this legislation. Twelve million Americans are out of work today. Unemployment has climbed steadily for the past 17 months to nearly 11 percent today. It is likely to keep rising in the months to come. The American economy is in the worst straits we have seen in half a century. Under these circumstances, Congress has an obligation to act, even when the administration says it does not care. There is no justification whatever for Congress to buckle to the veto threats of the President on the issue of jobs and justice for the workers of this country. This legislation should be rejected by the Senate because it does not deserve to pass.

Mr. HATFIELD. Mr. President, I say to the Senator from Massachusetts that I hope he would address his concerns to the leadership of the House of Representatives.

I should also say to the Senator from Massachusetts that if this is voted down, there is not going to be a jobs bill, there is not going to be an agreement on the MX missile, and there is going to be increased unemployment because this Government will shut down. And as I said earlier when the Senator from Michigan raised the same points, there may be those in this body who think it is best to shut the Government down. I am not one of them. But there are no options at this point that we have. It is not my creation, but as chairman of the committee I can only say that you vote this down and I do not know where we go from there.

I would yield 3 minutes——

Mr. KENNEDY. I think the question ought to be directed more toward the President. He made the veto threat, and he was willing to shut down the Government. and all because the White House says "no" to any jobs program at all.

Actually, as I understand it, the President has indicated he may wait for hours or even days before deciding whether to sign this bill. During that time, while we are waiting for his response, it seems to me that we could act on the jobs issue. A very reasonable position has been taken by the chairman of the Appropriations Committee. He sponsored a very modest jobs bill in the committee, and he defended it eloquently on the Senate floor. At the very least, we could act again on that proposal. I know, both by his record and his work, of Senator HATFIELD's deep commitment to unemployed Americans. I am very grateful for his past efforts and I hope he will continue to make those efforts in the future.

Mr. HATFIELD. I thank the Senator. I will pursue this efforts to try to get a jobs progrm, but I must admit that that is not going to be possible until the new Congress because the President made it abundantly clear where he stands at this point. Whether I think he is right or wrong, that is the President's role to play in the legislative process, and it is his prerogative to exercise that role as he sees fit.

I will yield 3 minutes to the Senator from Alaska, and then the Senator from Illinois wishes 3 minutes, the Senator from Idaho wishes 3 minutes, the Senator from Alabama wishes 3 minutes, and I know of no other Senator after that.

To the Senator from Alaska I yield 3 minutes.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. I regret the disagreement with the chairman of the Armed Services Committee. I want to point out that although the A-10 was not authorized, the money in this bill is not available for expenditure until the Armed Services Committee does clear it. In fact, 20 A-10's were in the President's budget request.

There is an increase for the F-16's, but the increase was not requested in the budget and the House complained about that so we put those in the same situation. If that is leverage, it is because of the budget situation and not because of the action of the Appropriations Committee.

As a matter of fact, with regard to the MX, when the authorization bill first passed this Senate, it contained no money for procurement for the MX in fiscal year 1983. We were reminded of that constantly by the House. We have in fact established a position in

this bill, which was the original position taken by the Armed Services Committee for 1983 for the MX procurement. As far as the POMCUS and the host nation support, we did try to carry out the instructions of the Senate in that regard. But it was a Member of the Senate—and all of us in the conference agreed—who pointed out that our National Guard and our military Reserves do not have the equipment that they need, and the money that was originally earmarked for POMCUS and the host nation support is in this bill but it is earmarked for our National Guard and our Reserves across the board.

We had testimony in hearings this past year that indicated that these units that are scheduled to go overseas in the event of an emergency, at the first sign of hostilities, are not properly equipped, and yet we are asked to equip the host nation reserves and their national guard.

Finally, because of my great regard for the distinguished President pro tempore, I wish to address the Pershing missile.

He has inquired as to why we did not have more funds for the procurement of the Pershing I. I remind the Senate that the test flight that was originally scheduled was delayed and then failed. The most recent shot was postponed. Only one launch has been achieved. It was a partial failure. The missiles are not now ready for full production.

With the 1982 low rate of production funding, $200 million, the Army can make deployment with the $30 million that we added to the operation and maintenance account. There are 21 of these missiles currently funded and ongoing.

This agreement does not terminate the program and should not send the wrong signal. In fact, the conferees stated their continuing support for this program.

We will make the initial deployment. We will provide funds after a successful test program.

We have directed the Department to reprogram or give us a supplemental request immediately when this missile has been successfully flown.

Meanwhile, we have added $30 million to the operations and maintenance account so that the Pershing II crews can be trained and ready to operate the new missiles when they are available.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, yesterday I expressed support for the position that had been taken on the NATO U.S. troops in NATO issue. I was very pleased that Senator STEVENS was able to work this out. I also was very pleased that the House of Representatives receded to the Senate position thereby providing funds to establish the new U.S. central command in the Middle East region.

However, Mr. President, I am extremely disappointed to learn that the conferees on the continuing resolution agreed to provisions on a number of NATO-related issues which, in my opinion, will have a severely adverse impact on the well-being of the Alliance. Indeed, the conferees approved provisions on five separate NATO issues that are directly contrary to the positions recommended to the Congress by Gen. Bernard Rogers, the Supreme Allied Commander in Europe, and Undersecretary of State Lawrence Eagleberger and adopted by the Senate last week. These five provisions relate to the Pershing II and GLCM missile programs, the POMCUS sets for divisions five and six, the host nation support program with West Germany, and the specialty metals restriction.

I will not rehearse the arguments against the provisions adopted by the conferees on these five programs since colleagues and I fully aired them during Senate consideration of the bill. But I would repeat my deep regret that the Senate conferees felt compelled to yield to the House on all five points. I intend to work closely with Senator TOWER and Senator NUNN in the months ahead to overturn these unfortunate and damaging conference decisions.

I pay tribute to my distinguished Senator, our colleague, the chairman of the Armed Services Committee, for the way he forcefully carried these arguments on the floor of the Senate, and I think properly so, and for the way Senator NUNN, went before the conferees to argue those same positions with respect to those NATO issues. If their arguments had prevailed our alliance would have been stronger and the free world would have been stronger today than it would be otherwise.

The PRESIDING OFFICER (Mrs. HAWKINS). The Senator from Idaho is next.

Mr. SYMMS. Madam President, I am very concerned. The other night in the late hours of the night there was an amendment which was adopted by the full Senate which I was in hopes would not come back from the conference, and I do not in any way wish to say anything here that would have any of the distinguished Senators who are on the conference feel that I am being critical of what has happened here for their sincere efforts. But I am concerned, as one Senator, that this question of national defense and of the strategic importance of the MX missile is being downplayed here somehow in the midst of our rush to go home.

I have heard some of my colleagues here stand up and say that the President is playing gamesmanship, and so forth. I just absolutely disagree with that. I think the President has a tremendous responsibility. His first and foremost responsibility to the security of the American people is to keep the peace, and that is why we have a defense establishment in the first place.

The distinguished chairman of the Armed Services Committee has enlightened us greatly with some of the things that have happened within this bill, but as I read the Hart amendment that was adopted the other night, we are delaying our ability to flight test the MX and also limiting our ability to flight test the MX and the flexibility we could have only so we can comply with paragraph 9, article 4, of the unratified SALT II treaty, which in my judgment is a very poor reason.

I wonder if Senator TOWER would agree that there are some complications here with respect to flight testing and production, and I have one other question.

Is it correct that the conference has now fenced this money in so it has to be approved now by the Appropriations Committee both in the other body and in this body instead of by the respective Armed Services Committees?

Mr. TOWER. Madam President, the Senator is correct. That is to say whatever basing mode might be submitted would be subject to consideration by the Appropriations Committee, not by the Armed Services Committee. To me that is an unfortunate precedent to set. It means getting around the subject matter of committees.

Of course, I feel particularly strongly about this because the Armed Services Committee and the Foreign Relations Committee are the only two major spending committees of the Senate in which the majority is barred representation on the Appropriations Committee. So we have no protection.

Mr. SYMMS. I appreciate the distinguished chairman's answer, and I might just also say we just heard the concern expressed by the chairman of the Foreign Relations Committee about how this is going to be viewed by our NATO allies.

I do believe that the interpretation regarding the status of the MX ICBM that is going to be read around the world with this conference report, and I say that with all due respect and affection for my distinguished friend from my neighboring State of Oregon, is going to be one that the Europeans and people in NATO are going to view if the Americans are unwilling to make a development and deployment decision as their President called for, and if Congress is unwilling to back up their President to move forward with the third leg of the triad, that is a new land-based missile, then the Europeans are going to come back and say, "If they do not have the courage to

put it in their own country,why should we do it in our country."

I think we are really playing with the security of this Nation by what has happened in this conference report.

I know everyone wants to go home for Christmas. But I can only say as one Senator that if the President interprets this conference as this Senator does, he very likely will veto it over the issue of what happened with respect to the MX missile notwithstanding some other things in the bill.

Mr. TOWER. I cannot respond to the suggestion that the President might veto it.

I certainly agree with the Senator from Idaho that this has very serious implications for us from the standpoint of strategic arms reductions negotiations, from the standpoint of theater force reductions negotiations and from the standpoint of mutual balance of force reductions negotiations.

It does further inflame the climate in Europe that is opposed to the stationing of land-based missiles in European countries.

I think the Senator is absolutely correct. They are likely to conclude that if the Americans will not place them on their soil why on earth should we base them on ours?

That, of course, further degrades the capability of the United States to negotiate any kind of significant arms reduction, reduction of destabilizing arms with the Soviet Union.

Mr. SYMMS. Madam President, I rise to object to the provision in the conference report which delays MX ICBM testing due to the U.S. unilateral policy of complying with the unratified SALT II Treaty. This provision, the Hart amendment, does not specifically mention the unratified SALT II Treaty as the reason for delaying indefinitely the first flight test of the MX ICBM. However, the intent, and purpose of the Hart amendment is to comply with the unratified SALT II Treaty. Indeed, the sole and only reason for the Hart amendment is to comply with the unratified SALT II Treaty.

I strongly object to the U.S. compliance with the unratified SALT II Treaty regarding the testing, characteristics and deployment of the MX ICBM.

Madam President, I ask unanimous consent to revise and extend my remarks further on this subject in the RECORD with respect to my objections to what has been done here.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

THE SALT II TREATY AS UNRATIFIED

The United States has already constrained our strategic forces unilaterally in compliance with the unratified SALT II Treaty in at least eight significant cases. The Hart-Tower amendment would be case No. 9.

Mr. President, it is correct that under the second agreed statement to paragraph 9 of article IV of the unratified SALT II Treaty the United States should not flight test a new ICBM type that has a different number of stages than that of the first new ICBM type to be flight tested. In other words, once the United States launches the first MX—with its four stages—in February, we could not under SALT II then test launch a second new ICBM type with, say, three stages, which would probably be the number of stages on a small mobile ICBM. But the United States has not ratified the SALT II Treaty.

In sum, I oppose the Hart-Tower amendment because it would defer MX flight testing in compliance with the unratified SALT II Treaty. This is case No. 9 of U.S. unilateral SALT II compliance. The evidence is growing ever greater that the constitutional treatymaking power and prerogatives of the Senate are being circumvented. Someday soon, Senators may begin to challenge U.S. SALT II compliance directly.

Beyond the above constitutional legal and political problems, the Hart-Tower amendment would also have the following deleterious programatic effects:

First. It will delay MX R&D, which the Congress, administration, and Joint Chiefs of Staff all agree should go forward as soon as possible on top priority.

Second. It will increase the cost of the MX program.

Third. Delay of MX testing and deployment will reduce U.S. leverage at the START talks.

The specific results of the Hart-Tower amendment will be that the first MX flight-test will probably now be delayed from January 1983 to at least March 1983, a 2-month slippage at least. The Senate has thus agreed to another serious delay in the MX program. The U.S. should not comply with the unratified SALT II Treaty.

Mr. President, one of the virtues of the MX ICBM in the Dense Pack deployment mode is that it violates the unratified SALT II Treaty. The Soviets have been flagrantly violating the SALT II Treaty since late 1979. Over 10 separate Soviet SALT II violations have been documented and reported in the press. SALT II has been made a dead letter by the Soviets. Their massive SALT II violations are indisputable. Thus the time has come for America too to cast SALT II aside and deploy MX.

Regrettably, President Carter and President Reagan have defied the Senate's prerogatives in contravention of the treatymaking power of the Constitution. Both President Carter and President Reagan committed the United States to compliance with the SALT II Treaty, without the advice and consent of the Senate. This U.S. SALT II compliance policy under the Reagan administration began in March 1981, with a State Department announcement that the United States would not undercut the SALT II Treaty, as long as the Soviets did not undercut SALT II. But the U.S. Constitution says nothing about giving the Soviets a role in deciding whether or not the United States ratifies and complies with a treaty. Moreover, the Senate has a voice in U.S. treaty compliance. Further, on May 30, 1982, President Reagan himself stated:

As for existing strategic arms agreements, we will refrain from actions which undercut them so long as the Soviet Union shows equal restraint.

SALT II is an existing arms control agreement, although it is an unratified treaty. The U.S. Constitution states that:

He (i.e., the President) shall have power, by and with the advice and consent of the Senate to make treaties provided two-thirds of the Senators present concur . . ."

This constitutional language is being contradicted by the President's policy that the United States not undercut SALT II contingent upon similar Soviet behavior. Further, the word "undercut" could even be interpreted to mean that the United States is bound to comply not only with the precise provisions of SALT II, but also with the undefined "spirit" of SALT II as interpreted by the U.S. President or even the Soviets. Thus, the President's policy of not undercutting SALT II is in effect Presidential ratification of the SALT II Treaty, committing the United States to compliance with SALT II's provisions. Not only have the Soviets officially never informed the United States that they will not undercut SALT II, but they are in fact undercutting SALT II with their many SALT II violations.

Thus, the Soviets have all the benefits of U.S. compliance with SALT II, while they themselves have accepted no obligations.

The President's policy of compliance with the unratified SALT II has official, even legal, status as a Department of Defense directive. Department of Defense Directives 5100.7 and 5100.72, and Air Force Regulation 28-1, require U.S. compliance with the unratified SALT II treaty. Further, these directives require quarterly reports from the military services on U.S. compliance with the unratified SALT II treaty.

There are many examples of U.S. unilateral compliance with the unratified SALT II treaty. The following listing is probably only partial:

First. The U.S. unilateral deactivation of 292 strategic delivery vehicles—160 Polaris SLBM's, 54 Titan II ICBM's, 80 B-52D bombers—counted in the SALT II treaty and in its data exchange, an integral part of the treaty.

Second. The U.S. modification of B-52 bombers to carry "strakelets" on those models which are also being equipped with air-launched cruise missiles. These "strakelets" are supposed to be "functionally related observable differences" required by the unratified SALT II, and they cost about $80 million.

Third. The U.S. redesigning of the B-1B bomber in order to carry 2 fewer air-launched cruise missiles, 20 instead of the 22 each is capable of carrying, in unilateral compliance with the unratified SALT II Treaty.

Fourth. the U.S. cancellation of deployment of 50 or 100 stockpiled Minuteman III ICBM's in compliance with the unratified SALT II Treaty's ceiling of 1,200 MIRV'ed missiles.

Fifth. The U.S. limitation of the throw weight of the MX ICBM to somewhat above 3,600 kilograms, in compliance with the unratified SALT II Treaty.

Sixth. The U.S. limitation of the launch weight of the MX ICBM to 90,000 kilograms, in compliance with the unratified SALT II Treaty.

Seventh. The U.S. limitation of the number of warheads on the MX ICBM to 10, instead of 14, in compliance with the unratified SALT II Treaty.

Given the above seven examples, President Reagan's decision to deploy the MX in the Dense Pack basing mode is not surprisingly being justified as being in compliance with the unratified SALT II Treaty. Both Defense Secretary Weinberger and Assistant Secretary Perle argue that MX Dense

Pack does not violate the SALT II Treaty. Thus the United States has constrained its strategic forces in eight significant ways. The administration argues that the MX canister, not the silo, is the launcher, and that this launcher is mobile. This argument, however, would be much more credible if the number of silos was greater than the number of canisters, and if the MX transporter-erector was also capable of launching the missile from its canister.

Instead, there are planned to be 100 canisters deployed in 100 silos. There is no reason to move each canister, because there are no extra silos, which in addition are to be very close together. Moreover, the canister can not launch the missile from the transporter-erector. Indeed, the only way the missile will be launched operationally will be from its silo. Indeed, logic and all observable characteristics of the MX Dense Pack suggest that the silo is the fixed ICBM launcher.

But article IV of the unratified SALT II Treaty states that:

(1) Each party undertakes not to start construction of additional fixed ICBM launchers.

(2) Each party undertakes not to relocate fixed ICBM launchers.

Thus, each of the 100 new MX Dense Pack silos would violate either one or the other of the above provisions.

In addition, article V. paragraph 2, of the unratified SALT II Treaty states that:

. . . each party undertakes to limit launchers of ICBM's and SLBM's equipped with MIRV's and ASBM's equipped with MIRV's, to an aggregate number not to exceed 1,200.

Due to the fact that at least seven Trident submarines carrying 168 MIRV'ed SLBM's are already under construction, the United States will be exceeding the 1,200 MIRV'ed missile ceiling with MX Dense Pack by as early as 1984, when the construction of the 100 MX Dense Pack silos will have to begin for them to be operational by 1986 as planned.

Thus we must conclude that MX Dense Pack will violate both aricle IV and article V of the unratified SALT II Treaty.

But the Reagan administration argues, incorrectly and contrary to the observable facts, that MX Dense Pack is in compliance with SALT II.

In sum, one of MX Dense Pack's virtues is the fact that it violates the unratified SALT II Treaty. Thus if MX Dense Pack is deployed, the unratified SALT II will have to be declared dead.

Section 33 of the Arms Control and Disarmament Act of 1961 states:

No action shall be taken under this or any other law that will obligate the United States to disarm or reduce or to limit the armed forces or armaments of the United States, except pursuant to the treaty-making power of the President under the Constitution, or unless authorized by further affirmative legislation by he Congress of the United States.

Strictly interpreted, section 33 states that Presidential policies to limit U.S. strategic force levels in compliance with expired or unratified SALT Treaties are both contrary to the law and inconsistent with the Constitution.

Thus MX Dense Pack has finally made the unratified SALT II Treaty a dead letter. The seven other examples of Reagan administration compliance with the unratified SALT II Treaty are equally contrary to the law and inconsistent with the Constitution.

The Soviets themselves have been behaving as if the SALT II Treaty was dead since late 1979. President Reagan recognized the existence of Soviet SALT II violations when he stated on May 9, 1982:

So far, the Soviet Union has used arms control negotiations primarily as an instrument to restrict U.S. defense programs, and in conjunction with their own arms buildup, as a means to enhance Soviet power and prestige. Unfortunately, for some time suspicions have grown that the Soviet Union has not been living up to its obligations under existing arms control treaties.

President Reagan is right. The Soviets have been violating the SALT II Treaty. The following examples of Soviet SALT II violations have been reported in the press, and are well known:

First, the reported Soviet rapid reload and refire exercises for their giant SS-18 cold-launched ICBM.

Second, the reported Soviet covert deployment of the camouflaged and concealed mobile SS-16 ICBM's at the Plesetsk test range. This activity is similar to the Soviet illegal deployment of 18 SS-9 ICBM's at the Tyuratam test range during SALT I.

Third, the Soviet deployment of AS-3 Kangaroo air-to-surface missiles on 100 TU-95 Bear intercontinental bombers in violation of several provisions of SALT II. This is also a Soviet falsification of the data exchange, calling into question all Soviet-supplied data.

Fourth, the continued almost total encryption of telemetry signals from the following Soviet missile programs: The SS-NX-20 SLBM, the SS-NX-19 SLCM, the SS-18 MOD X ICBM, the SS-20 IRBM, and now the new Soviet medium-heavy ICBM equivalent to the U.S. MX. This encryption is in violation of several provisions of SALT II.

Fifth, the fact that all Soviet camouflage, concealment, and deception is intended to deliberately interfere with U.S. national technical means of SALT verification—satellite reconnaissance—and therefore constitutes another Soviet SALT II violation. This violation is confirmed by a Soviet military dictionary dated as early as 1966, which states explicitly that all Soviet interference with satellite reconnaissance is deliberate.

Early in the Reagan administration, in January 1981, President Reagan called Soviet leaders liars and cheats who commit any crime to advance their objectives. In the same press conference, President Reagan declared that SALT II was unverifiable. President Reagan's concern that SALT II was unverifiable was fully consistent with his campaign statements opposing SALT II as "fatally flawed, unequal, destabilizing, and unverifiable." His concern was also fully consistent with the Republican platform's tough arms control section, which was reaffirmed by President Reagan after the election.

Thus if the Soviets are flagrantly violating SALT II, the United States should also cast SALT II aside and deploy MX Dense Pack.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. I thank the Chair and I thank the distinguished chairman of the Appropriations Committee.

Madam President, I preface my remarks by noting that it was 3 o'clock when we received the voluminous conference report, and my remarks are thus limited by the awareness which could be derived from a quick examination of it.

I am aware that as the Senator from Alaska maintains, at least on the MX the House of Representatives conferees had themselves in a strong position requiring concessions on our part. Nothing I say should be considered as a reflection upon the effectiveness of any of the Senators on our side in the conference.

But I must make note of the fact that, when we did not produce production money for the MX, we are flying in the face of a fundamental fact that the Soviets know. One-quarter of their land-based missiles can destroy 95 percent of ours. The Soviets cannot fail to note our increased acquiescence in the drift toward the day when it will become thinkable for them to hit us and produce the holocaust that well-intended peacemaking people want to avoid but may bring about by their choice of the wrong means to express their desire for peace.

On the MX, some of my colleagues are beginning to talk hopefully of alternatives such as the D-5 missile, without realizing that that missile is still a dream, a design concept, that cannot be deployed until 1989.

The MX, if things go reasonably well, could have been deployed very soon, and now the decision taken by the conference will slip the IOC until at least mid-1987.

But even beyond the MX, I think also of the Pershing, where the deletion of acquisition funds will have grave consequences.

I think also of the deletion of funds for prepositioning for theater division supplies in Europe. The distinguished Senator from Alaska said he had hearings in which they decided that the best thing to do was to give this money to the National Guard and Reserves. Let me say that, after 34 years in the service, I am aware that unless the POMCUS supply divisions win the Reserve and National Guard divisions will not leave our shores to go over there.

I do not know what kind of comprehensive hearings were held, but that is the most misleading result and decision I can think of.

I think also of the monstrosity of the reinclusion of funds for the A-10, which is so jokingly referred to by the media, so clearly rejected by this body, and so clearly unwanted by the Air Force.

I even think of the deletion of long lead time funds for the reactivation of the third battleship.

I say to my colleagues that neither our adversaries nor our allies are ignorant of the functioning and structure of the Congress and the committees of Congress. They know the difference between the Appropriations and Armed Services Committees, and the expertise that we can bring to the spectrum of consideration there. They

recognize that the remarkable shift in the weight of decisionmaking about national security issues away from the Armed Services Committee toward the Appropriations Committee is pregnant with significance for them. They will view it as a signal that this body is unwilling to face up to the demands of a sound defense.

I know the distinguished chairman and members of the Senate Appropriations Committee worked sincerely and diligently. Nonetheless, what was wrought was wrought, and I must state as my conscientious Senatorial opinion that, whatever considerations influenced the decisions of the conference, the country and the people whose security we are sworn to protect are ill-served by this resolution.

Mr. President, I turn to another issue symbolic of the conference committee's presumptuous changes. It relates to the fairness in the question of pay increases for ourselves and Federal workers. I refer to the conference committee's rejection by voice vote of the Ashbrook amendment which would prohibit payments for abortions subsidized by taxpayers performed under the Federal employees health insurance program. Financing these abortions includes a 60-percent contribution by the Federal Government. Congress is guilty of once again going on record as applying a double standard. That double standard denies Federal funds for abortions to poor citizens who must rely on medicaid, while at the same time permitting the use of Federal tax dollars for the abortions of another wealthier class of citizens, our Federal employees.

Moreover, despite previous protestations to the contrary, we have reversed both current law and practice by failing to leave the Ashbrook amendment in the new continuing resolution. The Ashbrook amendment is current law. It was included in the Treasury-Postal appropriations bills passed by both the House and Senate Appropriations Committees in September, and was thus enacted into law on October 1 as part of the omnibus continuing resolution. There was some disagreement about this point during the recent Senate floor debate, but there should be no confusion. As Senator HATFIELD himself explained to the Senator Appropriations Committee during a December 2 markup session:

> This year, by inaction on our own version of the Treasury bill, a provision (the Ashbrook amendment) was included. * * * And it is now in effect under the terms of the Continuing Resolution. (Committee transcript)

This start-again, stop-again manner of signaling changes in Federal policy is disconcerting to those at the Office of Personnel Management who are simply trying to do the job of enforcing a consistent and sensible policy of nonsubsidization of a hideous procedure that destroys innocent human life.

On another level, I would have to say that I am disappointed with the quality of the legal work that went into the preparation of the Senate Appropriations Committee report language that rationalizes the rejection of the Ashbrook amendment. In that report, the Appropriations Committee states:

> It is the view of the committee that the restriction constitutes an unwarranted attempt by the Congress to inject itself into the collective bargaining process by eliminating a medical benefit which Federal Employees have negotiated as part of their total compensation package.

This statement by the committee is simply erroneous. The General Counsel of OPM in a December 17, 1982, letter to Congressman CHRIS SMITH highlights the inaccuracy of this interpretation of current law. Mr. President, I ask unanimous consent that the letter be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF PERSONNEL MANAGEMENT,
OFFICE OF THE GENERAL COUNSEL,
Washington, D.C., December 17, 1982.

Hon. CHRISTOPHER H. SMITH,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SMITH: Thank you for your request for information concerning the Ashbrook Amendment and any impact that it may have on Federal labor-management relations.

The law simply does not permit the Federal government to engage in negotiations with employee representatives regarding health benefits. Federal employees have certain rights to engage in collective bargaining with respect to conditions of employment, but not health insurance.

While it is true that the Office of Personnel Management contracts with certain employee organization plans for the provision of health benefits, the plans participate in those contracts as insurance carriers and not as labor unions. OPM is, by law, the sole representative of Federal employees in all negotiations for health benefits.

Accordingly, there is no connection whatsoever between the Federal-sector labor relations programs, on the one hand, and the Federal Employees Health Benefits Program and the Ashbrook Amendment, on the other.

I have enclosed a legal fact sheet explaining these matters. I trust that this information will be of assistance to you.

Sincerely your,

JOSEPH A. MORRIS,
General Counsel.

Mr. DENTON. Mr. President, needless to say I am very disappointed in the conference committee's rejection of Ashbrook amendment provisions that had passed the House four times by wide margins and were only defeated by one vote in the Senate during the early hours of December 17. Aside from the many disagreements on abortion-related issues, there is a broad concensus of disapproving Federal funding for abortions, and against all taxpayers being required to pay for the so-called choice of an individual person. I will urge the 97th Congress to reconsider this measure next year.

Mr. President, I am further upset by the provision in the Conference Report that eliminates the authority of the Legal Services Corporation's Board of Directors to alter and funding of any current Legal Services grantee so long as the Senate fails to take action to confirm that Board of Directors. We are effectively holding hostage to the whim of a single Senator—any Senator who places a hold on the Board Members' nominations—the central decision making authority of the Board of Directors.

Furthermore, with regard to the payment of expenses to the members of the Corporation's Board of Directors as restricted by the DeConcini amendment, I expect that expenses will be reimbursed for meetings of the Board's committees as well as for meetings of the full Board of Directors.

Mr. HATFIELD. Madam President, I yield 3 minutes to the Senator from New Mexico.

Mr. DOMENICI. Madam President, I support the conference report, and I want to congratulate the Senator from Oregon, the chairman of the committee, Senator HATFIELD, and all of the conferees. Hopefully, when the bill passes I will be able to congratulate all of the Congress for a job well done.

While we only have preliminary figures at this time, they show that the conference agreement is about $2.7 billion in budget authority and about $1 billion in outlays below the level passed by the Senate yesterday.

As I view it, that is a good result. This conference report, plus all action under the jurisdiction of the Appropriations Committee, will put the total outlays for fiscal year 1983 about $2.3 billion over the 302(b) crosswalk in outlays. That is about one-half of 1 percent on a total allocation of about $460 billion.

I might add that on budget authority the committee is more than $12 billion below the 302(b) allocations that were set by the committee pursuant to the budget targets.

I am not sure everyone agrees with the Senator from New Mexico, but I think a compelling majority of this body agree that this is an excellent result considering where we started, where the lameduck started, the kind of temperament that existed, and the very difficult job of completing another continuing resolution at the last minute. Again I think this is an excellent achievement.

I congratulate the committee on its work, and I hope that in years to come we will be able to come forth with all of the individual appropriation bills

which we will pass. I am sure the distinguished chairman hopes that this will be the way we budget our country's money, and that we will be able to come in within budget, as I have described it here for this year.

I thank the chairman again for yielding and I congratulate him.

MULTILATERAL DEVELOPMENT PROGRAMS

Mr. MATHIAS. Mr. President, during the marathon sessions of the last few days major attention has focused on the most controversial issues in the continuing resolution such as jobs funding and the MX. In this final debate I would like to draw your attention to some important decisions on less visible issues but ones which will also affect large numbers of people: The poor in developing countries. I am referring to conference decisions affecting U.S. contributions to multilateral development programs.

As a strong proponent of U.S. participation in multilateral development efforts I have mixed feelings about the conference results. On the one hand, I am very pleased by the decision of the conferees to provide $249.2 million in U.S. contributions to international development programs such as UNICEF, the U.N. Development Program (UNDP), and the International Fund for Agricultural Development (IFAD). It is particularly reassuring that the levels agreed to by the conferees for UNICEF and UNDP are slightly above those for fiscal year 1982. The conference level of $42.5 million of UNICEF is a recognition both of UNICEF's important contributions to improving maternal and child health in developing countries and an appropriate response to the immense popularity and support that UNICEF enjoys among the American people. Likewise, conferees' approval of $140 million for UNDP is a helpful indication of support at a time when delays in U.S. contributions have been causing budgetary problems for UNDP. Both these programs, in my view, warrant continuing, strong U.S. support. It is my hope that this signal of support from Congress will discourage any potential budget-cutting efforts against this account in fiscal year 1984.

I am also pleased that the conferees have seen fit to provide $24 million for the International Fund for Agricultural Development (IFAD), although that level is still disappointingly low when placed beside the $180 million replenishment for fiscal year 1981-83 pledged, but not yet paid, by the United States. While I would have preferred a larger contribution with payment made sooner, the conference action is a beginning step in providing U.S. funding for the replenishment and an important signal of continuing U.S. interest in IFAD. I strongly endorse both IFAD's programmatic mandate of increasing food production among small farmers in the poorest countries and the symbolic value of IFAD as an organization which combines Western industralized and OPEC donor support in nearly equal amounts.

On the other hand, I am deeply disappointed by the failure of the conferees to provide more than $700 million in funding for the International Development Association (IDA), contrasted with the $945 million requested by the administration for fiscal year 1983. This means that more than $1.3 billion would have to be provided for in fiscal year 1984 to prevent a 3-year replenishment, already stretched out to 4, from being further extended to 5 years.

This is not the time to hold back on U.S. contributions. The concessional assistance provided by IDA to the poorest countries contributes importantly their economic development and, by helping to keep their economies viable, contributes indirectly to sustaining the world economy. It is my hope that we will do much better by IDA in fiscal year 1984.

Mr. EAGLETON. Mr. President. I am voting against the continuing resolution as a way of protesting the slipshod, slapdash manner in which the Congress now handles the appropriations process.

There are 13 appropriation bills which the Congress is obliged to process each year. This year, we have sent on to the President only 7 of the 13: Agriculture, District of Columbia, Legislative, Interior, Transportation, HUD, and Military Construction. Therefore, the continuing resolution now before us contains the funding for the remaining 6 bills—State-Justice-Commerce, Defense, Energy, Foreign Operations, Labor/HHS, Treasury-Post Office. These six bills comprise 78 percent of all the money to be appropriated. In fact, Mr. President, it was 6 years ago—fiscal 1977—that we last passed all 13 appropriations bills and sent them in a timely way to the President before the new fiscal year started.

We have relegated the most important business that Congress is entrusted with—the expenditure of taxpayers' money—to marathon, round-the-clock sessions. The result is that none of these bills or amendments thereto receive the kind of attention they deserve.

Here is a brief statistical analysis of what we did and how we did it.

We spent a total of 41 hours and 44 minutes on the continuing resolution. In that time we considered for "individual" attention at total of 85 amendments, including committee amendments and floor amendments.

We had 34 rollcall votes on amendments.

For example, the longest debate was on the MX missile. We spent 2 hours and 48 minutes on the MX. In my judgment, this matter was important enough and controversial enough to merit 2 or 3 days of intelligent debate.

On foreign aid we spent 15 minutes.

On the Clinch River breeder reactor we spent 41 minutes.

On the jobs portion of the bill we spent 38 minutes. think of it, Mr. President, with 12,000,000 Americans out of work, we discussed and disposed of the major jobs component in the continuing resolution in half an hour.

On the major amendment dealing with our relationship with our NATO allies, we spent 13 minutes.

On the Rapid Deployment Force we spent 45 minutes.

On the nuclear aircraft carrier we spent 49 minutes.

On the major amendment dealing with our role in Central America we spent 48 minutes.

On home energy assistance to assist needy people in the payment of their skyrocketing fuel bills we spent 23 minutes.

Mr. President, this hectic, frantic, helter-skelter way of doing the Nation's business is unacceptable. To rush through, on a last-minute basis, the bill which funds 78 percent of appropriated moneys, makes a mockery of the Senate tradition as "The World's Greatest Deliberative Parliamentary Body." This year's continuing resolution stands as a monument to nondeliberation. For that reason, I will vote against the continuing resolution.

Mr. KENNEDY. Mr. President, I would like to engage the chairman of the State, Justice and Commerce Appropriations Subcommittee, Senator WEICKER, in a brief colloquy. I am sure that Senator WEICKER is aware of the meeting by the Board of Directors of the Legal Services Corporation on Thursday and Friday of last week. During that meeting, the Board adopted an amendment to the Corporation's regulations which would prohibit an organization that receives funds from the Corporation to respond to questions by elected officials on matters not relating to appropriations, authority, or oversight for legal services. However, I understand that the provision on this subject included in this conference report does not have such a prohibition.

Mr. WEICKER. That is correct, Senator.

Mr. KENNEDY. In fact, I understand that recipient organizations would be permitted to respond to formal inquiries submitted by any Member of this body on any areas within their expertise. That would, for example, include inquiries on legislation affecting the elderly or the handicapped or on the administration of the social security disability program. Is that correct, Senator WEICKER?

Mr. WEICKER. Yes, that is correct, Senator.

Mr. KENNEDY. But under the regulation adopted by the Board last Friday, we could not get such inquiries answered; could we?

Mr. WEICKER. That appears to be the case.

Mr. KENNEDY. It seems to me that the Board's regulation is not in accordance with the appropriate provision in the bill. I would suggest that the Corporation reconsider this regulation in light of the congressional action today.

Mr. WEICKER. I would concur in the Senator's suggestion, as currently proposed the regulation is contrary to the provisions of this act.

Mr. KENNEDY. I thank the Senator.

Mr. President, I am also pleased that the conferees on the continuing resolution have adopted a provision to assure that the Secretary of Energy will distribute to the States up to $200 million in petroleum overcharges collected by the Treasury as a result of violations of the Emergency Petroleum Allocation Act of 1973. These funds will be available for vital energy conservation and low-income energy assistance programs.

The conferees adopted a formula for distributing the funds which I strongly supported on the floor of the Senate. It assures that the funds will be distributed in proportion to a State's consumption of refined petroleum products during the period of overcharges. This approach is a reasonable exercise of remedial power to address the injuries to consumers as a result of the overcharges.

The conferees did not specifically address the disbursement of other funds collected as a result of overcharges. The proposal for distributing overcharge funds adopted by the Senate reflects the approach the DOE should be following under existing law, and in fact DOE has in part been proceeding in this fashion. It is the most appropriate method of providing restitution for the injuries suffered by the consumer. I hope that the action taken by the Senate and the conferees will provide a clear indication that the Department should proceed expeditiously to assure the appropriate distribution of all the overcharges previously or hereafter collected.

Mr. JEPSEN. Mr. President, I rise in opposition to this conference report. I do so for a number of reasons, including the fact that it spends too much money. But, even beyond that, I feel compelled to vote against this resolution simply because I do not know what is in the report: We received the 540-page report just 3 hours before we were required to vote on it.

Mr. President, I realize the conferees were under an extremely tight deadline. I further realize that the Government Printing Office has been swamped with work these past few days. But for the life of me, I cannot understand how we can ask any Member to vote either in favor of or in opposition to this resolution without having had an opportunity to read it.

As you know, some significant changes have been made since this document was passed by the Senate some 40 hours ago. Funding for some programs has been deleted and funding for other programs has been added. The news media has reported many of the major changes but, with few exceptions, most of us have been kept in the dark as to a number of significant alterations.

Again, I do not condemn the capable chairman of the Appropriations Committee nor any of the conferees. But I simply cannot bring myself to vote in favor of a report of this magnitude and importance which I have not had an opportunity to read. Therefore, I must regretfully vote no when the issue comes up.

Mr. GARN. Mr. President. Yesterday the conferees on House Joint Resolution 631, the continuing resolution for fiscal year 1983, met and resolved the differences between the two passed versions of the joint resolution. I believe that the conferees were able to reach a fair and equitable agreement that represents a wholehearted attempt to minimize Federal expenditures in fiscal year 1983.

I would now like the highlight the agreement of the conference on the HUD-independent agencies sections of the resolution.

HUD—ANNUAL CONTRIBUTIONS

The conferees agreed to provide $8,651,475,689 in new budget authority and $519,711,198 in contract authority, instead of $9,186,630,000 and $485,114,257 as proposed by the House and $5,732,355,689 and $313,477,865 as proposed by the Senate. This level of funding will provide 2,000 Indian housing units; 14,000 section 202 new and substantially rehabilitated units; 65,000 rent supplement and section 23/section 8 conversion units and 10,000 property disposition units. In addition, a total of 67,146 section 8 existing units and 15,000 section 8 moderate rehabilitation units are funded from an estimated $4,600,000,000 in recaptures in fiscal year 1983.

The most critical decision made by the conferees was not to include any moneys for new and substantial rehabilitation of low-rent public housing projects. This action was taken with the understanding that it is essential to "clean out" the existing public housing new construction pipeline of approximately $9,000,000,000. The conference committee believes that an effort must be made to at least begin to clear the pipeline before additional development authority can be provided. The conferees have indicated that budget authority for public housing new construction would be provided in fiscal year 1984 and future years if progress is made on clearing the pipeline.

HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

The conferees agreed to increase the housing for the elderly or handicapped fund loan limitation by $181,200,000 as well as language proposed by the Senate to assure that HUD provide loans at 9.25 percent for those section 202 pipeline units that go to closing during fiscal year 1983.

FEDERAL HOUSING ADMINISTRATION FUND

(LIMITATION ON GUARANTEED LOANS)

The conferees agreed to increase the Federal Housing Administration (FHA) fund limitation on guaranteed loans from $39,800,000,000 to $45,900,000,000. In addition, the conferees also agreed to the language proposed by the Senate to allow multifamily mortgages in highest cost areas to exceed the FHA limit by 140 percent.

GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

SPECIAL ASSISTANCE FUNCTION FUND

The conferees agreed to provide $500,000,000 in mortgage purchase authority for the Government National Mortgage Association's Special Assistance Functions Fund. Of the total amount provided, the conferees agreed that $250,000,000 shall be made available to the targeted, tandem program. These funds are to be distributed on the basis of the chronological firm commitment date. The remaining $250,000,000 shall be made available for partially assisted section 8 projects.

VETERANS ADMINISTRATION

The conferees agreed to the House language directing the VA to terminate the development of a centralized hospitalwide information system—computerized medical information support system—Comiss and implement a decentralized minicomputer system—MUMPS. However, the conferees do not intend that such specifications as those taken in this account will become common practice. However, the Appropriations Committees for years have been encouraging the VA to resolve the issue of the proper medical computer system. Therefore, the conferees believe that the VA should continue to develop plans to use the automated output of the decentralized systems in order to provide systemwide data to the administrator.

GNMA TANDEM

Mr. PERCY. I would like to ask the distinguished chairman of the HUD-Independent Agencies Subcommittee whether my understanding is correct that the $500 million in special assistance funds contained in House Joint Resolution 631 is intended to be used under the same terms and conditions

as the 1982 funds, except as modified by the committee's report. It is my further understanding that targeted tandem funds would be distributed on the basis of the chronological firm commitment date to those who participated unsuccessfully in the March 1982, distribution of funds.

Mr. GARN. The gentleman's understanding is correct.

ALLOCATION OF GINNIE MAE 20-PERCENT, SECTION-8 TANDEM FUNDS

Mr. HUDDLESTON. Mr. Chairman, I want to clarify the situation with regard to allocation of the $250 million provided for 20-percent section-8 projects under the Ginnie Mae tandem program.

The conference report on House Joint Resolution 631 is silent with regard to the allocation. Is it, consequently, the chairman's understanding that HUD is not precluded from using a lottery for this allocation?

Mr. GARN. That is correct. As the distinguished ranking member of the subcommittee knows the statement of the managers on House Joint Resolution 631 does not contain any direction as to the mechanism for distributing the $250 million for the so-called 20-percent projects. In the past, Ginnie Mae has allocated funds through a random lottery system. This seems to be an equitable means of distributing the available funds among the eligible applicants.

Mr. HUDDLESTON. I thank the distinguished chairman for this clarification.

INTERNATIONAL FUND FOR AGRICULTURAL DEVELOPMENT

Mr. HATFIELD. Mr. President, I am pleased that the conferees included $24 million for a U.S. payment to the International Fund for Agricultural Development. I have strongly supported IFAD since its creation 5 years ago. Heretofore, Congress had not provided a contribution to this institution because of a number of issues relating to OPEC contributions, staff size, and the nature of the institution as a fund as opposed to another multilateral development agency. It is my belief that most of these concerns have been met, though I note that the conferees are hoping for further progress on these issues before the remainder of the U.S. share of the current replenishment is appropriated.

However, even with this limited appropriation, the United States is now in a position to join other countries in depositing its instrument of contribution to IFAD's first replenishment.

I believe our action on this item should encourage both IFAD and its supporters as to the eventual full appropriation of the U.S. share of the current replenishment—I will be working hard toward that end. In the meantime, I want to thank the chairman and ranking member of the Foreign Operations Subcommittee for their willingness to reexamine their position with respect to funding of this situation by going along with the $24 million provided in the conference agreement.

THE WARNER AMENDMENT AS MODIFIED BY THE CONFERENCE COMMITTEE ON THE CONTINUING RESOLUTION

Mr. HATFIELD. Mr. President, contained within the conference passed continuing resolution is modified language to a Warner amendment which was adopted by the Senate on Friday. The intent of the amendment was to authorize the distribution of $200 million in DOE escrow funds to States for the purpose of supplemental energy assistance. I would like to clarify for the RECORD the intent of the new language which has been agreed to by the appropriations conferees and representatives of the two principle authorizing committees of the House and Senate. First Mr. President, I introduce for the RECORD the actual language of the agreement which I am about to describe.

That the House recede from its disagreement to the amendment of the Senate numbered —, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

Sec. —. (a) It is the purpose of this section to provide the Secretary of Energy the exclusive authority for the disbursement of the designated petroleum violation escrow funds for limited restitutional purposes (1) which are reasonably expected to benefit the class of persons injured by such violations, and (2) which, based on information previously provided to Congress by the Secretary of Energy, are likely not to be, through procedures established by regulation, otherwise refunded to injured persons because the purchasers of the refined petroleum products cannot be reasonably identified or paid on because the amount of each purchaser's overcharge is too small to be capable of reasonable determination.

(b) As soon as practicable, the Secretary of Energy shall disburse designated petroleum violation escrow funds to the Governors of the States in accordance with the formula set forth in subsection (d).

(c) Amounts disbursed to the Governor of any State shall be used by the Governor as if such funds were received under one or more energy conservation programs. The Governor shall identify to the Secretary within 1 year after the time of disbursement the energy conservation program or programs to which the funds are or will be applied. Funds disbursed under this section shall be used to supplement, and not supplant, funds otherwise available for such programs under Federal or State law.

(d) The disbursement by the Secretary of Energy to each State shall be based on the ratio, calculated by the Secretary, which—

(1) the volume of refined petroleum products consumed within that State during the period beginning September 1, 1973, and ending January 28, 1981, bears to

(2) the volume of refined petroleum products consumed within all States during such period. Calculations made by the Secretary of Energy under this subsection shall be based upon estimates by the Secretary from reasonably available information.

(e) For purposes of this section—

(1) The term "designated petroleum violation escrow funds" means amounts (not in excess of $200,000,000) which are derived from settlements from alleged petroleum pricing and allocation violations generally resulting in overcharges to purchasers of refined petroleum products and held in trust accounts administered by the Department of Energy on December 17, 1982, and which—

(A) are not likely to be required for satisfying claims of potential claimants identified in proceedings of the Office of Hearings and Appeals initiated prior to December 17, 1982, or identified in judicial proceedings initiated prior to such date; and

(B) the use of under this section would be consistent with the remedial order or consent order covering such funds.

(2) The term "energy conservation programs" means—

(A) the program under part A of the Energy Conservation and Existing Buildings Act of 1976 (42 U.S.C. 6861 and following);

(B) the programs under part D of title III of the Energy Policy and Conservation Act (relating to primary and supplemental State energy conservation programs; 42 U.S.C. 6321 and following);

(C) the program under part G of title III of the Energy Policy and Conservation Act (relating to energy conservation for schools and hospitals; 42 U.S.C. 6371 and following);

(D) programs under the National Energy Extension Service Act (42 U.S.C. 7001 and following); and

(E) the program under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 and following).

(3) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

(4) The term "Governor", when used with respect to any State, means the Governor or the chief executive officer of that State.

(5) The term "refined petroleum product" means gasoline, kerosene, distillates, (including Number 2 fuel oil), LPG (other than ethane), refined lubricating oils, diesel fuel, and residual fuel oil, but does not include refinery feedstocks.

(f) No funds disbursed under this section may be used for any administrative expenses of the Department of Energy or of any State, whether incurred in connection with any energy conservation program or otherwise.

Mr. President, the compromise agreement "tightens" three major portions of the Warner amendment as it came out of the Senate. First, in subsection (a) language has been added to clarify that distribution of these funds is for the purpose of providing limited but expeditious restitution to claimants who have been injured by petroleum pricing and allocation violations but who are not likely to be identified through existing regulatory procedures.

Also, section (A) adds new language which states that for the purposes of those funds described herein, the Secretary shall make such distribution under the terms and conditions of this section and not by any other body of law. The Warner amendment as originally drafted cited authority to distribute such funds under the Emer-

gency Petroleum Allocation Act of 1973.

A second perfecting change was made to the Warner amendment with regard to the use of funds by States. Subsection (c) of the compromise amendment, and the related definitions under subsection (e)(2), require that States choose from five federally authorized State and local energy programs and obligate such funds under the rules and regulations which govern those activities as though the funds had been received for those purposes. This provision allows the States some flexibility in directing funds to those program areas of greatest need in the State and at the same time provides fiscal accountability upon the use of money by the States. The Governor is rquired, within 1 year after receipt of such moneys, to notify the secretary of those programs to which the funds will be applied. Those activities include the DOE low-income weatherization program, the energy extension service program, schools and hospitals energy conservation State energy planning, and/or the HHS low-income fuel assistance program. The Warner amendment as originally proposed, would have allowed the States to utilize their portion of the escrow funds for any energy activity without limitations. Furthermore, Mr. President, subsection (f) of the new text prohibits the use of these funds for administrative expenses, but shall not be constrained to limit the use of funds for those direct services such as labor costs associated with low-income weatherization and retrofit activities.

And finally, Mr. President, the Warner amendment has been perfected with regard to the distribution of funds to States. Rather than basing the State-by-State allocation formula on the amount of price-controlled refined petroleum products consumed within the State, the language has been amended to base the formula upon consumption of all refined petroleum products as defined in the Emergency Petroleum Allocation Act of 1973, including residual fuel oil.

Mr. President, I want to thank Senator WARNER for sponsoring the amendment and applaud the 76 Senators indorsing its original adoption. Not only does this provision provide supplemental funding to important State and local energy programs but it helps provide expeditious distribution of a portion of these escrow settlement funds.

Mr. GRASSLEY. Mr. President, this continuing resolution is a budget buster. It is $4.8 billion over the conference agreement on the first budget resolution.

According to that conference agreement, the total deficit reduction should have been $77 billion. That would leave a $104 billion deficit in fiscal year 1983.

As part of that agreement, Mr. President, $18.8 billion in savings should have found its way into this continuing resolution. The savings would break down as follows: $7.8 billion in defense; $5.9 billion in nondefense discretionary spending; $5.1 billion in Federal pay.

Well, Mr. President, we have achieved less than 75 percent of those savings. The Senate Appropriations Committee reported out a resolution that was $5.4 billion over the 302(b) allocations for fiscal year 1983, according to the Senate Budget Committee. Of the $18.8 billion savings target, only $13.4 billion was actually achieved by the committee.

The conference report now before us cuts the exceeding amount from $5.4 billion to $4.8 billion. However, this new figure still represents a significant amount over the budget resolution. Therefore, Mr. President, I cannot cast my vote in favor of this continuing resolution.

Since the conference agreement last June, the budget deficit has grown considerably larger. Congress should be cutting spending further. Instead, we are increasing spending, over and above the targets approved by Congress. The fiscal year 1983 deficit will not be $104 billion, but more like $150 to $200 billion. That is the size of the entire Federal budget in 1967. If deficits continue to expand at such a rate, the national debt will double in just 6 years, reaching $2 trillion by 1986.

It seems to me, Mr. President, that the seriousness and magnitude of our budget and economic problems are being totally missed.

Economic recovery will be threatened if we do not get the budget under control. The budget reflects this fact. It is out of control. We are losing the war against worldwide depression. Yet you would never know there is a world crisis out there by the actions taken by Congress during this lameduck session.

This is a time when we should be seeking new and innovative ideas to correct the imbalances in our economy. Instead, Congress remains obsessed with old fashioned remedies such as raising taxes and spending money on dead-end jobs.

This is too timid an approach, Mr. President.

The economy is undergoing dramatic structural changes. Industries are changing. Employment is being restructured. Education is becoming more specialized and sophisticated. Money and banking are being deregulated. The economy is disinflating.

We are in obvious need of an overhaul of economic policy. We must fashion new policies that are appropriate and flexible enough to handle change.

Right now, our biggest need is production. Over 30 percent of the Nation's industrial capacity is idle. At the same time, recent action by the Federal Reserve has loosened up on credit, which will eventually increase the money supply. If the economy does not begin to produce significantly, then the money expansion will be inflationary.

Mr. President, the biggest danger we face is to not take swift enough action to generate production. And we are simply adding to the problem by voting to increase spending above the amount of the budget resolution passed by Congress. The more we spend and increase the budget deficit, the less the economy will produce.

The work of this lameduck session has just about concluded. It is my hope, Mr. President, that when the new Congress convenes in January, it will be fearless and forward looking as it attempts to unravel the muddled economic predicament we are in. There is much to be done to turn the economy around. I hope we can deliberate wisely over the coming 5-week period to contemplate the task ahead.

THE MX MISSILE

Mr. BAUCUS. Mr. President, I will vote to prohibit any funds from being spent for construction of the MX missile. I oppose the Dense Pack basing mode. I oppose deadlines that would force Congress to make a hasty decision on the MX next year.

The Dense Pack proposal is the latest in a series of mistakes in developing the MX missile.

The MX has been promoted as a weapon to close the so-called window of vulnerability, the threat to the land-based leg of our strategic triad. But Dense Pack would almost certainly be vulnerable to a Soviet first strike within 4 to 7 years of deployment, if not sooner.

The MX has been referred to as "Peacekeeper." But it would be viewed by the Soviets as a first strike weapon, and they would undoubtedly respond with yet another escalation of the nuclear arms race.

The MX has been called a weapon that would enhance American security. Yet because it may be vulnerable to a Soviet first strike, and because it could make the Soviets vulnerable to an American first strike, the MX could be a destabilizing force that could endanger American security by increasing the dangers of nuclear war.

Mr. President, let us put the MX in perspective.

The MX would be one of the most powerful and dangerous weapons ever built. But we do not know how it should be based. We do not know if the basing modes would work. We do not know if we will be asked eventually to build an antiballistic missile system to protect a vulnerable MX. We do not know the ultimate cost of the system. We do not know whether

the MX will ultimately destroy the SALT and ABM treaties.

How can we vote to build such a powerful weapon under these uncertain circumstances? Does anyone really believe that if we vote to spend a billion dollars to build these missiles that we know what we are getting outselves into?

This is not a logical or sound way to build a nuclear weapon. It would be a dangerous leap into the unknown. It would be a strange and eerie step. it would be yet another mistake in the sorry history of the MX.

Others have suggested that we appropriate the money, prohibit it from being spent until Congress has agreed next year, and do so with a fast-track formula that would force a rush to judgment next year.

The last thing we need is to rush to judgment. The last thing we need is another hasty and ill-considered proposal. I will oppose deadlines because the last thing we need is Congress voting to build a missile before we know the full implications.

DENSE PACK

I have received classified briefings on Dense Pack. I have weighed volumes of information. I have evaluated the arguments, pro and con. I have concluded that for a number of reasons, Dense Pack would be a grave mistake.

First, I have concluded that within 4 to 7 years of deployment, Dense Pack would be vulnerable to a Soviet first strike. There are a number of possible ways a Soviet attack could occur.

The Soviets could pin down Dense Pack by exploding nuclear warheads every minute or so, at an altitude of about 120 miles above the Dense Pack field. The MX missiles would be prevented from taking off because onboard computers and other guidance systems would probably be vulnerable to radiation, electromagnetic pulses, and other effects of the nuclear explosions. While the missiles would be pinned down, the Soviets could launch a staggered attack with high yield warheads on the Dense Pack silos.

The Soviets also could develop Earth-penetrating warheads, which would fall beneath the Earth, and explode simultaneously. This would destroy many of the missiles and cover most of the rest with debris, ruining their targeting.

Moreover, it could be possible for the Soviets to explode a number of very large warheads, very low over the Dense Pack field, within a split second.

The Soviets can be expected to have the capability to launch one of these attacks within 4 to 7 years from the time of deployment.

The second problem is that a destabilizing situation could be created by deployment of the Dense Pack MX system. If it is vulnerable to a Soviet first strike, the result would be a dangerous two-way window of vulnerability. Such a situation would move both sides closer toward a launch-on-warning policy by increasing the degree of fear, and the temptations, on both sides, to attack first.

The third problem is cost. The Dense Pack system itself should cost close to $30 billion. However, I strongly suspect that proponents will be back soon, asking for at least another $12 billion for an antiballistic missile system to protect Dense Pack. Or they may seek to modify the system or build more missiles, raising the cost further. We do not know where the road ends. We do not know where the cost stops.

Our economy faces disastrous conditions. Twelve million people are jobless. Federal deficits could reach $200 billion a year. We cannot afford to spend so much for a system that might not work, and might make matters worse.

The fourth problem is that the MX could be the undoing of the SALT and the ABM treaties. If it does not destroy the treaties, it could force renegotiation, or attenuated legal interpretations that could ultimately strip the treaties of meaning and effect.

Mr. President, I believe it would be a serious mistake for Congress to allow any, repeat any, construction of MX missiles until the questions have been answered and the problems have been solved.

National security and nuclear arms control are far too important for ill-considered proposals or hasty judgments. We have a responsibility to say no to Dense Pack, and no to MX construction.

Mr. DURENBERGER. Madam President, it is with great disappointment that I reviewed the language contained in the continuing resolution providing funds for the Professional Standard Review Organizations. As this Senator has indicated in the past, adequate funds for these organizations are absolutely critical to their survival but more importantly are essential for the provision of quality care under the medicare program.

There have been, in the past, many criticisms and comments on the abilities of PSRO's to function. There are those of us who have attempted to correct the problems with the program and there are those who simply sought to rid us of the entire system. This year the Congress decided quite clearly to seek changes in the PSRO program, the end result of which was the enactment, as part of TEFRA, of the new utilization and quality control peer review program.

Recognizing the time necessary to move from the old PSRO program to the new PRO program, we directed the Secretary to continue the existing system until such time as the new program is in place.

In fact there is clear statutory language prohibiting the Secretary from terminating a PSRO in operation on September 3, 1982, the date of enactment, until such time as the Secretary replaces the PSRO by entering into a contract with a review organization under the new provision. The language contained in the appropriations bill before us basically guts that provision. Specifically there is language added in conference which states that:

None of the funds appropriated under this paragraph shall be allotted or otherwise awarded to any PSRO which the Secretary of the Department of Health and Human Services has determined should be terminated from the Professional Standards Review Program because of its inability to effectively or efficiently discharge its responsibilities under the Social Security Act.

Madam President, I am particularly concerned with the language which addresses the inability of PSRO's to effectively and efficiently discharge their responsibilities. HCFA's evaluations of PSRO's that were performed in the first two quarters of 1982 do not provide a sound basis for determining the effectiveness of PSRO's. The U.S. General Accounting Office has reached this conclusion and the Finance Committee has agreed. As a result the Secretary has been instructed to disregard those evaluations. It is clear to this Senator that the administration has made an effort to rid us of PSRO's on something less than a sound basis. We would certainly expect this to change.

By prohibiting the Secretary from terminating any PSRO in operation on September 3, 1982, we did not mean to suggest that we expected to continue ineffective organizations long into the future—but we did mean to keep some system in place until the new program takes over.

Therefore, notwithstanding the language added in conference and the reduction from $25 million to $15 million in funds to manage the program, I would expect the Secretary to proceed very cautiously in making determinations as to the effectiveness of PSRO's. In those limited circumstances where the termination of a PSRO is warranted, we would certainly expect the Secretary to immediately contract with a new effective organization able to discharge those responsibilities outlined in the Social Security Act.

In closing, let me reiterate my commitment to effective quality control and utilization review. It is in all of our best interests to make this program work. Certainly we have provided the necessary legislative framework for such a system. The need for effective peer review will certainly grow as the changes made this year in hospital reimbursement are put into place.

Mr. EXON. Madam President, there are many reasons a vote should be cast

for and many reasons why a vote should be cast against this conference report.

On balance, it is the judgment of this Senator that I shall vote no for many reasons, of which I will cite only a few.

In the first place, I am not one who believes lameduck sessions of the Congress should be held except in the event of a true emergency. There is no emergency now that properly justifies, in my mind, why we are here in the first instance. Nothing we have considered here, absolutely nothing, comes under the legitimate qualification of an emergency. Everything could have and should have been handled in the regular session or delayed a month or so until the convening of the regular session of the new 98th Congress. It was initially suggested that we come back here for the stated purpose of reviewing the President's Special Commission on Social Security recommendations that was promised the first part of December. We have no report from the Commission and they are not even meeting, but we are.

There is clearly something wrong with our procedure, when we continually finance Government with continuing resolutions, thereby effectively eliminating the traditional and more thorough budgetary authorization appropriation processes. In this instance we have written essentially a full year's budget via a continuing resolution. We have become a slave of continuing resolutions because we lack the discipline and possibly the mechanism to do our work orderly and properly. I do not like to think of it, but we may also lack the will anymore to do things properly.

The good that might come from this lameduck session is that it might, I emphasize "just might," convince us that we require a radical change in the rules and procedures of the Senate. Certainly, we can agree that before any further thought is given to televising all of this, we must first get our house in better order. Otherwise, we will certainly run the risk of seeing this institution further deteriorate in the minds of the people.

This Senator tried unsuccessfully to rectify what I believe to be the improper manner in which the House of Representatives pay increase was handled and if there is anything we can agree upon, it should be that there is no emergency on raising congressional pay during the drastic economic times facing our constituents and our country.

Madam President, my no vote is essentially in protest against the process, the timing, and the reason we are here at all.

This is in no way critical of any individual, official, or political party. We are all in this together and possibly from all of this will come needed reform and a return to basic commonsense. We cannot reason together, even disagree agreeably, working under a hammer of time that tends to substitute expediency for thoughtful deliberations.

MATERNAL AND CHILD HEALTH BLOCK GRANT

Mr. DECONCINI. It is my understanding that the committee explanation includes language regarding the maternal and child health block grant authorizing funds to support, "projects of regional and national significance." This program has been of great value to Indian populations who form a group that is in great need of the kinds of services provided under the maternal and child health block grant. It is also my understanding that because of their special relationship to the Federal Government. Indian maternal and child health projects could be funded as projects of national significance and should be continued as funds become available.

Mr. SCHMITT. The Senator's understanding is correct.

Mr. THURMOND. Mr. President, I had initially intended to vote in favor of the conference report on the continuing resolution. However, a few minutes ago I learned of the damage that will be done to our national security by the provisions in this conference report. I feel that the conference report is so badly flawed in the national defense area that I cannot support it.

The decision of the conferees to strike MX production funding has the potential to completely undermine our ongoing START talks and it may well kill any prospect of modernizing our theater nuclear forces in NATO. The Congress has taken an action that could tie the hands of the President in conducting foreign policy. I cannot imagine how our allies can deal effectively with the U.S. Government when the Congress makes such far-reaching unfavorable decisions.

The decision not to fund Pershing II production is likewise an alarming decision. Aside from the disturbing fact that the Army has already properly obligated fiscal year 1983 funds for procurement of the Pershing missile under the terms of the previous continuing resolution and, I am advised, will incur $30 million in termination costs, I suspect that our allies will have to reexamine their decisions to deploy both Pershing II and the ground launched cruise missile.

I am also concerned that funding was not provided for several key programs to include:

National Guard and Reserve programs authorized at $200 million were funded at only $80 million,

Funds to begin the modernization of the battleship *Missouri* were denied,

Funds for the air-launched and the ground-launched cruise missiles were provided at levels well below the budget request.

I share along with Senator TOWER, chairman of Senate Armed Services Committee, that appropriations were provided for programs specifically reviewed and denied by the authorizing committee. I refer, of course, to the situation with regard to A-10 aircraft, the C-17 aircraft, and others. I hope the Senate will not ignore the rules and tradition of this body that establish the authority of the authorizing committees. If the Appropriations Committee ignores the work of the authorizing committees, our system of legislation will come unraveled.

Mr. MOYNIHAN. Mr. President, I rise simply to state my opposition to the conference report on House Joint Resolution 631, the continuing appropriations measure.

At this very moment, we have no Government. Were it not for the presumption on the part of the Executive that Congress will finally do its job, the Government of the United States would, by all rights, now be approaching the point of cold shutdown. This is lamentable not for the inconvenience it places upon Government, but because it forces serious issues of public policy to be settled with less contemplation than they deserve.

Mr. President, this is a deliberative body. We were meant by the Constitution so to be. When the processes of Government and legislation become as hopelessly confused as they have in the last few days, we as a Senate lose that distinction. And we lose it at the peril of the careful procedures that makes our democracy among the oldest on Earth.

I do not favor chaos in Government. Or furloughs. Or benefit checks that will be halted in midstream. And I do not mean to tempt those consequences by my vote against the continuing resolution.

But, Mr. President, I vote against this measure for the reason that it does not represent good Government. It does not represent the kind of deliberation that this body owes the Nation.

I vote against this legislation as well for it does not contain the measure that is arguably the best reason for us being in session just a few short days before Christmas: a program of employment for those who are jobless.

I offered my own thoughts on these matters in legislation I introduced last summer. And I pursued that legislation as we developed proposals for this post-election session. That, of all events, was one of the reasons for returning to Washington, so that we might turn our nearly undivided attention to the nearly 14 million Americans who are either out of work or who have given up looking. We are deep into a depression that has no par-

allel, save the thirties. And it was proper of Congress to resolve action.

That we have not accomplished this purpose in our closing hours here borders on being shameful. What we now salvage we salvage by resolving to make jobs for the unemployed our very first item of business in the 98th Congress.

Mr. President, I vote, then, in protest against a process that leaves us with no Government and with no measurable achievement on the question of employment. We must do better.

IMPACT AID AMENDMENT

Mr. BAUCUS. Mr. President, I would like to express my gratitude to the conferees for accepting my amendment on impact aid. Your actions have set right a problem that has been snowballing into great financial loss for Montana's schools.

Without this technical amendment, 5 schools, serving 1,300 students, would have had to close next year. This is in spite of the fact that they were entitled to an education under the impact aid program.

These students might have lost out because of a miscalculation of the Federal distribution formula. For several years, Montana had been incorrectly computing their local contribution rate. The result was that the State had been requesting less Federal impact aid money than it was entitled to.

When the office of public instruction in Montana discovered this mistake, and attempted to correct the problem by submitting new data, the Department of Education explained that the continuing resolution had locked them into the incorrect figures.

Further, the Department of Education felt that it was not able to help us resolve this problem administratively, insisting that only this kind of technical amendment would correct the error.

My amendment corrected this problem by allowing the Department of Education to use Montana's corrected calculations. It did not provide for an increase in overall appropriations.

This amendment was essential for the continued operation of Montana's heavily impacted schools, and we deeply appreciate the cooperation of Chairman HATFIELD and the ranking minority member, Senator PROXMIRE.

DEFENSE ISSUES IN THE CONTINUING RESOLUTION

Mr. LEAHY. Mr. President, although I am very pleased at the conference's action in deleting funding for the MX missile and Dense Pack, I must say I am disappointed at the outcome on several issues of importance to NATO. The failure of the conferees to sustain the Senate's positions, reached after considerable debate and work, on these issues is a blow to efforts to improve NATO's conventional forces and to reduce overreliance on nuclear weapons.

Fortunately, the conferees agreed to maintain American troop levels in Europe at current levels. However, this solid achievement is substantially offset by the action of the conferees in dropping the Senate's position on funding the transport of Prepositioned Divisional Equipment Sets 5 and 6 to Europe, and by rejecting the wartime host nation support agreement with the Federal Republic of Germany. Both these measures, as voted by the Senate, were decidedly in the security interests of the United States and the NATO Allies. Receding to the House's position of restricting the NATO waiver on imports of defense items containing non-U.S.-origin specialty steel is also harmful to U.S.-NATO defense cooperation and to the prospects for important American military equipment sales to key allies.

Mr. President, these issues are important enough that supporters of strengthening NATO's conventional force posture will want to return to them next year. I will support efforts to reverse these actions of the conference as soon as possible.

Mr. GRASSLEY. Mr. President, I intend to vote against the conference report to the continuing resolution, Senate Joint Resolution 631, in part because of a 15-percent pay raise which House Members have insisted on granting themselves and 33,000 senior Federal executives and civil servants. I find this action to be ill timed, as well as grossly insensitive to the plight of millions of unemployed and disadvantaged citizens suffering under our crippled economy. It is amazing to this Senator from Iowa that this self-serving pay hike comes as we prepare a stopgap funding measure for fiscal year 1983, fully aware that the Federal deficit will draw close to $200 billion by the end of the fiscal year.

Those of us on the Budget Committee, my colleagues on the Appropriations Committee, as well as many others in this body, have labored to control the growth of social and defense programs in an attempt to attain some degree of fiscal responsibility. We have watched Federal programs be cut. We have made many difficult spending decisions in numerous programs because of our inability to pay for them. In good faith we have tried to sell the urgent necessity of holding tight of the Federal purse strings. And yet, this $9,000 pay increase flies in the face of this basic budget policy.

Yes, Americans will grow weary of our moralizing about the need to control Federal spending, if we fail to show fiscal restraint for ourselves. We cannot expect sacrifice exclusively from the grassroots, while Members of Congress attempt to insulate themselves from the pain imposed on others.

We are confronted with highest unemployment rate the Nation has ever witnessed, with 12 million Americans out of work. I have watched industries close in my State, unemployment benefits exhausted, and brave workers take cuts in their paychecks rather than lose their jobs and face the unemployment lines. I doubt the American public will look favorably at a huge pay increase for those who have helped us spend our way into this economic dilemna.

However, with the threat of elections barely over, Members of the House have wasted no time in richly rewarding themselves. How can they justify this arrogance? I am aghast at the insensitivity of the Members of the House; however, I commend my colleagues in the Senate for holding firm in conference to keep our salaries capped.

Mr. HATFIELD. Madam President, I wish to express my appreciation to the Senator from New Mexico for his constant cooperation and consistent effort to support and undergird the whole appropriation-budget process, and I am very grateful for his remarks.

Madam President, if no other Senator wishes to debate—and I know of no other Senator who has indicated that desire—I move the adoption of the conference report. I yield back the time.

Mr. PROXMIRE. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "nay".

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 55, nays 41, as follows:

[Rollcall Vote No. 459 Leg.]

YEAS—55

Abdnor	Burdick	Dole
Andrews	Byrd, Robert C.	Domenici
Baker	Chafee	Durenberger
Bentsen	Chiles	Ford
Boschwitz	Cochran	Gorton
Brady	D'Amato	Hart
Bumpers	Danforth	Hatfield

Hawkins	Matsunaga	Roth
Hayakawa	Mattingly	Rudman
Hollings	McClure	Schmitt
Huddleston	Melcher	Simpson
Inouye	Murkowski	Stafford
Johnston	Nickles	Stennis
Kassebaum	Packwood	Stevens
Kasten	Percy	Tsongas
Laxalt	Pressler	Warner
Long	Proxmire	Weicker
Lugar	Quayle	
Mathias	Randolph	

NAYS—41

Armstrong	East	Mitchell
Baucus	Exon	Moynihan
Biden	Garn	Nunn
Boren	Glenn	Pell
Bradley	Grassley	Pryor
Byrd, Harry F., Jr.	Hatch	Riegle
Cannon	Heflin	Sarbanes
Cohen	Helms	Sasser
DeConcini	Humphrey	Specter
Denton	Jepsen	Symms
Dixon	Kennedy	Thurmond
Dodd	Leahy	Tower
Eagleton	Levin	Wallop
	Metzenbaum	Zorinsky

NOT VOTING—4

Cranston	Heinz
Goldwater	Jackson

So the conference report on the joint resolution (H.J. Res. 631) was passed.

Mr. HATFIELD. Madam President, I move to reconsider the vote by which the conference report was adopted.

Mr. STEVENS. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SURFACE TRANSPORTATION ACT OF 1982

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Madam President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. FORD. If the majority leader will yield, I might say we have enough people around the wall here to prevent the majority leader from being heard.

Mr. BAKER. Madam President, time is precious. If Senators will bear with me, I will try to be loud. I am not very big but I am loud.

Madam President, if I can be recognized for a moment, let me say there are two routine matters that have been cleared and I believe there is no objection.

We have about 20 minutes left before the vote will occur on the Baker substitute, according to the unanimous-consent agreement.

There are at least two matters that must be dealt with in the meantime; one by the Senator from Kansas (Mr. DOLE), and I believe another one by the Senator from Arkansas (Mr. BUMPERS). We may be pushed for time.

EXTENSION OF TIME FOR VOTE

Mr. BAKER. I ask unanimous consent, Madam President, that the time for the vote on the Baker substitute be extended from 6 p.m. until 6:30 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Is there objection?

Mr. BIDEN. Reserving the right to object. What is the rationale for that?

Mr. BAKER. The rationale is the Senator's caucus.

Mr. BIDEN. I thank the Chair.

The PRESIDING OFFICER. Is there objection? Without objection——

Mr. BUMPERS. Reserving the right to object, Madam President, as soon as we return, are we now on the gas tax bill?

Mr. BAKER. As soon as I get through these two items.

Mr. BUMPERS. Will the majority leader tell me, what is the pending business when we return to it?

Mr. BAKER. Madam President, will the Chair please state the pending question?

The PRESIDING OFFICER. The amendment of the Senator from Arkansas to the substitute offered by the majority leader.

Mr. BUMPERS. I have no objection.

Mr. BAKER. Madam President, there are two small actions. Has the request been acted on?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Two small matters have been cleared. One has to do with the expediting of the disposition of the continuing resolution for the consideration of the President.

ENROLLMENT OF HOUSE JOINT RESOLUTION 631

Mr. BAKER. Madam President, I call up House Concurrent Resolution 436, dealing with the enrollment of the continuing resolution and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 436) relating to the enrollment of H.J. Res. 631.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The concurrent resolution was considered and agreed to.

Mr. BAKER. I move to reconsider the vote.

Mr. PROXMIRE. I move to lay that motion on the table. The motion to lay on the table was agreed to.

The concurrent resolution is as follows:

H. CON. RES. 436

Resolved by the House of Representatives (the Senate concurring), That the requirement of 1 U.S.C. 107 that the enrollment of H.J. Res. 631 or any measure continuing appropriations be printed on parchment be waived for the duration of the Ninety-seventh Congress, and that the enrollment of H.J. Res. 631 or any measure continuing appropriations be in such form as may be certified by the Committee on House Administration to be a truly enrolled joint resolution.

FISHERY CONSERVATION AND MANAGEMENT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5002.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its disagreement to the amendments of the Senate to the bill (H.R. 5002) entitled "An Act to improve fishery conservation and management," and ask a further conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Biaggi, Mr. Anderson, Mr. Breaux, Mr. Studds, Mr. Snyder, Mr. McCloskey, and Mr. Pritchard be the managers of the conference on the part of the House.

Mr. BAKER. Madam President, I move that the Senate insist on its amendment and agree to the request of the Hosse for a conference, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. PACKWOOD, Mr. GORTON, Mr. HOLLINGS, Mr. STEVENS, and Mr. INOUYE conferees on the part of the Senate.

ORDER OF BUSINESS

Mr. BAKER. Madam President, the conference report is now on its way to the President. I expect the President will act on that, I hope tonight, I expect tonight. In any event, I expect him to act on it promptly.

May I say I have seen wire service reports that he might wait "a day or two." I have talked to the President. That is not the case. He did not say that. He expects to act on it promptly and I hope—I want everybody to know that I have personally talked to the President. I make that representation on my own authority, based on my own conversation, which was less than 30 minutes ago.

After we proceed from now to 6:30, there will be a vote on the Baker substitute. It is the intention of the leadership to continue with the consideration of the highway bill and to complete it, if possible, this evening.

Madam President, I yield the floor.

Mr. HELMS. Will the Senator yield?

Mr. BAKER. Yes.

Mr. HELMS. Madam President, there is some hope that we might get to the PIK farm bill. Can the leader give me some indication—if we can resolve the one remaining difference, would there be a window of opportunity for that?

Mr. BAKER. Madam President, the Senator from North Carolina has never been in a better position to ask that.

Mr. HELMS. I thank the Senator.

SURFACE TRANSPORTATION ACT OF 1982

AMENDMENT NO. 5190

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Madam President, I yield to the Senator from Texas, who wishes to speak on behalf of the amendment.

Mr. BENTSEN. Mr. President, I want to commend the Senator from Arkansas on his amendment. He is hitting an issue now—before it becomes a threat to the total Federal mass transit program. It is appropriate to deal with it now. This issue is similar to the problem that has plagued the highway program for 25 years, an issue that is only now being addressed in an amendment to the law that I offered in the Committee on Environment and Public Works. That is what the Senator from Arkansas is trying to do.

Mr. President, I come from a "donor" State in the highway program. I know the frustration that results in my State from watching their tax dollars go to Washington and not see a fair return. Ultimately, it leads to an effort to terminate the entire program. I do not want to see termination of a sound Federal mass transit program.

We would be unwise not to realize that people contributing to the new mass transit fund will expect a fair return on those funds.

When I first looked at the new tax for mass transit, I was particularly disappointed that it did not recognize the need for new rail projects in growing areas of the country. I questioned Secretary of Transportation Drew Lewis on this point. I was pleased that he agreed with me and that he convinced the administration to support new rail starts such as the one being planned in Houston. Prehaps the development of this project will assure Texas a fair return on the portion of the tax it pays to the transit fund. But, I am not—nor can I be—certain that it will. Some early estimates indicated that My State would receive only about 50 cents back for every dollar it sent to te mass transit fund. Many other States would not do as well.

I suggest to my colleagues—both those with significant mass transit and those without—that it is not sound public policy to start a new program with an inherent weakness that will surely serve to create discontent among the States. The lack of a fair return of funds to each State is surely such a flaw.

Mr. BENTSEN. Mr. President, I ask unanimous consent to be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Madam President, I compliment the Senator from Arkansas. I ask unanimous consent that I be made a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Madam President, I had an amendment drafted, though not exactly in the same way as the Senator from Arkansas. I compliment him. I think it is a big step in the right direction. This mass transit, this additional penny, this 20 percent of the money that will be going to mass transit is nothing but income transfer. What it will do for my State of Oklahoma is that $5 million will stay in the State but $15 million or a little over will be going to the rest of the States for mass transit. What we are going to be finding is that farmers and ranchers and factory people in the State of Oklahoma will be sending this $15 million to mass transit systems throughout the country. That is not a national purpose.

The national purpose exists for interstate highways, possibly for secondary roads, but not for mass transit. I have nothing against mass transit for New York, Chicago, Washington, and San Francisco.

I have heard this tax called repeatedly a user tax, but it is certainly not a user tax if you are requiring three-quarters of the dollars from a lot of States to go into other States. That is income transfer. It is not user fees. So I just hope that my colleagues will join me and my distinguished colleague from Arkansas and pass this amendment so we can actually have a user fee and not increase the amount of income transfer that is coming about by passage of this tax.

Mr. D'AMATO addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Madam President, I think there has been a great misconception with respect to where the moneys come from and where the moneys go as a result of this legislation. An interesting statistic. Forty-five percent of all receipts from the proposed tax would come from urban areas, but those areas could only receive approximately 35 percent of the funds. If there was ever an amendment that would gut any reasonable distribution of funds, recognizing the infrastructure needs that exist, it would be this amendment. This amendment would not be accepted by the House, and I do not think it should be accepted by this body. It will totally emasculate mass transit in this Nation.

Let me once again raise a point I brought up earlier. I am arguing equity here. For years, my State has been hurt by inequitable formulas in a host of Federal programs. I cannot stand idly by and watch this occur again.

New York State gets only 50 percent of its medicaid expenses reimbursed by the Federal Government. Arkansas gets over 72 percent of its medicaid funds reimbursed from the Federal Government.

Under this amendment, I estimate that my State would lose $200 million; New Jersey would lose $30 million, Florida tens of millions of dollars, and so on.

This amendment destroys the concept of the creation of a fund which is dedicated to the rehabilitation of this Nation's infrastructure.

Mr. GRASSLEY. Madam President, I rise in strong support of the amendment offered by the Senator from Arkansas. I never have liked the idea of highway users being forced into subsidizing mass transit riders. A far more equitable solution would be to require transit users to pay their own way.

This is why I supported an amendment offered by my good friend, the Senator from Idaho, during Senate Finance Committee deliberations. This amendment would have barred the use of any of this increased highway tax for mass transit. Unfortunately, the amendment failed to pass. It was argued that this 1 cent mass transit give-away, as unfair as it might be, was necessary if we were to have a bill at all. In view of the deteriorating bridges and highways throughout my State and the country, there did not seem to be much choice. The revenues generated by the user tax, apportioned under the Senate formula that focuses upon needs, use, and to some degree, population, are essential to the continued viability of our highway system.

The more that I study this highway and tax proposal, the more concerned that I get about the prospects of protecting the interests of the rural States. In view of the House bill and the Senate bill, I am not certain that the Senate highway formula will be preserved. If it is not retained, I should not support this legislation.

The reason that I would not be able to support this legislation if the Senate highway formula was traded with the House formula because under the House highway formula, the same States that make out like bandits with this 1 cent give away, will also take an unfair portion from the highway fund. The reason for this is that the House formula is based upon populations, with little regard for actual highway needs. To dispell any notion that only people are transported on our highway system, I might point out that farm commodities, manufactured goods, and other items are moved over our highways, and this causes tremendous wear.

I do not have all the figures, but it is my understanding that under the House formula, Iowa would lose $7 million per year. Alaska would lose $68 million. Idaho would lose $8 million, Wyoming would lose $12.3 million, Montana would lose $17.6 million, Texas would lose $10.1 million, North

Dakota would lose $10.9 million, South Dakota would also lose about $11 million, Colorado would lose $8.7 million.

Now, some may argue that the issue of transit and that of highway formulas are unrelated. Well that simply is not the case. It is related because the representatives of the metropolitan areas said that we could not have a highway bill without first giving money for transit.

If I could have assurances that the Senate highway formulas could be preserved in conference, I might not be so inclined to vote for the pending amendment. But I do not know how anyone here in the Senate can guarantee that.

We can guarantee it if we pass this amendment. We will be able to go to conference in a better bargaining position. And if the House will not give us our fair highway formula, then we need not worry about their transit concerns, because frankly, this whole bill is going to otherwise go down in flames.

This amendment is protection for us representing rural States. I urge my colleagues to support it.

Mr. GARN. Madam President, I yield the floor if the Senator from Arkansas has any other comments.

Mr. BUMPERS. Madam President, I will just take 1 minute. I want to make these points to my colleagues. This is a simple amendment. Under the bill, your State is only assured of getting one-half of the penny that is allocated for mass transit. My amendment raises that to 85 percent, which applies to the other 4 cents. Otherwise, you are asking a poor State like mine, the second poorest State in the Nation, that uses more gasoline per capita than any State in the Nation, to vote for a 5-cent tax, 1 cent of which comes to Washington that we never see again. My State has more unpaved roads probably—I am not sure of this, but I bet we have as many unpaved, unimproved roads in my State as any State in the Nation per capita. We cannot afford it. We cannot afford to subsidize the other States of this country under the formula provided for in this bill.

So I urgently plead with my colleagues to support this slight increase for States like mine which desperately need it. I yield the floor and I am prepared to vote.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Madam President, I rise in opposition to this amendment. I will not take the time of the Senate at this late hour to discuss the merits or demerits of the particular issue but only to tell Senators there has been no mass transit authorization for 2 years. It has been a very difficult process to finally arrive at one, and even at this moment we have been in preconference discussions with the House on what we are able to achieve. I must oppose this amendment. If it were adopted, if the Senate chooses to adopt this amendment tonight, forget mass transit. There is no way on Earth that I could convince the House of Representatives with this amendment. They were having a hard enough time taking an amendment from the other night, if they will, by the Senator from New Hampsire that is far less reaching than this particular one, though I hesitate in a way to make that kind of an argument on what the House will or will not do. But that is a factual situation, having been in those meetings all day long. I do not want to cut off anyone, but if there is no further debate or anyone wishing to speak, I would move to table the amendment.

Mr. BUMPERS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Madam President, if it is agreeable to the Senator from Utah and the Senator from Vermont and the Senator from Kansas and the other managers of the bill, I would propose that the vote on the tabling motion be postponed until 6:30 p.m. this evening. I ask unanimous consent to that effect.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Madam President, just a minute; 6:15 p.m. instead of 6:30 p.m.

The PRESIDING OFFICER. Is there objection to the 6:15 p.m. time? The Chair hears none, and it is so ordered.

Mr. BAKER. I thank the Chair.

Mr. DOLE. Madam President, I suggest the absence of a quorum for a brief moment.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. RIEGLE. Madam President, I ask unanimous consent to set aside the quorum call so I might call up the amendment of Senator CRANSTON.

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk resumed the call of the roll.

Mr. DOLE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Madam President, may we have order?

The MAJORITY LEADER. The Senate will be in order. Those in the gallery will please be quiet also.

Mr. DOLE. Madam President, let me first suggest what I propose to do so everyone will be informed. It is not controversial but I want to explain to all Members.

While we have been debating the continuing resolution and in the past 24 hours we have tried to find some, only the noncontroversial amendments, and I must say ahead of time even if those are adopted there is no assurance they will be retained by the House if and when we get to conference. What we have done is to package together seven noncontroversial amendments that we have cleared all the way around. There are an equal number of Democrats and Republicans interested in the amendments.

One is an amendment by the distinguished Senator from Delaware, Senator ROTH. Another is an amendment by the distinguished Senator from Indiana, Senator QUAYLE. Another is a technical amendment to an amendment offered earlier by the distinguished Senator from West Virginia, Senator ROBERT BYRD. Another one is known as a California public utilities amendment, which has been further modified to decrease the loss of revenues to the Treasury, which is of interest primarily to the distinguished retiring Senator from California, Senator HAYAKAWA, and the Senator from California, Senator CRANSTON.

We have a technical amendment of the Senator from New Mexico, Senator DOMENICI.

And then we have an amendment that deals with safe harbor leasing and affects only Eastern Airlines that has passed this body on two other occasions, and there are others that I assume are noncontroversial to those who have the amendments but they appear to spark some controversy to those who have at this time the right to object and frankly stop any amendment that we might want to consider.

Mr. METZENBAUM. Madam President, will the Senator from Kansas yield?

Mr. DOLE. I yield.

Mr. METZENBAUM. The Senator from Kansas mentioned an amendment of the Senator from Indiana (Mr. QUAYLE). Would he be good enough to tell us what that is?

Mr. DOLE. I yield to the Senator from Indiana to explain that. It is a technical amendment. It is a nontax amendment.

Mr. NICKLES. Madam President, if the Senator will give me just a few minutes I will have an answer for him.

Mr. METZENBAUM. Madam President, will the Senator from Kansas be good enough to yield?

Mr. DOLE. I yield.

Mr. METZENBAUM. He and I have had a number of conversations throughout the day, yesterday, and the day before. It is my understanding

that with respect to the California amendment it is as we have discussed and that with respect to each of the other amendments they are as discussed. The foundation amendments are not included.

Mr. DOLE. I can assure the Senator from Ohio that is an accurate statement. The California amendment is the narrowed version we discussed earlier today, and there are no foundation amendments in this package, and I make the record clear. It is not that the Senator from Ohio opposes certain foundation amendments but the list grew from three to about nine, as I understand it.

Mr. METZENBAUM. The Senator from Kansas is right. It continued to grow as the hours passed.

Mr. DOLE. We have no quarrel with the amendment of the Senator from Colorado, no quarrel with the amendment of the Senator from Texas, and no quarrel with the amendment of the Senator from Illinois. Beyond that there were six additions.

Mr. METZENBAUM. The Senator from Kansas is correct. I thought we had gone too far.

Will the Senator from Kansas be good enough to yield for one other question?

Mr. DOLE. I yield.

Mr. METZENBAUM. I had asked about closing the tax loophole, and I shall not be long, that business concerning the subchapter S and deferring the fiscal year. Has that matter been attended to in this measure or another measure?

Mr. DOLE. That purported loophole in subchapter S corporations as passed earlier this year has been agreed to by the House of Representatives and Senate and that loophole closing is part of the technical corrections which are now in the final stages of conference, and it will be agreed to hopefully later this evening by both the House of Representatives and the Senate.

Mr. METZENBAUM. So it need not be added as an amendment to this bill and that loophole or that error, or whatever, will be taken care of?

Mr. DOLE. That is correct.

I am more confident we will finish technical questions, although I have great confidence that we will finish this, but we are a little further along on the technical corrections.

Mr. METZENBAUM. I thank the Senator from Kansas for his total cooperation.

UP AMENDMENT NO. 1582

(Purpose: Making technical corrections and other miscellaneous amendments)

Mr. DOLE. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 1582.

Mr. DOLE. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31 of the matter proposed to be inserted, strike lines 8 through 10 and the matter between lines 10 and 11, and insert in lieu thereof "(3) Tread rubber, 6 cents per pound.

On page 41, strike line 21 and all that follows through line 3 on page 42 and redesignate the subsequent subsections accordingly.

On page 31 of the matter proposed to be inserted, in the table following line 6, strike "9.75" and insert "10", and strike "$4.875" and insert "$5.00", and strike "$12.375" and insert "$12.50".

Section 244 of the matter proposed to be inserted is amended—

(a) in subsection (a) by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1984";

(b) in subsection (c)—

(1) by striking out "fiscal year 1983 under section 104(b) of this Act" in paragraph (1) and inserting in lieu thereof "the year in which certification is made pursuant to subsection (b)"; and

(2) by striking out "fiscal year 1982" in paragraph (2) and inserting in lieu thereof "the preceding fiscal year"; and

(c) in subsection (d) by striking out "September 30, 1984" and inserting in lieu thereof "September 30, 1985".

At the end of title I of the matter proposed to be inserted, insert the following:

SEC. . DEDUCTION FOR ELIMINATING ARCHITECTURAL AND TRANSPORTATION BARRIERS TO THE HANDICAPPED AND ELDERLY.—Subsection (c) of section 2122 of the Tax Reform Act of 1976 (relating to the effective date for allowance of the deduction barriers to the handicapped and elderly) is amended by striking out "January 1, 1983" and inserting in lieu thereof "January 1, 1984".

SEC. . AFFIRMATIVE COMMITMENT RULE.

Clause (iii) of section 46(a)(2)(C) (relating to longer period for certain long-term projects) is amended by inserting "or (VII)" after "subclause (I)".

Sec. . TAX TREATMENT OF PUBLIC UTILITY PROPERTY.

(a) NORMALIZATION METHOD FOR PURPOSES OF DEPRECIATION.—(1)

In general.—Paragraph (3) of section 168(e) of the Internal Revenue Code of 1954 (relating to special rule for certain public utility property) is amended by redesignating subparagraph (C) as subparagraph (D) and by inserting after subparagraph (B) the following new subparagraph:

"(C) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC.—

"(i) IN GENERAL.—One way in which the requirements of subparagraph (B) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of subparagraph (B).

"(ii) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of clause (i) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under subparagraph (B)(ii) unlelss such estimate or projection is also used, for ratemaking purposes, with respect to the other 2 such items and with respect to the rate base.

"(iii) REGULATORY AUTHORITY.—The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in clause (ii)) which are to be treated as inconsistent for purposes of clause (i).".

(2) AMENDMENT TO SECTION 167(l).—Subparagraph (G) of section 167(l)(3) of such Code (defining normalization method of accounting) is amended by adding at the end thereof the following new sentence: "For purpooses of this subparagraph, rules similar to the rules of section 16(e)(C) shall apply.".

(b) COMPUTATIONS FOR PURPOSES OF INVESTMENT CREDIT.—Subsection (f) of section 46 of such Code (relating to limitation in case of certain regulated companies) is amended by adding at the end thereof the following new paragraph:

"(10) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC., FOR PURPOSES OF PARAGRAPHS (1) AND (2).—

"(A) IN GENERAL.—One way in which the requirements of paragraph (1) or (2) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of paragraph (1) or paragraph (2), as the case may be.

"(B) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS. The procedures and adjustments which are to be treated as inconsistent for purposes of subparagraph (A) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's qualified investment for purposes of the credit allowable by section 38 unless such estimate or projection is consistent with the estimates and projections of property which are used, for ratemaking purposes, with respect to the taxpayer's depreciation expense and rate base.

"(C) REGULATORY AUTHORITY.—The Secretary may be regulations prescribe procedures and adjustments (in addition to those specified in subparagraph (B)) which are to be treated as inconsistent for purposes of subparagraph (A).".

(c) EFFECTIVE DATES.—

(1) GENERAL RULE.—The amendments made by subsection (a) and (b) shall apply to taxable years beginning after December 31, 1979.

(2) SPECIAL RULE FOR PERIODS BEGINNING BEFORE MARCH 1, 1980.—

(A) IN GENERAL.—Subject to the provisions of paragraphs (3) and (4), of notwithstanding the provisions of sections 167(l) and 46(f) of the Internal Revenue Code of 1954 and of any regulations prescribed by the Secretary of the Treasury (or his delegate) under such sections, the use for ratemaking purposes or for reflecting operating results in the taxpayer's regulated books of account, for any period before March 1, 1980, of—

(i) any estimates or projections relating to the amounts of the taxpayer's tax expense, depreciation expense, deferred tax reserve, credit allowable under section 38 of such Code, or rate base, or

(ii) any adjustments to the taxpayer's rate of return.

shall not be treated as inconsistent with the requirements of subparagraph (G) of such section 167(l)(3) nor inconsistent with the

requirements of paragraph (1) or (2) of such section 46(f), where such estimates or projections, or such rate of return adjustments, were included in a qualified order.

(B) QUALIFIED ORDER DEFINED.—For purposes of this subsection, the term "qualified order" means an order—

(i) by a public utility commission which was entered before March 13, 1980,

(ii) which used the estimates, projections, or rate of return adjustments referred to in subparagraph (A) to determine the amount of the rates to be collected by the taxpayer or the amount of a refund with respect to rates previously collected, and

(iii) which ordered such rates to be collected or refunds to be made (whether or not such order actually was implemented or enforced).

(3) LIMITATIONS ON APPLICATION OF PARAGRAPH (2).—

(A) PARAGRAPH NOT TO APPLY TO AMOUNTS ACTUALLY FLOWED THROUGH.—Paragraph (2) shall not apply to the amount of any—

(i) rate reduction, or

(ii) refund,

which was actually made pursuant to a qualified order.

(B) TAXPAYER MUST ENTER INTO CLOSING AGREEMENT BEFORE PARAGRAPH (2) APPLIES.—Paragraph (2) shall not apply to any taxpayer unless, before the later of—

(i) July 1, 1983, or

(ii) 6 months after the refunds or rate reductions are actually made pursuant to a qualified order.

the taxpayer enters into a closing agreement (within the meaning of section 7121 of the Internal Revenue Code of 1954) which provides for the payment by the taxpayer of the amount to which paragraph (2) does not apply by reason of subparagraph (A).

(4) SPECIAL RULES RELATING TO PAYMENT OF REFUNDS OR INTEREST BY THE UNITED STATES OR THE TAXPAYER.—

(A) REFUND DEFINED.—For purposes of this subsection, the term "refund" shall include any credit allowed by the taxpayer under a qualified order but shall not include interest payable with respect to any refund under such order.

(B) NO INTEREST PAYABLE BY UITED SATES.—No interest shall be payable under section 6611 of the Internal Revenue Code of 1954 on any overpayment of tax which is attributable to the application of paragraph (2).

(C) PAYMENTS MAY BE MADE IN TWO EQUAL INSTALLMENTS.—

(i) IN GENERAL.—The taxpayer may make any payment required by reason of paragraph (3) in two equal installments, the first installment being due on the last date on which a taxpayer may enter into a closing agreement under paragraph (3)(B), and the second payment being due one year after the last date for the first payment.

(ii) INTEREST PAYMENTS.—For purposes of section 6601 of such code, the last date prescribed for payment with respect to any payment required by reason of paragraph (3) shall be the last date on which such payment is due under clause (i).

(5) NO INFERENCE.—The application of subparagraph (G) of section 167(1)(3) of the Internal Revenue Code of 1954, and the application of paragraphs (1) and (2) of section 46(f) of such Code, to taxable years beginning before January 1, 1980, shall be determined without any inference drawn from the amendments made by subsections (a) and (b) of this section or from the rules contained in paragraphs (2), (3), and (4). Nothing in the preceding sentence shall be construed to limit the relief provided by paragraphs (2), (3), and (4).

At an appropriate place add:

(J) AFFIRMATIVE COMMITMENT RULE FOR SYNTHETIC FUEL.—Clause (iii) of section 46(a)(2)(C) of the Internal Revenue Code of 1954 (relating to longer period for certain long-term projects) is amended by adding at the end thereof the following new sentence: "In the case of property described in clauses (iii) or (v) of section 48(1)(3)(A), property described in clauses (vi) or (vii) of section 48(1)(3)(A) which is related to such clause (iii) or clause (v) property, or property described in clause (v) of section 48(1)(2)(A), this clause shall be applied by substituting 'January 1, 1985' for 'January 1, 1983.'"

At the end of title I, insert the following:

SEC. . LEASING OF CERTAIN AIRCRAFT. Subsection (d) of section 208 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by adding at the end of subparagraph (D) of paragraph (3) the following new sentence "For purposes of sections 47 and 168(f)(8) of the Internal Revenue Code of 1954, if any property described in this subparagraph—

"(I) is sold (or assigned) pursuant to a title 11 or similar case (within the meaning of section 368(a)(3)(A)), or is transferred subsequent to such sale or assignment, and

"(II) is used outside the United States,

such property shall, with respect to the lessor under any agreement with respect to such property under section 168(f)(8), be treated as property described in section 48(a)(2)(B)(i), except that none of the benefits provided in this subparagraph shall inure to a foreign air carrier; however, it shall not be considered a benefit for a foreign air carrier to purchase airplanes sold in circumstances described in subclause (I)."

Mr. DOLE. Madam President, I suggest the absence of a quorum.

Mr. STEVENS. Madam President, if the Senator will withhold, will the Senator yield for a parliamentary inquiry?

Mr. DOLE. I yield.

Mr. EAST. Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. EAST. Madam President, was the Senator from Kansas asking for a unanimous-consent agreement that the amendment be in order?

The PRESIDING OFFICER. It will take unanimous consent.

Mr. EAST. Has he propounded that request?

Mr. DOLE. No, I have not propounded that request yet.

Mr. EAST. Pardon?

Mr. DOLE. I have not propounded that request yet.

Mr. EAST. I cannot hear what the Senator is saying. What was the reply? Has the request been submitted?

Mr. DOLE. The amendment has been submitted and I am about to propound that request.

I suggest the absence of a quorum for 1 minute.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAST. I am sorry I did not hear the Senator.

Mr. DOLE. I am now going to ask unanimous consent that the amendments be in order.

Mr. EAST. I have an objection.

The PRESIDING OFFICER. Objection is heard.

VOTE ON MOTION TO TABLE BUMPERS AMENDMENT

The PRESIDING OFFICER. The hour of 6:15 having arrived, the Senate will now proceed to vote on the motion to table the Bumpers amendment. The question is on agreeing to the motion to lay the amendment of the Senator from Arkansas on the table. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Washington (Mr. JACKSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER. Are there any Senators in the Chamber who wish to vote who have not voted?

The result was announced—yeas 52, nays 44, as follows:

[Rollcall Vote No. 460 Leg.]

YEAS—52

Baker	Glenn	Murkowski
Biden	Gorton	Nunn
Boschwitz	Hart	Pell
Bradley	Hatch	Percy
Brady	Hawkins	Quayle
Byrd, Harry F., Jr.	Hayakawa	Riegle
Chafee	Heflin	Roth
Chiles	Hollings	Rudman
D'Amato	Humphrey	Sarbanes
Danforth	Johnston	Schmitt
Dixon	Kassebaum	Specter
Dodd	Kennedy	Stafford
Dole	Levin	Stennis
Domenici	Lugar	Stevens
Durenberger	Mathias	Tsongas
Eagleton	Mattingly	Warner
Garn	Metzenbaum	Weicker
	Moynihan	

NAYS—44

Abdnor	Exon	Mitchell
Andrews	Ford	Nickles
Armstrong	Grassley	Packwood
Baucus	Hatfield	Pressler
Bentsen	Helms	Proxmire
Boren	Huddleston	Pryor
Bumpers	Inouye	Randolph
Burdick	Jepsen	Sasser
Byrd, Robert C.	Kasten	Simpson
Cannon	Laxalt	Symms
Cochran	Leahy	Thurmond
Cohen	Long	Tower
DeConcini	Matsunaga	Wallop
Denton	McClure	Zorinsky
East	Melcher	

NOT VOTING—4

Cranston	Heinz
Goldwater	Jackson

So the motion to lay on the table Mr. BUMPERS' amendment (No. 5190) was agreed to.

Mr. MOYNIHAN. I move to reconsider the vote by which the motion was passed.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. DECONCINI. A parliamentary inquiry, Madam President.

Mr. DOLE. Madam President, may we have order?

Mr. DECONCINI. Will the Senator from Kansas yield for a parliamentary inquiry?

Mr. DOLE. Let us first get order.

The PRESIDING OFFICER. Let us have order so we may hear the parliamentary inquiry.

Mr. DECONCINI. A parliamentary inquiry, Madam President.

Will the Chair please advise the Senator on how long a period of time that rollcall vote took?

The PRESIDING OFFICER. Twenty-five minutes.

Mr. DECONCINI. I thank the Chair.

Mr. DOLE. I might suggest there was a lot of tallying going on there and it took longer than usual.

Madam President, I ask unanimous consent that the amendments at the desk be in order.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Madam President, reserving the right to object, what was the request?

Mr. DOLE. The request was renewing my request that the amendments be in order, the same amendments we have discussed.

Mr. EAST. I would be willing to accept that after the adoption of the Baker substitute. I would be willing to give unanimous consent to their consideration at that time.

Mr. DOLE. A parliamentary inquiry, Madam President. They would not be in order after the Baker substitute is adopted?

Mr. EAST. It would be by unanimous consent.

The PRESIDING OFFICER. The Senator from North Carolina is right. It would take unanimous consent.

Mr. PERCY. Madam President, reserving the right to object.

Mr. DOLE. A parliamentary inquiry. They would be in order, of course, by unanimous consent?

The PRESIDING OFFICER. They would be.

Mr. ROBERT C. BYRD. Madam President, a parliamentary inquiry.

Are not those amendments at the desk which qualify under the cloture rule—is it not in order to bring them up now without debate and have a vote on them?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Madam President, it is my understanding that the Senator from North Carolina is willing to give me that consent if the vote comes after the vote on the Baker substitute.

Mr. EAST. After adoption of the Baker substitute, I would be willing to given unanimous consent to the consideration of the amendments, yes.

Mr. DOLE. We could vote on the amendments following the vote on the Baker substitute. There would not be debate.

Mr. EAST. They would be debatable if we got some reasonable timeframe for debate. I would not want to consider them until after the adoption of the Baker substitute. I would be willing to enter into a unanimous-consent agreement to consider the matter at that time if we could work out some kind of reasonable time frame in terms of debate upon them.

Mr. DOLE. I think the Senator is concerned that they might be amendments that would enhance passage of the Baker substitute. I assure the Senator from North Carolina that they are not for that purpose. One is an architectural barrier to build ramps to provide access for people who are handicapped. Another is by the distinguished Senator from Delaware, who has been trying to get recognition for several days.

Another is a technical amendment by Senator ROBERT C. BYRD.

Mr. ROBERT C. BYRD. On behalf of myself and Senator LONG.

Mr. DOLE. Another is a technical correction by the Senator from New Mexico, which corrects a technical amendment. Another is safe harbor leasing, which affects Eastern Airlines. I suggest if we can work it out that way so the Senator would be assured it does not have any impact on the vote—a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. Can we agree to act on the amendments after the vote on the Baker substitute?

The PRESIDING OFFICER. It could be arranged by unanimous consent.

Mr. DOLE. I would ask unanimous consent.

Mr. PERCY. Madam President, a parliamentary inquiry.

Mr. BAKER. Will the Senator yield to me for just a moment?

Mr. DOLE. Yes.

Mr. BAKER. I do not like to be unaccommodating, but we simply cannot arrange for time for debate and consideration of amendments after the Baker substitute is adopted. If we do that, I am afraid the horse is out of the barn and there is no telling how long that will go on.

Mr. ROBERT C. BYRD. That would be most unusual.

Mr. BAKER. It is most unusual.

I hope the Senator from North Carolina will reconsider this. I am perfectly willing to have the vote after the Baker substitute. But the consideration of the amendments, it seems to me, must surely come before the adoption of the substitute.

If the Senator wants to have a brief time for debate on those amendments, I am willing to try to arrange that, but I think we need to dispose of that before we go on with the vote on the substitute.

As I understand it, there is a package of amendments. There is an equal number of Republican and Democratic amendments, and we thought they had been cleared all around.

I hope the Senator from North Carolina will reconsider his objection and permit the distinguished Senator from Kansas to go forward with this on behalf of both Republicans and Democrats. We are trying to finish what seem to be important and necessary matters before we get to the substitute and start down what I hope is the final road on the consideration of the highway bill.

Mr. PERCY. Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. PERCY. Would it be permissible for the Senator from Illinois to ask unanimous consent that the MacArthur amendment be added to the package? So far as the Senator from Illinois is concerned, it has been cleared on both sides, supported by the Treasury, supported by the manager of the bill and is noncontroversial. It has now been reviewed by the distinguished Senator from North Carolina. I only ask him to respond whether or not he would accept it.

Mr. EAST. I am sorry, I did not hear.

Mr. PERCY. A tremendous hardship would be done if it is not enacted promptly, and this bill seems to be the only vehicle.

Mr. METZENBAUM. Madam President.

Mr. DOLE. Madam President.

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mr. DOLE. Let me comment to the Senator from Illinois, I know this is another amendment that was agreed to several days ago. I am not sure this package is going to remain wrapped, and I do not want to unwrap it to stick in another item. It seems to me there are several amendments, and a Senator has a right to submit an amendment without debate on the floor. I know there are other Senators who have amendments that are foundation amendments. I understand there are nine. They are not objectionable to this Senator, but the Senator from Ohio has indicated he will object.

Mr. PERCY. My inquiry is if it is possible for me to ask unanimous consent that it be included in the package.

I think enough people know about it and know the consequences in every single State.

The John D. and Catherine T. MacArthur Foundation is an Illinois not-for-profit corporation created for charitable and public service purposes. It is committed to stimulating innovative activities that will contribute to the common health and welfare. It supports a carefully defined range of programs within which it can act as a catalyst to produce desirable change.

The foundation was fully activated in 1978 and is one of the newest foundations in the United States. Most of you will have heard of the MacArthur Foundation in the context of its prize fellows program, which honors a small number of exceptionally talented individuals who by their previous achievements have given evidence of originality, dedication to creative pursuits and capacity for self-direction. The award is given to these individuals over 5 years so that they may have the time and freedom to devote themselves to their own creative endeavors.

What makes these prize fellow awards so noteworthy is that they are made to recipients who have no knowledge that they are under consideration for such an award. Individuals do not apply for the prize fellows program awards; rather, the program relies on a substantial number of designated nominators or talent scouts. Direct applications and self-nominations are not accepted. Nominees are in turn considered by a selection committee which makes its recommendations to the board of directors of the foundation.

The MacArthur Foundation has a number of other important programs, too, including programs to spur research in mental health; help increase the effectiveness and improvement of education, Government, justice and mass communications; and recognize special service in the Chicago area community.

Mr. President, the need for this amendment stems from the short time period under the present law for divestiture. On December 1, 1978, the foundation received 100 percent of the shares of Bankers Life & Casualty Co.—an Illinois insurance company—upon the termination of a trust created by John D. MacArthur. These shares of Bankers Life & Casualty are subject to a 5-year divestiture period under the law, requiring the foundation to reduce its holdings of Bankers Life to 20 percent or less on or before November 30, 1983.

Mr. President, I submit that for a foundation the size of the MacArthur Foundation, that is an unreasonably short time to dispose of such major assets. The recent value of the foundation assests was over $800,000,000—nearly a billion dollars. According to the foundation extensive and lengthy worldwide marketing efforts by professional investment bankers have not yielded buyers willing and financially able to purchase all of the active assets of Bankers Life. The current recession and the stress conditions of insurance and real estate businesses have temporarily discouraged prospective purchasers.

To highlight the dilemma faced by the foundation, let me only point out that Bankers Life owns upwards of 50 office buildings and parcels in Manhattan alone. In addition, it owns sizeable real estate in Florida. All of these parcels are valuable but no one would demand that a foundation like the MacArthur Foundation should surrender its valuable assets for a song. Yet the present law could result in that development if we do not take action here today to grant the foundation an extension.

Mr. President, the amendment I offer today is simple and straightforward and I believe it has a considerable amount of support on both sides of the aisle.

My amendment would simply give the MacArthur Foundation another 2 years to dispose of these assests in order to meet the conditions of the law. We do not want to exempt the foundation for the important provisions of current law—we are simply seeking a reasonable, 2-year delay in this case.

In all other areas, the foundation is in accord with the purposes of the 1969 act that governs foundation divestitures: No family members own or operate a tax-exempt business and the active businesses pay full income taxes. Under the extension, these limits on its operations will continue in force.

Furthermore, this is a unique problem since among the 50 largest foundations, the MacArthur Foundation is the only one subject to this 5-year deadline. Other large foundations funded before 1969 have 10-, 15-, and even 20-year periods for divestiture. When that 1969 law was written, they were grandfathered in. In short, the 1969 law recognized the problem that divestiture would create and they provided for existing foundations. But they did not provide as good a mechanism for future, large foundations.

An extension of the present deadline has no revenue gain or loss consequences for the budget. If the deadline is not postponed, the foundation will have to sell by November 30, 1983, no matter what the price. The public will be the loser if the foundation is forced to sell within the deadline. Its grants, as outlined earlier today, will be smaller and fewer. None of us want to see that happen, I presume, and I urge my colleagues to support this important amendment. It is fully supported by the Treasury Department.

Madam President, I ask unanimous consent that the MacArthur amendment be considered.

Mr. METZENBAUM. Will the Senator from Illinois withhold his request for a minute?

Mr. METZENBAUM. If the Senator will withhold his request, the Senator from Illinois inquired about this amendment, and I indicated I had no objection to it. Since that point, there have been eight other special requests made including the Senator from Texas, who was there 2 years ago, 1 year ago, and the Senator from Colorado. There are also others who are asking for the same kind of treatment. I had spoken with the Senator from Illinois and indicated that if he had a separate measure and came forth with that measure alone, I would cooperate to support it. But as soon as you open the door to the Senator from Illinois, I noticed that the Senator from Colorado was on his feet. I have no doubt that the other eight will be on their feet as well asking for special consideration. Under the circumstances, I would object.

Mr. PERCY. I thought we had a clear understanding that had been made between us that if it was a clean amendment without other attachments to it there would be no objection.

Let me at least put the question and, if there is no objection—and I hope the distinguished Senator from Ohio would honor his word that he gave me—see if it can go clean, because it is absolutely unique. It is different than any other foundation. It is in a disastrous situation that would force it to liquidate $1 billion of assets in a few months.

Mr. METZENBAUM. The Senator from Illinois came over just a few minutes ago and said that there is a separate bill on this, would you have any objection. I indicated I would not.

Mr. DOLE. Madam President, I withdraw my request.

The PRESIDING OFFICER. The Senator from Kansas has withdrawn his request.

Mr. STEVENS. Parliamentary inquiry, Madam President.

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. How many staff members may a Senator have on the floor at one time?

The PRESIDING OFFICER. Two.

Mr. STEVENS. Madam President, I request that the Chair direct the Sergeant at Arms to ascertain who these staff members belong to.

The PRESIDING OFFICER. The Sergeant at Arms is so directed.

Mr. BAKER. Madam President, I ask for regular order.

The PRESIDING OFFICER. The question is on the amendment.

Mr. HELMS. Madam President, I want to know precisely what the unanimous consent is. I appreciate——

Mr. DOLE. I withdrew it.

The PRESIDING OFFICER. The request has been withdrawn.

Mr. BAKER. It has been withdrawn.

Mr. HELMS. Very well.

The PRESIDING OFFICER. The request has been withdrawn.

The Senate is not in order. Senators cannot hear the conversation.

The Chair requests again that the Senate be in order.

Mr. RIEGLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. Madam President, I want to call up an amendment at the desk. I realize there is no time for debate at this point. I call it up for Senator CRANSTON, who is unable to be here. It is amendment No. 5011

The PRESIDING OFFICER. The amendment will be stated.

Mr. SYMMS. Reserving the right to object, what is the amendment about?

Mr. ROBERT C. BYRD. No objection would lie to this amendment.

The PRESIDING OFFICER. The Senator has requested to call up the amendment. The clerk will report.

The assistance legislative clerk read as follows:

The Senator from Michigan (Mr. RIEGLE), on behalf of Mr. CRANSTON, proposes printed amendment numbered 5011.

Mr. STEVENS. Objection.

Mr. ROBERT C. BYRD. Objection would not lie to this.

The PRESIDING OFFICER. The Senator has a right to call up his amendment. It is a germane, timely filed amendment. Now the question is on the amendment.

Mr. ROBERT C. BYRD. Yeas and nays, Madam President.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. STEVENS. Was the amendment read?

Mr. ROBERT C. BYRD. The amendment was not read.

Mr. DOLE. Was the amendment read?

Mr. STEVENS. The amendment must be read.

The PRESIDING OFFICER. The amendment has not been read.

The clerk will report.

The assistant legislative clerk read as follows:

The amendment of Mr. BAKER is amended as follows:

On page 133, lines 6 and 7, strike out the comma and "3.5 per centum." and insert in lieu thereof "and section 314 of the Federal Public Transportation Act of 1982, 3.5 per centum, and by adding at the end the following new paragraph:

"The Secretary shall not obligate or expend funds appropriated under section 314 of the Federal Public Transportation Act of 1982 for any fiscal year after fiscal year 1983 unless the Secretary, in carrying out subsection (a) of this section, section 165(b) of the Federal-Aid Highway Act of 1973, and section 504 of the Rehabilitation Act of 1973, shall first, not later than 90 days after the date of the enactment of this paragraph, have published in the Federal Register for public comment, proposed regulations and, not later than 180 days after the date of such enactment, shall have promulgated final regulations, establishing (A) minimum criteria for each recipient of Federal financial assistance under this Act or the Federal-Aid Highway Act of 1973 to provide handicapped and elderly individuals with transportation services that such individuals can use and that are the same as or comparable to those which such recipient provides to the general public, and (B) procedures for the Secretary to monitor and ensure compliance with such criteria. Such regulations shall include provisions for ensuring that organizations and groups representing such individuals are fully consulted by such recipients in the process of determining and carrying out actions to provide such transportation services to such individuals.".

Mr. RIEGLE. Madam President, I ask unanimous consent that Senator KENNEDY be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on the amendment.

Mr. RIEGLE. I ask unanimous consent that Senator RANDOLPH also be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Madam President, will the majority leader ask for 1 minute at least so that Members will know what it is they are voting on?

Mr. BAKER. Madam President, I ask that I may proceed for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered. The majority leader.

Mr. BAKER. Madam President, obviously what is happening is clearly within the rules of the Senate. We provided a time certain to vote, but in the ordinary course of affairs any amendment at the desk, timely filed and qualified, can be called up without debate.

Now, I do not know how many amendments are at the desk, but that could go on for a long, long time, if we are going to continue that.

Could I inquire if there are a number of amendments that Senators on either side of the aisle intend to try to call up without debate? If that is the case, then we have one situation. If there are not very many of them, maybe we ought to provide for a minute for somebody to explain what we are voting on.

Now, I do not mean to put anybody in a box, but I also need to find out where we are and what is going on.

Mr. ROBERT C. BYRD addressed the Chair.

Mr. BAKER. I yield to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, it is my understanding that this is the only amendment—if I am mistaken, I hope someone will correct me, and I know they will. It is my understanding that this is the only amendment on this side that qualifies under the cloture role to be called up, and the ony one that would be called up before the vote on the Baker substitute. I would just hope that the Senator who is calling this up, on the basis of a promise that he made to Senator CRANSTON, who is not here, would be allowed to have a minute to explain what it is all about so we will all know what we are voting on.

Mr. BAKER. Madam President, on that basis, I request there be 1 minute of debate on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. I thank the Chair. Again, I want to state that I am offering this for Senator CRANSTON, who is unable to be here.

This amendment is designed to provide for fair and equitable treatment of handicapped and elderly persons in the context of our Nation's public mass transit system. Specifically, this amendment would authorize—but not require—the Secretary of Transportation to set aside for handicapped and elderly transit purposes 3.5 percent of transit capital infrastrucure program funding. This is the same percentage that the Secretary may, under the Baker amendment, set aside for that purpose out of discretionary capital assistance funding under section 4(a)(3)(A) of the Urban Mass Transit Act as it is proposed to be amended.

Second, our amendment would require the Secretary of Transportation to issue regulations establishing criteria for handicapped and elderly transportation services.

Madam President, the Senator from California submitted this amendment Tuesday night and my detailed statement explaining it appeared in part II of the RECORD for December 14 at page S 14740.

Madam President, if the Congress is going to provide a multiyear extension of the mass transit program and if the Congress is going to levy a 5-cent gas tax, with a portion of those revenues dedicated to the transit capital infrastructure, I believe we should adopt this amendment to help assure that our Nation's handicapped and elderly citizens receive a modicum of fair treatment under these programs.

Madam President, the Senator from California and I have long been deeply concerned that federally assisted transit systems must deal fairly and adequately with handicapped and elderly citizens.

We are convinced that the current situation is most unsatisfactory and that we should not leave it unchanged. On July 20 of last year, the Secretary of Transportation rescinded regula-

tions that had been promulgated under section 504 of the Rehabilitation Act of 1973 and related statutes and that set forth specific standards by which federally assisted transit systems would be required to move closer to full accessibility. In place of those regulations, the Secretary issued an interim rule that requires that federally assisted systems certify themselves—subject to virtually no Transportation Department monitoring—that they are making so-called special efforts and that establishes no national standards or criteria by which those efforts are to be gaged.

This local-option, self-certification, self-policing process is an abdication of Federal responsibility for protecting handicapped persons from discrimination and inadequate services.

On January 27 of this year, four other members of the Banking Committee and I asked the Comptroller General of the United States to conduct a survey of transit services under the interim regulation. That report is very valuable and presents some very disturbing information regarding the effects of the interim rule. The survey covered 84 transit systems in 33 States and the District of Columbia, and the data came from the transit operators themselves.

The survey data showed widespread deficiencies were noted in paratransit services, the one alternative to accessible bus service. Those deficiencies include waiting lists for people needing the service for daily commutes; long advance-notice requirements; the setting of priorities by trip purpose; denials of requests for services; shorter hours and fewer days of service than bus service—and the list goes on.

Madam President, the GAO also reported in April, that, since the time that the local-option approach had been adopted in the interim rule, the Department has done very little to administer that rule and has provided almost no guidance or assistance to transit system operators regarding the requirements of the rule; and that UMTA regional and headquarters officials planned no active monitoring of transit operators to determine compliance.

These GAO findings clearly indicate a most unfortunate situation in which the Department of Transportation's hands-off, local-option, self-certification, no-monitoring, and no-criteria position is transforming the antidiscrimination laws into meaningless symbols. And it is not just that accessible bus service is fast becoming a lost hope in many parts of the country, the special services—paratransit—for handicapped persons are proving to be unsatisfactory.

The present course is clearly not the answer. Not only are we headed toward affording handicapped and elderly persons third-class treatment, we're frustrating our own efforts to rehabilitate people, help them get back into productive activities, be more independent, and get off of disability and welfare rolls. Mobility is certainly critical to these efforts, and it is a tragic waste to fund vocational rehabilitation programs and then frustrate those rehabilitation efforts by failing to insure that we continue to make progress in enabling disabled persons to find and to get to and from work.

In this amendment, we are not proposing an enormously costly burden for transit systems or requiring an immediate return to the controversial, tough standards that were in place before July of 1981.

I do believe, however, that it is essential that we turn the system around and get back on the right track. The four parts of our amendment are as follows:

First, it would require the Secretary to establish national criteria for providing handicapped and elderly persons with comparable, usable transportation services.

Second, our amendment would require the Secretary to establish some procedure for the Department to monitor and insure compliance with the criteria he sets up. The situation disclosed by the GAO report is totally unacceptable from the standpoint of the Department's current attitude and inactivity with respect to monitoring what services are being provided.

Third, our amendment would help give handicapped groups an opportunity on the local level to make their needs known and to be consulted on how they are to be met.

Fourth, recognizing that the proposed gas tax would provide a new source of funding for transit capital improvements, this amendment would authorize—but not require—the Secretary of Transportation to set aside a modest portion of that new funding for capital improvements specifically for the purpose of enabling the needs of elderly and handicapped persons to be met. In this connection, I urge my colleagues to keep in mind that, as the GAO report shows, transit services for handicapped and elderly persons are in very bad shape in some localities. These funds could be well spent to help correct that situation.

In summary, our amendment would deal with four vital aspects of handicapped and elderly transportation issues while still retaining the philosophy of granting broad discretion to local systems in the design and implementation of their programs.

I urge my colleagues to support this amendment.

REGULATIONS ARE OVERDUE

Madam President, I want to emphasize that this amendment by and large simply reinforces current provisions of law in section 16 of UMTA and section 504 of the Rehabilitation Act and elsewhere. The broad principles established in those provisions need to be carried out through regulations and it has now been almost a year and a half since the so-called interim final rule was promulgated. It has been almost a year since the Department of Transportation announced in the Federal Register that a permanent regulation is necessary and itself recognized the major shortcomings of the interim rule.

Clearly, the promulgation of new permanent regulations is overdue. And I believe that, when permanent regulations are proposed, they should provide some assurance that physically impaired individuals are provided with services that are in some fair measure comparable to the services that others receive. Is the U.S. Senate prepared to tell disabled and elderly citizens that they should receive much less from federally assisted systems?

Madam President, regarding the issue of cost, the set-aside portion of this amendment would, of course, result in no additional costs at all. With respect to the requirement that regulations be promulgated, as I am sure Senators can appreciate, since the criteria that this amendment would require would be developed by the Secretary of Transportation, it is not possible to forecast specifically what cost they might entail for transit systems. Obviously, for those systems that have continued to make progress toward providing adequate services for handicapped persons, the costs would be minimal. For those that have neglected the needs of these individuals the costs can be expected to be more substantial. In any event, through the use of the discretionary set-aside, the Secretary would be able to minimize the cost impact.

But let me ask my colleagues a question about cost: What will be the costs of continuing the present state of neglect? What will be the costs of treating disabled and elderly individuals as third-class citizens, the costs of precluding them from getting into the job market, the costs of forcing them to stay on the disability and welfare rolls? These are surely very substantial costs—in both human and economic terms. Those are the costs that we should be focusing upon and trying our best to avoid.

Madam President, what are "comparable" transportation services within the meaning of this amendment?

First, I would suggest that the question be addressed to the Secretary of Transportation. The Secretary would have discretion to make reasonable choices in establishing the criteria that would answer that question.

But let me give some examples of the kinds of issues that comparability raises where the services provided handicapped and elderly persons are

not in the form of accessible buses or other equipment serving the general public. Services for handicapped and elderly persons should cover the same general geographic area as do services for the general public. The fares charged handicapped and elderly persons should not on the average exceed the fares charged the general public for trips between the same destinations. Services for handicapped and elderly persons should not be denied or delayed based on the purpose of their trips.

The response time for services for handicapped and elderly persons should not impose an undue burden upon them. I would hope that the Secretary would allow no more than 24 hours advance notice—preferably less—to be required. He could provide for a progressively diminishing advance-notice maximum.

I would emphasize—as the word itself implies—that comparability does not require mathematical precision. A rule of reason would obviously have to be followed and, within reason, the Secretary would have a measure of latitude and discretion. But the goal is clear: Handicapped and elderly persons are to be assured the same type of benefit from transit services as nonhandicap persons enjoy.

(By request of Mr. RIEGLE, the following statement was ordered to be printed in the RECORD.)

● Mr. CRANSTON. Madam President, this amendment, which is cosponsored by the distinguished ranking minority member of the Banking Committee (Mr. RIEGLE), and the very able Senator from Connecticut (Mr. DODD), who serves on the committee with us, is designed to provide for fair and equitable treatment of handicapped and elderly persons in the context of our Nation's public mass transit system. Specifically, this amendment would authorize—but not require—the Secretary of Transportation to set aside for handicapped and elderly transit purposes 3.5 percent of transit capital infrastructure program funding. This is the same percentage that the Secretary may, under the Baker amendment, set aside for that purpose out of discretionary capital assistance funding under section 4(a)(3)(A) of the Urban Mass Transit Act as it is proposed to be amended.

Second, our amendment would require the Secretary of Transportation to issue regulations establishing criteria for handicapped and elderly transportation services.

Madam President, I submitted this amendment Tuesday night and my detailed statement explaining it appeared in part II of the RECORD for December 14 at page S14740.

Madam President, if the Congress is going to provide a multi-year extension of the mass transit program and if the Congress is going to levy a 5-cent gas tax, with a portion of those revenues dedicated to the transit capital infrastructure, I believe we should adopt this amendment to help assure that our Nation's handicapped and elderly citizens receive a modicum of fair treatment under these programs.

Madam President, I have long been deeply concerned that federally assisted transit systems must deal fairly and adequately with handicapped and elderly citizens.

I am convinced that the current situation is most unsatisfactory and that we should not leave it unchanged. On July 20 of last year, the Secretary of Transportation rescinded regulations that had been promulgated under section 504 of the Rehabilitation Act of 1973 and related statutes and that set forth specific standards by which federally assisted transit systems would be required to move closer to full accessibility. In place of those regulations, the Secretary issued an interim rule that requires that federally assisted systems certify themselves—subject to no Transportation Department monitoring—that they are making so-called special efforts and that establishes no national standards or criteria by which those efforts are to be gaged.

This local-option, self-certification, self-policing process is no more than a "paper-game" farce. It is not even a "paper tiger." It is a "paper kitten." In essence, these regulations are a total abdication of Federal responsibility for protecting handicapped persons from discrimination and inadequate services.

Indeed, the Department of Transportation came close to recognizing this fact when, on January 13 of this year, it published a Federal Register notice indicating that its interim final rule was being reconsidered. In that notice—published some 6 months after the interim rule—the Department stated that the disadvantage of the interim rule's approach "are that it leaves some transit operators unsure of what they should do and that it may permit some transit operators to make minimal transportation services available to handicapped persons." In addition, the Department noted that "without any substantive Federal criteria, the quality of transportation services offered to handicapped persons might be inconsistent or quite low in some areas."

That is the Department of Transportation talking about its own regulations.

On January 27 of this year, four other members of the Banking Committee and I asked the Comptroller General of the United States to conduct a survey of transit services under the interim regulation. That report is very valuable and presents some very disturbing information regarding the effects of the interim rule. The survey covered 84 transit systems in 33 States and the District of Columbia, and the data came from the transit operators themselves.

The survey data showed a very sharp drop-off in the acquisition of lift-equipped buses when the interim rule was issued. For example, 19 of the surveyed systems canceled orders for a total of 707 equipped buses. At the same time, widespread deficiencies were noted in paratransit services, the one alternative to accessible bus service. Those deficiencies include waiting lists for people needing the service for daily commutes; long advance-notice requirements; the setting of priorities by trip purpose; denials of requests for services; shorter hours and fewer days of service than bus service—and the list goes on.

Madam President, the GAO also reported in April, that, since the time that the local-option approach had been adopted in the interim rule, the Department has done very little to administer that rule and has provided almost no guidance or assistance to transit system operators regarding the requirements of the rule; and that UMTA regional and headquarters officials planned no active monitoring of transit operators to determine compliance.

These GAO findings clearly indicate a most unfortunate situation in which the Department of Transportation's hands-off, local-option, self-certification, no-monitoring, and no-criteria position is transforming the antidiscrimination laws into meaningless symbols. And it is not just that accessible bus service is fast becoming a lost hope in many parts of the country, the special services—paratransit—for handicapped persons are proving to be unsatisfactory.

The present course is clearly not the answer. Not only are we headed toward affording handicapped and elderly persons third-class treatment, we are frustrating our own efforts to rehabilitate people, help them get back into productive activities, be more independent, and get off of disability and welfare rolls. Mobility is certainly critical to these efforts, and it is a tragic waste to fund vocational rehabilitation programs and then frustrate those rehabilitation efforts by failing to insure that we continue to make progress in enabling disabled persons to find and to get to and from work.

In this amendment, we are not proposing an enormously costly burden for transit systems or requiring an immediate return to the controversial, tough standards that were in place before July of 1981.

I do believe, however, that it is essential that we turn the system around and get back on the right track. The four parts of our amendment are as follows:

First, it would require the Secretary to establish national criteria for providing handicapped and elderly persons with comparable, usable transportion services. In this regard, I would note that the Secretary would have broad discretion to formulate those criteria, and I am not sure that I or many others deeply concerned about these issues would necessarily be satisfied with the criteria that the Secretary would develop. But I believe it is even less productive to have regulations implementing section 504 and UMTA section 16 that set no minimum standards, no bottom lines.

Madam President, I want to emphasize that this amendment by and large simply reinforces current provisions of law in section 16 of UMTA and section 504 of the Rehabilitation Act and elsewhere. The broad principles established in those provisions need to be carried out through regulations and it has now been almost a year and a half since the so-called interim final rule was promulgated. It has been almost a year since the Department of Transportation announced in the Federal Register that a permanent regulation is necessary and itself recognized the major shortcomings of the interim rule.

Clearly, the promulgation of new permanent regulations is overdue. And I believe that, when permanent regulations are proposed, they should provide some assurance that physically impaired individuals are provided with services that are in some fair measure comparable to the services that others receive. Is the U.S. Senate prepared to tell disabled and elderly citizens that they should receive much less from federally assisted systems?

We have declarations of national policy in UMTA that elderly and handicapped persons have the same right as other persons to use mass transit services and that special efforts should be made in the planning and design of those services in order to assure the availability to elderly and handicapped persons of services they can use. How can we have those declarations and, at the same time, condone Federal regulations saying that federally assisted programs have no specific obligations other than to file a piece of paper—subject to no verification—simply stating that they are making special efforts?

Second, our amendment would require the Secretary to establish some procedure for the Department to monitor and insure compliance with the criteria he sets up. The situation disclosed by the GAO report is totally unacceptable from the standpoint of the Department's current attitude and inactivity with respect to monitoring what services are being provided.

Third, should not any flexible system that leaves considerable discretion to local transit operators assure that representative organizations of handicapped and elderly persons will have meaningful opportunities to participate in the process of planning and carrying out the services to meet their needs? The GAO report indicated that this consultative process is presently adequate. Our amendment would help give these groups an opportunity on the local level to make their needs known and to be consulted on how they are to be met.

Fourth, recognizing that the proposed gas tax would provide a new source of funding for transit capital improvements, this amendment would authorize—but not require—the Secretary of Transportation to set aside a modest portion of that new funding for capital improvements specifically for the purpose of enabling the needs of elderly and handicapped persons to be met. In this connection, I urge my colleagues to keep in mind that, as the GAO report shows, transit services for handicapped and elderly persons are in very bad shape in some localities. These funds could be well spent to help correct that situation.

In view of the nonavailabililty of mass transit services for handicapped persons, many of them are forced to rely on private cars and taxis. Thus, they will be bearing a particularly heavy burden in paying the new gas tax—directly or indirectly.

Is not it only fair, Madam President, that some of these revenues be dedicated to meeting their needs?

Let us not literally leave these deserving individuals behind. Through the adoption of this amendment, we can show them that the Senate cares about their needs and is willing to make some provision for helping to meet them.

In summary, our amendment would deal with four vital aspects of handicapped and elderly transportation issues while still retaining the philosophy of granting broad discretion to local systems in the design and implementation of their programs. It would provide disabled and elderly persons with some fairness, some participation in the process, some Federal accountability, and an opportunity to share in some of the new tax revenues they must pay. It would leave great flexibility to the Secretary of Transportation to set the criteria and establish procedures for monitoring. But it would not permit the Federal Government to shed entirely its responsibilities—to abandon vast numbers of physically impaired persons to a future like the past they have known—one in which they were excluded, as no citizen should be, from the mainstream of our society and the opportunities that adequate transit services can and should open up for them.

I urge my colleagues to support this amendment.●

Mr. RIEGLE. Madam President, I ask unanimous consent that Senator MELCHER be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on the amendment of the Senator from California.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. We are prepared to accept the amendment without a rollcall.

Mr. RIEGLE. I thank the Senator.

The PRESIDING OFFICER. There is not a sufficient second at the moment.

The amendment (No. 5011) was agreed to.

Mr. RIEGLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HUMPHREY. Parliamentary inquiry, Madam President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. What is now the pending business?

The PRESIDING OFFICER. The amendment offered by the majority leader in the nature of a substitute.

Mr. HUMPHREY. Further question. Have the yeas and nays been ordered?

The PRESIDING OFFICER. They have not.

Mr. DOLE. Madam President, I would like to make one more unanimous-consent request, that the amendment I have sent to the desk may be in order at this time.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Reserving the right to object, I am sorry, what is the unanimous-consent request?

Mr. DOLE. Madam President, I would say to the Senator from North Carolina it is the same package of noncontroversial amendments. Three are technical in nature, totally technical. One deals with architectural barriers for the handicapped. One is the amendment of the distinguished Senator from Delaware which is a germane amendment. One deals with Eastern Airlines' safe harbor leasing, and another is the amendment of the distinguished retiring Senator from California (Mr. HAYAKAWA) dealing with California public utilities.

Mr. EAST. Madam President, if we may have order.

The PRESIDING OFFICER. The Senate will please be in order.

The Senator from North Carolina.

Mr. EAST. First, let me say that I am not suggesting these amendments do not have their relative merit, as the implication in ticking off the list, for example, on the handicapped, that some way or other I do not think they have merit. I am sure that each and perhaps every one of them have merit and I am willing to look at the merits. As we saw on this last amendment, I do not really think Senators know what they voted for. We had 1 minute of explanation.

We just voted on faith, and I do not know that does violence to the deliberative process of having not the vaguest notion of what we are really doing.

I am not questioning these seven or eight or nine—I do not know; the package seems to grow by the minute—that every one of them have merit.

I am willing to do this: I am willing to enter into a unanimous-consent agreement to have 1 hour of debate before the Baker substitute so we can look at these amendments and debate them in that hour period and dispose of them.

But I do not want this to be interpreted as saying they do not have merit. This is not the issue before the group.

The point is let us look at them and see what they are and what they deal with and to allow 1 hour on seven or eight amendments to debate that prior to the vote on the Baker substitute I think is an eminently fair and reasonable request.

I am willing to entertain a unanimous-consent request to that effect.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I withdraw the amendment. (UP 1582).

STATEMENTS ON BAKER SUBSTITUTE AMENDMENT—AMENDMENT NO. 4998

SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. ROBERT C. BYRD. Mr. President, it is with some disbelief that I look back over the long days and nights during which the Senate has considered this legislation. Originally, we were called back by the President to act on as many regular appropriations bills as possible, and to pass a continuing resolution that would keep the remaining Government agencies functioning. Yet, we found that the President's main priority became a gasoline tax proposal that is unfair, unnecessary, and ill timed.

It is difficult to justify action on this legislation under our current economic circumstances, as well as the hurried conditions of this lamest of lameduck sessions. And I believe that the extraordinary time pressures under which the Senate has operated made it impossible to give these proposals the dispassionate consideration and analysis needed to separate good ideas from passing fancies.

Clearly, we must provide funds for badly needed road and bridge repairs. But the 5-cent-per-gallon tax increase on gasoline unfairly hits low- and middle-income people.

Perhaps there may be some instances in which a gas tax would be justified. But it is not justified under current circumstances. We are in the middle of a profound and record-setting recession. This administration's proposals have taken pennies here and dollars there from the poor and middle class throughout this Congress. Now they want to stifle recovery and put an additional burden on the poor with a gas tax. I cannot support such a move at this time.

This tax has been strongly supported by a President who promised earlier this year that he would not ask for tax increases. In his 1982 state of the Union message, he said, "I will seek no tax increases this year."

As recently as September 28 of this year, the President ruled out an increase in the Federal gasoline excise tax. He was asked the following question at a White House Press Conference on that date:

Knowing of your great dislike for taxes and tax increases, can you assure the American people now that you will flatly rule out any tax increases, revenue enhancers or, specifically, any increase in gasoline taxes?

And the President replied:

Unless there is a palace coup and I am overtaken or overthrown * * * I don't see the necessity for that.

The President does not give the appearance of a man overthrown, but he does give the appearance of a man whose word is not an iron promise.

Members may recall the $98 billion in tax increases and "revenue enhancers" that the President sought this summer. That particular package of tax increases had many unfair elements, particularly tax increases on tobacco and telephones, increased unemployment taxes for small businesses, decreased deductibility of medical expenses, and withholding of tax on interest and dividends.

These provisions most deeply affect the elderly and working Americans of all ages—those who can least afford new taxes.

Democrats offered an alternative—an amendment that was fair and equitable—to replace the unfair and inequitable tax increases. Our amendment would have deferred a portion of the Kemp-Roth tax cut for those with incomes between $46,500 and $78,600, and would have eliminated the third year of the cut for those with incomes greater than $78,600. This proposal would have reduced the deficit by a total of nearly $25 billion over 3 years.

Democrats offered a similar amendment to the pending bill, H.R. 6211. Our amendment would have deferred a part of the final installment of Kemp-Roth for those with incomes between $50,000 and $65,000, and would have more than paid for the additional bridge and highway construction contained in this bill.

Democrats fought hard to insure that the Nation's most significant problem—unemployment—was at least partially eased by extending unemployment benefits for those in grave danger of exhausting their eligibility. And we will continue to seek more help for the 12 million Americans out of work.

On behalf of Senate Democrats, I offered an alternative jobs package amendment to this bill. It reflected the suggestions and advice of many Senators representing a broad cross-section of views and philosophies. It was a balanced and carefully crafted amendment.

The amendment had several major components:

First, it would have authorized a labor-intensive community public works program funded at $2 billion in the current fiscal year. This program would have channeled funds directly to State and local governments through the community development block grant program, specifically for hiring unemployed workers referred to the program by the Employment Service to make repairs and improvements to public buildings, streets, schools, and other public facilities in the communities.

The amendment would have added $1 billion to the heavy public works proposal in the legislation, to be used for urban water system and sewer rehabilitation and construction programs. It also would have required that an inventory be made of existing components of the public infrastructure, and a plan developed and submitted to the Congress for their repair, modernization and regular replacement.

The amendment would have increased funding for several existing programs which would have generated significant employment, including $400 million for public housing rehabilitation and modernization; $100 million for reforestation and timber stand improvement through the Forest Service; $100 million for the senior citizens community service employment program under the Older Americans Act; and $37 million for reclamation of abandoned mine sites.

The amendment would have invested $200 million immediately in retraining workers who have lost jobs in declining industries—jobs which are not likely to be filled even when economic recovery begins.

The amendment would have helped create jobs in rural America by aiding farmers and ranchers in expanding

their markets through increased sales of U.S. agricultural exports, and provided $750 million for the agricultural export credit revolving fund in the food-for-peace program for this purpose.

For those millions of Americans whose unemployment benefits either have expired or are about to do so—in many cases in the week before Christmas—our amendment would have provided additional weeks of benefits.

Our amendment, altogether, would have resulted in the rapid creation of over 350,000 direct jobs—and a minimum of 100,000 indirect jobs—over and above the approximately 300,000 direct and indirect jobs that advocates of the highway and mass transit legislation claim will result from their program.

I believe it also is essential to note that there is a serious dispute concerning the number of net new jobs that actually will result from passage of the highway, mass transportation, and gas tax bill. A number of reknowned economists—both liberal and conservative—have indicated their belief that the bill, at best, will create only a very few jobs beyond those the gas tax will siphon off from the economy. Regardless of the accuracy of these observations, clearly this bill is not a bill to employ the currently unemployed. Virtually all of the jobs that will result from this program will be filled by skilled workers, many of whom now are employed, whose employers simply will move to undertake the new work generated by this legislation. President Reagan leveled with the country on this matter, and stated emphatically that this bill is not a "jobs bill."

It is clear that this Senator is committed to addressing the critical problem of unemployment. I offered the Democratic jobs program amendment in that spirit. Senator LEVIN's amendment to extend unemployment benefits, which was similar to a proposal I had advanced earlier, reaffirms that commitment.

Senator RIEGLE offered an amendment to make this regressive tax measure more fair by expanding the earned income tax credit program. This program helps our poorest working families—whose earned income must be below $10,000 a year. Senator RIEGLE's amendment would have offset the gas tax for these families who face a daily struggle for existence. But the Senate unfortunately defeated even this attempt at introducing a measure of fairness into the administration's program.

I worked with other Senators to gain a provision in the highway portion of this bill and its October predecessor that improves the quality of coal haul roads. West Virginia has a large number of these roads that are in sore need of improvement, and I have pursued that provision with vigor.

As a member of the Appropriations Committee, I have long been involved with bridge projects in West Virginia. The Weirton-Steubenville Bridge is one of the most recent examples of my concern for adequate transportation facilities. There are thousands of other bridges across America that need repair, and I will continue to be involved in seeing that this is accomplished.

Recognizing that we have failed repeatedly to make this bill stronger, fairer, more helpful to the unemployed and less painful to working Americans, I cannot justify support for this bill at this time.

The time between adjournment sine die and the convening of the 98th Congress should be spent in devising a far better approach to jobs, taxes, and infrastructure improvements.

I, as Democratic leader and as a Senator from West Virginia, have cooperated with the majority leader and his side of the aisle. We have bent over backward to cooperate in expediting consideration of this measure. Last week, we proposed to forebear from offering further amendments to the bill, if those on the Republican side would do the same. We cooperated in voting for cloture. We cooperated in setting a time certain to vote on the Baker substitute. So there has been no obstruction on our part.

In the end, we must ask if the President asked the Congress to return in order to present this microcosm of the flaws in his overall program? Perhaps there has been, as the President puts it, a "place coup." For there are certainly better ways and a more appropriate time to accomplish the purposes of this bill.

I might say that my constitutent mail is running about 7 to 1 against the basic gasoline tax increase. I have heard further serious opposition to the other tax increases in H.R. 6211 as well.

I simply suggest that the Senate can do better than this. I am confident that we can act in a more reasoned manner to produce a superior product at the beginning of the new Congress. For those reasons, I will vote against this measure.

I simply suggest that the American people deserve better than this bill. They deserve better that this hasty, regressive, half solution to a serious problem.

They deserve better than broken promises and trickle-down economics. They deserve a serious attempt to deal with the raging unemployment that plagues this great Nation, and the sickly state of our basic industries.

I am confident that the Senate can act in a more reasoned and creative manner at the beginning of the new Congress. I will not give the citizens of my State and this Nation a tax increase for Christmas. I will vote against this measure.

AMENDMENT NO. 4998

The PRESIDING OFFICER. The question is on agreeing to the amendment of the majority leader as the substitute.

The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HUMPHREY. Mr. President, I ask for a division of the question.

The PRESIDING OFFICER. The motion to strike and insert is not divisible.

Mr. HUMPHREY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. The pending business is the Baker substitute amendment?

The PRESIDING OFFICER. It is.

Mr. HUMPHREY. And that is ruled as a motion to strike and insert; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HUMPHREY. Very well. I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

On this question, the yeas and nays have been ordered, and the Clerk will call the roll.

The legislative Clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Pennsylvania (Mr. HEINZ) are absent on official business.

I further announce that, if present and voting, the Senator from Pennsylvania (Mr. HEINZ), would vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Washington (Mr. JACKSON), are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON), would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 71, nays 24, as follows:

[Rollcall Vote No. 461 Leg.]

YEAS—71

NOT VOTING—5

Cranston	Hatfield	Jackson
Goldwater	Heinz	

So Mr. BAKER's amendment (No. 4998) was agreed to.

Mr. BAKER. I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. I yield the floor.

The PRESIDING OFFICER. Third reading.

Mr. HELMS. A point of order.

Mr. BAKER. Mr. President, I move to proceed to the motion to reconsider the vote by which the motion to invoke cloture on H.R. 6211 was defeated.

POINT OF ORDER

Mr. HELMS. Point of order.

The PRESIDING OFFICER. The question is on the motion to proceed.

Mr. HELMS. Point of order, Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina will state his point of order.

SEVERAL SENATORS. We cannot hear the Senator.

Mr. HELMS. I wish the man up there would turn on my microphone.

Mr. President, Public Law 95-435 provides:

Beginning with fiscal year 1981, the total budget outlays of the Federal Government shall not exceed its receipts.

According to figures provided me by the Senate Budget Committee, estimated revenues from this bill would be, at most, $22.9 billion. Estimated expenditures, on the other hand, would be at least $27.1 billion. According to my arithmetic, this bill would add another $4.2 billion to the Federal deficit.

Since H.R. 6211 adds to the Federal deficit, it is in violation of Public Law 95-435. I raise a point of order against H.R. 6211 on the grounds that it violates Public Law 95-435.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Mr. President, as I understood the point of order made by the distinguished Senator from North Carolina, it was not made under the Budget Act. Is my recollection correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Rather, it was made on interpretation of a previously enacted piece of statute law. Is that correct?

The PRESIDING OFFICER. That is true.

Mr. BAKER. Is it within the domain of the Chair to rule on an interpretation of law?

The PRESIDING OFFICER. It is not.

Mr. BAKER. Mr. President, is a statute previously passed then superseded by any statute which is subsequently passed?

The PRESIDING OFFICER. It is.

Mr. BAKER. Mr. President, I move to table the point of order.

The PRESIDING OFFICER. The point of order stated by the Senator from North Carolina involves interpretation of law which under the Senate procedures the Presiding Officer cannot make. The Chair submits to the Senate, Is the point of order well taken?

Mr. BAKER. Mr. President, I move to table the point of order and ask for the yeas and nays.

Mr. HELMS. Will the majority leader yield for a moment?

Mr. BAKER. Yes.

Mr. HELMS. I knew that.

Mr. BAKER. Well, I did not know that.

Mr. HELMS. It is a question for the Senate to decide and the Senate is going to decide whether it is going to vote to violate the law.

BAKER. Mr. President, I did not yield for debate and I believe debate is not in order.

Mr. HELMS. I believe the law is being violated.

Mr. BAKER. Mr. President, I do not think any law is being violated and I move to table the point of order.

The PRESIDING OFFICER. Are the yeas and nays requested?

Mr. BAKER. They are requested.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Washington (Mr. JACKSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 73, nays 22, as follows:

[Rollcall Vote No. 462 Leg.]

YEAS—73

Abdnor	Garn	Packwood
Andrews	Glenn	Pell
Baker	Gorton	Percy
Baucus	Hart	Pressler
Bentsen	Hawkins	Quayle

NOT VOTING—5

Cranston	Hatfield	Jackson
Goldwater	Heinz	

So the motion to lay on the table was agreed to.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, what is the question before the Senate?

The PRESIDING OFFICER. The question is on the motion to proceed to the motion to reconsider the vote by which a cloture was defeated on H.R. 6211.

Mr. HELMS. Point of order, Mr. President.

The PRESIDING OFFICER. The Senator will state this point of order.

Mr. HELMS. I want to make a point of order with reference to section 311 of the Congressional Budget Act, and I

think Senators ought to be reminded what they have said and, with their indulgence, I will read it.

Mr. BAKER. Mr. President, the point of order is not debatable.

Mr. HELMS. I am not debating.

Mr. President, I make the point of order under section 311 of the Budget Act that H.R. 6211 contains budget authority in excess of that permitted by the most recently agreed to concurrent resolution on the budget.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I move, in accordance with the provisions of section 904 of the Budget Act, to waive section 311 of that act with respect to the pending Baker substitute amendment.

The PRESIDING OFFICER. The question is on the motion.

Mr. HELMS. I ask for the yeas and nays, Mr. President. I am entitled to that.

Mr. BAKER. You are entitled to that.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Washington (Mr. JACKSON) are necessarily absent. I further announced that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER (Mr. GORTON). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 81, nays 14, as follows:

[Rollcall Vote No. 463 Leg.]

YEAS—81

Abdnor		
Andrews	Denton	Kasten

So the motion to waive section 311 of the Budget Act was agreed to.

Mr. BAKER. Mr. President, the pending question before the Senate, I believe, is my motion to proceed to the motion to reconsider the vote by which the motion to invoke cloture on H.R. 6211 was defeated.

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Mr. President, in the normal sequence of events if that motion prevails, then we will be on the motion to reconsdier, and if it is reconsidered, then we would be on cloture.

Let me ask the Chair this: I assume that the cloture vote, if we reach that, on that vote the yeas and nays woud be automatic, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Have the yeas and nays been ordered on the other two at this time?

The PRESIDING OFFICER. On neither.

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order to order the yeas and nays on the motion to proceed and the motion to reconsider with one show of seconds, and that if it is granted that the votes be back to back which, of course, they would be, and the first vote be 15 minutes and the succeeding two votes be 10 minutes each.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

MOTION TO PROCEED TO MOTION TO RECONSIDER

Mr. BAKER. Now, Mr. President, the question before the Senate is the motion to proceed to the motion to reconsider.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I ask for the yeas and nays, Mr. President, under the order.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered on both motions.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee to proceed to the motion to reconsider the vote by which the motion to invoke cloture on H.R. 6211 was rejected.

The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Colorado (Mr. HART), and the Senator from Washington (Mr. JACKSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote" yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote or to change their vote?

The result was announced—yeas 86, nays 7, as follows:

Rollcall Vote No. Leg. 464

So the motion to reconsider was agreed to.

CLOTURE MOTION

The PRESIDING OFFICER. Pursuant to rule XXII, the clerk will state the motion to invoke cloture.

The bill clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Rudy Boschwitz, Strom Thurmond, Ted Stevens, Warren Rudman, Arlen Specter, Robert Dole, Slade Gorton, John H. Chafee, Bob Packwood, Robert T. Stafford, S. I. Hayakawa, Richard G. Lugar, James A. McClure, Dan Quayle, Frank H. Murkowski, David Durenberger, and Jennings Randolph.

VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on H.R. 6211, the Surface Transportation Assistance Act of 1982, shall be brought to a close? The yeas and nays are mandatory under the rule. The rollcall will be 10 minutes in duration. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Washington (Mr. JACKSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 87, nays 8, as follows:

Mr. PRESIDING OFFICER. On this vote, the yeas are 87, the nays are 8. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

THIRD READING

Mr. BAKER. Third reading.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

(The following statements were delivered or submitted during consideration of the bill and are printed at this point for purposes of continuity:)

Mr. METZENBAUM. Madam President, I am going to vote against this legislation.

I have no higher legislative priority than helping to find jobs for the more than 11 million Americans, many of them Ohioans, who are out of work. I have spent countless hours in recent months working to ease the suffering of the unemployed. So I yield to no one in my desire to create jobs.

But the fact is, this is not a jobs bill. It is a tax bill—it is a tax bill—it is a tax bill masquerading as a jobs bill. It is not only a tax bill, it is a bad tax bill. The gasoline tax is unquestionably a regressive tax which falls most heavily on those least able to pay it. This administration and this Congress have already done enough to add to the tax burden of middle-income and poor Americans. Just a few months ago, we passed a bill doubling the cigarette tax and reducing the medical deduction. And a year ago we passed a tax bill to make the rich richer.

The tax might be defensible if it would, in fact, create hundreds of thousands of jobs. But that clearly will not be the result. Indeed, there is persuasive evidence that the tax will actually lead to a net reduction in employment. According to Martin Feldstein, Chairman of the Council of Economic Advisers, the tax "may actually increase unemployment during the first year or two."

I believe Mr. Feldstein is correct.

I also believe that my State of Ohio will be among the biggest losers if this program is enacted.

In 1984, the first full year that the new tax would be collected, Ohioans would pay $510 million into the highway trust fund. Under the 85-percent guarantee contained in the bill, Ohio would receive $433 million in return, yielding a net loss under the highway portion of the bill of $76.5 million. I might point out that today, Ohio receives back 89 cents on each dollar donated to the fund. That is hardly ideal, but it is certainly better than what is provided under this legislation. I see no reason why my State should receive a smaller share of the trust fund revenues than it currently gets.

With respect to the transit trust fund, Ohioans would contribute $51 million and could expect to receive $80 million in return, a net gain of $29 million.

In sum, the State would lose $47.5 million if this program is enacted. How on earth can I go back to the people of my State and explain to them that I not only voted to raise their taxes, but to make sure that they would not receive their fair share of those taxes?

What we have is a bill under which Ohioans would subsidize the creation of jobs in other States, chiefly in the Sun Belt, many of which have far lower unemployment rates than Ohio does. I invite the sponsors of the bill to explain that to unemployed steelworkers and other jobless Ohioans.

It would make far more sense for Ohio to simply impose its own 5-cent-a-gallon gas tax, knowing that all the revenue raised would benefit the citizens of our State.

In the final analysis, this legislation imposes a new, regressive tax, it will not return a fair share of that tax to Ohio and, indeed, will very likely lead to a net loss of jobs in the State while accelerating the flow of Federal aid—and jobs—to the less needy States in the Sun Belt.

To vote for this and then tell Ohioans that I voted for jobs would be a cruel sham. This legislation ought to be killed. Let us stop wasting our time with gimmicky programs that insult the jobless and let us get on with serious efforts to reduce unemployment.

TAR SANDS TAX CREDITS

Mr. GARN. Five years ago Congress enacted the energy tax credit, in part for synthetic fuel projects. Since then the IRS has ruled that we did not intend to apply the credit to tar sands synthetic fuel projects, such as the one in Santa Rosa, N. Mex. or Price, Utah. Did the Senator by his amendment, which was accepted last Wednesday, intend to ratify this misdirected interpretation of our legislative intent?

Mr. DOMENICI. No; not at all.

Mr. GARN. Do you agree that the tax credit for alternative energy property should include tar sands as well as coal gasification, liquifaction, and oil shale, and so forth?

Mr. DOMENICI. Yes; certainly. By extending the affirmative commitment rule in this instance, we intended for the extensions to apply across the board to all eligible alternative fuel sources including tar sands.

Mr. GARN. Thank you very much for helping clarify that point.

FEDERAL-AID HIGHWAY IMPROVEMENT ACT

● Mr. BENTSEN. Mr. President, I would like to commend Senator STAFFORD, the chairman of the Committee on Environment and Public Works, his distinguished ranking minority member, Senator RANDOLPH, and Senator SYMMS, the chairman of the Transportation Subcommittee, for their outstanding work on the Federal-Aid Highway Improvement Act.

As the senior Democratic member of the Transportation Subcommittee I have been deeply involved with the Federal-aid highway program for the last decade. I fully and strongly support this legislation as reported out of committee and I urge my colleagues to join me in this support.

S. 3043, Mr. President, provides for the largest authorization levels in the history of the highway program; $12 billion in 1983, with the gradual increase to $15 billion in 1987.

It should be emphasized, however, that our highway needs and requirments are larger and more urgent than at any time in the past. Thousands of bridges all across the country are in a state of disrepair and 1 out of every 2 paved miles of highway needs resurfacing or complete reconstruction.

Over the years we have made an enormous and, in my opinion, extremely productive investment in our Federal-aid highway system. If we want to preserve and protect that investment for the future we must be prepared to devote substantial resources to resurfacing, restoring, rehabilitating, and reconstructing the system. Without that investment America's highway system is in danger of crumbling and buckling into disrepair.

S. 3043 recognizes the urgent and massive nature of the maintenance requirement by increasing the 4R budget from $800 million this year to $1.8 billion in 1983, with a gradual increase to $3.4 billion in 1987.

Another important aspect of this legislation is that it maintains the "user pays" principle that has always been a key element of the Federal-aid highway program. Now it is true, Mr. President, that under S. 3043 the user pays more than in the past and has a greater stake in the system, but I sincerely believe that the millions of Americans who make use of and benefit from the Interstate Highway System recognize the importance of maintaining that system and the equity of the user pays principle.

However, in considering this legislation, I also felt strongly that it was time to deal with past inequities in the way Federal-aid highway funds are spent. With a vast increase in the size of the program those inequities would have been magnified to the detriment of donor States.

For example, the State of Texas has received a return of only 76 cents for every dollar invested since the program began. While it is true that the Texas rate of return has improved sharply in recent years, we are still a donor State contributing much more to the fund than we receive. While Texas has been losing, on the average, a quarter for every dollar invested, some States get back more than $2.50, and that is not a bad investment by any standard.

In an effort to redress this obvious, longstanding inequity in an expanded highway bill, I offered and the committee accepted an amendment that guarantees each State a minimum return of 85 percent for every dollar contributed to the highway trust fund.

Under the terms of my amendment the total authorization level for the Federal-aid highway program in each fiscal year 1983 through 1987 will be increased by an amount estimated by DOT to be sufficient to provide an 85 percent minimum apportionment under the total program. Any State slated to receive less than an 85 percent return would be granted an additional allocation to bring their total program level to the required minimum. These funds could be used by the States for any Federal-aid highway program category. It is important to understand that while my amendment will address the inequities of the past generation, it will not result in a reduction in the estimated apportionment to other States.

I have received correspondence from the Department of Transportation, confirming that this amendment creates contract authority for projects carried out with funds allocated under the amendment. I ask that the letter from John Fowler, General Counsel of the Department of Transportation, be placed in the RECORD at this point.

The letter follows:

DEPARTMENT OF TRANSPORTATION,
Washington, D.C., December 9, 1982.

The Hon. LLOYD BENTSEN,
U.S. Senate
Washington, D.C.

DEAR SENATOR BENTSEN: This is in response to the request of Mr. Lee Fuller of your staff on your amendment to S. 3043 made during the markup by the Committee on Environment and Public Works on December 7. The particular amendment concerned the minimization of contributions. This amendment allocates among the States amounts sufficient to ensure that a State's percentage of apportionments in each fiscal year (FY 1984–87) of primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination and rail-highway crossing funds shall not be less than 85 percent of the percentage of estimated tax payments attributable to highway users a State paid into the Highway Trust Fund, excluding the Mass Transit Account, in the latest fiscal year for which data is available. Under the draft of the amendment made available to the Department by Committee staff, there would be contract authority for projects carried out with funds allocated under this amendment.

Subsection (b) of the amendment provides that the amounts allocated under the section shall be available for obligation when allocated, shall be subject to the provisions of title 23, United States Code, and may be obligated for certain named projects.

Title 23, United States Code, provides contract authority for all the named projects pursuant to the provisions of section 106(a).

Sincerely,

JOHN M. FOWLER,
General Counsel.

I would like to take this opportunity, Mr. President, to express my appreciation to the Secretary of Transportation, Drew Lewis and Ray Barnhart, Federal Highway Administrator, for the spirit of helpfulness, fairness, and cooperation they brought to negotiations on this amendment. I was also pleased that the Secretary has expressed his support for the inclusion of new starts for mass transit programs that have become so essential for growth cities such as Houston.

S. 3043 will enable America to maintain its investment in the Interstate Highway System; it will help this country grow and prosper during the decade of the eighties; it corrects inequities in the way funds have traditionally been allocated and preserves the user-pays principle. In short, Mr. President, this legislation deserves the support of the Senate and I urge my colleagues to join me in voting for it.●

Mr. MITCHELL. I will not vote for the gas tax bill.

The proposal before us pursues two goals which have my strong support. It creates an accelerated program of much-needed highway construction and repair, and it seeks to create jobs at a time of record high unemployment.

Both these objectives individually merit support. There is an undeniable need to maintain the multibillion dollar investment that our highway system represents. There is an equally urgent need to provide jobs for those unable to find work in the current recession.

But it is the method by which these goals are to be financed—a 5-cents-per-gallon increase in the gasoline tax—that should be rejected.

An accelerated program to repair our highways is a sensible proposal, and one I support. The benefit of a sound transportation system to the Nation and the economy is indisputable.

If the only issue at stake were the question of maintaining our highways, the language reported by the Senate Public Works Committee would deserve unanimous support.

The allocation formula retains the essential elements of miles-traveled and miles of federally aided highways in each State. The committee wisely adopted a provision to allow those States which are economically hard-hit in this recession—such as Maine—to defer payment of the matching State share of costs for 2 years, until the economy improves.

Maine's geographic location means our roads do not compare on a miles-traveled basis with centrally located States. Maine must, however, still construct and maintain safe interstate highways. The one-half-percentage minimum allocation of the Highway Trust Fund would make certain that essential sections of our highway system do not fall into disrepair because the allocation formula takes no account of geography.

For these reasons, I support the extension of the highway program. Investment in our national infrastructure is an appropriate and rational role for the National Government, and has my support.

The other goal of the proposal before us, to create jobs at a time of record high unemployment, has my strong support as well.

Today, for the first time in four decades, more than 10 percent of our total work force is unemployed. Twelve million working men and women cannot find jobs in the private economy. Millions of these people are not even eligible for unemployment compensation benefits, because they have been out of work so long they have exhausted their benefits, or because their working history has been so interrupted or short they did not qualify in the first place.

Hundreds of thousands of our unemployed people are in a particularly tragic situation. They are the men and women who are 55 or older. These workers are too young to retire and too old to readily find jobs in new fields. They face the very real and tragic prospect of losing the results of their lives' work—their homes and their savings.

Thousands of the jobless from States particularly hard hit have been forced to migrate in search of work, but have reached their destinations at the same time as the recession. We have people living out of their automobiles and in makeshift tent cities in some parts of this country.

In these truly desperate circumstances, Congress is doing no more than its duty to consider jobs legislation. And given the budget deficits we face, we must find a way to create jobs without enlarging the Federal deficit. So the basic goal of this proposal has my strong support.

But unfortunately, an essential effort to employ the jobless on needed projects has come hand in hand with a proposal to increase the gas sales tax, which costs proportionately more for people with the lowest incomes. And that tax increase would be imposed on a commodity essential to virtually every working person in this country—gasoline.

Because the means of reaching the goal is so counterproductive, I am forced to vote against the entire proposal.

Both goals of this proposal could have been accomplished by an alternative. It was an alternative for which I voted and which I am convinced would be better, in economic terms, in effectiveness, and in simply equity.

That alternative would have retained and improved the best of the current proposal without the accompanying disadvantage of a higher gasoline tax.

It would have maintained the accelerated highway construction and repair program. In addition, it would have created a 1-year emergency public employment program to respond to the current emergency of a 10.8-percent unemployment rate.

This jobs program would have gone into effect promptly. It would have been targeted to the areas hardest hit by unemployment. It contained safeguards to prevent overhead costs from ballooning. It capped pay for these jobs at $10,000. It would have given priority to people who have been out of work for 3 of the last 6 months, and who do not receive unemployment compensation.

This jobs program would have directed the money to those most nearly at the end of their own resources. It would have done so quickly, to respond to the need, which is urgent. And it would have done so responsibly, to make certain the money was not misused or wasted.

Most importantly, that alternative would have been financed without enlarging the huge budget deficit, without imposing an additional tax on anyone, and without draining yet more billions from a recessionary economy.

It would have been financed by the straightforward and fair expedient of deferring the third year of the income tax cut for the most fortunate 5 percent of Americans in order to give a helping hand to the least fortunate.

The proposals would have delayed part of the cut—not the whole cut—for people with incomes between $50,000 and $65,000 per year, and it would have delayed the entire cut for those with incomes over $65,000. In 3 years, all these people would receive the full third installment of the tax cut. They would only be asked to defer a portion of tax relief, not to give it up. Over 3 years, this deferral would save $24.9 billion.

I supported that alternative because it was moderate, it was fair, and it asked a modest sacrifice only of those who could make it without hardship. Those at the upper end of the income scale have already received substantial tax relief from the 15-percent tax cut now in place. A 15-percent tax cut means far more to those in higher tax brackets than it does for the vast majority of the working people of this country.

The 15-percent cut has given the worker who earns $10,000 a year $52 in tax relief. It has given the person who earns $100,000 a year $2,127 in tax relief. I do not feel that a 3-year delay of further tax relief will impose a harsh or unfair burden on those fortunate enough to earn more than $65,000 per year.

But that alternative was rejected by the Senate majority.

The proposal before us now would not only create substantially fewer jobs for those in the most immediate need, it would finance that effort through a hike in the gasoline tax which, even by conservative estimates, will swallow up $30 of the $52 in tax relief that a worker earning $10,000 has received.

The gas tax increase will fall with particular harshness on States like Maine, which have relatively small populations in large land areas, have little or no mass transit and suffer from low per-capita income. Almost every person who works in Maine must drive to work—some very long distances. Many receive low pay. Upon these people—the working men and women who are the backbone of our society—this gas tax increase will have a severe adverse effect. It is an effect that is neither fair nor necessary.

An increase in a sales tax on a widely used and essential commodity is the wrong tax at the wrong time.

Like all sales taxes, the gas tax increase would fall most heavily on those with the lowest incomes. And because it drains the resources that contribute to creating jobs out of the economy, it would finance jobs in highway construction and repair at the cost of jobs lost in other sectors.

The analysis by the Congressional Budget Office clearly shows that the impact of this tax in terms of additional jobs created is zero. The highway construction jobs created will be paid for by other jobs lost. The Chairman of the President's Council of Economic Advisers has repeatedly emphasized that its overall effect will be to lose some existing jobs or prevent others being created.

So, from a purely economic point of view, the gasoline tax increase is not an effective way to finance additional jobs or a good way to finance accelerated highway construction at a time of record high unemployment.

And from the standpoint of equity, a higher gasoline tax exacerbates an already unfortunate tilt in the distribution of the tax burden.

A major but little-noticed effect of the President's 3-year tax program is the redistribution of the tax burden away from those who can best afford it and onto those who can least afford it.

The tax cut reduced all tax rates by an identical 25 percent over 3 years. But an identical rate reduction does not provide an identical measure of tax relief. If tax relief is measured against income, the Reagan cut gives 8.4 percent relief to an income of $80,000 and 2.3 percent to an income of $10,000. That is not identical, even-handed tax relief.

Two-thirds of the benefits of this tax cut go to the people who pay just one-third of the total tax bill: Those with incomes over $60,000. One-third of the benefit of this tax cut is shared among the millions whose taxes pay two-thirds of the total tax bill: The average working people of this country. A full 35 percent of the tax cut will go to the top 5 percent of the taxpayers.

And the imbalance in the tax burden will worsen, not lessen, in future years. When the effects of inflation and higher payroll taxes are taken into account, the tax relief for families with average incomes vanishes by 1984.

By 1985, with the full 3-year tax cut in place, fewer taxes will be paid by the top 5 percent of income earners. In average terms, their tax rates will be 3.5 percent lower than they were in 1980. These people will see actual, tangible tax relief in the form of more after-tax dollars in their pockets. By contrast, the millions of people who make up the lower 50 percent of income earners will actually pay more in taxes than they did in 1980. Their average tax rate will rise by 0.5 percent. So these millions of people will see no tangible benefit in terms of higher take-home pay from the tax cut, and will, in fact, be paying higher taxes despite the tax cut. That is simply unfair.

The overall effect is to shift the burden of Federal taxes away from those most able to pay—people earning higher salaries, who enjoy substantial discretionary disposable income—onto the people least able to pay, those earning average and lower incomes, whose every dollar is earmarked for essentials and for the most basic amenities of life.

By 1985, the principles of ability-to-pay, which is the cornerstone of any fair tax system, could be undermined.

The tax increase enacted this past summer also included changes which raised taxes on working people. The excise tax increases in that bill are regressive, falling most heavily on those with lower incomes. The curtailment of medical and casualty loss deductions falls most heavily on middle-income taxpayers who use the most common itemized deductions. These increased taxes will be paid disproportionately by the same people who received the least tax relief in the 1981 tax cut, a fact which further shifts the tax burden away from those with the greatest ability to pay. The cumulative effects of the 1981 tax cut and the 1982 tax increase argue strongly against yet another tax hike.

The middle of a recession is never a wise time to raise taxes, expecially taxes as broadly based and pervasive as a gasoline tax. This tax increase will siphon $5.5 billion out of consumers' pockets at a time when consumer spending is needed to stimulate our economy. It is illogical to take $5.5 billion away from consumers when economic reality dictates that consumers should spend more. It simply reduces their ability to spend. More particularly, it is contrary to economic reason to take that money with a sales tax, because that takes proportionately more from the very people whose income is almost all spent—those at the lower end of the income scale who cannot afford to save.

Equally importantly, the increase in another sales tax simply weights the tax burden further against people with average and lower incomes in favor of those with the highest incomes.

Tax cuts on high incomes are defended on the grounds that high incomes are the source of investments which expand our economy. Incentives for investment are important, and have always played a role in our economic policies. But investment incentives alone cannot make up for the lost buying power of millions of unemployed consumers. When consumers cannot afford to buy the goods already on the shelves, the producers of those goods have no rational incentive to invest in producing more.

The 3-year tax cut was based on the theory that investments by the wealthy would lift the economy into a period of growth. This has not happened. When a theory is disproven by events, it is only sensible to change the policies based on that theory. The alternative proposal I supported would have modified, slightly, one aspect of that policy. It would have delayed part of a tax cut, without sacrificing its longer range purpose, in order to accommodate a more immediate and more pressing economic need. It would have done so for an economically sensible and proven purpose: To put people back to work and thus add slight immediate stimulus to our economy. And it would have done so without accentuating the already unfortunate shift in the tax burden to the average-income working people of this country.

By contrast, the gasoline tax hike simply accelerates the shift in the tax burden, takes no cognizance of the fact that our economy needs stimulus, not a further tax drain, and does so to produce no additional jobs.

For those reasons, I cannot support this proposal, despite the fact that I support its overall objectives.

Mr. BENTSEN. Mr. President, Congress recognized the need to preserve this highway network when in 1976 it added the terms "resurfacing, restoration, and rehabilitation" to the highway program. These additional words were carefully selected specifically to make it clear that Federal-aid funds could be used to restore existing pavements to a smooth, safe, useable condition when extensive reconstruction is not feasible or prudent.

Mr. NICKLES. Will the Senator yield? I agree that it is very clear that the Congress intended that emphasis be placed on preserving the serviceability and improving the safety of existing highways in the most cost-effective manner possible. I do believe, however, that the standards for such restoration projects should be developed cooperatively with the individual States who own those roadways and have the responsibility for their maintenance.

Mr. BENTSEN. Certainly the individual States should participate in establishing the criteria. Uniformity of design is essential on the Interstate system, but logic demands that there must be some flexibility when the 3R process is used on other classes of roads, always mindful, of course, that safety is of high priority. The Federal Highway Administration has adopted an innovative, flexible, and cost-effective approach in establishing design criteria which are conducive to highway safety. It allows the States to select criteria, subject to FHWA approval, which are appropriate to their individual needs, but which still meet the stated objectives of Congress. The FHWA rule does just that. It is titled "Design Standards for Highways: Resurfacing, Restoration, and Rehabilitation of Streets and Highways Other Than Freeways." It has been in development for 6 years and has received strong support from the National Association of Counties. It also was unanimously endorsed by the American Association of State Highways and Transportation Officials.

Mr. NICKLES. The Senator is correct. My State highway department strongly supports the FHWA rule, for it allows us to improve many miles of intolerably unsafe highways instead of having to spend all of our dollars on just a few miles. On balance, it makes for far more miles of safe highway driving than under previous procedures. I do expect that the Federal Highway Administration will continue to monitor this program to insure that our congressional objectives for building and maintaining safe highways are met.

Mr. BENTSEN. I thank the Senator. I am sure that will be done as FHWA continues with its implementation of this final 3R rule.

Mr. DODD. Mr. President, I would like to take this opportunity to seek clarification from the Senator from Idaho (Mr. SYMMS) of statements submitted on the highway bill, listing States that probably qualify for different truck weight limits under the grandfather clause in 23 U.S.C. 127. This list is illustrative only and by no means is exclusive. There are numerous States that are legitimately grandfathered for higher axle weight or gross weight or special permit authority or combinations thereof. Connecticut is one such State that has legitimate grandfather rights with respect to truck weight limits. Is it not clear that the language making a State the final arbiter of the scope of its grandfather rights applies equally as well to Connecticut and to a host of other States that have the benefit of grandfathered State laws that predated the enactment of the Federal law? Specifically, it is my understanding that Connecticut is currently grandfathered for axle weights, gross weights, and special permit authority that are different in all three instances than those limits prescribed under Federal law.

Mr. SYMMS. The Senator from Connecticut (Mr. DODD) is correct in his assessment of the grandfather clause.

Mr. RIEGLE. Mr. President, I support the portion of the amendment containing the mass transit provisions as proposed by the Senator from Indiana. It would create a special 2-year program to put Americans to work improving our mass transit systems, and would also reauthorize the successful and important Federal mass transit program through fiscal year 1985. This legislation represents a carefully constructed, even fragile compromise among the members of the Banking Committee on some very difficult issues. I want to commend both the Senator from Indiana and the distinguished chairman of the Banking Committee, the Senator from Utah, for their cooperative efforts in developing this legislation and bringing it to the floor.

This legislation represents an important component of a bipartisan response to the unemployment crisis in this country. It would put hundreds of thousand of Americans to work restoring the Nation's transportation system.

Under this amendment, the revenues produced through the 1 cent of the gasoline tax earmarked for mass transit purposes would be used to fund a special program of grants to finance transit projects which can begin construction or manufacturing in the shortest possible time. These projects must also be labor intensive to the extent practicable. I want to stress the short-time frame and labor intensiveness of this program which must be adhered to if the program is to have the intended fast economic impact. As a rule, the program should fund only projects

That are advanced enough in the planning and design stages to be able to go into actual construction or production within 4 months of passage where practicable, but certainly not more than 6 months.

The jobs impact of transit investment is significant: According to American Public Transit Association estimates, the use of $1.1 billion—the annual revenue projected for transit earmarked gas tax revenues—for transit capital projects would generate 84,000 jobs. These jobs would occur in every sector of the U.S. economy, but would be focused on the particularly hard hit construction and motor vehicle industries.

This legislation would also reauthorize the basic UMTA program at 1982 funding levels for 3 years. It would also accomplish an important restructuring of the program by putting about 75 percent of the funds into an expanded formula grant program, usable for both capital and operating assistance. Formula funds would be distributed in accordance with a revised formula that represents a balance between the needs of big and small cities, as well as the needs of both bus and rail systems. Remaining program funds would be available for discretionary grants for capital projects under section 3 of the act. As of fiscal year 1986, gas tax revenues earmarked for transit would be the funding source for the section 3 program.

Mr. President, in general, this legislation reaffirms the national commitment to mass transit, while at the same time creating a flexible efficient program that targets funds where most needed. In the last two Congresses the Banking Committee, as well as the Senate as a whole, spent a great deal of time and effort debating the shape and direction of the transit program. In the last Congress, legislation that had passed both Houses died in a filibuster at the end of the last lame-duck session. In this Congress, the Banking Committee held hearings in both sessions, considered transit funding levels and program structure on at least three occasions; and at the direction of the Members had conducted extensive staff negotiations that have resulted in the compromise we are considering today.

Let me stress at the outset that there is one element of this proposal with which I strongly disagree. This legislation would significantly reduce Federal assistance for operating costs of the Nation's transit systems. It would impose a 20-percent reduction of cities of over 1 million, a 10-percent reduction on cities of 200,000 to 1 million, and a 5-percent reduction on cities of 50,000 to 200,000. However, the administration has been seeking much more draconian cuts, which would impose a 33-percent cut in operating assistance in 1983, leading to full phaseout after 1984.

It is with considerable reluctance that I have decided not to actively oppose the reductions contained in this amendment. Since the House bill contains no mandatory cuts in operating assistance, it is my hope that the conference on this bill will produce a more acceptable result. While the

impact of the administration's would be devastating, the impact of the cuts contained in this amendment on transit operations in the major cities of this country will still be severe. It will particularly hurt those cities suffering the impact of the recession. They have few local resources to use to replace lost Federal funds. These cuts would hit hardest in cities like Detroit and Chicago, whose economies have been so hurt by this recession, and where transit service already faces major cutbacks. I am concerned that amendments may be offered today that would involve cuts along the lines proposed by the administration. I will strenuously oppose any such amendment.

Mr. President, apart from this last shortcoming, the legislation has many strengths. It provides positive action for employment and transit improvement, and is a comprehensive package of worthwhile reforms to the UMTA program that represents the views of many members of the Banking Committee, both majority and minority. Let me briefly highlight the major provisions of the package:

It would create a special discretionary grant program in fiscal years 1983 and 1984 to utilize transit-earmarked gas tax revenues for transit infrastructure grants for projects that can go into actual construction or manufacturing within the shortest possible time, and which are labor intensive to the extent practicable. We expect the Secretary to carefully adhere to these requirements. Over the 2 years $1.65 billion would be available for these projects.

In the third year, the gas tax revenues become the funding base for the section 3 discretionary program and the special restrictions are dropped.

It would retain current funding levels out of general revenues for 3 years, thus returning an important element of stability and predictability to the Federal transit program;

It would create a block-grant type of program, providing a significant degree of flexibility to local government and transit systems. The direct relationship between the larger urbanized areas and the Federal Government which has been so important to the success of the program would of course be continued. It would also provide for regular Federal review and audit of local uses of Federal transit funds, intended to assure closer monitoring of compliance with statutory requirements than would have been required under the administration's original block-grant proposal. This will help avoid inefficient or wasteful application of scarce funds. Under this block-grant approach, 76 percent of program funds would be made available to communities of all sizes to maintain and improve mass transportation services. There would be increased discretion in the use of funds for capital purposes. As I indicated earlier, urbanized areas would be limited as to the portion of their annual allocation that could be used to underwrite costs to between 80 to 95 percent of the amount available to them for operating assistance in fiscal year 1982.

The section 18 program of capital and operating assistance for small urban and rural areas is preserved at current funding levels. This is a major accomplishment of this legislation. The section 18 program has een an example of a successful Federal program in many States where increased mobility has been made available to thousands of residents of small and rural communities for the first time. This legislation also contains a 1-year reduction in the time during which section 18 funds can be obligated. One of the problems with the program has been that a number of States have failed to claim available funds, thereby endangering the overall funding level of the program.

For urbanized areas, the formula program would adopt a new distribution formula that stresses actual service, thereby focusing transit funds where they are most needed. Since the creation of the formula program in 1975, the program funds have been distributed primarily on a population basis, with little connection between the distribution of funds and the actual operation of transit service. All legislation that has been considered in Congress since that time has attempted to insert a significant factor related to actual transit service. This legislation would accomplish that long sought goal. It also balances the interests of bus and rail transit systems, and larger and smaller cities; 67 percent of the program funds will be focused on cities of over 200,000 population; 6.5 percent would go to cities over 50,000; and 2.5 percent would be reserved for the section 18 program. For the larger cities, two-thirds of the funds would be distributed to recipients based half on population and population density factors—as in the current formula—and half on the localities relative share of all bus revenue vehicle miles operated in the country; 32 percent of the funds would be distributed on a formula weighted 40 percent on the localities relative share of rail route miles and 60 percent on its relative share of rail revenue vehicle miles. This formula represents a difficult compromise of the many transit interests. I believe it is a fair division of funds that will allow both older existing systems and newer developing systems to meet their needs. Funds for smaller cities, those between 50,000 and 200,000 in population would continue to be distributed to the Governor, based on the existing population and population density formula.

A cap is placed on the use of block grant funds for operating assistance. For urbanized areas of over 1 million in population that cap is 80 percent of the amount available for operating assistance in fiscal year 1982; for urbanized areas between 200,000 and 1 million, the cap is 90 percent of the 1982 amount; and for urbanized areas of 50,000 to 200,000 the cap is 95 percent of the 1982 amount. As a transition provision, for 2 years, an area may transfer formula capital funds for operating uses, up to the amount available in fiscal year 1982, providing that it agrees to a reduction in the size of the overall formula grant of $1 for each $2 transferred to operating uses. It is my understanding of the intent of this provision that the exercise of this transfer provision would not affect the levels of section 3 discretionary grants made each year for projects being funded pursuant to a letter of interest or letter of commitment.

This legislation also contains an important revision of current procurement requirements. A recipient would be able to request secretarial approval of its own procurement system. If the Secretary finds that the system provides for competitive procurements, it shall be approved for all procurements under the section 9 program. This represents important progress in a very controversial area. I recently wrote the Department of Transportation to gain clarification of their views on the procurement question and the various legislative proposals that have been pending. The Department's response does help clarify how it interprets current law and would interpret the proposed changes. I believe it would be helpful to have the full text of this response printed in the RECORD.

I agree with the Department's interpretation of these proposed provisions, particularly its statement that grantees would not be required to adhere to a low initial cost bid system.

Mr. President, I believe this is, on balance, a positive piece of legislation that deserves strong support and I urge its adoption. I ask, therefore, that the full text of the letter be printed in the RECORD.

The letter follows:

URBAN MASS TRANSPORTATION ADMINISTRATION,
Washington, D.C., August 5, 1982.

Hon. DONALD W. RIEGLE, JR.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR REIGLE. Secretary Lewis has asked me to respond to your letter regarding questions about the Urban Mass Transportation Administration's (UMTA) procurement procedures and certain procurement provisions in mass transit legislation now before the Congress. Your questions and our answers are set forth below.

1. "What procurement standards are currently imposed on UMTA grantees?"

UMTA currently requires its grantees to comply with the minimum procurement

standards contained in section 3 of the UMT Act of 1964, as amended, and OMB Circular A-102. Attachment O, Uniform Standards Governing State and Local Procurements. The latter circular was implemented by UMTA Circular 4220.1A, dated June 8, 1982. These standards provide that all procurements will be processed in a manner that ensures that maximum open and free competition will be obtained to the fullest extent practical. This is consistent with the UMT Act section 3 statutory prohibition against the use of discriminatory or exclusionary specifications. Such standards are also designed to ensure that all procurements result in goods and services being obtained efficiently and economically and in compliance with the provisions of applicable Federal law and Executive Orders.

2. "To what extent has the Department been implementing the provisions of section 12(b)(2), and what have been the results?"

The language of section 12(b)(2) is permissible, however, Congress specifically included this requirement in both the fiscal years 1980 and 1981 DOT Appropriations Act, and added a further requirement in the 1982 Act. In 1980 UMTA determined that the standard White Book specifications met the minimum requirements of the legislation with respect to the procurement of Advanced Design Buses. Thus, the grantees would be deemed to be in compliance with the legislation by utilizing the standard White Book specifications and upon furnishing certification of compliance thereto for every rolling stock procurement. UMTA also took other affirmative steps to implement the requirement, including: (1) hiring of a consultant to develop a viable life-cycle cost procurement method for transit equipment; (2) funding of bus procurements utilizing this procedure on an experimental basis; (3) funding of seminars nationwide to inform grantees of the requirement and to provide technical assistance in its implementation; and (4) funding of grants to assist grantees in updating and improving their data collection systems to facilitate life-cycle cost procurement methods. UMTA has been, and continues to be, concerned about the potential for abuse and anti-competitive practices in implementing this requirement, and has attempted to ensure that grantees apply this requirement in a manner which is fair and reasonable.

In the fiscal year 1982 DOT Appropriations Act, Congress imposed a further requirement calling for the evaluation of performance, standardization, life-cycled costs and other factors the Secretary may deem relevant. This new requirement became law on December 23, 1981, and was implemented by UMTA with a February 18, 1982, notice in the Federal Register, as amended on March 4, 1982. The notice included an explanation of the new requirement and the projects to which it applied. UMTA determined that the requirement would be applicable only to grants awarded after December 23, 1981, but also to procurements awarded using FY-1982 funds for which bids had not already been advertised by December 23, 1981. The notice informed grantees that specific methods of implementing the new requirement would not be prescribed in order to allow grantees the maximum flexibility possible in meeting the new requirements. Thus, grantees were allowed to select a method of their own choosing for implementing the new requirements so long as such method would not violate the minimum standards contained in section 3 of the UMT Act of 1964, as amended, and Attachment 0 to OMB Circular A-102. The grantees continue to be required to furnish a certification of compliance to UMTA for every rolling stock procurement.

To date, the only known problems resulting from this legislation have been administrative delays caused by the implementation of these requirements. This includes the need to have a balance between the established mthods of complying with these requirements while eliminating factors which will result in the use of discriminatory or exclusionary specifications. The use of such specifications is prohibited by statute and must be avoided even in the implementation of these requirements.

3. "What, in your view, are the differences between the language of section 306 of H.R. 6211 and that contained in the Senate bills?"

The Senate bills—S. 2367, S. 2377, and S. 2502—each contain the following provision:

A recipient may rquest the Secretary to approve its procurement system. If, after consultation with the Director of the Office of Federal Procurement Policy, the Secretary finds that such system provides for competitive procurements, the Secretary shall approve such system. Such approval shall be binding unless withdrawn. This subsection does not affect the [the Buy American] certification. . . .

It is our preliminary interpretation that there are three basic differences between this provision and that in the House legislation. First, the latter apparently provides an option automatically available to a grantee without Secretarial review. To the contrary, the Senate provisions would require a Secretarial finding that the grantee's procurement system is "competitive" before this option could be used. Second, the House provision, if chosen by a grantee, would eliminate the UMT Act section 12(b)(2) factors from the affected procurements; in addition, the grantee's procurement need not be based upon "lowest initial capital costs." (It bears noting at this point that UMTA does not now require grantee procurements to be based on low cost bids. While competitive bid, one method, uses low initial capital cost, competitive negotiation, another method, allows consideration of such factors as quality to be taken into consideration.) Under the Senate provisions, (other than the Administration's bill, S. 2367, discussed below) a grantee's procurement system found "competitive" would still be subject to the section 12(b)(2) factors since the legislation does not provide for their waiver. While the Administration's provision is the same as that contained in the other Senate bills, it is included in a section of the bill (section 9) that provides that no other provisions of the UMT Act other than those set forth in section 9 would apply. Thus the section 12(b)(2) factors would not apply if the Administration's section 9 procurement option were chosen by a grantee and approved by the Secretary. None of the Senate provisions include the House provision on the waiver of low cost bids, but as noted earlier, UMTA currently does not require grantee procurements to be based on low cost bids and would under any of the provisions, continue this existing policy. Third, and finally, the House provision is limited to the procurements of "rolling stock." The Senate provisions would apply to a larger category, a grantee's "procurement system."

4. "If any of the currently pending provisions were enacted, are there circumstances under which UMTA would require grantees to adhere to a 'low initial cost bid' system? If so, please explain."

If any of the currently pending provisions are enacted, UMTA would not require grantees to adhere to a 'low initial cost bid' system. As noted above, UMTA currently requires its grantees to comply with the minimum procurement standards contained in section 3 of the UMTA Act and OMB Circular A-102, Attachment 0. In brief, these procedures require that all procurements be processed in a manner that ensures maximum open and free competition. But the procedures do not require that the initial low bid be accepted in all cases; they recognize that sound procurement practices may accommodate such factors other than cost as quality and technical expertise. If any of the provisions are enacted. UMTA would continue to ensure that competitive systems retain this flexibility and would not require grantees to adhere to a low cost bid system.

5. "In approving a procurement process as 'compeitive,' as would be provided under any of the currently pending bills, what standards or criteria would UMTA use in making such a determination?"

Generally, we would only approve a procurement procedure that provides maximum free and open competition, does not allow exclusionary or discriminatory practices or otherwise restrict or eliminate competition, and provides protection against fraud and abuse.

We will be pleased to provide you with any additional information on these matters that you may request.

With regards.

Sincerely,

ARTHUR E. TEELE, Jr.

Mr. NICKLES. Mr. President, I must compliment the President of the United States, and the very able and distinguished Senate majority leader for holding firm to their commitment to see this legislation passed—despite opposition coming from myself and others.

At this time, I believe I should state my reasons for my opposition to this legislation.

It is certainly a setback for New Federalism. Where are the statesmen who not long ago rallied behind the belief that States know best how to solve most of their own problems—in this case, road repair and maintenance? Increasing Federal involvement only throws a roadblock in front of any State initiative to finding solutions as unique as the needs of each State.

The tax is just not fair, especially for so-called donor States like Oklahoma. My State has received a yearly average of 74 cents for every dollar it paid into the highway trust fund since 1956. Meaning: the State has been forced to pay more than one-half billion dollars to the Federal Government that it has received. The current apportionment formula has left 14 States holding the short end of the stick during the past 25 years. Even if Congress guarantees that States would receive no less than 85 percent, Oklahoma would still lose more than $60 million a year.

In addition, the tax bill earmarks an enormous amount of funds to proping up ailing mass transit systems. States

with relatively small populations, like Oklahoma, will lose millions. My State stands to lose at least $15 million a year.

States also lose money when forced to comply with Federal rules and regulations governing construction and maintenance. Oklahoma Department of Transportation officials estimate federally initiated projects cost as much as 30 percent more than those administered solely by the State.

Costs are also inflated by Federal labor laws such as the Davis-Bacon Act and Walsh-Healy Act. Davis-Bacon, the 51-year-old statute requiring payment of prevailing wages to workers on all federally funded construction and maintenance projects, has been expanded to cover resurfacing, restoration, rehabilitation, and reconstruction (post-interstate construction program). This action not only inflates project costs but also decreases employment and undercuts State control and responsibility.

Considering these inequities, my State of Oklahoma could get more mileage increasing its own gasoline tax 3 cents, than what Congress is forcing us to swallow for 5 cents.

As far as creating jobs, this tax bill will likely cause a net decrease in the number of jobs in this country. Taking an additional $27.5 billion from consumers over the next 5 years might help the construction industry somewhat but will reduce future job opportunities in the rest of private sector. In some industries, like trucking, many persons may actually lose work because of the tax. If raising taxes really created jobs, why do we not increase the tax to a dollar and put everyone back to work? Economic revovery is the only long-lasting solution to our unemployment problem—a recovery that is unfortunately slowed every time Congress enacts a bogus jobs bill.

Mr. President, no one denies the need for rebuilding the Nation's roads but the answer will not be found in raising Federal taxes—especially at a time when economists are counting on consumers to pull the country out of recession. Furthermore, State legislators and Governors are much closer to the intricacies of the problems of our roads and should be given the opportunity to address local needs. This tax increase will more than double the Federal gasoline tax and increase the Fed control and responsibility of transportation which should be left to individual States.

Mr. CANNON. Mr. President, I would like to ask a question of the Senator from Oregon (Mr. PACKWOOD) concerning the impact of this legislation. As the cosponsors of the Motor Carrier Act of 1980, we are both aware of the desire by Congress to direct the ICC to permit the trucking industry to compensate for legitimate foreseeable cost increases through changes in rates. I wonder if he would agree with the observation that I am about to make.

Mr. PACKWOOD. I would be delighted to respond.

Mr. CANNON. Thank you. We are all aware of the financial plight of America's trucking industry. In these difficult economic times the entire regulated trucking industry will show a net income for 1982 of less than one-half of 1 percent. To put it more graphically, on gross operating revenues of $44.1 billion the net after taxes, income will be only $210 million. In addition, Mr. President, the motor carrier bankruptcy rate is running more than double that of other business.

We are also aware that this bill's substantial increases in gasoline and heavy truck use taxes will place severe additional burdens on the industry's operating costs. And while we trust that future productivity gains will eventually brighten this dismal profit picture, I deem it important that motor carriers be able to obtain expeditious and favorable rate relief from the Interstate Commerce Commission.

Mr. PACKWOOD. I join with the ranking member of the Committee on Commerce, Science and Transportation in urging the Interstate Commerce Commission to give expeditious and adequate consideration to rate filings by motor carriers to cover these new costs imposed upon them.

Indeed, I might say to my colleagues, the Finance Committee fully recognized the difficult financial condition of the trucking industry during markup. That was, in fact, a major reason for our decision to phase in the heavy truck excise taxes over a 2½-year period.

Mr. CANNON. I thank the chairman.

Mr. DOMENICI. Mr. President, I would like to take this opportunity to comment the many Senators and committees whose cooperative efforts brought this vital legislation to the Senate floor. H.R. 6211, the Surface Transportation Act of 1982, positively addresses two serious and troubling problems facing our great Nation: The deterioration of our Nation's vital highway and mass transit systems and rising unemployment.

This bill is a wise investment. It increases our transportation excise taxes in return for providing over 300,000 jobs, for completing our Nation's Interstate Highway System, and for making essential highway, bridge, and mass transit repairs.

Title II of this legislation, as reported by the Environment and Public Works Committee, provides $12.2 billion in spending authority for fiscal year 1983. This represents a $3.9 billion increase above the current level of highway authorizations. Over the next 5 years, more than $70 billion in highway expenditures will be made possible by the enactment of this bill.

The Secretary of Transportation has assured us that every effort will be made to spend the funds raised by this bill as rapidly and efficiently as possible. This will create new business for construction materials, equipment, and service firms. This will allow a major portion of the construction industry to survive and continue to provide employment until economic recovery restores traditional demand for their services. Repairing our national transportation system will not only contribute directly to short-term new employment, but more importantly, it will increase long-term employment and productivity by maintaining a viable transportation system essential to the Nation's commerce and business.

Taxes under the bill would rise to 9 cents a gallon starting next April. The last time the tax was increased to its present level of 4 cents was 23 years ago, when gas sold for about 31 cents per gallon. At that time, the tax amounted to 13 percent of the price of a gallon of gasoline. Gasoline now sells for about $1.30 a gallon and even after the 5-cent-per-gallon increase, the tax will be only 7 percent of the price of gas. Furthermore, because the tax is applied at the refinery, the entire 5 cents may not automatically be passed on at the pump.

H.R. 6211 treats rural and urban areas fairly. My vast State of New Mexico comprises nearly 3.5 percent of the land area of the United States and 2 percent of highway lane miles, but only approximately half of 1 percent of the Nation's total population. As a result, States like New Mexico are often shortchanged when distribution for highway moneys are heavily weighted toward the more urbanized States. The Senate Environment and Public Works Committee bill proposes an equitable distribution which balances the needs of States like my own, where smooth and safe highways and farm-to-market roads are critical, and more heavily populated States where urban freeways have become a way of life. In addition, our urban neighbors will also significantly benefit from the new capital fund for improving mass transit that will be financed with revenues from 1 cent of the gasoline tax.

Special recognition has been given to the fact that this is a difficult time for the trucking industry to bear increased costs. For that reason the highway use tax increase has been delayed until January 1, 1984, and it is phased in over 18 months, to be fully effective on July 1, 1985.

Finally, the bill is fair to farmers and ranchers. Fuels used on farms will be fully exempt. Aerial and ground application of fertilizers and pesticides will also be exempt, and those who

provide such services will be permitted to claim the exemption directly without having to claim the exemption through the farmer as required under present law.

Farmers producing corn and other crops used in creating gasohol will benefit from a full exemption from the 9-cent-per gallon tax. This will encourage increased production of gasohol at a time when surplus grain supplies are heavily depressing market prices.

I am sure there are those who would prefer that we undertake this investment in our Nation's highways without imposing the user fees to pay for it. To do this would be shortsighted.

First, failure to charge user fees in proportion to wear and tear of roads would lead to more rapid deterioration of our roads than is currently taking place. Indeed, society is already paying more than it should for inadequate and deteriorating roads, through high car maintenance expenses and lower business productivity.

Second, the country simply cannot tolerate much more deficit financing. We already face deficits in the $200 billion range over each of the next 3 years if no changes are made to current laws. These deficits could absorb 87 percent of net savings. These are funds that should be going to private industry to revive our economy. The longer we permit such deficits to keep real interest rates high, the longer we will wait for a strong economy.

Mr. President, I support H.R. 6211 for all the reasons I have mentioned. H.R. 6211 puts the Nation on the right course by investing in the future. Repairing our national transportation system is an essential step toward long-term employment opportunities and improved productivity in all sectors of the national economy.

EXPLANATION OF VOTE TO SUPPORT THE MOTION TO WAIVE SECTION 311 OF BUDGET ACT

Mr. DOMENICI. Mr. President, I would like to take a moment to explain why I supported the motion to waive section 311 of the Budget Act.

Section 311 of the Budget Act applies to the fiscal year for which we have a budget resolution; namely, fiscal year 1983. This bill actually lowers the budget deficit in fiscal year 1983 by some $600 million. I realize that as a technical matter the increased outlay in the bill may violate section 311, but I think the purpose of section 311 is to make sure the deficit does not increase. This bill raises revenues in fiscal year 1983 by about $1.6 billion. Since outlays would increase by about $1 billion, the deficit would be reduced by $600 million as I have already indicated.

Because of this, I see no purpose to be served in this case by adhering to the technicalities of section 311. This bill would reduce the deficit. That is enough for me. I think the purposes of the Budget Act are well served by the motion to waive section 311 in this case.

Mr. PERCY. Mr. President, I am pleased to join with my good friend from Connecticut (Mr. DODD) to discuss our proposed amendment to the highway bill.

The legislation before us today is one of the most important pieces of legislation we have debated in this session of Congress. It comes at the tail end of the 97th Congress when the unemployment level in the United States is still rising—my own State of Illinois now ranks third among the industrial States with a jobless rate of over 13 percent. This legislation is also overdue acknowledgement that some of our crucial transportation networ', built up over decades, is rapidly deteriorating and needs immediate attention.

To highlight the importance of maintaining our transportation system, let me just highlight one item. Earlier this year the President signed into law a really landmark bill, creating export trading companies. The bill acknowledges the great importance of exporting to our national economic well-being. We simply must export to pay for the expensive oil we import. Illinois and the Midwest breadbasket contribute enormously to our foreign exchange earnings through exporting. But we all know we need more of it.

As important as this legislation is, the underlying assumption of it is that we can get our products to market. We must have a well-maintained transportation network if we are going to truck our manufactured goods from the factory to the airport or the seaport. We have had first-hand experience where our transportation system has not been up to snuff and it has cost us exports. I am speaking of the export of coal. It was not too long ago that ships were lined up at Baltimore and other ports for months waiting to get coal for sale overseas. Our export sales could have increased substantially if we had paid more attention to our lack of adequate harbor facilities for loading coal.

Of course, the international demand for our coal arose suddenly with the escalation in the price of oil. We did not forsee it 10 years ago. I cite this today, however, as an example of where inadequate transportation facilities have a major impact on our export potential and on our domestic economy.

Now we are confronted with an acknowledged deterioration of the highway system built up over the last 50 years. We have built a lot of highways but we have not paid much attention to their upkeep. In this legislation we are getting around to providing some of that much needed rebuilding.

Mr. President, we spend a lot of money in the budget each year for transportation and other types of capital improvements. In the fiscal 1983 budget, we will spend over $155 billion for capital investments of various types. Unfortunately, we have very little idea of whether we are funding the most needed projects. We simply do not have the information to make realistic cost-benefit analyses on the capital needs of the country.

The chief economist for the Conference Board, Dr. Albert T. Sommers, testified earlier this year on behalf of improving our Federal capital budgeting. I would like to quote from just one part of his remarks because it is so relevant to the need for better information on capital spending. The chief economist for the Conference Board noted, and I quote:

> Public capital formation has now subsided to about its lowest share of total output at any point in the postwar years. School construction has slowed—appropriately enough, with the decline in the school-age population. But the misdirected pressures to economize account for a 10-year liquidation of much of the U.S. defense system. Even if schools and defense are excluded from capital outlay, the remaining nondefense public-capital formation has taken less and less of our GNP. Outlays for highway construction fell after the completion of the interstate highway system several years ago, understandably; now the system is deteriorating again. The remaining programs—mass transit, general institutional construction, urban rehabilitation, bridges, parks, water and sewage systems, ports—have suffered. In current dollars (not adjusted for inflation), the investment-type programs identified in recent budgets have been growing at a 1.5 percent annual rate; the growth in current operations has been at a 14 percent annual rate. A Commerce Department study indicates that through much of the 1970's, Federal spending on "public works" fell short of depreciation, even with the depreciation calculated, with vast understatement, on an original-cost basis.

Dr. Sommers made another good point during this hearing in the House of Representatives. He said, and I quote:

> Productivity in the private sector rests on a great deal of support provided from the public sector. Businessmen know this. Even in our international position, your failure to construct the ports to export the coal is a limitation on our exports. The condition of the roads is an inhibition to the transfer of goods. These are tangible kinds of defaults. But I have a feeling there are others. There should be some measure of a falling sense of cohesiveness in a society that won't and can't organize itself to provide for its collective needs.

Mr. President, the point of the amendment we had planned to offer today was to provide a kind of measure—a crude one, to be sure—to begin to have a better understanding of where we stand on our capital needs.

We do not undertake this effort to have some type of "wish list" of public works projects. That is not my goal. Anyone who knows the public record knows that I have opposed wasteful

89-059 O-86-18 (Pt. 24)

public works projects—from the Tennessee-Tombigbee Waterway in Mississippi to phase II of the Deep Tunnel in my own backyard in Chicago. These are excellent examples of projects that got started because we had little sense of the other capital needs of the country.

Our amendment is clear and straightforward. Mr. President, I ask unanimous consent that the text of our amendment appear at the end of this colloquy. Our amendment would do the following things:

First, each year the President would submit to Congress a special analysis for the upcoming fiscal year stipulating the expected spending on public infrastructure investments like highways and ports.

Second, each year the President will also submit a capital budget which will evaluate capital investment needs. This would, of course, be part of the unified budget.

Third, the Secretary of Commerce—who has some experience in this area—is directed to pull together an inventory of civilian public facilities, with an assessment of the conditions of these facilities. The report would be due in January 1985 and the Secretary would work with each agency which would actually compile its own inventory.

Mr. President, this is a sensible approach to the Federal budget. It has been supported by the General Accounting Office—which helped us write this proposal, the chief economist of the Conference Board and the AFL-CIO. Moreover, there is a bipartisan approach to this in the House, where Republican Congressman CLINGER and Democratic Congressman EDGAR have championed this issue.

Mr. President, I ask unanimous consent to place at this point in the RECORD a letter from Congressmen EDGAR and CLINGER stating their support for this amendment and the warm welcome it would receive by House conferees on this highway bill.

In summary, I would like to cite remarks made by the Comptroller General, Mr. Bowsher, about our capital spending. He observed that:

> Investment in capital assets, both defense and domestic, are issues that warrant particular attention and visibility in the budget process. Investments in capital assets should involve longer term decisions on programs and funding whenever possible. Such a longer term focus for investment decisions would allow the Congress to consider budget levels in relation to the overall conditions and needs for the Nation's public infrastructure and defense structure.

Mr. President, this budgetary tool will vastly improve the information flow that we have. The budget each year does contain a special analysis on "Investment, Operating and Other Budget Outlays." This little pamphlet, however, has all of six pages of narrative. We feel it can be improved and that is what our amendment would do.

I would like to yield now to my good friend from Connecticut (Mr. DODD) for a few remarks.

Mr. DODD. Mr. President, the chairman of the Committee on the Budget (Mr. DOMENICI) and the chairman of the Committee on Environment and Public Works (Mr. STAFFORD) have been very accommodating in discussing both the merits of our amendment and their difficulties in moving forward with this proposition at this time. I don't believe we have any general disagreement over the absolute necessity of generating expanded information about the condition of our public facilities. We all want to insure that limited public resources directed at improving the quality of the Nation's infrastructures are allocated in an efficient and cost-effective manner. As long as the financing commitment does not match the enormous demand, we will need to expand our information base. We also must refine the decisionmaking process of the Congress so as to be able to address our most pressing needs in a rational manner.

The Dodd-Percy amendment did not modify the Budget Act of 1974. It did, however, require certain changes and additions in the presentation of the budget which do have implications for the future consideration of the unified Federal budget. In fact, I want to emphasize my strong feelings that the congressional budget process is the appropriate place for making these decisions among competing priorities.

In addition, the Senator from Illinois (Mr. PERCY) and I attempted to refine our amendment to convey a great deal of discretion to the administration as to the information to be generated. It may well be desirable to provide more precise definitions of the kind of information which would be the most useful and the manner in which such material would be presented to the Congress.

I recognize the need for hearings on these matters. But I have a problem in deferring this matter at this time on which I would like to seek some assurances from the respective committee chairmen. We have to act quickly on this subject. This highway bill increases the commitment by over $5 billion to certain segments of our infrastructure. In the next session, we cannot help but address the problems besetting other capital facilities. In this regard, may we have some assurance that this matter will receive a high priority on the agendas of your respective committees early in the next session?

Mr. DOMENICI. Mr. President, the Budget Committee has held extensive hearings on budgeting concepts, including the subject of capital budgeting. While the Percy-Dodd amendment does not require the adoption of a separate capital budget, it requires the President to include with the annual budget submission to Congress a "capital investment budget."

The argument has often been advanced by others that Federal capital investments should somehow be separated from the Federal budget totals. This could cause pressure to redefine budget deficits in terms of operating expenses only. That would totally distort the effect of the Federal budget on the economy, would cause Federal outlays to appear to be lower than they actually are, and could lead to less congressional scrutiny of Federal capital investments.

I am prepared to hold further hearings on the issue of capital budgeting. Furthermore, I extend my pledge to work with Senators STAFFORD, DODD, PERCY, ROTH, and others, as well as the Congressional Budget Office and the General Accounting Office, to analyze the Federal Government's investment in capital facilities, improvements, and repairs.

Mr. STAFFORD. Mr. President, I would join with my colleagues with a pledge to do all that I can to work with the Senator from New Mexico (Mr. DOMENICI) and the Senator from Connecticut (Mr. DODD). We need to request from CBO, GAO, and other agencies the information that is necessary to put together a solid program to improve the infrastructure of America. As chairman of the Committee on Environment and Public Works, I intend to do all I can to develop a rational capital improvement program for our Nation.

FEDERAL CAPITAL INVESTMENT BUDGET ACT DODD-PERCY AMENDMENT

Mr. DODD. Mr. President, the amendment being discussed by myself, Senator PRECY, and others would add a new title to the committee bill establishing a Federal capital investment budget. This amendment is a refinement of legislation which I originally introduced on June 15. A similar proposal, pending in the other body, has bipartisan support from approximately 60 cosponsors, at recent hearings before the House Subcommittee on Economic Development, this measure generally was endorsed by a wide range of experts, including the General Accounting Office. I might add that our amendment was refined with the benefit of advice from the GAO.

The amendment has three basic provisions; first, it requires a special analysis to be prepared and included in the President's budget submission beginning with the proposed budget for fiscal year 1985. This analysis would provide an estimate of the current levels of investment in our infrastructure. In additions this submission would include an identification of public and private financing sources and constraints, Federal investment

priorities, and surplus Federal assets. Let me emphasize that there is no mandate or intent to require the President to relate this information to any specific standards of present or future need.

The second part of the amendment would expand upon this information beginning with the budget submitted for fiscal year 1986 to include separate estimates of construction, rehabilitation, and repair investments. In addition, this expanded documentation would include an estimate of the current levels of services being provided and the costs of continuing such current levels.

Finally, our amendment requires the Secretary of Commerce to prepare and submit to the Congress by January 1, 1985, an inventory and assessment of public facilities which would then be updated every 2 years. I might add that this requirement for an inventory and needs assessment parallels an earlier proposal which I introduced on September 23, 1981.

In sum, all this amendment does is require the preparation and submission to the Congress of information about the state of our public capital facilities. The administration is accorded almost complete discretion in designing and preparing this data. Any costs associated with the development of this material would come from existing authorities and not new spending.

Our amendment seeks to fill an information void which makes it difficult, if not impossible, to effectively allocate limited public resources in response to the serious problems represented by the inadequacy and deterioration of our Nation's infrastructure of public facilities.

With this information in hand, we will be able to determine when a new highway is authorized, for example, when it will need to be repaired, how it will be maintained, where the resources will come from, and who will be responsible. This bill does not mandate additional spending on infrastructure investment. It does require, however, the more efficient utilization of public resources and a framework for establishing priorities among competency demands.

Clearly, and most importantly, this bill acknowledges that the Federal Government is not the total answer to the problem, but must take a lead in planning and managing the appropriate responses from government at all levels and the private sector.

I believe that there is a strong argument for attaching this measure to the pending bill. The Congress is about to make an increased, and in my opinion, long overdue commitment to certain segments of our infrastructure. In the next session, we cannot help but address the problems besetting other capital facilities; quite simply, we need better information before we make those decisions. Some may argue that this information is superfluous because the need is far greater than available resources. I would respond that this is precisely why we need this inventory, needs assessment and analysis. Limited funding demands the improved planning and management tools involved in our amendment.

Mr. President, our amendment will enhance the current approach to public investment in this Nation and allow us to get the most out of our total public capital investment. We have attempted to limit this proposal as much as possible without sacrificing the goal of improved planning to reverse the deterioration of our infrastructure. Such an effort is integrally related to our mutual goal of advancing long-term economic growth, development and employment. I urge my colleagues to support this modest, commonsense approach.

A letter from Representatives EDGAR and CLINGER, and a copy of the proposed amendment follow:

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 9, 1982.

Hon. CHARLES H. PERCY,
Room 4321, DSOB,
Washington, D.C.

DEAR SENATOR PERCY: We are pleased to add our support to the Dodd-Percy amendment to provide a capital budget for the federal government.

As authors of similar legislation (H.R. 6591) in the House of Representatives, the Dodd-Percy amendment represents an important and necessary reform of our budget procedures. The House version of this legislation has over fifty cosponsors from both parties in all regions of the nation. H.R. 6591 was the subject of four days of hearings in the Subcommittee on Economic Development, on which we both serve, and was unanimously endorsed by a broad range of interests including business, labor, state and local officials, and private sector economists.

During consideration of the Surface Transportation Assistance Act of 1982, the Chairman of the Surface Transportation Committee assured us that should the Senate adopt a capital budget amendment along the lines of H.R. 6591, he would support the inclusion of such an amendment in the conference report.

Your amendment most certainly is an important step towards fulfilling a vital and necessary means of more rationally addressing our deteriorating infrastructure.

Sincerely,

BOB EDGAR.
BILL CLINGER, JR.

At the end of the bill, add the following new title:

SHORT TITLE

SECTION 1. This title may be cited as the "Federal Capital Investment Budget Act of 1982".

PURPOSES

SEC. 2. The purposes of this title are—

(1) to provide basic information of the capital infrastructure of the Nation in an organized and rational manner;

(2) to identify serious deficiencies in the public investments that are deteriorating and beyond repair and to identify those that are constraining national growth;

(3) to allocate limited funding in public infrastructure in a cost-effective and orderly manner by allowing the establishment of reasonable priorities in capital investment;

(4) to distinguish between Federal, State, and local responsibilities in order to reduce fragmentation and duplication of effort; and

(5) to improve legislative oversight over public capital investments.

FEDERAL CAPITAL INVESTMENT BUDGET

SEC. 3. Section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11) is amended by adding at the end thereof the following new subsection:

"(k)(1) The President shall include with each Budget submitted under subsection (a) on or after January 1, 1984, a special analysis, for the ensuing fiscal year, which shall identify for each function, agency, and program the amount of appropriations and expenditures which may be classified as public infrastructure investments, and shall contain appropriate summaries of the total amount of such appropriations and expenditures. In addition, the special analysis under this paragraph shall contain—

"(A) an estimate of current aggregate public infrastructure investments;

"(B) an estimate of current aggregate operation and maintenance expenditures;

"(C) an identification of potential and alternative sources of financing and capital investment constraints at the State and the local level of government;

"(D) an identification of Federal public infrastructure investment priorities;

"(E) an identification explaining the relationship of the proposed annual capital expenditures contained in the proposed Budget to the Nation's longer term needs and the Federal Government's longer term public capital infrastructure strategies;

"(F) a 5-year projection on anticipated capital and related operation expenditures;

"(G) identification of surplus Federal assets in these categories; and

"(H) evaluation of whether some of these services would be better provided by the private sector or on contract to the private sector.

"(2) In addition to the information required by paragraph (1), the President shall include with each budget submitted under subsection (2) on or after January 1, 1985, a capital investment budget which shall identify by State (considering the District of Columbia and each insular area as a State) the amount of appropriations and expenditures which may be classifed as public infrastructure investments, and shall contain—

"(A) an estimate of construction and rehabilitation investments and operation and maintenance expenditures;

"(B) an estimate of the costs to continue specific present levels of service;

"(C) an assessment of the levels of service being produced by public infrastructure capital; and

"(D) a 5-year projection of appropriate amounts for the capital investment budget.

"(3) For the purposes of this subsection, any appropriation or expenditure shall be classified as a public infrastructure investment to the extent that funds so appropriated or expended will be used for the construction or rehabilitation of any civilian public facility in the United States.

"(4) For the purposes of this subsection—

"(A) the term 'construction' means the erection or acquisition of new structures

and the acquisition and installation of initial equipment therefor;

"(B) the term 'rehabilitation' means the alteration or reconstruction of an existing structure and the acquisition and installation of initial equipment or modernization or replacement of such equipment; and

SEC. 4. Title VII of the Public Works and Economic Development Act of 1965 is amended by adding at the end thereof the following new section:

"INVENTORY AND ASSESSMENT OF PUBLIC FACILITIES

"SEC. 717. (a) The Secretary of Commerce (hereinafter referred to as the 'Secretary') shall prepare an inventory of civilian public facilities in the United States and an assessment of the physical condition of such public facilities.

"(b) The Secretary shall make a report of the inventory and assessment required by subsection (a) to Congress not later than January 1, 1985. The Secretary shall update such report and transmit a copy thereof to Congress every 2 years thereafter.

"(c) The Secretary may secure directly from any department or agency of the United States information necessary to enable the Secretary to carry out this section. Upon request of the Secretary, the head of such department or agency shall furnish such information to the Secretary.

"(d) The Secretary shall consult with officials of State and local governments in developing the inventory and assessment required by this section.".

Mr. CANNON. Mr. President, during the extensive debate prior to passage of the Motor Carrier Act of 1980, significant concerns were addressed to the question of the impact on highway safety which might result from the liberalized entry provisions contained in the legislation. Such concerns were based on the concept that—given the vast numbers of new certificates, combined with the expansion of existing certificates—many new carriers would become involved in the trucking industry including many new carriers transporting hazardous materials.

In response to these concerns Congress included a provision which would provide mandatory evidence of financial responsibility—insurance, bonding, et cetera—for all tank truck carriers of hazardous materials, in meaningful amounts. This was based upon the premise that such a caveat would best combine the elements of safety and profitability. In short, the carrier willing to pay for a meaningful safety program would: First, be able to obtain insurance coverage and thereby operate on the Nation's highways; and second, obtain such coverage at competitive rates. The carrier with a poor safety program would either: First, be unable to obtain coverage—thus prohibiting operations; or, second, pay high rates for coverages, thus subtracting from profitability. The entrepreneurial incentive was geared toward safety.

This, therefore, was the basis for section 30 of the 1980 Motor Carrier Act. While similar provisions were enacted with regard to nonbulk, nonhazardous materials carriers, Congress reserved its greatest concern for tank truck carriers of hazardous materials establishing minimum evidence of financial responsibility at $5 million for certain materials; while giving the Secretary of the Department of Transportation discretion to lower the limits to $500,000 for other materials.

While granting the Secretary discretion, the Congress was most direct in its intention. The House of Representatives report on the legislation (No. 96-1069) states at page 44:

The Committee wants to emphasize its strong belief that many of these hazardous materials should also be subject to at least a $5 million minimum, especially hazardous materials transported in bulk.

The report went on to note that Secretarial discretion was included in section 30 because some commodities on the DOT's hazardous materials list would obviously require less than $5 million liability protection—examples: charcoal briquettes and burlap bags.

Last, the legislation provided that the mandatory hazardous materials limits were to be extended to all types of motor carriers—for-hire, private, interstate, and intrastate.

In imposing the requirements of section 30, via regulation, the Secretary has not followed congressional intent. Instead of selecting the higher limits for tank truck carriers of the most dangerous and most commonly transported hazardous materials, the Secretary chose the lowest. Thus, a carrier transporting 9,000 gallons of gasoline need only possess evidence of financial responsibility of $500,000—the same limit required for the carrier of the charcoal briquettes and burlap bags.

The absurdity of the situation is best exemplified by California's highly publicized Caldecott Tunnel accident. Therein, seven persons were killed and there was an estimated $44 million in property damage. Additionally, a six-fatality grade crossing accident in Huntsville, Ala., involving a tanktruck load of gasoline has already produced one personal liability settlement of $9 million. While the carriers in both incidents were covered to responsible limits, the fact remains that had the accidents involved carriers strictly complying with current legal requirements, the burden on individuals and various elements of the public would be tremendous.

Now, in the bill we give the Secretary even greater discretion. But it is our intention that the discretion be used prudently with respect to hazardous materials. For the most hazardous materials, the upper limits should be used. We would not have set the limits in the legislation if we had not intended them to be used. This is a matter of urgency with respect to highway safety and I hope that DOT will not ignore this mandate.

Mr. THURMOND. Mr. President, I rise today in support of final passage of H.R. 6211, the Surface Transportation Act of 1982.

Mr. President, this measure will provide the funds necessary to begin rebuilding our crumbling surface transportation infrastructure and put hundreds of thousands of unemployed Americans back to work. Severe weather, heavy traffic, and years of neglect have left many of our roads and bridges in a deplorable state. A short drive along any of a number of the major thoroughfares leading away from our Nation's Capital bears witness to this fact.

This is not to say, Mr. President, that this measure is perfect. As it was originally introduced, Mr. President, I had grave concerns over certain aspects of the bill, particularly those relating to the heavy-vehicle highway-use tax. While I believe that the trucking industry should pay its fair share for the use of our Nation's highways, I felt that a tenfold increase in this tax would be too much for the industry to bear at this time.

Fortunately, Mr. President, the bill has now been amended so as to make the burden it originally would have imposed much less onerous and more bearable. I continue to have serious reservations about some of the remaining provisions, especially those that would direct that highway trust fund moneys be used to subsidize mass transit and the totally unjustified and, in my opinion, counterproductive expansion of the Davis-Bacon prevailing wage requirements.

On balance, however, I believe that this measure should pass. Accordingly, Mr. President, I call upon my colleagues to give it their support.

GASOLINE TAX

Mr. BOREN. Mr. President, I would like to bring to the attention of the Senate a possible inequity that exists in H.R. 6211 between types of truck semitrailers used to transport goods on the railroads. Under this bill, vehicles that are used both as highway vehicles and as a railway, which have two sets of wheels, one for the road and one for the rail, are exempted from the Federal excise tax. Yet vehicles that are used both as a highway vehicle and on a railway car, which have one set of wheels and are commonly called piggybacks are not exempted. These vehicles are in direct competition with each other, yet this bill appears to provide a considerable tax advantage of one over the other.

I was prepared to offer an amendment which would equalize the tax treatment between these vehicles, but it is my understanding that the chairman of the Finance Committee would be obliged to object due to revenue loss projections and objections from Treasury. Is that the situation, Mr. Chairman?

Mr. DOLE. The Senator from Oklahoma is correct. The revenue projections which I have seen average over $20 million in revenue loss per year over the next 6 years. We could not agree to a measure of that magnitude at this late point in the consideration of this bill.

Mr. BOREN. Then, Mr. Chairman, I will withhold offering my amendment. Could I ask the distinguished chairman if the committee would look at the entire area to assure the equal treatment of various types of piggyback vehicles in the next session through hearings with a view toward possible corrective legislation?

Mr. DOLE. I can assure the Senator that the committee will have an opportunity to consider this issue next year.

Mr. BOREN. I thank the distinguished chairman.

Mr. KENNEDY. Mr. President, I oppose the gas tax bill now pending before the Senate. Let me briefly outline some of my principal objections to this legislation.

The proposed increase in the gas tax is regressive. It will fall heavily on the average working American family, and the poor, and the unemployed. These Americans are already bearing the brunt of the administration's disasterous economic policies, and the tax increase will make their lives that much more difficult. I believe the Senate would have been better advised to adopt the proposal offered by the Democrats that would have repealed the third year of the Kemp-Roth tax cut for the wealthiest Americans. This would be a fairer and more equatable way of providing funds for vital job-creating activities.

Second, I believe the bill reflects unwise fiscal policy. It simply makes no sense, while we are in the midst of the greatest economic depression since World War II, to raise taxes now, for a construction program that will not begin to create jobs for many months into the future. A sound fiscal policy would reverse this approach to create jobs now when we need them most, and not take money from the very consumer whose spending is necessary to fuel the recovery.

Third, Mr. President, I believe this legislation places excessive emphasis on new construction, rather than on vitally needed repairs of our roads. The bill provides far more than the $11 billion the GAO estimates is needed to complete new construction of interstate highways of national significance, and it provides inadequate attention to essential repairs and refurbishment. Repairs are not only needed immediately; they also provide much more rapid job creation.

Finally, Mr. President, I am deeply concerned about provisions concerning mass transit. The bill before us eliminates the inflation adjustment for mass transit projects that are substituted for new highway construction under the transit provisions adopted in 1976. I believe that this provision unfairly discriminates against mass transit projects and interferes with national transportation planning. I am also deeply disturbed by the ceilings placed on mass transit operating subsidies.

In sum, this bill is neither good tax policy, nor good fiscal policy, nor good transportation policy. It is no answer to the desperate unemployment crisis facing our Nation. I support cloture because I believe the Senate should be permitted to work its will, but I urge my colleagues to oppose passage of this legislation.

ORPHAN BRIDGES

Mr. WEICKER. Mr. President, during debate on H.R. 6211, the Surface Transportation Act of 1982, it had been my intention to offer language which would address a critical bridge problem along the northeast corridor. My amendment would have directed the States in expending their apportioned bridge funds to give strong consideration to bridges which overpass the Northeast corridor improvement project. It would not have siphoned money away from the States' major bridge projects. However, in deference to the need to approve this important legislation before the adjournment of the 97th Congress, I instead engaged in a colloquy with my distinguished colleague, Mr. STAFFORD, who is chairman of the Committee on Environment and Public Works, and I commend Senator STAFFORD and his staff for their cooperation and assistance in this regard.

The colloquy focused on 209 bridges which overpass the Northeast corridor for which neither Amtrak nor the States claim responsibility for their upkeep and maintenance. While States do not claim responsibility, they do include these bridges in the bridge inventories upon which apportionments for Federal bridge assistance are calculated. Since H.R. 6211 establishes a new, strong Federal commitment to bridge rehabilitation and replacement, the following bridges have been indentified as "orphan bridges" and clearly would qualify for bridge assistance funding under the bridge repair and rehabilitation program authorized under section 144 of title 23 of the United States Code.

The list follows:

NORTHEAST CORRIDOR BRIDGES—ORPHAN BRIDGES

[OH bridges listed in order of priority for replacement or repairs]

Priority and bridge number	Crossing	Built	Length (feet)
Maryland:			
1—97.45 (SA)	Vincent Street, Baltimore	1873	27
2—97.56 (SA)	Fulton Avenue, Baltimore	1873	27
3—95.77	Charles Street, Baltimore	1915	221
4—97.49	Mount Street, Baltimore	1915	79

NORTHEAST CORRIDOR BRIDGES—ORPHAN BRIDGES—Continued

[OH bridges listed in order of priority for replacement or repairs]

Priority and bridge number	Crossing	Built	Length (feet)
5—99.81	Frederick Road, Baltimore	1932	96
6—120.48	Chestnut Avenue, Bowie	1943	149
Pennsylvania (main line):			
1—7.75	Primos Avenue, Folcroft	1891	121
2—7.58	Folcroft Avenue, Folcroft	1891	63
3—6.05	Calcon Hook Avenue, Curns Park	1896	128
4—14.28	Lloyd Street, Chester	1899	123
5—9.11	Amosland Road, Norwood	1901	97
6—7.16	Sharon Avenue, Sharon Hill	1901	96
7—6.09	4th Street, Darby	1901	103
8—8.03	Ashland Avenue, Folcroft	1904	124
9—17.71	Blue Ball Road, Marcus Hook	1904	143
10—5.31	71st Street, Philadelphia	1915	115
11—86.11	Ridge Avenue, Philadelphia	1917	113
12—64.34	Edgely Road, Edgely	1919	168
13—17.11	Market Street, Marcus Hook	1927	654
14—63.10	Fallsington Road, Tullytown	1929	390
15—88.13	Market Street, Philadelphia	1930	250
16—88.12	Stanton Plaza, Philadelphia	1930	210
17—88.00	30th Street, Philadelphia	1930	300
18—86.93	34th Street, Philadelphia	1930	250

Mr. WEICKER. It is my hope that States, in expending their bridge apportionments, will utilize the 80-20 percent match to address the deteriorating condition of these 209 bridges. I do not attempt to answer the jurisdictional questions surrounding these bridges, nevertheless I hope that States will take action to resolve this significant problem. In my State of Connecticut alone, there are 64 "orphan bridges." I believe the time has come for responsible preventive action be taken by all parties involved.

Mr. President, I would like also at this time to thank my colleague from Connecticut, Mr. DODD, for his strong interest in this matter. I also appreciate the concern expressed by Senators HEINZ, D'AMATO, SPECTER, and PELL over the deterioration of these bridges. I look forward to working with my colleagues in the 98th Congress to insure prompt action on this important safety problem.

ORPHAN BRIDGES

Mr. DODD. Mr. President, I am pleased to join my distinguished colleague from Connecticut (Mr. WEICKER) in sponsoring this amendment which is consistent with the intent of this legislation to direct increased revenues to the rebuilding of our roads and bridges. Specifically, our amendment requires States to give strong consideration in allocating funds made available under this legislation for bridge repair to those bridges which run over rail lines which make up the Northeast corridor improvement project.

The need for this amendment results from the unique status of these so-called orphan bridges. At this time, more than 600 bridges and viaducts cross over Amtrak rail lines in the Northeast Corridor, However, neither Amtrak or the States involved accept responsibility for the upkeep and maintenance of 209 of these bridges—including 64 in my State of Connecticut—due to the fact that the ownership of these bridges was not expressly addressed when legislation was approved providing for Amtrak right-of-way over these rail lines. This confusion over ownership has resulted in a situation where both Amtrak and the States have been reluctant to undertake necessary upkeep and, as a result, the bridges have deteriorated to the point where their condition impedes both local traffic and rail service in our region.

Amtrak estimates that the current cost of repairing these bridges is $100 million. I wish to emphasize that our amendment does not provide additional funding for this purpose. In Connecticut, for example, these bridges are already listed on the bridge inventroy which the State develops and which serves as the basis for the allocation of Federal funds for bridge repair. Our amendment simply cuts through the problems associated with the uncertain ownership of these bridges which constitute a potential danger to motorists, pedestrians, and rail operations. Without some direction of this nature, it is our fear that the problems and time associated with determining ownership will cause further inaction on necessary repairs. While these bridges are being repaired, it is our strong intention that the involved parties seek some resolution of the ownership of these bridges and I would strongly urge the Department of Transportation to assist in this process where necessary. Mr. President, let me restate that this amendment does not require additional spending, but gives strong encouragement to the States to address a situation which threatens the adequacy and safety of the transportation network of our region. I want to thank the leadership and staff of the Committee on Environment and Public Works for working with us on this problem. I particularly want to commend my friend and colleague Senator WEICKER for pursuing this issue with me and I urge adoption of the amendment.

Mr. PRESSLER. Mr. President, I wish to commend my Senate colleagues for their long hours of hard work on section 201 of H.R. 6211, the Highway Revenue Act of 1982. Many Senators representing varied interests originally objected to the House bill. But we in the Senate have devised a compromise that is far superior to the version passed by the House of Representatives.

In particular, I believe that the highway-aid allocated formulas reported by the Senate Environment and Public Works Committee reflect a viable and fair blueprint for restoring our Nation's roads. I am pleased to be a cosponsor of S. 3043, the legislation containing these revised formulas, and incorporated into H.R. 6211 during Senate debate as the Baker substitute.

In the past few years we have seen an alarming trend to ignore the desperate highway needs of rural States. Under the House proposal, my home State of South Dakota would not be given credit for the many actual miles of road that must be maintained to serve our farmers, ranchers, and rural citizens.

The allocation formulas in the House bill discount the interests of States like South Dakota in many major Federal-aid programs, including interstate construction and primary road construction and resurfacing. However, I would like to detail the difference between the House and Senate plans regarding the interstate system's resurfacing, restoring, rehabilitation, and reconstruction—4R—apportionment formulas.

When the interstate 4R program began, funding was based on an assessment of the number of interstate lane miles compared to an estimate of vehicle miles traveled—VMT. The initial formula was constructed to put 75 percent of the emphasis on lane miles and

25 percent on VMT. States like South Dakota fared well under this arrangement because we have a large number of lane miles and relatively low levels of VMT. Last year, the Senate adjusted the formula to one based on 60 percent lane miles and 40 percent VMT. However, in conference with the House, the lane mile ratio was lowered to 55 percent. Consequently, the amount of money available to large rural States for interstate 4R was reduced.

These reductions are disturbing enough, yet the House has passed an allocation formula for interstate 4R money that totally eliminates the lane mile consideration. Such a formula is not in the best interests of the Nation's Interstate System. The key here is the concept of a nationwide highway system. We cannot allow the rural portions of this great transportation network to go into disrepair in order to benefit more heavily traveled highways. I urge my colleagues to carefully consider the ramifications of such a discriminatory allocation formula should it be included in the conference report on H.R. 6211.

POSTCLOTURE PROCEEDINGS

Mr. BAKER. Mr. President, we are in a postcloture situation, I believe, on the bill itself; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Are amendments in order to the bill at this stage?

The PRESIDING OFFICER. Amendments are not in order.

Mr. BAKER. Mr. President, would the Chair please state for the benefit of the Senate what rules apply to debate and at this point of postcloture in respect to the length of time Senators may speak.

The PRESIDING OFFICER. No Senator may speak for more than 1 hour.

Mr. BAKER. I thank the Chair.

Mr. HUMPHREY. Mr. President, unless some other Senator has an urgent wish to be the first to speak after cloture I shall proceed to use some of my time and reserve the remainder if there is a remainder,

Apparently no one else wants to be first.

Mr. President, this Senator believes that President Reagan is getting some very bad advice these days.

May we have order?

The PRESIDING OFFICER. (Mr. GRASSLEY). The Senator from New Hampshire has asked for order.

I ask that both the Members of the Senate, staffs, and visitors in the gallery be quiet, pay attention. Since we have called for order there is less order than there was previously. So I ask the Senator from New Hampshire to suspend until we get order.

Is it satisfactory to the Senator from New Hampshire or does he want me to seek further peace and quiet?

Mr. HUMPHREY. I thank the Chair.

Mr. President, I made the point that the President is getting some very bad advice. From whom I do not know. But in my mind I am certain he is getting very bad advice.

A number of columnists have written on the subject of the gasoline tax and suggested that initially the President was opposed to this gasoline tax, that he was brought aboard by his staff on the argument that if he did not get aboard this bandwagon he would be run over by it.

I do not know whether this contention is true or not, Mr. President, and have no way of being certain.

But inasmuch as the argument has been made by a number of columnists, respectable columnists, including Patrick Buchanan, I am inclined to believe it.

According to a recent column written by Mr. Buchanan—if we might have order, Mr. President.

The PRESIDING OFFICER. The Senator from New Hampshire has asked that the Chair bring order to the Senate.

So once again, for the second time in the 5-minute period the Chair reminds the Senate that the body is not in order and asks Senators to respect the right of the Senator from New Hampshire to be heard.

Mr. HELMS. Mr. President, will the Senator yield to me 1 minute?

Mr. HUMPHREY. I am happy to yield to my colleague.

The PRESIDING OFFICER. First of all, the Chair asks the Senator from New Hampshire if the peace and quiet is satisfactory to him.

Mr. HUMPHREY. It is. Thank you.

Mr. HELMS. Mr. President, the Chair's point is well taken about the order in the Senate.

Third reading was achieved when there was such a hubub around me that I did not hear it.

I am not going to protest, but I do hope that the Chair will do everything possible to maintain order in the Senate because we are entitled to hear what is going on.

Now, this hubbub to which I referred was very costly to us in terms of certain procedures, and I am not going to protest because maybe I should have been sitting on the front row or standing in the well, as I have to do a lot of times, to hear.

But I do hope the Chair will maintain order in this Chamber.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. EAST. Mr. President, may I make a parliamentary inquiry?

The PRESIDING OFFICER. Does the Senator from New Hampshire yield?

Mr. HUMPHREY. I am delighted to yield.

The PRESIDING OFFICER. What is the desire of the Senator from North Carolina?

Mr. EAST. In addition to Senator HELMS' point, was it appropriate to have third reading on the same legislative day?

The PRESIDING OFFICER. It was not so appropriate.

Mr. EAST. Pardon?

The PRESIDING OFFICER. It was not. If the point of order had been raised it would have been subject to a point of order.

Mr. HELMS. That is the point, Mr. President.

Mr. EAST. We raise the point of order.

Mr. HELMS. Too late.

Mr. EAST. I think clearly that what was done was not in conformity with the rules of the Senate and it clearly was done, Mr. President, while there was disarray in the Chamber, and I do not look upon it as a fair and ethical calling.

The PRESIDING OFFICER. The point of order is not timely.

Mr. EAST. The point of order is what?

The PRESIDING OFFICER. The point of order by the Senator from North Carolina is not timely and hence out of order.

Mr. EAST. But it is conceded by the Chair and by the Parliamentarian that having third reading on the same legislative day was contrary to the rules of the U.S. Senate.

The PRESIDING OFFICER. The Senator from North Carolina is correct.

Mr. EAST. How does one justify that? I put that question to the Chair.

The PRESIDING OFFICER. On many occasions in the past the Senate has had third reading on the same legislative day and points of order not being raised hence we can continue in the normal course of business.

Mr. EAST. Mr. President, let me continue this parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. EAST. The Senate was in disarray. Senator HELMS has already made that point, and the Chair is falling back on the very feeble explanation that the rules have been violated before. Under the laws of the United States, let alone of the U.S. Senate, is that a justification for deliberately violating the laws and the rules of the Senate when the Senate was in a period of disarray?

I find that hard to accept. That is hardball, that is parliamentary hardball, is it not, beyond the rules of the Senate itself, and at some point I

think it is appropriate to make that point that what occurred could not under the rules of the Senate occur on the same legislative day, and the decision and the call was made while the Senate was in disarray. I call that going beyond the pale of the rules.

Mr. BAKER. Mr. President, will the Senator yield to me for a moment without losing his right to the floor?

Mr. HUMPHREY. The Senator from New Hampshire has the floor.

Mr. BAKER. Mr. President, will the Senator yield to me without losing his right to the floor?

The PRESIDING OFFICER. Will the Senator yield to the majority leader?

Mr. HUMPHREY. I yield.

Mr. BAKER. I surely hope the Senator from North Carolina does not think anybody has tried to play hardball with him, but the Chair has acted, in my opinion, in the way the Chair should act under the circumstances. But if the Senator is seriously concerned about that, the remedy is simply for me to adjourn for 1 minute. We are in a postcloture situation, and if I do that and the Senate will agree to adjourn, then we are back on this measure.

There is no reading of the Journal, nothing comes over under the rule, nothing of the procedure that follows after adjournment is actuated, and we are right back where we started. But I will do that if the Senator wishes. But I respectfully suggest there is nothing improper in what the Chair did. Indeed, there was implicit in what he did that this was routine and regular, and if you want to pull the whole thing out, we will vitiate it and move to adjourn.

Mr. HELMS. Mr. President, will the Senator yield to me? The majority leader and I discussed this point earlier in the evening, and he is exactly right.

The point I was making, Mr. President, is there was not order in the Senate. I was expressing the hope that the Chair would maintain order. This is a minuscule point, since the majority leader can adjourn for 1 minute, which he told me he would not do. Being conversant with the rules, I think not much time is involved, but just to keep the record clean so that everybody will be satisfied, I hope the majority leader will vitiate that and go through the routine. It will take about 2 minutes.

Mr. HUMPHREY. Mr. President——

Mr. BAKER. Mr. President, will the Senator yield?

Mr. HUMPHREY. Only on condition that my time may be back up to the time I first yielded.

Mr. BAKER. I am happy to do that.

The Senator from New Hampshire has the floor. If I may gain the floor in my own right, that will stop the time running of the Senator from New Hampshire.

I seek recognition.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. HUMPHREY. Point of order. Does the Senator from New Hampshire have the floor?

Mr. BAKER. I would not impinge on the Senator at all. I thought the Senator was concerned about time running against him, and I was proposing to change that by seeking recognition in my own right.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the time consumed in these various colloquies of the last minutes be removed from the time consumed by the Senator from New Hampshire of his 1 hour.

The PRESIDING OFFICER. Is there objection?

Mr. HUDDLESTON. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Let us not get tangled up. The Senator had a minuscule point. Will the Senator yield to me for a moment?

Mr. HUMPHREY. I will.

Mr. BAKER. Let me propose that I gain the floor in my own right. Let me propose that we go back and start over from scratch.

I propose I may be recognized for the purpose of vitiating third reading, at which time I would be recognized for the purpose of moving to adjourn for 1 minute.

Mr. President, I make that request in the form of a unanimous-consent request.

Mr. ROBERT C. BYRD. Mr. President, before the Senator moves——

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. I would hope Senators would not press the majority leader to do this. What has been done is often done. The Chair often—once we give unanimous consent that a measure may be called up, we vitiate the 1-day rule. We do not necessarily vitiate the 3-day rule. But very seldom does anyone raise any question about that 3-day rule once we have given consent that the measure be called up, in which case the Chair proceeds to see if there are no further amendments, third reading. That is what happened here. He made it very clearly. I sat here and listened to him.

Mr. HUMPHREY. Pardon me, is the majority leader speaking on the majority leader's time? I yield no further on this.

Mr. BAKER. Will the Senator yield to me for a unanimous consent request?

Mr. HUMPHREY. No, sir.

The PRESIDING OFFICER. Will the Senator from New Hampshire yield the floor?

Mr. BAKER. If the Senator will yield to me, I will make the request I just suggested and that will put us back to square 1.

Mr. HUMPHREY. Very well, I yield.

Mr. BAKER. Very well.

VITIATION OF THIRD READING

I ask unanimous consent that third reading of the bill be vitiated. I ask unanimous consent that immediate thereafter I may be recognized for the purpose of making a motion to adjourn, and that no debate, no motion, no point of order may be raised against either one of those proceedings.

The PRESIDING OFFICER. Is there objection?

Mr. HOLLINGS. I object.

Mr. BAKER. Fritz, let me do this.

Mr. HOLLINGS. All right.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Has third reading been vitiated?

The PRESIDING OFFICER. It has.

ADJOURNMENT

Mr. BAKER. Mr. President, I move that the Senate stand in adjournment for 1 minute.

The PRESIDING OFFICER. The question is on agreeing to the motion to adjourn.

The motion was agreed to; and at 9:17 p.m. on Monday, December 20, 1982, the Senate adjourned until 9:18 p.m., the same day.

AFTER ADJOURNMENT MONDAY, DECEMBER 20, 1982

The Senate met at 9:18 p.m., pursuant to adjournment, and was called to order by Hon. CHARLES E. GRASSLEY, a Senator from the State of Iowa.

THIRD READING

The PRESIDING OFFICER. The pending business is third reading of the bill.

The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time. The bill was read the third time.

Mr. BAKER. Mr. President, just in case we have not covered it, I ask unanimous consent that no time consumed in debate thus far be charged against the distinguished Senator from New Hampshire.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, how much time do I have?

The PRESIDING OFFICER. Sixty minutes.

Mr. STEVENS. Mr. President, will the Senator yield for a parliamentary inquiry?

Mr. HUMPHREY. Yes.

Mr. STEVENS. Mr. President, does the two-speech rule apply after cloture procedure?

The PRESIDING OFFICER. It does. The two-speech rule applies.

Mr. HUMPHREY. A parliamentary inquiry, Mr. President.

Can a Senator not manage his 1-hour time under rule XXII in any way he wishes?

The PRESIDING OFFICER. He may, but there can be no violation of the rules in so managing his time.

Mr. HUMPHREY. Very well.

Mr. President, I began by making the point that in the opinion of this Senator the President of late has been very badly advised on a number of issues. May we have order. Mr. President?

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. I thank the Chair.

Mr. President, it is alleged by a number of people, presumably in a position to know, that at first President Reagan was not inclined to support this gasoline tax, but that he was brought aboard to support it by his staff who advised him that the juggernaut was rolling and he had either better get out of the way or he was going to be crushed beneath it.

And this point was central to a piece written by Patrick Buchanan, published some days ago, who quoted some unnamed White House official in the following way: "If we had waited, the train would have left the station," referring, of course, to the gasoline tax.

Mr. President, I think those of us who have tried to oppose passage of this gasoline tax have made an important point. Just in case it has escaped my colleagues in confusion, and particularly if it has escaped the nincompoops at the White House who badly advised the President on this point, if four U.S. Senators, three of whom are freshmen, very nearly defeated this gas bill, it would have been very easy for the President not only to kill it but to keep it off the calendar at all. But the President was badly advised if Mr. Buchanan and others with excellent credentials and easy access to high officials in the White House were correct in their assertion that President Reagan really did not want this bill but was persuaded to support it by some White House officials.

I offer my congratulations to what appears to be a victory to the President, to the Secretary of the Department of Transportation, who is a persistent man, to the majority leader and the Senate leadership. But, in my opinion, this is no victory. If it is a victory, it is a mighty hollow victory. Now the press marginally against President Reagan will add to the list of their inconsistencies—which includes, as they put it, the largest peacetime tax in history—a very regressive tax on gasoline which, in large measure, was unnecessary in the view of this Senator. And so it is not only a victory, it is a disaster.

Mr. President, why has this bill been pushed so very hard? I cannot imagine. It is bad economics. How many times have those of us, on this side of the aisle, at least, heard the sermon about not raising taxes during a recession. I have heard it. I have preached it. I believe it. I thought President Reagan believed it. I thought my party believed it.

And yet we are raising taxes at a critical moment in the recession when the economy is grasping for straws, desperately struggling to gain footing, struggling to get on its feet. And this administration, with the cooperation of Republicans, has just delivered a knee to the groin of this economy. It is an economic mistake. It is a political disaster.

Some contend that this measure, this increase in the taxation, the net tax burden on our country, will create jobs. What utter nonsense. If raising taxes creates jobs, then why stop at a nickel? Why not 50 cents, so we create twice as many jobs? Why stop with gasoline? Why not increase the taxes on other things, as well? Indeed, why not confiscate paychecks in full? Why not simply wrest the paychecks from the hands of working men and women and decide we will spend it because we want to create jobs and we know how to restore prosperity?

May we have order, Mr. President.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from New Hampshire.

Mr. HUMPHREY. I thank the Chair.

It is perfectly clear, on the basis of simple logic, that this is a bad time to be raising taxes. And this tax does raise the net tax burden on our people and on our economy.

It seems clear, to this Senator, at least, that it will not create jobs. It will transfer jobs, yes, but what does that do except maybe some political good that permits Members of Congress to claim they are doing something about unemployment?

The gasoline tax, in the sense of creating jobs, is a political sleight of hand. Yes, we will increase employment in the construction industry, but we will reduce employment and reduce job creation in the private sector by this levy of $5.5 billion per year. The notion that we are creating jobs is New Deal nonsense, it is Keynesian claptrap, it is hypocrisy. We are not. We are destroying jobs.

Well, then, if it is not a good time to enact this tax and it does not create jobs, why do we need it? Well, the next retort of the proponents is that unless we do so this week and not next month or February, when the new Congress comes in, unless we do it now, why, bridges all across the country will be plunging into rivers and highways will be crumbling before our very eyes. This contention, although, of course, I have exaggerated it to a degree, is also nonsense on its face. Another month or 6 weeks, time enough so we can consider this with due process and careful deliberation—which it has not received—is not going to make a material difference.

So it is not needed for the economy. Obviously the economy does not benefit by raising taxes. It is not going to speed up the recovery, it is not going to create jobs, and it is immaterial whether we wait 6 or 8 weeks and do it correct. So why, then, all the pressure to have this bill?

Well, it has come down, I am afraid, to a matter of saving face. Maybe that is not so bad for the President. It is important that he win most of these efforts. But I hope that he and his men have learned a lesson and that the President will be a little bit more hesitant to accept the kind of advice he has been getting lately from his advisers. He could easily have stopped this tax. Simply by telling the Senate and the House leadership he did not want it would have been enough.

But, instead, we have gotten ourselves into a real mess where Republicans have aired their dirty laundry in public. Maybe some good will come out of that. I know the Senator from New Hampshire has a few malodorous socks he would like to air still but I shall wait for a private moment to do that.

Mr. President, this tax has been described as a user fee. And, to some extent, that is true, and I support that approach. And were there some offsetting tax reductions so that there were no net tax increase upon the economy, then the Senator from New Hampshire would be a lot more inclined to support this bill.

At the same time, how do we describe as a user fee the spending of 1 cent collected from motorists for mass transit? Tell that to the motorist pulling up to a gas pump in New Hamshire, that 1 out of 5 cents about to be collected from him by way of a tax increase is going to be spent on subway riders or cars in New York City and that it is just a little old user fee. He will not swallow that, I can assure you. It is not a user fee. It is intellectual dishonest for us to sell it on that basis.

Mr. President, there are many provisions in this bill which are bad, if not pernicious, one of which is the expansion of the applicability of the Davis-Bacon Act; a sorry act that has been on the stature books for decades too long, for which repeal has been urged time and time again by responsible and respectible bodies; a bill which cost taxpayers, on the average 36 percent more in construction costs, on construction projects where Davis-Bacon applies, in contrast to those

projects in which it does not apply. If anything, we ought to be repealing Davis-Bacon or at least exempting project funding by this tax increase from Davis-Bacon.

If we are truly concerned—I have heard a lot of pious sentiment here about our National Highway System and about how it is falling rapidly into disrepair—if we are truly concerned about repairing our highways and truly concerned about the interest of the taxpayers, obviously, we would want to do all that we can to insure that we get maximum value per dollar. Is that what we are doing? No, we are not doing that at all, although we have an opportunity to do it.

Instead, we are extending the applicability of Davis-Bacon from strictly new construction, to which it was formally restricted, to highway repairs, as well. So it is a giant step backward at a time when we could have taken a giant step forward.

There are other unfortunate provisions. It extends the responsibility of the Federal Government into areas of State responsibility at a time when, under the new Federalism thrust of this administration, the progress is supposed to be in the other direction.

Mr. President, I believe I already touched upon the disappointment of a number of us on the way in which this bill has been handled. It has been railroaded through the Congress. It has been rammed down our throats. There have been, I am told, only 2 hours of hearings on this gasoline tax. There are no reports, despite the fact that the matter came before at least three committees. There is not one single report available to Members to consult in their deliberations on this bill, not one. It is customary, of course, to have such reports.

There has been no time for a national debate to ensue, no time for a national consensus to evolve.

The Senator from New Hampshire went through his mail yesterday on this subject. He has stacks of telegrams from highway builders. He has stacks of telegrams from trucking companies. But so far he has only a smattering of letters from constituents interested enough to write individually written letters. Why is that? Because they do not care about paying a nickel more per gallon? Not at all. In my view, it is because this has been rushed through the Congress so fast there has not been time, given the slowness of the mail through the U.S. Post Office and the Senate Post Office, to reach the desks of the individual Senators. We are flying blind. We do not know how the people will really feel about this tax at this stage. But we have to press on for surely if we do not there will be no highways to repair in January when the new Congress comes in.

It would be better to put this aside and save it for a time when it could be considered calmly and rationally, when it could be given due deliberation, when adequate hearings could be held, when witnesses could be called, when a national debate could ensure, a consensus formed and reports issued to Senators so that they could read them and be knowledgeable on this very complex bill.

Mr. President, I began by referring to a column by Patrick Buchanan in which some unnamed White House official with whom he had talked said, "If we had waited, the train would have left the station."

In his piece, Mr. Buchanan, among other things, had this to say in particular about the train that the White House was worried about missing. Quoting Mr. Buchanan:

> And what is Ronald Reagan doing aboard a train headed in a direction opposite to the one in which he promised to point the United States?

I ask that question as well, Mr. President, as one of the earliest supporters of Ronald Reagan for his party's nomination, one who spent days with him on the road riding a campaign bus over the highways of New Hampshire, one who has been delighted to defend him against vicious charges, and one who wishes him well. But one who is growing tired of seeing his President pushed from the course which he had set for himself and the Nation by those who do not truly share his point of view.

If Ronald Reagan is President, then let Ronald Reagan be President. If we are going to try Reaganomics, then let us have Reaganomics and not some watered-down mush dredged up from the history of past administrations which has failed.

The President has been badly advised. He could easily have killed this bill, and I think we have proven it over the last week or 10 days.

Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from New Hampshire has consumed 16 minutes 37 seconds.

Does the Senator want to yield back the remainder of his time?

Mr. HUMPHREY. No, he does not.

Mr. President, I would like to talk about the filibuster, the perceived filibuster, that has taken place in this body, or a series of filibusters, actually.

Some have suggested that the use of the rules by a small number of determined Senators is somehow a perversion of the process, somehow unethical.

Instead, I would contend that the rule which permits extended debate, rule XXII, has worked very, very well in this case, very well. It has almost—unfortunately, not quite—prevented passage of a bill being railroaded through Congress without due process and without adequate consideration. It is a good thing when something like that can take place.

I was fascinated and educated in listening to the remarks of the distinguished junior Senator from North Carolina last evening. I regret that he lost the floor because he certainly had my rapt attention. He certainly has one of the clearer minds in this body, a man of lucid logic, a man well steeped in the history of our Republic and in that crazy science called political science, a man with the courage of his convictions, a man who knows that he is here to represent the people of his State and the people of the United States and not 99 other Senators.

I thought his remarks were excellent. I thought he well answered some rather rudely put inquiries.

One of the points on which he was particularly eloquent was the origin of rule XXII, and the fact that it is a democratically constructed rule, that is to say, it was created and can be changed, amended, or deleted by the democratic rules of the Senate.

It is a democratic process. The filibuster rule, to use the plain word, is one of the catalog of checks and balances that we have in this country to prevent a majority from abusing the minority.

I would point out that, in the knowledge of this Senator, at least, there has never been a matter about which the people of the United States felt stronger that was frustrated for any great length of time by the filibustering rule.

Yes, filibustering has sometimes delayed, annoyingly delayed at times, the exercising of the will of the American people, but never indefinitely. I hope it will always be so, I hope we always have that rule. It is a good rule.

I want to point out further, Mr. President, that anyone who consults the record of this last week or 10 days will find that, by far, the vast majority of the time consumed on this floor, including that during the 36-hour straight session we had the other day, was time consumed in the normal process of offering and debating and voting upon amendments. The Senate has fallen all over itself and made a fool of itself this last week. It has not been so much the fault of filibuster as the fault of trying to deal with matters that we had no business taking up in a lameduck session, which no one anticipated being taken up in a lameduck session, which had not been announced as pending during a lameduck session.

If we got ourselves tangled up in the tarbaby, it is not the fault of those who have been resisting the gasoline tax.

Mr. President, I point out further for myself that it has been my inten-

tion to delay only the gasoline tax and no other measure, important or otherwise, pending before this body during the lameduck session. I stated on the floor and in public that I would not delay the continuing resolution or any other business of the Senate, and I have not. I think the Senator from Kansas will agree with that.

Mr. DOLE. Will the Senator yield?

Mr. HUMPHREY. Mr. President, I ask unanimous consent that I may yield to the Senator from Kansas without losing my right to the floor and without, upon resumption, my remarks counting as a second speech.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. I only interrupt the Senator to confirm what he just stated. As I indicated to him earlier, as far as this Senator knows, the Senator from New Hampshire has done nothing to delay anything but the gas tax bill. I have been on the floor every minute, and with the exception of a couple of amendments we adopted, offered by the Senator from New Hampshire, which were acceptable and may have taken 5 minutes, this Senator knows of no other except a brief statement by the Senator from New Hampshire. We shall include in the RECORD, and I have asked the clerk to compile a record of just how the time has been allocated the last few days so the RECORD will show and the public will know how the time was consumed.

I do affirm the statement just made by the distinguished senior Senator from New Hampshire.

Mr. HUMPHREY. I thank my friend from Kansas. I hope he remains my friend. I certainly feel friendly to him from time to time. He is a fine man, though we do not always agree. That is a part of politics.

Mr. President, I will admit that when I began, I was under the impression that I might interrupt my speech without getting zapped, but the Chair has me worried on the basis of earlier statements. Nevertheless, I am going to take a chance, because my colleagues advise me that they "know a way around" this problem. I am inclined to think they do, so I am going to yield the floor at this point and, for whatever it is worth, state that I reserve the remainder of my time.

Mr. EAST. Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection——

Mr. EAST. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will resume the call of the roll.

The legislative clerk continued with the call of the roll.

Mr. EAST. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Does the Senator from North Carolina desire to be recognized?

Mr. EAST. Yes, Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. EAST. Mr. President, I would like to utilize some of the time I have been allocated under the post-cloture rule of 1 hour for discussion and debate.

First, I want to thank the distinguished senior Senator from New Hampshire for his remarks about my comments the other evening. In particular, he made reference to my comments on the filibuster and the democratic process.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator from Kansas raises the point that the Senate is not in order.

Mr. DOLE. The Senator is entitled to be heard.

Mr. EAST. I thank the Senator from Kansas. I thank the Chair.

The PRESIDING OFFICER. The Senator from North Carolina may proceed.

Mr. EAST. There are those who will feel, and understandably—it is always so at the late hour when the filibuster is employed—that some way or other this does not seem appropriate; it seems out of order, but I should like to note that as regards the democratic process the filibuster rule provision was developed under the rules of the Senate, which is a democratic institution. It has the power under the Constitution to set its own rules, which it has done. The very purpose of the filibuster, that is, of allowing individual Senators to speak, is to slow down rash action on the part of the majority.

There are a number of us who feel this gas tax bill is rash. It is not a good bill to begin with. It comes late in the session. It comes possibly on the last day of the session. There is a great desire on the part of some, its supporters, to push it through.

I wish to note that yesterday the distinguished chairman of the Senate Finance Committee, the Senator from Kansas, for whom I yield to no one in my admiration as an individual and skill as a Senator, was encouraging, and understandably perhaps in his perspective, Senators not to speak on the issue, which I understand and certainly do not mean to intend reflects adversely on the distinguished Senator.

But it does, in my judgment, suggest the problem here that at the tail end of the session, in the wee hours of the morning, we run the risk of passing poor legislation. Ultimately, that will reflect adversely upon the deliberative process, which is the toughstone of the democratic process, namely that you have carefully examined and concluded that a particular measure is in the best interests of the country—in this case, we are U.S. Senators—and also in the best interests of our respective States.

I have searched my conscience on that point, and I find it in the best interests of neither the people of the United States nor the people of my State of North Carolina.

Trying to put this thing in perspective and trying to get a genesis of the problem, one will recall that the purpose of the lameduck, at least it was agreed upon, as the distinguished Senator from New Hampshire noted, was to deal with appropriations bills and/or with the continuing resolution.

A number of other things crept onto the agenda and the list grew—Radio Marti, for example; S. 99, for example. Those measures failed to survive cloture votes. They were pulled down and sent on their merry way. But for some reason or other the gas tax, like the cat with nine lives, kept being resurrected. I think it is being given not equal treatment under the rules and the law, but it is being given superior treatment for some reason.

Now, if in terms of merit it warranted it, I could understand. But I do not see, on the basis of the merit of it, why it was required that every effort be made to keep it alive and on the agenda. It has meant one of the most heavy expenditures of the energies of this body, and, of course, in conjunction with the administration, to keep this one alive and well.

Initially, I felt the measure deserved to be considered, to be examined, and, if it could survive a cloture vote initially, to have gone into it. But it could not do that any more than these other measures. It failed the test. Yet, we find that there was this effort to go back, pull it out, and do everything they could to get it back on the agenda.

At that point I felt it was a new era on this measure, and hence the need to resist it.

The lameduck has attempted to do too much, and we were right at the beginning of the lameduck, when something could not survive a cloture vote, to pull it down and move on. And if we had done that with this one, we would have finished the appropriations measures and/or the continuing resolution and we would be out of here.

So I am resistant to the notion that some way or other it is those of us who are unhappy with this measure who have insisted on prolonging the lameduck. To the contrary, it is those who have concluded, come whatever, that this measure must come before this body and it must be passed.

Now, the distinguished Senator from Kansas had noted way before the lameduck that he thought we ought to consider probably solely the social security issue.

That was a good proposal, a single issue in the case of an entitlement program, a fundamental problem in terms of restoring the integrity of it so that we could begin to restore the integrity of entitlement programs generally. It would have been a great precedent. I think the distinguished chairman of the Finance Committee made an excellent suggestion at that time.

Well, that did not gain much support, and so then it was concluded, and I recall the distinguished chairman of the Senate Appropriations Committee, the senior Senator from Oregon, saying that we ought to confine ourselves to appropriations measures and the continuing resolution. Well, that made eminently good sense, too.

I should like to point out that our leadership here, including the distinguished majority leader, for whom I yield to no one in my admiration as an individual and his personal character and integrity. I have voted for him in the past to be majority leader, and I will go on record right now, tonight, saying that in January one of the greatest pleasures I will have will be to vote for him as majority leader. He is a man of great character, great talent, great integrity.

We have then excellent majority leadership. Originally Senator DOLE said, "Let's try social security." Then, second, the distinguished chairman of the Appropriations Committee said, "Well, there is not much sentiment for that. Let's go to appropriations and the continuing resolution."

So that was agreed upon and seemed eminently reasonable and responsible. But I repeat, what happened was the list began to grow, so again the test was, can you survive cloture? If you cannot, you are pulled down—Radio Marti, S. 995. But again, it is the gas tax that has the nine lives of the proverbial cat; it keeps coming back. And so finally at some point I felt in my own mind I was relieved of the obligation—and I think others have, too, who have assisted us in this effort—to acquiesce in it; it could not survive the hurdles these other measures had to face. Why should this be allowed to keep coming back again and again and again?

What was so sacred about it? Was it that well conceived? Was it that substantively sound?

I submit the answers to those questions must be no.

So again, I submit for the first problem, is the lameduck session. The error was along the way, and I am not suggesting anyone in particular is to blame. This thing grew like Topsy and all of a sudden it became clear that the crown jewel of the lameduck would be a gas tax, 5 cents a gallon.

I got to thinking to myself for me to have to go back to North Carolina and when they said, "Now, EAST, what is the great accomplishment of the lameduck," I would say, "Well, we passed the continuing resolution," which is not a major accomplishment. We had to do that anyway.

I would say:

No, the crown jewel is the gas tax.

Oh, well, Senator, explain that to me.

Well, you are going to be paying a nickel a gallon more on gasoline.

You mean, Senator, that is the main thing you accomplished while you were up there, another 5 cents a gallon on my gasoline?

I do not think it is a good idea, and I have tried to figure out some way or other that I could in good conscience rationalize that this was a good thing, that it was positive, because I know in my State—oh, sure, you can find people who will support anything in this country if you look hard enough—but generally in my State there is strong opposition to it, and there was not any way that I could go back to North Carolina and be content with saying, "This is what we had done," and then the question will be:

Well, Senator, what did you do to stop it.

Well, I really did not do a great deal. I just kind of drifted along with the crowd.

Oh, I see. Now, when did you say you come up again for relection?

Well, 1986.

Well, we will remember that, Senator.

I presume they would be saying to themselves because I can tell you when I was sent up here by the people of my State it was not to drift along with legislation that I in my good conscience felt was not in their best interests or in the best interests of the country, or I might try this angle with them.

Well, I might say:

I do not think it is any good either, but I will tell you the problem was I would have inconvenienced my colleagues if I had not acquiesced because, you see, it was just before Christmas, it was time to go home.

But that is not very persuasive, either.

So what we have to fall back on I will acknowledge and I regret it and I do not do it with relish or any great feeling of satisfaction, we have had to avail ourselves of the rules of this distinguished body to try to do two things:

One, to delay a final vote on it so, two, that people might reflect upon it carefully and thoroughly.

All I am trying to do is to see that the deliberative process has been thoroughly exhausted on this measure and if it finally goes through then I can go back to my State and I can say to my voters and my constituents:

I fought the good fight, we finished the race, we kept the faith.

Yes, perhaps, we will have to report we lost. But there will not be any way that the good voters of North Carolina, I hope, can say:

Well, doggone it, East could have done a better job to fight that thing. He should have tried to head it off. We did not hear his voice raised very must in opposition to it. He did avail himself of his parliamentary opportunities. I do not know quite why we sent him up there.

So and so forth.

So it was in that spirit that I and I think the others have joined in this effort to make sure that this body is comfortable not only in terms of national policy but in what it is going to do to their respective States.

This bill, Mr. President, has many weaknesses in it.

I do not wish to worry my brethren going into them all again, but I will simply tick them off quickly and remind them that the bill is a regressive tax upon the working people of this country. Gas is a necessity; it is not a luxury. It is not a luxury. It comes in a time of, yes, recession, when you are trying to stimulate purchases by people at all levels. This will be taking away purchasing power. That, candidly, I would consider a negative.

I do not know of any economist worth his salt from left to right who recommends that taxes should be raised in time of recession.

Above all, because you are trying to stimulate purchasing power, certainly among those in the middle and lower rung of the economic scale as well as those at the top, but as you begin to scrape off, again you run the risk of lowering purchasing power.

Certainly, that is not the good thing to do, when we are all sitting on the threshold of hoping that this economy will turn around, How? By there being greater consumer demand and here consumer demand will be diluted by a new tax.

It has to be an economic negative.

I can understand why there would have been the suggestion by the distinguished Senator from Kansas that it is best not to go into this measure extensively. If I were a proponent of it I would discourage that also. It is not very soundly conceived.

Mr. President, the tax is regressive. The tax is coming in the time of recession. I consider those in and of themselves enormous negatives.

Mr. President, an additional objection that I have to it, one that has been alluded to before is this question of the user fee concept. We are told that this is not really a tax. We are

told it is a user fee, somewhat the new euphemism in Washington in terms of tax parlance and jargon—user fees, revenue enhancers. The ability of language and certainly the English language is endless, and that is good. It is one of our great cultural tools. But user fee, revenue enhancer to me it is the old problem of a rose is a rose is a rose. This is a tax of 5 cents per gallon on gasoline.

It is not even strictly a user fee because under a user fee as we have noted and others have noted user fees mean precisely that. You collect from the user of something and you directly without dilution or diversion put it into the thing used.

With all due respect to people with mass transit, when you slice it off 20 percent of your tax for mass transit, by definition that is not a using group. By definition users of mass transit are not using the roads, the highways, and the bridges. They are using mass transit in the urban centers.

If we want to have a specific tax for that, a user fee tax or whatever, I would be happy to consider it. But certainly if you place a user fee tax on the users of the highways and in the rural areas of North Carolina, you send it up to other areas for mass transit, that is not a user fee any more than if we place a tax upon the users of the subway in New York City and send it down to rural eastern North Carolina and tell the good people of New York it is a user fee. They do not use the rural roads of eastern North Carolina.

When you violate the fundamental tenet of the user fee, as we are doing here, that is bad tax policy. It is bad precedent. It is not to reflect adversely on the need for mass transit or from our great colleagues who represent urban areas who need this kind of a system.

Mr. RANDOLPH. Mr. President, will my able colleague from North Carolina yield to me for a very short comment of about 1 minute?

Mr. EAST. I will happily yield.

Mr. RANDOLPH. If it will come out of my time?

Mr. EAST. If it comes out of the Senator's time, I will yield on that basis.

Mr. RANDOLPH. I thank my colleague.

In effect, the able Senator said that the people of New York and other cities would not be using other than mass transit. The fact is that North Carolina is a State of great tourism, beautiful, and people by the thousands come into North Carolina and West Virginia and other States, and they buy their fuel for hundreds of miles in those States and so, in effect, the people from, let us say, the more metropolitan areas of Philadelphia, Pittsburgh, New York do go to rural States.

The people in Boston go into Vermont, New Hampshire, and Maine. We are a mobile society, and people move really by the millions every year, and not just in the areas of their own counties or their own States, but they move across America, across America where people from the East go to the west coast, people from the West go to the east coast. They go from the Maine area moving down into Florida, spending weeks and weeks in that sunny clime. They buy gasoline.

I think on balance perhaps there are as many users from some of the more metropolitan areas of the country who are coming into North Carolina and West Virginia, and I feel that that argument perhaps is in a sense not fully valid, that argument which my good colleague is making.

I thank my colleague.

Mr. EAST. Mr. President——

The PRESIDING OFFICER (Mr. SPECTER). The Senator from North Carolina.

Mr. EAST (continuing). I would like to move the further consideration of the bill be postponed until tomorrow.

Mr. STAFFORD addressed the Chair.

Mr. EAST. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll to ascertain the presence of a quorum.

The assistant legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. EAST. I object, Mr. President.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. I object, Mr. President.

The PRESIDING OFFICER. The objection is heard.

The clerk will resume the call of the roll.

The clerk continued with the call of the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The motion by the Senator from North Carolina to postpone the matter to a subsequent day is not in order. Cloture requires that the Senate remain on the matter on which cloture has been invoked until that matter has been disposed of. A motion to postpone to a subsequent day is not a final action; therefore, the motion is not in order.

The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I support this legislation.

H.R. 6211, the gas tax highway bill, is essential for revitalizing Iowa's highway system. During the past few days I have been in communication with representatives of Iowa's Department of Transportation, the U.S. Department of Transportation, the Associated General Contractors of Iowa, and the Road Information Program to review the vast transportation needs of my State and to study what this pending legislation can offer. I would like to share my findings with my colleagues because I imagine Iowa's situation is not that much different from that of most other States.

The Federal Highway Administration has determined through the highway performance monitoring system that over 68 percent of the pavement on Iowa's main road system is deficient. This represents nearly 18,000 miles of Iowa's road system that carries over 87 percent of our State's total traffic volume.

Almost 2,000 miles of paved roads are rated as "poor" by AASHTO standards, which means that the roads are severely cracked, rutted, or broken. Riding quality is described as "intolerable."

The other 15,915 deficient miles of roads are identified as only "fair" by AASHTO standards. Riding quality on these roads is inferior not only because of ruts and cracks, but also because of the bumps created by extensive patching.

Over 3,000 miles of Iowa's pavement is over 40 years old although the design life expectancy was only 20 years. Furthermore, 3,600 miles are substandard with regard to width. These roads are narrower than 24 feet, and in many instances, as narrow as 18 feet.

The poor condition of Iowa's highways causes the waste of fuel and increases tremendously the costs resulting from damage to motor vehicles and tires.

Road deterioration is not the only problem facing Iowa. Indeed, the disrepair of our bridges present a major transportation problem.

The Federal Highway Bridge Replacement and Rehabilitation Program's Third Annual Report to Congress submitted this past March identified well over 13,000 bridges in Iowa as deficient. This equals over 52 percent of Iowa's 25,556 bridges over 20 feet in length.

These 13,000-plus deficient bridges can be separated into two major categories. Over 5,600 are "structurally deficient" by Federal inspection standards. These bridges are unable to accommodate maximum allowable vehicle weights because of deterioration of the surface and support structures. The second category of bridges are "functionally obsolete" because of restrictive width and height clearances and inadequate roadway approaches.

Four hundred of Iowa's bridges need immediate repair. These are presently or soon-to-be embargoed. Six hundred need repair within 5 years. Most of these bridges are more than 40 years

old and must be repaired or rehabilitated. Over 1,100 State bridges are over 50 years old and are designed for 15-ton trucks, not 40-ton trucks.

Based upon present needs—not the cost of future road and bridge deterioration, not the impact of future inflation, and not the minor structural repairs for general maintenance—over $8 billion are required to cover the backlog of road and bridge renewal needs in Iowa. Based upon an ordinary 10-year road program and 15-year bridge program, this translates into an average of $625.6 million in constant dollars each year for the first 10-year period. The estimates break down as follows:

Resurfacing—15,915 miles at $88,000 per mile—the cost: $1.4 billion or $140 million per year for next 10 years.

Rebuilding—1,925 miles at $650,000 per mile—the cost: $1.25 billion or $125 million per year for next 10 years.

Bridges—13,284 bridges at $407,000 per bridge—the cost: $5.41 billion or $361 million per year for next 15 years.

The total cost: $8.06 billion or $626 million per year for next 10 years.

A review of the fiscal year 1983 budget for the Iowa Department of Transportation, along with a comparison of the aforementioned needs provides a vivid picture that underscores the need for this new highway legislation.

This year, IDOT has been able to budget for only $303 million in transportation projects; $104 million of this originates from Federal-aid funds; $112 million was earmarked for administration, operations, and maintenance, which includes patchwork, but no rebuilding or resurfacing. In sum, only $218 million is available for all road and bridge work, including the cost of engineering, acquisition of rights-of-way, and new construction.

During this same period, Iowa's county and city governments will spend about $450 million, which includes $36 million in Federal-aid funds for all programs. Of this, only $124 million will be spent on capital improvements on county roads, city streets, and bridge rehabilitation.

Consequently, only about $342 million will be spent in fiscal 1983 in Iowa for road and bridge revitalization. This compares with the projected spending needs of $625 million per year for the next 10 years just to cover present road and bridge needs. This represents a staggering shortfall of at least $283 million.

This immediate shortfall is compounded by the current trends in revenues generated for Iowa's road use tax fund which is the major source of support for State and local highway budgets. In fiscal year 1982, about 14 percent of this road-use tax fund originated from a 3-percent sales tax on vehicles in Iowa. During this same period, 40 percent of these road fund revenues came from vehicle registration fees. Forty-six percent of this fund is created by motor fuel taxes.

Notwithstanding recent action taken by Iowa's General Assembly to raise fuel taxes, resulting revenues are expected to quickly level off and even decline during the next few years. Between fiscal year 1981 and fiscal year 1982, total motor fuel consumption in Iowa decreased by nearly 11 million gallons. This represents a continuing trend toward reduced fuel consumption. In view of the 150-percent increase in highway construction costs during the past decade, it is clear that State fuel taxes can no longer assure the generation of sufficient State and local road funds.

Moreover, although use and registration taxes can help, they cannot compensate for the shortfall in highway and bridge renewal funding. Under the present revenue arrangement, the State of Iowa simply cannot meet the backlog of highway and bridge repair needs, let alone hope to accommodate future needs. Increased Federal assistance will be necessary.

With the passage of this new highway legislation, the State of Iowa has much to gain. The Iowa Department of Transportation has estimated expected increases in interstate, interstate 4R, primary, and bridge program levels of Federal assistance based upon $12 billion program levels under the Senate bill. Interstate assistance will rise from the fiscal year 1982 level of $15 million to $18 million in fiscal year 1983. Assistance for the 4R program will rise from $11 million to about $30 million. Primary funding will increase from $24 million to $35 million. The bridge program will almost double, increasing from $16 million in fiscal year 1982 to $31 million in fiscal year 1983.

These Federal funding increase obviously translate into a general improvement of Iowa's ability to meet the enormous building and repair needs of our highway system. Specific projects can be identified, however, that will be expedited and enhanced by this pending legislation. The following represent only a small number of projects that will be helped.

Increased Federal assistance will guarantee the continued funding for the Waterloo-Cedar Falls highway construction program replacing Interstate 380, thus greatly expanding the funding for city and State projects.

This bill will assure completion of I-380 by the end of 1986. Moreover, if the Department of Transportation agrees to utilize discretionary funding, which is my desire, this highway can be completed by the end of 1984, gaining 2 full years.

By increasing funding by a factor of 3, sufficient money will be available to make the needed repairs on the older Interstate routes in Iowa. The bill allows the replacement of broken pavements and fixing old interchanges to help maintain Iowa's major truck route.

By doubling funding for bridge improvements, the number of bridge repairs will increase significantly. Particularly important is the fact that work can be completed on embargoed bridges that presently restrict truck loan limits. This legislation also will qualify the MacArthur Bridge located between Illinois and Burlington, Iowa, for Federal funding. Plans for this bridge project could possibly be ready as early as 1984. Funding the final construction of the Keokuk Bridge will so be assured, allowing this particular work to begin in 1983.

I could go on and on detailing the benefits that this legislation offers for my home State, but I think the point has been made. If other States across the Nation even come close to the problems facing Iowa with regard to the disrepair of highways and bridges, the need for additional assistance is clearly established and justified. I hope my colleagues will take a close look at the needs of their own State highway system and weigh carefully the benefits that road improvements will bring through enhanced energy conservation, reduced vehicle repair costs, increased transportation productivity with the accompanying reduction in consumer costs, increased employment, and so forth. By doing so, they will find some very compelling reasons for supporting this highway legislation.

Mr. Chairman, this legislation was designed to rebuild our national transportation system by taxing users. It is a comprehensive legislative package spanning the jurisdiction of many committees. Some of the revenue provisions of the original administration bill were unacceptable to me. As a member of the Committee on Finance, I have worked with Senator DOLE and other committee members to mitigate the most offensive provisions of this bill to the extent possible. Despite this effort, some difficult issues remain.

The American economy is weathering the effects of a national recession. The suffering caused by this recession is focused in my region of the country, the Midwest. Low agricultural prices have destroyed demand for consumer goods and services. With diminished personal income, my constituents are buying fewer consumer durables, such as cars, washing machines, and tractors. The manufacturers of these items are predominantely located in the Midwest. With reduced demand for these products and the raw materials needed to construct them, Midwestern manufacturers are laying off employees to slow production and reduce costs. With so many Midwesterners out of work, demand for housing and new construction has evaporated. With reduce customer traffic,

retailers are depleting their inventories and forestalling reorders.

Recently, there are some small indications that the economy may be beginning to revive. Retail sales increased 1.2 percent in November to a seasonally adjusted average of $9.1 billion. Producer prices for finished goods rose 6 percent in November equal to a 7.2-percent annual rate before compounding. Hopefully, these higher sales will prompt retailers to increase their orders, causing factories to step up production and rehire some of the many idled workers laid off in recent months.

At this point, we are faced with a Hobson's choice—should we enact a major jobs program before Christmas displaying our resolve to get people back to work or should we resist an employment program which funds itself by increasing taxes, a step which threatens a nascent and delicate recovery? Traditionally, we have funded public works projects of this nature by increasing the Federal deficit. To the credit of the 97th Congress, this alternative has not been seriously considered. If we eliminate deficit financing as a serious option, Congress is forced to look carefully at the costs and benefits of the legislation before us.

The 5-cent fuel tax hike will increase the cost of passenger and commercial transportation, it will send a ripple of price increases through the economy which will be reflected in the cost of goods all of us purchase which are transported on our Nation's roadways.

The revenue package also includes a series of fees on the heaviest trucks. Consumers will also see these fees added to the cost of the items they purchase. While trucks have always paid Federal taxes, the shift in user fees from light to heavy vehicles was prompted by the Department of Transportation's highway cost allocation study. In the study, the Department found that heavy trucks cause 33 percent of the road damage and contribute only 26 percent of the revenue to repair that damage. Consequently, the Department of Transportation proposes a set of user fees that imposes greater fees on the heaviest trucks to correct the perceived imbalance.

The trucking industry has attacked the study on the grounds that it fails to take into consideration weather conditions which cause road damage. The validity of the study is an issue which needs further examination. It is also an issue outside the expertise of the Senators on the Committee on Finance. To address the issue of the study's validity, the Committee on Finance pushed back the effective date of the increase in the user fee to January 1, 1984, and will seek the guidance of the committees of appropriate subject matter jurisdiction.

Irrespective of the merits of increasing user fees on vehicles which allegedly cause the greatest highway damage, there is some evidence that the trucking industry does not have sufficient income to pay the increased tax. Many of my constitutent truckers are operating at only 40 percent of capacity. They are still reeling from the effects of deregulation. They are scrounging for business in a highly competitive environment where the recession has diminished the amount of available cargo to haul. To many, the additional cost threatens their survival.

Within this hard-pressed industry, the proposed changes in the user fee structure fall most heavily upon the independent owner-operators. Independent owner-operators own their own power units, pay their own costs, including taxes, and lease their services to a trucking company at a fixed rate. Consequently, independent owner-operators have difficulty passing their costs through to shippers and trucking companies until the expiration of a contract. Already operating on razor-thin profit margins, these independent owner operators are unable to absorb any additional tax burden at this time.

In light of the serious financial condition of the trucking industry, the Senate Committee on Finance included many provisions designed to delay any increase in tax until the industry regains the ability to pay. The administration proposed an increased user fee of $2,700 per truck for the heaviest vehicles effective on April 1, 1984. The Ways and Means Committee sanctioned an increase of the fee to $2,000 effective on July 1, 1983. The Senate Finance Committee version increases the fee on the heaviest trucks to $1,600 phased in over a 3-year period beginning on January 1, 1984. The Senate version is a 41-percent reduction from the administration's proposal and a 20-percent reduction from the House proposal.

This tax applies to a truck in the heaviest weight classification, those trucks whose weight exceeds 80,000 pounds. According to the Iowa Department of Transportation, only 9½ percent of the Iowa trucks that currently pay tax would owe the highest user fee, these trucks represent only 1 percent of Iowa's truck population. Nevertheless, the current fee on heavy trucks is $210 annually and even the Senate Finance Committee proposal of $1,600 represents a dramatic increase in operating costs. For that reason, the tax's effective date was delayed until January 1, 1984, and phased in over 3 years. Despite these changes, concern still existed that the reduced and phased in levy might be a bankrupting increase for the trucking industry. Consequently, the Senate adopted the Boschwitz amendment which reduced the maximum user fee on the heaviest trucks from $1,600 to $1,200, and extended the phase-in period 6 months. I offered a successful amendment to the Boschwitz amendment to extend the phase-in period for independent owner operators from 3 to 4 years. the definition of an independent owner operator is contained within the Motor Carriers Act of 1980. This amendment was needed to soften the increase of user fees on independent owner operators who own their tractor, power unit and lease their services to trucking companies. These individuals cannot pass through their costs until their contracts are renegotiated. Independent owner operators are small businessmen and businesswomen that might face grave financial hardship if the user fee structure was implemented too quickly. I am proud to have worked with Senator DOLE and other members of the Committee on Finance to have devised this exemption and I am grateful to the Members of this body for accepting this provision. It is important to many of my constituents who rely on independent owner operators to transport their manufactured goods and agricultural products. If the industry is unable to pay the increased tax bill as it becomes effective, the levy should be reexamined.

In an effort to lower other taxes on large truck operators, the Senate Committee on Finance retained the tax on passenger tires and passenger retreaded tires. The committee adopted a graduated rate structure for tires, taxing the first 0 to 50 pounds of a tire's weight 9.75 cents per pound, the next 50 to 100 pounds at 15 cents per pound and any weight above 100 pounds is taxed at 25 cents per pound. The House bill taxed all tires over 100 pounds on their entire weight at 25 cents per pound. Under the House measure, a 99-pound tire would be untaxed, but a 101-pound tire would be taxed at $15.25. The tax on tread rubber has been reduced from the House fee of 25 cents per pound to 5 cents per pound for tires under 50 pounds and 16 cents per pound for tires over 100 pounds. These changes significantly reduced the tax burden on the heaviest trucks.

The Boschwitz amendment extends the tax on truck parts to all vehicles weighing more than 10,000 pounds. The Finance Committee recommended this tax be imposed on vehicles weighing over 33,000 pounds. Although this tax applies to a broader class of vehicles, the rate of the tax has been reduced from 12 to 10 percent. I supported this modification which was designed to reduce the costs of operating heavy vehicles.

These changes were the best compromises we could achieve in the Finance Committee and on the Senate

floor. I realize that a phased in user fee with a delayed effective date is still an increased business cost and is small consolation to those dedicated men and women who are transporting the Nation's goods by truck. Let me stress, it was the best compromise we could achieve.

To conclude, this is a very difficult issue for all of us. Even if the cost allocation study is accurate, it is important for us to be sensitive to the needs of the trucking industry. If economic conditions do not improve, the phase in and effective date provisions should be reexamined to reflect these events. The Federal Government will not attain it projected revenue pickup if truckers do not have the ability to pay. We must weigh the costs and benefits of this legislation. The benefits of better roads and the employment of construction workers must be balanced against the potentially crippling effect of tax increases on our Nation's truckers and the resultant increases in the cost of all goods consumed by Americans. The question before us is will this measure enhance or impede our economic recovery? Whichever path we select, we should carefully monitor our decision to be sure it addresses the economic conditions that exist in the future.

I have a copy of the Iowa Poll, published by the Des Moines Register, which shows support for an increase in the gasoline tax if the money is used for road repair: Favor 63 percent, 36 percent oppose.

I ask unanimous consent that that be printed in the RECORD. It reflects the views of 954 of my constituents on the gas tax legislation. This Iowa Poll should be of some assistance to my colleagues in attempting to gage the popularity of the measure before us.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IOWANS IN POLL BACK GAS TAX BOOST

(By Richard Doak)

Iowans overwhelmingly favor the increase in the federal gasoline tax that Congress has been considering, a new Iowa Poll shows.

The poll, conducted Dec. 9-16, found broad support for the nickel-a-gallon increase if proceeds are used to improve the nation's highways and bridges.

Here were the results when adults in a cross section of Iowa were asked:

Do you favor or oppose the plan to increase the federal gasoline tax by 5 cents per gallon to pay for improving highways and bridges?

[By Percent]

	Favor	Oppose	Don't know
All Iowans	63	36	1
Republicans	•	•	•
Democrats	•	•	•
Independents	•	•	•

Figures were illegible.

The tax increase, which was embraced by many members of Congress as a means of creating jobs and recommended by President Reagan, is intended to provide about $6.6 billion a year for highways and mass transit.

As the table shows support for the increase is greater among Iowa Republicans than among Democrats and independents, but majorities of all three political categories favor it.

Across the state, the least enthusiasm for the gasoline tax boost was found in rural Iowa. Residents of rural Iowa are split fairly evenly, the poll found, with 50 percent in favor and 45 percent opposed.

Residents of the state's largest cities (50,000 or more population), on the other hand, favor the increase by a margin of 47 percent to 32 percent. The margin of approval among residents of small-and medium-size towns was lower than among large city residents but higher than among residents of rural areas.

Most white-collar workers favor the plan (65 percent in favor) than blue-collar workers (38 percent in favor). The least support was among farmers (33 percent in favor). Among retired Iowans, 63 percent favor the increase.

There also were differences in levels of support among various income groups. Sixty-nine percent of Iowans with family income above $30,000 a year said they favor the increase, while 58 percent with income below $15,000 a year said they do so. In the middle range, between $15,000 and $18,000 family income, 63 percent expressed approval of the plan.

SUPPORT OF FULL 9-CENT TAX EXEMPTION FOR ETHANOL

Mr. GRASSLEY. Mr. President, I wish to express my strong support for the increase of the exemption of alcohol fuels from the gasoline tax to the full 9 cents. If we do not increase this exemption, we will be missing a great opportunity to put people back to work, strengthen the prices of corn and other commodities, reduce Government exposure to farm program payments, improve our overall economy, and enhance our efforts to become energy self-sufficient.

It has only been 4 short years ago that we did not have any real ethanol industry of which to speak. Estimates for 1982, however, indicate that 100 million bushels of corn will be utilized for ethanol production. The growth of the ethanol industry has created a significant, new market for corn. Bob Wisner, agriculture economist at Iowa State University determined that this ethanol market added anywhere from 5 to 7 cents per bushel of corn. If this new incentive is passed, we might see an expansion of the ethanol industry by threefold.

I would like to share with my colleagues the content of a letter sent to members of the Senate Finance Committee from a fellow Iowan, Mr. Jack Parsons, president of the National Corn Growers Association. His letter urges our support for this proposal and highlights the benefits that will accrue. The letter is as follows:

NATIONAL CORN GROWERS ASSOCIATION,

December 18, 1982, Washington, D.C.

The National Corn Growers Association urges you and your colleagues on the Committee on Finance of the United States Senate to include an exception, similar to the House version of this proposed legislation, that would increase the motor fuels tax by 5 cents per gallon for alcohol fuels produced from agricultural products. The current federal alcohol incentives in conjunction with the incentives in 34 states have contributed significantly to the development of a viable alcohol fuels industry in the United States. The most cogent arguments for the inclusion of an exception for alcohol fuels in motor fuels are the following:

Provides for genuine incentives for substantial increases in employment in the construction, operation and ancillary activities of grain alcohol processing facilities.

Increased utilization of corn by the alcohol fuels industry that could result in substantial increase per bushel of corn.

Increased domestic demand for corn in the alcohol fuels industry, a market that would neither be subject to displacement by unfair subsidized foreign competition nor disrupted by export embargoes.

Minimize the federal outlays and expenditures for domestic price support programs inasmuch as the U.S. Department of Agriculture will expend about 50 cents to 80 cents per bushel annually as the cost of government storage, interest and associated costs.

Minimize the federal expenditures to farmers not to produce corn and grain, which is approximately 75 cents per bushel for corn under the 1983 reduced acreage program.

Reduce substantially the prospect of a sizable federal outlay for grain deficiency payment in 1982/83, which could run as high as 21 cents per bushel for corn, by raising market price through demand.

The best estimate for federal outlays and expenditures in 1982/83 for the set-aside and storage programs for grain is about $3 billion.

Reduce the U.S. declining dependence on foreign petroleum imports and provide additional safeguards against any future petroleum export embargoes against the United States.

Continue the leadership role of the federal government in establishing and implementing a uniform federal policy on alcohol fuels in the 1980's.

U.S. corn farmers urge you and your colleagues to adopt the position of the National Corn Growers Association inasmuch as it will benefit the entire U.S. economy. The major and most immediate benefit to result from exempting alcohol fuels from the additional motor fuels tax will be increased jobs and permanent employment—particularly in the middle western states, all of which will improve the economic situation while developing a more viable federal and state tax base. The proposed exemption for alcohol fuels would be the most significant step that Congress could take toward restoring profitability to agriculture as well as moving America toward greater energy independence.

Sincerely yours,

JACK PARSONS, *President.*

Mr. President, to further elaborate the points detailing the benefits of an increased exemption for ethanol. I

would like to share an analysis produced by various representatives of the agriculture sector. This analysis addresses first, the revenue impact of the exemption; second, the potential impact on the U.S. farm sector; third, the stimulas to job creation; and fourth, a sampling of supporters.

REVENUE IMPACTS TREASURY AND AGRICULTURAL SECTOR

If passed into law, the exemption would result in approximately 200 million dollars [1] of revenue not collected by the Treasury annually out of estimated annual excise tax revenues of approximately $10 billion.

However, the exemption would directly benefit the U.S. Agricultural sector by creating an increased demand for feed and grain supplies domestically. The enhanced domestic market for agricultural products is both timely and needed. The U.S. Department of Agriculture predicts net farm income in 1982 as the lowest since the Depression. 1983 is expected to provide continuing financial problems and low incomes for American farmers.

REDUCTION OF FEDERAL DEFICIENCY PAYMENTS TO FARMERS

Due to apparent structural changes in world agricultural markets, the U.S. is in even greater need of a stable new domestic outlet to bring supply/demand balance to the agricultural marketplace. The fuel ethanol industry offers enormous potential as that new outlet. Its effects on 1981-1982 corn prices offers a perfect case in point: The USDA has computed last season's average market price for corn as $2.43 a bushel. The demand for corn caused by the fuel ethanol industry has been judged to be 5 cents per bushel increase for last crop year. In other words, the absence of a fuel ethanol industry would have resulted in an average market price of only $2.38 per bushel. The USDA further estimates that for each cent the market price was below $2.40 per bushel, the government would have had to make $82 million in direct payments to farmers ($2.40 was the loan rate for corn). Conservatively, then, the fuel ethanol industry saved taxpayers in just this one instance $164 million.

INCREASE IN FARM INCOME

The fuel ethanol industry also improves farm income substantially. For example, this crop year, USDA estimates an average corn price of $2.15-2.40 per bushel. The fuel ethanol industry should use about 150 million bushels of corn next year, which is estimated to increase prices approximately 5 cents per bushel. Assuming an 8 billion bushel corn crop (this year's was 8.3 billion), the fuel ethanol industry will increase farm income $400 million, thus injecting badly needed income into a very depressed industry.

REDUCTION IN FEDERAL LAND DIVERSION PAYMENTS

A vigorous fuel ethanol industry could also save hundreds of millions of taxpayer dollars by obviating the need for paying farmers to keep their land out of production. In 1983, USDA estimates that corn farmers who participate in the paid land diversion program will receive at least $1.35 billion in direct payments—$700 million in price "deficiency" payments and $650 million in land diversion payments.

REDUCTION OF FEDERAL SURPLUS CORN STORAGE PAYMENTS

A strong fuel ethanol industry could save taxpayers hundreds of millions of dollars by reducing the amount of surplus grain under government ownership. It is currently estimated that, counting storage, handling, interest, and transportation costs, a bushel of CCC-held corn costs from 50-80 cents per bushel per year to hold. The CCC is expected to hold 500 million bushels of corn alone by the end of next marketing year. By using 150 million bushels of corn for ethanol will reduce government storage payments by approximately $100 million annually.

IMPACT ON STATE REVENUES

Currently 34 individual states have exempted fuel ethanol/gasoline blends from state excise taxes on gasoline. The average exemption is 4.5¢ per gallon. The annual cost to these states is approximately $90 million.

The uniform federal exemption would permit state legislatures to rescind existing 34 state exemptions thereby producing an aggregate revenue increase at the state level of approximately $90 million per year. This would create a single national market for fuel ethanol and free up state revenues for highway maintenance.

CREATION OF JOBS

Relative to other energy and high technology industries, the fuel ethanol industry is a good source of job creation. Increased employment in the agriculture, trucking, construction, and chemical industries is generated, as well as the jobs resulting from increased use of coal as a process fuel source. Over 3,000 jobs were created just in the 100 mile radius of Peoria, Illinois alone due to the fuel ethanol industry. For each 36,000 bushels of corn utilization, it is estimated that one job is created in the industry.

During a period of high unemployment, the ethanol industry has had a substantial effect on creating new jobs. The Administration bill will stimulate the construction of additional plants. A uniform federal policy on alcohol fuels should stimulate the construction of new fuel ethanol plants.

A specific example of jobs creation within the ethanol industry is the New Energy Company of Indiana, which recently started the construction of a 50-million gallon per year alcohol plant in South Bend, Indiana. Indiana University Economists assessed its impact on jobs as follows: (1) Creation of 775 new permanent jobs; (2) Creation of an average of 200 construction jobs over 28-month period with peak of over 500 new construction jobs; (3) Increase local population (which has been declining) by over 1,500 persons; and (4) Increase local business activity by $16.6 million.

In addition, current corn processing employment data indicate that each 36,000 bushels of corn processed requires 1 full time job. Finally, in addition to on-site construction and operation jobs, new fuel ethanol facilities create or maintain jobs in steel, metal fabrication, and other industrial equipment sectors.

INCREASE NATIONAL SECURITY

The development of alternative energy production from renewable resources enhances national security by extending and increasing the supply of domestically produced liquid fuel. This reduces the need for foreign imports at a time when the political instability in certain Persian Gulf oil producing nations could threaten the supply of oil to the United States and its Western Europe and Japanese allies. Finally, the creation of domestic energy sources reduces balance of payments deficits by keeping funds in the United States.

Mr. RANDOLPH. Mr. President, will my colleague yield?

Mr. GRASSLEY. Yes, I yield the floor.

Mr. RANDOLPH. Mr. President, it is gratifying that the material presented by my colleague is not just discussion, but documentation. Would he be kind enough to repeat the vote in Iowa, in a very leading newspaper, not only of that State but of the country?

Mr. GRASSLEY. If the Senator from West Virginia will yield to me, I shall respond to his request by suggesting that the poll was taken the second week in December. It is the Iowa Poll, a syndicated poll owned and operated by the Des Moines Register, a very respected poll. It does show support for the gas tax increase: 63 percent favor, 36 percent oppose, and 1 percent undecided. Among Republicans, that was broken down to 74 percent in support, 24 percent opposed; Democrats, 56 percent for, 43 percent opposed; Independents, 63 percent for, 33 percent opposed.

It has support among all economic groups, overwhelming support by every economic group except farmers. Even among farmers, it had majority support.

I think this does speak to the point that people recognize that a use tax addressing the needs, to be spent for the purpose that it was raised for, is well received by the people of my State.

The Senator from West Virginia suggested that the poll may have spoken beyond the borders of my State for support of it. He may be correct, but I cannot attest to that. I cannot help but think, particularly in those areas of the country, where there is a tremendous reliance upon the automobile and the truck for transportation to meet the economic needs of our people, there would be general support. That would be my general supposition.

Mr. RANDOLPH. Will my colleague yield further?

Mr. GRASSLEY. Yes.

Mr. RANDOLPH. Would it be a fair statement—I want him to be careful, as he always is: Is this not a position of people generally, not always in the breakdown he has just indicated of the people in Iowa, but throughout the Midwest, the States we call the Midwest?

Mr. GRASSLEY. Yes, I would say for certain more so in the Midwest than maybe the country as a whole, because, generally speaking, in the rural areas, there is an understanding and appreciation of the need of highways as a part of the economic infra-

[1] Congressional Budget Office estimates current 4¢ exemption will reduce revenues by $100 million annually each year through 1987.

structure for that part of the country. I think the Senator would find that, yes.

Mr. RANDOLPH. I thank my colleague for the documentation, which is important in this debate.

Mr. DOLE. Mr. President.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I say to my colleagues that we are making progress. That may be hard to determine. It is my understanding that the House is anxiously awaiting the outcome of our efforts. I hope we might be able to go to conference yet tonight, or during the night, and have a final product before the Senate sometime tomorrow. I know that is not the desire of at least three Members of the Senate who would not want this bill to pass at all. I really believe that if we all cooperate and not talk and let them talk, we could probably finish by midnight, third reading or passage or whatever.

Mr. EAST. Mr. President, I suggest the absence of a quorum.

Mr. BAKER. Mr. President, I hope the Presiding Officer will attempt to observe the presence of a quorum on the floor.

Mr. HELMS. Mr. President, the absence of a quorum has been suggested.

The PRESIDING OFFICER. The Chair is observing at the moment.

Mr. HELMS. I say to the Chair this does not do the proponents of the bill any good. There is no way to go.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. DECONCINI. Mr. President, will the Senator withhold that for a unanimous-consent request?

The PRESIDING OFFICER. Does the Senator withhold his request for a quorum call?

Mr. HELMS. I object.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EAST. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed and concluded the call of the role.

The PRESIDING OFFICER. A quorum is present.

The Chair recognizes the majority leader.

Mr. BAKER. Mr. President, I do not seek recognition.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER: The Senator from North Carolina.

Mr. EAST. Mr. President, I was earlier addressing my concerns about this measure and I would like to continue with my discussion there. In particular, I would like to respond to the issue raised by the distinguished Senator from West Virginia (Mr. RANDOLPH), and I indicated that one of the deepest reservations I had about this measure was that this, in fact, was not a user fee in the usual sense that those who are using a facility are asked to pay a fee, and then the funds from that go directly back into that particular activity.

The distinguished Senator from Arkansas, of course, earlier raised this issue. That is not to suggest that anyone is hostile to the idea that you want effective mass transit in the urban centers of this country, but it was to observe that though you called this a user fee, in fact 20 percent of this tax will go to people who do not use in the direct sense as user fee is normally used, do not use the facilities being taxed; namely the roads, highways, and bridges. By definition they are using the mass transit systems of our large cities or urban areas.

Again this is not to express any hostility to their legitimate needs, but it is to note, as I had earlier noted, that there are serious flaws in this legislation, and I have tried in every way that I could to indicate I think it inappropriate that we rush through and vote upon and thrust upon the American people in the waning hours of the 97th Congress.

Mr. President, I would like to inquire, I would like to have order in the Chamber please, so that I might——

The PRESIDING OFFICER. The Senator is entitled to order, and the Senate will please be in order.

Mr. EAST. I thank the Chair.

So the Senator from West Virginia (Mr. RANDOLPH), who is a man of great distinction and always debates his case with great eloquence and persuasiveness, certainly I do not at all resist the very appropriate and pertinent point he raises that we would, of course, not want to not do well by those using mass transit. I am only saying this is not a user fee and that word is being used to describe what we are doing here.

When you violate the basic concept of the user fee, and in this case begin to drain off 20 percent of it for nonusers, I think it is bad precedent. I think it violates the fundamental concept of the user fee where if the words mean what they are supposed to mean that would not be present. So I wanted to clarify to the distinguished Senator why I was objecting to the user-fee notion here and simply reminding my colleagues this is not a user fee, again fully respecting and understanding the needs of those in the large cities for effective and useful mass transit.

I fully understand the reasoning behind that, but that is not the issue before us. It is whether this is technically a user fee, and it is not, I submit, Mr. President, and hence I consider this one of the principal weaknesses in the measure.

Earlier I noted again I was opposed to the bill because it is a regressive tax hitting the working people the hardest, and in a time of recession, and I did not think that was good economics.

Mr. President, I do not wish to unduly belabor the point, but I would appreciate it if we could have order in the Chamber and Senators might take their seats and staff might take theirs because, as I have indicated, Mr. President, my concern is with the substantive nature of this bill, that I question the soundness of it, and that has been my whole purpose from the very beginning to try to get some deliberation on it.

This is the greatest deliberative body in the world supposedly, allegedly, and it certainly is a body of great distinction in terms of the individual Members of it, as I hold all of my colleagues, all 99 of them, in the highest esteem. But I fear if we do not pay attention to the substance of discussion, if we are in the Chamber, then we run the risk of doing some violence to that fundamental concept of the deliberative process.

I am simply asking, Mr. President, for those who do not wish to "deliberate" that they might repair elsewhere and discuss their business and what else they are doing.

As I was indicating, Mr. President, my objections are substantive. Regressive tax in time of recession, user fee concept violated.

Now, another thing we are told by some at least is that this is a jobs bill. Well, Mr. President, I would underscore to my colleagues that upon serious substantive analysis and evaluation at best this is a jobs transfer bill.

It is not a jobs creation bill, it is a jobs transfer bill. Because for every alleged job that you might create in highway construction and road construction, and I am for that, but you very likely run the risk of taking it away from jobs in other areas.

For example, in North Carolina, and I know the great State of West Virginia is involved here too, we are States that have great trucking industries. Now a lot of the smaller truckers in particular are in dire economic straits right now. This is the kind of thing that could send them down the economic tube. So the trucker loses his job, the business goes bankrupt because of the bill. You might pick up a new job in highway construction, but I am saying that does not deal with the overall question of unemployment. It simply transfers from one point on the ledger to another and you stay basically, perhaps, equal; you may even lose ground.

The distinguished Senator from Colorado, Senator ARMSTRONG, was noting yesterday, Mr. President, this plight of truckers. And they are in very dire

straits at this point. And this sort of thing places an inordinate burden upon them and very likely will send many of them into bankruptcy, large trucking companies, but particularly the middle range ones, smaller ones. We have a lot of them in North Carolina.

So this is, at best, a jobs transfer bill. And in terms of the numbers of unemployed in the country, even if it was an increase of the figures that have been offered, it obviously is very small in terms of the general employment needs in this country. Mr. President, in terms of trying to keep our eye on the ball, the ball is not further taxation at this time.

The name of the game, I would say, in economic terms as to what we ought to be doing, is to gain control of Federal spending, the rate of growth, which would be a great contribution to getting interest rates down. And, if the Federal Reserve Board is cooperative, we would thereby be doing what everybody agrees would be the greatest jobs creation program in America—lower interest rates—so that construction of all kinds and the automobile industry could begin to take us out of the recession because these were the industries that led us into it because of the unconscionably high interest rates.

The touchstone is interest rates, is it not? I do not know anyone in either political party—liberal, conservative, maverick, independent, moderate, nondescript—who has not contended, as I understand it, over a long period of time that the problem in this country is interest rates—interest rates. And the greatest contribution we, the Congress, could make is to get Federal spending under control—the rate of growth of it—now. I am not talking about repudiating the past 40 years, I am not talking about repudiating anything, I am talking about getting the rate of growth of Federal spending under control.

That is why the distinguished Senator from Kansas, the chairman of the Finance Committee, was on target when he had suggested at one point we might take care of social security. Because if we got that entitlement program under control and restored its integrity, it would suggest the desire to getting to all of the other entitlement programs, which is the biggest single cause, is it not, I ask, of controlling the rate of growth of Federal spending? Of course it is. And one of the first things we shall have to do when we come back at some point is to come to grips with these problems.

So I submit this bill, whatever possible merit it has—and I question that—is cosmetic, at best, in terms of the fundamental economic problem in this country, which is getting interest rates down to revitalize the construction business, the automobile business, and lead us out of the recession.

Mr. President, I would like to make an inquiry as to how much additional time I have remaining.

The PRESIDING OFFICER (Mr. JEPSEN). The Senator has 25½ minutes remaining.

Mr. RANDOLPH addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. RANDOLPH. Will the Senator yield to me out of my time?

Mr. EAST. I am not yielding the floor at this time to the distinguished Senator from West Virginia, but I would yield on his time.

Mr. RANDOLPH. Yes, that is what I requested.

Mr. EAST. For a question.

The PRESIDING OFFICER. Is there objection to the Senator yielding on the time of the Senator from West Virginia? Without objection, it is so ordered.

Mr. RANDOLPH. Will the Senator not at least consider very, very carefully what he believes is an opposition which should be thoroughly made on the issue here, not on other matters? Does he not feel that he has done that and should permit his colleagues on the Republican and Democratic sides of the aisles to vote either yes or no on this measure? He has done his job, is that not true?

Mr. MATHIAS. Hear! Hear!

Mr. EAST. Parliamentary inquiry. I want it fully understood that in this discussion we are discussing it on the time of the Senator from West Virginia——

Mr. RANDOLPH. That is correct.

Mr. EAST. Not on the time of the Senator from North Carolina.

The PRESIDING OFFICER. The Senator from West Virginia has agreed to that.

Mr. DOMENICI. I do not believe the unanimous-consent request said the answer was on his time, I think the question was. Otherwise he could answer for a whole hour.

The PRESIDING OFFICER. The Senator from New Mexico is correct.

Mr. MATHIAS. Hear! Hear!

The PRESIDING OFFICER. The Senator from West Virginia asked the question on his time.

The Senator from North Carolina is recognized.

Mr. EAST. Mr. President, in view of the point the Senator from West Virginia raises, it was a question I addressed earlier and I would be happy to reiterate my answer to that.

Mr. President, I am still inquiring, and I think it is a fair and reasonable inquiry, whether this Chamber is in order. We have an extensive number of people in the back here and a great deal of milling around and talking and conversing. Now I do not mind answering questions on my time put by such distinguished colleagues as the Senator from West Virginia, but I do think it is an unreasonable imposition to ask me to speak over discussions and conferences, et cetera, that are going on in the back of the room.

The PRESIDING OFFICER. The Senator may proceed.

Mr. EAST. I would like to respond to what I think is a fair question by the Senator from West Virginia: Do I not unduly impose upon this body and my colleagues?

As I earlier indicated, I entered into this whole affair with reluctance. First, I felt that the lameduck session might have confined itself to social security programs, as the distinguished chairman of the Finance Committee had suggested was a good idea, but that was pulled down.

Then the distinguished chairman of the Appropriations Committee suggested we might confine our time to appropriations bills and the continuing resolution, and it was generally agreed that that was the second best or a very, very good idea. So the lameduck was called back into session for that purpose.

But before we got back, the list began to grow of things that would be added here and there. S. 995, for example; Radio Marti, for example, and so it went.

All of those things were subject to could they survive a cloture vote. When they could not, they were pulled down, and we were told, "We shall move on."

It was only the gas tax that seemed to have gained, as I noted earlier, the proverbial nine lives. It did not survive cloture votes. It kept getting renewed life and so it really did not have, if you will, equal treatment under the rules. This one keeps coming back again and again.

I do not think it a good bill, and I think we run the risk, when we adjourn, of having done what? Of having passed a continuing resolution, which candidly is not a major accomplishment because we were to do that anyway, but this will be the crown jewel for good or for ill of the 97th Congress lameduck session. To have to return to North Carolina and to explain to them this has been our great accomplishment I simply cannot in good conscience do.

I think it is a bad bill. We have tried to engage our colleagues in discussion, the deliberative process, if you wish, on the fundamental essentials of this bill.

Another point I would like to note in this regard, Mr. President, is this: Do you realize our distinguished Members of the House, some of whom I see here in the Chamber and it is a great honor to have them—do you know what they get to take home primarily if this bill goes through and they approve it? Do you know what they take back to their

constituents? Here are the main things they did; gave themselves a pay raise and put a gas tax upon their constituents. Those are the two major accomplishments they may have made.

I do not want to be a party to what I think, with all due respect to them and ourselves, is not only a bad bill but I think the political perception is enormously undesirable.

As I noted the other day, I think we lost our way somewhere along the line. Do you ever do that every now and then here in Congress, in Washington? You begin to say "How in the world did I get here?" I am beginning to say to myself, how did we ever get here late in the night, trying to decide whether to put a gasoline tax on the American people, when what we should have been keeping our eye on was getting the rate of growth of Federal spending under control, getting the Federal Reserve Board, we would hope, to keep that downward trend in interest rates. All of that together would contribute to the single greatest problem we have of lower interest rates to revitalize the private sector in this country, to broaden and deepen the tax base, to apply reasonable tax rates to it, and you will have more money for public funding of anything, of any kind, including highway construction, roads, and bridges.

So it is, I say to the Senator, that I have extended this debate because I think these are valid points. I am not just killing time for the sake of killing time. I like to feel those are serious, substantive tax policy, and economic policy points.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. EAST. Mr. President, I would like to move under the provisions of rule XXII to extend the time for debate by 1 hour and I would like to suggest the absence of a quorum.

Mr. STEVENS. I object. No business has been transacted since the last quorum.

Mr. EAST. I make the point of order that a quorum is not present.

I presume, Mr. President, no one is counting the House Members, with all due respect to the various gentlemen.

The PRESIDING OFFICER. The Chair will advise the Member there is no need for comedy.

The Chair will ask that all those people in the Senate Chamber who are not Senators will please either sit down or leave the Chamber.

The Chair will ask the Sergeant at Arms to come to the well, please.

Will the Sergeant at Arms come to the well, please?

Mr. EAST. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. EAST. Would it not be appropriate for the clerk, in fact, to determine that we have a quorum, to call the roll to determine that? Would that be appropriate?

CALL OF THE ROLL

The PRESIDING OFFICER. The clerk will call the role.

The bill clerk called the roll and the following Senators answered to their names:

[Quorum No. 54 Leg.]

Abdnor	Gorton	Quayle
Andrews	Grassley	Randolph
Baker	Hawkins	Riegle
Baucus	Hayakawa	Roth
Boschwitz	Huddleston	Rudman
Brady	Humphrey	Sasser
Bumpers	Jepsen	Schmitt
Byrd, Robert C.	Laxalt	Simpson
Chafee	Long	Specter
Chiles	Lugar	Stafford
Cochran	Mathias	Stevens
Cohen	Mattingly	Symms
DeConcini	McClure	Thurmond
Dole	Melcher	Tower
Domenici	Mitchell	Tsongas
Durenberger	Murkowski	Wallop
Eagleton	Nickles	Warner
East	Packwood	Weicker
Garn	Percy	

The PRESIDING OFFICER. A quorum is present.

The question is now on agreeing to the motion to extend the time for 1 hour.

The motion was rejected.

Mr. EAST. Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. I move to reconsider the motion. I ask for the yeas and nays.

The PRESIDING OFFICER. Only one such motion is in order during any one calendar day. That motion has been made.

Mr. EAST. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. A quorum is present.

Mr. EAST. Mr. President, I would like to continue.

Mr. GORTON. Mr. President, I make the point of order that the Senator has already spoken twice.

The PRESIDING OFFICER. The Senator is making the point of order that the Senator from North Carolina is making a third speech on the same question in the same legislative day. The point of order is well taken.

Mr. EAST. Mr. President, I would like to move to indefinitely postpone consideration of the measure. I seek recognition.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. Mr. President, I would like to continue my discussion on the merits of this proposal, which I had indicated previously was my primary purpose—and, yes, I will concede dragging this into the wee hours of the morning. I think we run the risk of passing a very bad bill at a very late hour. I think it is not only bad for the country as a whole, I think it is bad for the citizens in my State, and since I represent not only a State—I do represent a State—I am of course a Member of the U.S. Senate. In both cases, as I have tried to make clear to the distinguished Senator from West Virginia, I think when something is not well advised—and I do not think this piece of legislation is, and it has been given new life, time and time again, unlike other measures before this body in the lameduck—they will be pulled down when they could not survive the first cloture vote.

I think it is a case not of trying to be obstructionist—it has been done before in this body; that is why the rule exists—but to utilize as well as I can the rules of this body to discourage passage of a bad bill. At least, I like to feel we have managed to get some focus upon the substance of this measure. What has troubled me, as I have indicated, is that this Congress—and my distinguished colleagues from the House being here brought the point home in a rather poignant way—this Congress runs the risk in the lameduck, in view of the continuing resolution and this possible passage of the tax bill, of going home and informing the American people that the primary things we have accomplished are to raise the pay of Members of Congress and to place an additional tax burden upon the American people—unwise economically, unwise politically. As I have suggested, and I suppose many will say that the point has been well made, I do not wish to return to my State and in any way, shape, or form to appear to be in complicity with that legacy of the Congress at this yuletide season, increasing the pay of Members of Congress and placing an additional regressive tax upon the working people of this country. What we have had to do is take advantage of every special opportunity we have had to drive that point home.

I would like to note to my colleagues, for what it is worth, that the other evening, when I spoke in the wee hours of the morning for 4 hours and 15 minutes, I spoke to the substance of this bill and the economic and political implications of it.

I simply did not consume time. And I appreciate, for example, the kind remarks that have been made on this floor regarding my comments that evening. For example, Senator ARMSTRONG, the distinguished Senator from Colorado, spoke well of my remarks. And I would also like to note, on the other side of the aisle, though I agree he would not necessarily partake of all that I was offering, thought I had some trenchant arguments on this matter, the distinguished Senator from Michigan (Mr. RIEGLE).

Senator RIEGLE, you will recall, was pointing out that we run the risk—that is why he offered his motion—in this Congress in terms of what we did last year with the 5, 10, and 10, the marginal tax rates. We run the risk of

being perceived as taking care of those at the top end of the economic scale. And then, having done that, we begin to add these excise taxes, sales taxes, and you know by definition they are regressive. They hit the working people hardest.

We did that last year in the tax package. We are doing it tonight again, and it is the principal legacy of the lameduck. Again, it is done under the rubric, the euphemism of a user fee, but it is a tax. So at least I concede—I hope Senators would concede—I am suggesting that I have tried in every way that I can to make the discussion substantive and relative and pertinent to the issue, because we really have not had a chance to deliberate, to discuss it.

To the contrary, the suggestion has been that we best not get into all of these things, best just to move it on through, pass it, and be done with it. And knowing that this is viewed and is considered as the greatest deliberative body in the world, of representative democracy, I think to ask that we have, to the limit of our rules, intelligent discussion and deliberation on an important measure of this kind is not unreasonable or unconscionable because, in fact, we had not had it to this point. And I think everybody would concede we have not had it. The point has been, let us pass it and go home for the yuletide.

Mr. President, I suggest the absence of a quorum.

Mr. DOLE. I object.

The PRESIDING OFFICER. A quorum is present.

Mr. EAST. Point of order. Is a quorum present, Mr. President?

The PRESIDING OFFICER. A quorum is present.

Mr. EAST. Pardon?

The PRESIDING OFFICER. A quorum is present.

Mr. EAST. Mr. President, as I was suggesting then——

The PRESIDING OFFICER. The question is on the motion to pospone.

The motion was agreed to.

Mr. EAST. I move to reconsider, and I ask for the yeas and nays.

Mr. BAKER. Mr. President, I move to table the motion.

Mr. EAST. I suggest the absence of a quorum.

The PRESIDING OFFICER. The motion has been made to reconsider and the motion to table has been made. A quorum is present. The question is on the motion to table.

The motion was agreed to.

The question is on final passage of H.R. 6211.

Mr. BAKER. Mr. President, if no other Senator seeks to speak at this moment, I think it would profit the Senate to have just a few moments to deliberate in private. I suggest the absence of a quorum. [Laughter.]

Mr. President, having been hoisted on my own petard, I shall speak.

Mr. President, it is clear that a quorum is present. It is also clear that we need some time for some of the principals in this matter to confer. So if someone wishes to speak at this time, ever so briefly and on a temporary license that is revocable at any moment, I would be glad to yield the floor for that purpose.

Mr. HART. Will the majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. HART. If the time has passed, what is it that the principals have to confer on?

Mr. BAKER. If the time had passed, they would have nothing to confer about, but I am hopeful that we are going to speed up the process of trying to get the time to pass.

Mr. HART. During that time the Senator would encourage others to speak?

Mr. BAKER. Mr. President, only if they will speak on a brief license.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. How much time do I have remaining?

Mr. EAST. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina (Mr. HELMS) has 60 minutes, and he has the floor.

Mr. EAST. Pardon?

The PRESIDING OFFICER. The Senator from North Carolina has 60 minutes.

Mr. EAST. Excuse me, Mr. President. Parliamentary inquiry. How much time do I have remaining, please?

The PRESIDING OFFICER. The junior Senator from North Carolina has 1 minute and 21 seconds.

Mr. EAST. I thank the Chair.

Mr. HELMS. Mr. President, I did not hear how much time I had.

The PRESIDING OFFICER. The senior Senator from North Carolina has 60 minute.

Mr. HELMS. Sixty minutes?

The PRESIDING OFFICER. Yes.

Mr. HELMS. I thank the Chair.

Mr. President, the majority leader and I have been working on another piece of legislation for the past 2 hours, and his purpose in asking for the quorum call was to allow me to complete a call to the Secretary of Agriculture.

Mr. QUAYLE. Point of order, Mr. President. The Senate is not in order.

The PRESIDING OFFICER. A point of order has been made, the Senate is not in order. It is well taken.

The Senate will be in order. The Chair will advise again that the Sergeant at Arms should clear the Senate of all those who are not seated who are not Senators.

The Senator from North Carolina may proceed.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. A quorum is present.

Mr. HELMS. Very well.

Mr. President, let me begin by reading an editorial from the Durham Morning Herald of December 1, 1982. It is headed, "Gasoline Tax: Another Outrage."

> The American taxpayer is being led around and around like a hog with a ring in its nose. It's time for the taxpayer to say stop this nonsense, but the prospect is bleak. The latest proposal for raiding the taxpayers' pocket, a 5-cents-a-gallon gasoline tax * * *.

Mr. President, if we are going to have a quorum, I want a silent quorum.

The PRESIDING OFFICER. The Senate will be in order. The Senate will be in order.

Mr. HELMS. Mr. President, arrangements have been made for me to take a telephone call that I have been trying to take in connection with the payment-in-kind farm bill, and I believe the distinguished Senator from Alaska desires the floor, so I yield the floor.

[The following proceedings occurred after midnight:]

Mr. STEVENS. Mr. President, I thought perhaps I might take the time of the junior Senator from Ohio to talk about the Alaska railroad bill, but I do not see him here. [Laughter.]

Mr. LEAHY. Does the Senator want us to call him?

Mr. STEVENS. I think perhaps he might appear.

The bill is at the desk.

I ask unanimous consent that it be put on the calendar. Is that in order at this time?

The PRESIDING OFFICER. Is there objection?

Mr. LONG. I object.

Mr. TSONGAS. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. STEVENS. I wish to make sure Senators are still on their toes around here at this time of night.

You know, Mr. President, I have read——

Mr. LONG. Mr. President, will the Senator yield for a question at that point?

Mr. STEVENS. I yield.

Mr. LONG. Does the Senator understand that the objection is not directed to the merits; it is only because another Senator who would object is not here at the moment?

Mr. STEVENS. I understood what the role of the Senator was, and I appreciate his comments making sure that the record is clear about that.

The difficulty about this railroad is that it is a federally owned railroad and for 5 years now the House of Representatives has told us they cannot put up any more money to run it.

So we finally worked out a situation where it could be turned over to the State of Alaska, and it has taken us 2 years to get the people of Alaska to realize that they better take it over or it is going to go out of business.

Having done that we found someone saying on this floor that it is a giveaway. If it is such a giveaway, why were almost 200 people laid off this month? It is because the railroad does not have enough money to pay the employees necessary to keep the railroad running in minimum operating condition. The railroad has had to reduce the speed of its trains because of the bad condition of the track.

I have been trying now since last May to get this bill on the floor.

I am making this statement now because I do not think I will speak on this again this year, but when we come back next year I hope everyone understands it is not a lack of courtesy I have for the Senator from Ohio; it is just that I do not think he should be able to object every time something comes up that affects my State and not have similar treatment.

Mr. LONG. Mr. President, will the Senator yield for a question at that point?

Mr. STEVENS. I yield.

Mr. LONG. Has the Senator explored the possibility that the Government might lease the railroad to the State of Alaska and simply make a nonrecourse loan for the payment of it?

Mr. STEVENS. We did explore that, and I tell my friend that the trouble is that some of the existing statutes concerning the lease of property would trigger a finding that that property was surplus to the United States and that triggers an action as far as selling portions of the railroad. So it destroys the concept of having a railroad as an entity.

And we have explored, I think, every single possible effort to save this railroad.

Whether the Senator knows it or not, there is $7.6 million in the continuing resolution that just went to the President to try to keep the thing going until next year in hopes that we can get a bill passed so that my State can take it over. The State cannot spend money on a Federal railroad, and the Federal Government will not spend any more money on a Federal railroad, and it is just going to go out of business.

What I was really saying was that I hope the Members of the Senate know that I have deep respect and my colleague has deep respect for the Senate and for the rights of Senators. But starting the next session I intend to object to use the rules to the same extent against the Senator from Ohio.

My people are disturbed. Two-hundred people are now unemployed in my State. I might add there were 700 unemployed in the State of Ohio as a result of this because we were scheduled to buy five locomotives, 20 percent of the parts of which were made in Ohio, but we cannot order them because my State cannot take over the railroad.

I think I could take up this hour that is allotted to me in this postcloture session very easily, and if the Senator wants to speak I invite him to speak.

The Senator from Ohio now, according to my count, has 16 bills that have been passed by the House of Representatives or reported out of Senate committees and, incidentally, the action of the Senate committees have all been unanimous except one vote, and that was the Senator from Ohio. He has them held up here at the desk because of an antiquated procedure of unanimous consent to take them off the desk or his threat to filibuster in a postelection session.

My colleague on this side of the aisle who was debating a bill could have done the same thing that the Senator from Ohio has done and not let it come up at all, and our patience is being worn by the fact that the Senator from North Carolina is debating a bill and using all of the rules from his point of view, but at least we are debating it, at least the viewpoints of people who oppose or support the highway bill are being heard.

There is no chance to get these other bills up because of an objection from one person under antiquated rules that prevent them from even being discussed.

I hope my friend finishes his phone call soon because I think he should come back just to save the decorum of the Senate.

(Mr. MURKOWSKI assumed the chair.)

Mr. STEVENS. Alaska is most difficult to represent, and I see my colleague in the chair. My home is closer to Tokyo than it is to Washington, D.C. It is very hard for people that far away to understand this Government and continue to support it the way our people do.

We are almost totally owned by the Federal Government except for land that is owned by the State. We have 1 percent of our land in private ownership and we struggle under a private enterprise economy. Perhaps you do not know that President Nixon suggested in 1970 that this railroad be sold, and it has in effect been on the block for an offer from anyone who wants to make an offer since 1970, and no one has offered.

Two major companies have made studies. Two major companies have made studies about buying this and have given up the idea.

Senator METZENBAUM's staff and my staff have been working for weeks trying to see if we could come up with some language so that we could try, and in good conscience my colleague and I, to make some compromise with the Senator from Ohio, but that has been, so far, been impossible.

Today many of the Members of the Senate do not know but we have been trying to find some other way to get the bill before the Senate, but that is not possible either.

If this Congress goes home without having passed the Alaska Railroad bill, I think it will be a real national sorrow as far as our people are concerned, and let me tell you that railroad serves four military bases, Eielson Air Force Base, Fort Wainwright, Fort Richardson, and Elmendorf. The railroad has the means for the transportation of heavy equipment to those military bases.

My State is willing to take it over, willing to guarantee a $250 million investment to keep the railroad going, willing to agree if it is ever sold that the difference between what we have invested and what we received will be turned over to the Federal Government.

We have made every possible concession in the last 3 weeks trying to get a bill.

I really want the Senate to know if when we come back there is acrimony between Ohio and Alaska where it started. I hope that the Senate realizes that there comes a time when a person who uses the rules to the extent that the Senator from Ohio has used the rules, in my opinion, he deserves to have them fully, fully read against any effort he makes in his appearances on the floor of the Senate.

Now I have said my say. I will be happy to yield to the Senator from Ohio if he wants to speak. If he does not want to speak, that is all right with me, too.

Mr. METZENBAUM addressed the Chair.

Mr. STEVENS. I yield to the Senator on condition that when the Senator from North Carolina returns, the Senator from Ohio will yield to him when he is finished.

Mr. METZENBAUM. I do not intend to accept the floor under any conditions.

Mr. STEVENS. In that case I will keep the floor, Mr. President. I have got an hour and——

Mr. METZENBAUM. I understand the Senator from Alaska wished me to respond to him first.

Mr. STEVENS. I did under conditions which I thought were honorable since everyone knows why I started talking in the first place. The Senator may not know that since he was not here, but he can get clued in very fast. I have the floor.

Mr. METZENBAUM. I thought the Senator from Alaska wanted me to answer him.

Mr. LONG. Mr. President, will the Senator yield to me for a question?

Mr. STEVENS. Yes.

Mr. LONG. This Senator hopes we can achieve some progress in what the Senator is trying to do. Why not yield the floor and permit the Senator from Ohio to respond to what he said here?

Mr. STEVENS. But I took the floor on condition I would return the floor to the Senator from North Carolina. I want the Senator from Ohio——

Mr. METZENBAUM. I want to assure the Senator from Alaska that when the Senator from North Carolina returns and he wants the floor I will yield.

Mr. STEVENS. I yield the floor.

Mr. METZENBAUM. I would first like to suggest to my friend from Alaska that he might get a lot further with his legislation without threatening the Senator from Ohio.

Mr. STEVENS. I did not threaten, it was a promise.

Mr. METZENBAUM. The last threat he made was he was going to come to Ohio to speak in connection with my reelection campaign, and to that I responded I would be pleased to send him a ticket, and he did not come.

Prior to that when we were debating the Alaska natural gas bill he promised to come to Ohio to debate me with respect to that matter, and he did not come.

He is welcome to come to my State any time he wants, and he is welcome to object to any of the measures that I have on the floor of the Senate any time he wants. But the next time I hope he understands that I will not have my staff working for the last 2 days trying to bring about a resolution of his problem only to have him move on the floor at 10 minutes after 12 and ask for a unanimous consent to bring up his bill, and I thank the Senators for objecting in my behalf so my rights on the floor would be protected.

Mr. DOLE addressed the Chair.

Mr. METZENBAUM. I have attempted, unless there is something urgent, to answer the Senator from Alaska, because the Senator from Alaska deserves a little further reply with respect to the facts of the legislation that he is attempting to bring up.

Mr. DOLE. I would not want to disturb my deputy. [Laughter.]

Mr. METZENBAUM. Please do not for the moment.

Of all the giveaway bills around here this is the best. Somehow the Senator from Alaska has the idea that his State, the richest State in America, should be given a railroad absolutely free owned by the Federal Government. The railroad runs for 700 miles through the State of Alaska. The railroad has in addition to it 36,000 acres of land, and he wants the U.S. Government to give it to the State of Alaska for free.

Well, you look at the legislation we passed here, we are always providing exemptions or special provisions to the State of Alaska. But I do not know of anything that I have learned about this Nation of ours that causes us to be so bountiful to one State, one State that just recently saw fit, because it had so much money, to give $1,000 back to each of the people who live in the State.

This is not a railroad that is a loser. This is a railroad that the Alaska Anchorage Times, I guess it is, recently said, "Alaska railroad finally in the black."

Another story in the Alaska papers stated, "Strong Year Predicted for Alaska Rail." According to the Anchorage Daily News of August 8, 1982:

In the past few months the earnings picture has brightened and railroad officials expect to be filling their ledgers with black ink when the fiscal year ends in September.

Another railroad fact: "In the last 18 months the railroad's volume has increased by 20 percent," quoting Mr. Smith. "The railroad could double its current tonnage in the next several years if coal export plans proceed on schedule, and if North Slope oil activity continues to grow."

According to the Anchorage Times of August 30, Mr. Jones, who runs the railroad, says "The best financial year ever for the railroad. He predicted $50 million in revenue, $12 million cash flow, and $8 million in profit for the line this year."

Give it away to the poor State of Alaska. Maybe we ought to give it to the State of Mississippi. I saw the other day where the Governor there is having some difficulty with respect to the educational programs, and I do not say that facetiously. I say if you are going to give something away then we ought to give it to those States that are much in need. Maybe we ought to give it to the State of Ohio. We have got about a $1 billion deficit. Why anybody would have the audacity to come to the U.S. Congress and ask for a 700-mile railroad to be given to it free and then cry they are not being treated fairly, because we do not give it to them—the House passed this measure, and even they did not go that far. They provided for 75 percent of liquidation value. That is an amount probably approximating $180 million, and independent reports indicate that this railroad and the land are worth something better than $500 million.

What does the Senator from Alaska want? He wants it free. He is the majority whip. The majority whip, I would think, has the responsibility of seeing to it that we balance the budget and not that we give away this country's assets.

I think the Alaska railroad bill is just nothing more than a boondoggle for one State, and it is a bill that I do not think should pass.

You can make all the threats in the world about objecting to unanimous consent to all the measures brought by the Senator from Ohio. Well, I have had the Senator from Alaska's threats before, and they have not bothered me in the past and they are not going to bother me now, and I say to him that my staff has been trying to figure out a way with his staff and the staff of the other Senator from Alaska and they have spent the last several days doing it to try to figure out a way to get the fair market value of this property in order that Alaska might decide whether it did or did not want to buy it.

For that, in appreciation, the Senator from Alaska comes here at 5 minutes after 12 and attempts by unanimous consent to get the bill brought to the floor and to possibly be passed, and I thank those who spoke up and objected in my behalf.

Mr. TSONGAS. Mr. President, will the Senator yield? I would like to say that I objected for the reasons described, but I think, in all fairness, the request was made in jest.

I just have one question of the Senator from Ohio. Would he be willing to give it to the State of North Carolina? [Laughter.]

Mr. METZENBAUM. Will that get us home?

Mr. TSONGAS. It seems like a fair deal to me. [Laughter.]

Mr. METZENBAUM. I have offered several things this evening. If we give it to the State of North Carolina we can go home. I also offered the Senator from Alaska during the dinner hour if he would exchange his beautiful little daughter Lily and gave her to me I would be willing to give him the Alaskan railroad. [Laughter.]

Mr. TSONGAS. If I may, I note for my colleagues the discussion going on in the back of the Chamber, which is certainly far more interesting than what is taking place publicly, and I, for one——

Mr. STEVENS. Will the Senator yield for one comment?

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. TSONGAS. I am going to monitor whether those who engage in filibusters are going to get a deal that rewards the filibuster, because if that happens the impact from now on is going to be tremendous, because the message will be clear.

The more obstinate you are, the greater the reward, and if that is the lesson for tonight, I just think it is one we should all learn, all take out our rule books because that is the way it is going to be from this time out.

Mr. LONG. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield to the Senator from Louisiana.

Mr. LONG. There were two of us who objected to that request of the Senator from Alaska. The Senator

from Louisiana was sitting in the leadership chair and he objected, as well as the Senator from Massachusetts. The Senator did not see how all this happened, but he should know that in seeking to find some way to pass the time while other conversations occurred in the cloakroom and elsewhere, it was suggested that someone should make a speech. And so the Senator from Alaska took the floor and began to speak, and in the course of his speech he did make the suggestion that his bill should be acted on or some such thing as that. But I honestly do not believe anyone could see in his remark that he actually had any hope of passing the bill at that moment. I think he realized it would be objected to.

Mr. STEVENS. Mr. President, will the Senator yield to me?

Mr. METZENBAUM. Certainly, without losing my right to the floor, I ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. The Senator just told the Senate he is willing to trade the Alaska railroad for my daughter. I told him all along he has it overpriced. [Laughter.]

Mr. LONG. Will the Senator yield to me further?

Mr. METZENBAUM. Yes.

Mr. LONG. Is there not some basis upon which the Senator from Ohio could settle his differences in this matter with the Senator from Alaska? Because, having heard good speeches made on both sides of the argument, it seems to the Senator from Louisiana that there ought to be some basis that men of good will could work this out. I think you are both men of good will, especially at this time of the year; my impression is that no lawyer wants to sue anybody at Christmastime. During this time of the year, it seems to me two men of good will might be able to get together and maybe split the difference and work out something.

Mr. METZENBAUM. Mr. President, I do appreciate the Senator from Louisiana having protected my rights on the floor. I do not actually believe the Senator from Alaska was expecting to pass this bill without giving me an opportunity to be heard, and I think he did it with some sense of levity.

But the facts are that the other Senator from Alaska spoke with me in the back of the Chamber probably 3 hours ago when we discussed a method by which this matter could be resolved which would not actually provide for title being transferred but it would provide for a fair evaluation to be made as to what the railroad is worth. It is in this area that my staff has literally been working on this matter to even the point where I have asked, "Why are you wasting so much time?" because we did not seem to be making any headway.

I gather the Senator from Alaska was well aware of those negotiations that were going on. And every bill I have a hold on here, I have indicated a willingness to talk about them and certainly have heard lots of stories about them and that includes the Alaska railroad bill. On some of them we found equitable compromise and the bills have gone through.

I yield to the Senator from Kansas.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. As I understand it, we are down to the last speaker, last official speaker, in this effort to move ahead on the highway bill. I think we are making progress. We can announce that every hour.

It would seem to me if the Senator from North Carolina would want to protect his rights, I know he is working on farm legislation, of course the longer we stay on this bill, the less chance we have of passing the farm legislation. And I have a lot of farmers in Kansas that would like to get on to the farm legislation. We have had a good long day, we have heard a lot of good speeches, and we have wasted a lot of time. Sooner or later, we are going to vote on this bill and, as one of the managers—we have four managers of this bill on each side—I would hope that we might be able to do that. Because if we intend to go to conference tonight—we have been doing a little preliminary, informal conferencing in the last few hours; there are only about three issues. It will not take long. As I understand it, others have been doing the same thing, so we are not going into the conference without some idea of where we intend to come out.

So I say to my colleagues that have been patient for the last several days; just bear with us for another day or two and, hopefully—only 1 day—we will be able to finally complete this action.

While the Senator from North Carolina is approaching the podium, I am happy to yield the floor.

Mr. HELMS. I thank the Senator sincerely. And I thank the Senator from Alaska for allowing me to leave the floor.

I will be candid with Senators. I have been walking straddle-legged between two issues, both of vital important—the gasoline tax being one of them, of course, the other being the payment-in-kind farm bill.

I believe that every Member of the Senate is in favor of the payment-in-kind farm bill, save one, and he, utilizing his rights as a Senator—and I respect him for doing so—has effectively delayed consideration of a bill which I believe vital to our hopes of restoring some measures of stability to American agriculture.

I will further confide in my fellow Senators that I have discussed this fix that we are in with everybody available, including the Secretary of Agriculture, and I have made a good faith offer to the Senator in question that we would accept his proposed amendments and take them to conference. He is now checking to see if he wants to accept that.

I apologize to the Senate for being the last at bat. It puts me in an uncomfortable position because I realize I am the Senator who is keeping you here at this late hour. But I think any Senator who had the conviction that a piece of legislation is undesirable would probably make the same judgment that I have made with respect to this one.

Earlier, before all of the telephoning and conferring began, I was reading from an editorial in a very fine North Carolina newspaper, the Durham Morning Herald. As many Senators know, Durham is the home of Duke University, one of the greatest educational institutions of our country. The Durham Morning Herald is a very fine newspaper, highly respected in my State. The editorial is headed, "Gasoline Tax: Another Outrage."

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will come to order.

Mr. HELMS. Here is what the editorial said:

> The American taxpayer is being led around and around like a hog with a ring in its nose.
>
> It's time for the taxpayer to say stop this nonsense.

Mr. President, I am not going to attempt to use my time—

The PRESIDING OFFICER. The Senator may proceed.

Mr. HELMS. Mr. President, the editorial continues:

> But the prospect is bleak. The latest proposal for raiding the taxpayer's pocket, a five-cent-a-gallon gasoline tax, has received a supposedly grudging nod from President Reagan and it reportedly has the backing of influential and numerous members of the Pork Barrel Gang, alias the U.S. Congress.

Mr. JEPSEN. Mr. President, point of order. The Senate is not in order.

The PRESIDING OFFICER. The Senator is correct. The Senate will please come to order. Senators conversing, please cease and take a seat.

Mr. HELMS. Mr. President, may I inquire, it may have some effect upon whether we do have order. I assume that the timekeeper is not charging the time required to get order.

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. So what the Senators and visitors are doing is delaying the process of the Senate; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. The editorial continues:

It looks as though this extra tax will be passed and the taxpayer will dutifully fork over yet more of his money to keep the bureaucrats in style.

Mr. Reagan calls the tax a necessity. Here's a better description: It is an absurdity and an outrage.

Just when the hard-pressed consumer begins to feel some relief from high gasoline prices, along come the killjoys in Washington. They want to make sure the consumer doesn't get to keep an extra nickel—if the market won't take his money, then the government will.

Mr. Reagan, a Republican, sounds just like North Carolina's Democratic governor, Jim Hunt, who inflicted a three-cents-a-gallon tax on Tar Heels last year.

The PRESIDING OFFICER. The Senator may proceed.

Mr. HELMS. I thank the Chair.

First, Mr. Reagan paints a grim picture of crumbling roads and bridges, then he tries to sugar-coat the medicine by telling us the nickel-a-gallon tax won't cost the average taxpayer more than about $30 a year—"less than a couple of shock absorbers."

Of course an extra nickel won't cost you much a year, at least not directly. There is no way, however, to tell how much extra will be padded into the economy because of higher freight costs on every item you buy. You can bet it will be more than a couple of shock absorbers.

It is particularly galling to hear this soft soap from the President, the man who promised to get the government off the taxpayer's back. But after his preformance earlier this year, when he approved the largest tax increase in history (and said it was really a case of making the tax burden more equitable) we shouldn't be surprised.

Even if Mr. Reagan were correct in saying that the nickel gas tax will be a small burden for individuals, that is no consolation. Almost every tax increase can be and is justified as a mere piffle for the individual, a small price to pay for such a large amount of good for the society as a whole.

Mr. JEPSEN. Mr. President, the Senate is out of order. Is there some way that the Senate could be kept in order so we may proceed? We have been here a long time. It is the Christmas season. We are continually interrupted by people who ought to know better.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HELMS. I thank the Chair and I thank the Senator from Iowa.

It doesn't matter what is on the government's shopping list—roads, buildings, you name it—the line is depressingly familiar. It will only cost you the price of a shock absorber or two, the price of a night at the movies, a few ice cream cones. You'll never miss it.

This tactic is used by the bureaucrats to make you feel guilty and appeal to your "social conscience." How can you be so selfish as to begrudge a few pennies or a few bucks and deny your fellow man the goodies the government will deliver?

This time-worn shabby argument ought not to begulle us any more. The thing to remember is that every "harmless" little tax increase is another straw on the camel's back. Add them up and before you know it, you're carrying a staggering burden.

We're at that point now. Taxes of all kinds, including the "hidden tax" of inflation, are eating us alive. Governments at all levels are taking 40 percent and more of the ordinary taxpayer's earnings. And still the politicians and bureaucrats, unsatiated, scheme to get more—as if they thought the taxpayer was a bottomless well.

American taxpayers ought not to accept any additional federal tax increase on any segment of the economy for any purpose. If the federal goverment thinks it must spend additional money on any given item, let it rearrange its budget and cut out something less important.

If you agree, write your congressman and the president and protest loudly.

Mr. President, I read that editorial into the RECORD not because I agreed fully with it, but I am absolutely persuaded that this editorial, written by a very fine editor, is a measurement of the discontent, the suspicion, and the cynicism of the American people about this Congress and about Washington in general.

A couple of hours ago I was stopped outside the Chamber by a young man who identified himself as an independent truckdriver. He said he had had an auditor look at this legislation and give him a horseback estimate. He said, "Senator, I will not be in business if this bill is enacted."

This is not one of the big, enormous trucking companies. This is a man who owns one truck.

That is one of the reasons why the Senator from North Carolina has felt obliged to oppose this legislation.

I do not doubt the sincerity and the good intentions of the authors of the legislation or Senators who support it, but I do say that it is contributing to a wildfire of cynicism across this land.

I talked with a lady in Southern Pines, N.C. She said, "Well, I see you are going to put another nickel on my gasoline tax." She went down the list of various things she did not like.

Then she said, "But I notice you fellows took care of yourselves. The House of Representatives gave itself a pay raise."

I said, "Well, we did not."

She said, "I know that, but you took care of yourselves by arranging to make more money on the side."

She said, "Have you any idea how I can make some money on the side?"

Let me read you something else, from the Wall Street Journal, of Tuesday, November 30, 1982.

The distinguished Deputy Director of the Joint Economic Committee of Congress, Mr. Bruce Bartlett, wrote as follows:

As Congress reconvenes for a lameduck session, congressional leaders seem united on the need for a new public works jobs program to combat unemployment, financed by an increase in the gasoline tax. President Reagan has said he supports the proposal primarily because of the deteriorating state of the nation's highways. Unfortunately, it is highly unlikely that such a program will have any significant impact on reducing the unemployment rate. Indeed, it may even increase joblessness.

The principal problem is that business cycles can seldom—if ever—be identified until they have substantially run their course. Consequently, federal jobs programs invariably aren't enacted or implemented until the recession is virtually, or even entirely, over. This is particularly so because politicians are inclined to react to the unemployment rate, which lags behind the business cycle, rather than to changes in real GNP growth.

For example, the 1954 Economic Report of the President, submitted to Congress in January, asserted that the economic state of the nation was "marvelously prosperous," although a downturn had begun the previous July. Similarly, it was not until late in 1960 that it was recognized that a recession had begun in April. And the relatively brief 1969-70 recession was over almost before anyone realized it was taking place.

JOBS WON'T BE CREATED IN TIME

Consequently, counter-cyclical jobs programs could not even be enacted until well after a recession had begun. Although the 1960-61 recession ended in February 1961, anti-recessionary actions were still being taken in September 1962, when Congress adopted a $900 million accelerated public works program to combat the recession that ended 19 months earlier. The Public Works Impact Program was approved in 1972 to fight the recession that ended in 1970. And two public works programs were enacted in response to the 1973-75 recession: one in 1976 and another in 1977.

In addition, a public works program, even if enacted in a timely fashion, will require a significant period before coming onstream.

Let me say parenthetically, Mr. President, that this is precisely what everybody who has discussed this bill with me has acknowledged, that it will take 6, 7, 8, or 10 months before anything is done. Bureaucracies are not established quickly, and all of the rules and regulations must be written and the labor unions have to come in to tell the Government how much to pay the fellow fixing the potholes—that sort of thing. So you can take Mr. Bartlett's word for it, the effects of this program will not be felt until the latter part of 1983.

On top of that, it is not a jobs program. I think a fair argument can be made, as Martin Feldstein' Chairman of the Council of Economic Advisors, said, it will result in a net loss of jobs.

According to a study by the Office of Management and Budget in 1979, less than 8 percent of public works projects can be completed in 9 months or less, whereas 30 percent require 2 years or more. Hence, even if a public works program can be enacted at the beginning of a session and construction begun within 90 days, the vast bulk of employment wouldn't be created until long after the average recession—which lasts about 12 months—had ended.

Another problem is the relatively low labor intensity of public works projects and the considerable mismatch between the job skills required for construction work and those of the unemployed. According to OMB, the typical public works project expends only 22 percent of its cost on direct employment. The other 78 percent of expenditures have only indirect employment

effects no different from a general increase in Government expenditures.

In addition, OMB found that very few workers employed in public works projects were unemployed prior to being hired—as few as 12 percent in program study and no more than 27 percent in another. And because 50 percent to 75 percent of jobs on public works projects are skilled, the chances of such a project helping unskilled, hard-core unemployed are almost nil.

Finally, OMB found that public works were a relatively high-cost method of creating unemployment—from $69,320 for each direct job created, assuming no substitution for existing employment, to as much as $198,059 per job, with 65 percent substitution.

Mr. TSONGAS. Will the Senator yield for a parliamentary inquiry?

Mr. HELMS. If the Chair will allow me to yield on the Senator's time, I shall be glad to do that.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. TSONGAS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. TSONGAS. If there is an arrangement arrived at whereby the PIK legislation would be brought to the floor, would it take unanimous consent for that to be accomplished?

The PRESIDING OFFICER. The Senate is operating under cloture at the present time. Under those circumstances, it requires unanimous consent to consider any other measure.

Mr. TSONGAS. I shall state, as someone who has been here unnecessarily for 4 days, that I shall not participate in any endeavor that rewards this activity. I will object, and I will stay to object as long as is necessary. I am not alone on this side. I am sure there are others. There is no way I am going to allow myself to be used to say to people that the more obstinate and destructive the tactics, the more likely we are to acquiesce. This body is out of control.

Mr. HELMS. The Senator is going too far.

Mr. TSONGAS. Mr. President, I have the floor.

The PRESIDING OFFICER. The Senator from North Carolina yielded to the Senator provided the Senator from Massachusetts speaks on his time. However, the Senator from North Carolina has regained the floor and may decline to yield further.

Mr. HELMS. I am not inclined to yield further——

Mr. TSONGAS. I hope you got the message, though.

Mr. HELMS. Mr. President, I do not yield further. I request regular order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HELMS. The problem is twofold: First, the Federal public works project must comply with the Davis-Bacon regulations——

Mr. BRADLEY. Will the Senator yield for a parliamentary inquiry?

Mr. HELMS. The Senator can claim time, but if he will do me the courtesy of allowing me to finish my remarks, I would appreciate it.

Mr. BRADLEY. Mr. President, the Senator will not yield for a parliamentary inquiry?

Mr. HELMS. Certainly.

Mr. BRADLEY. Is it my understanding, based upon the Chair's response to the question of the Senator from Massachusetts, that it will take a unanimous consent to bring the PIK bill to the floor before cloture has been voted on?

The PRESIDING OFFICER. The Chair responded that while a matter on which cloture has been invoked is pending, it takes unanimous consent to consider any other measure.

Mr. BRADLEY. I simply want to state that, with Senator TSONGAS and Senator MELCHER, I shall object as well.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. BAKER. Mr. President, will the Senator yield to me for a moment on my time?

Mr. HELMS. Certainly.

Mr. BAKER. Mr. President, I think I ought to put something to rest right away.

It is not a question of having a unanimous-consent request before the Senate and objecting. There is no request. As far as I am concerned, there is not going to be a request to do that during this postcloture period. It is my intention to try to pass this bill. The Senator from North Carolina knows that and understands that. I thought it might be as well to let other Senators know that there will be no effort by the leadership on this side to lay aside this measure. We are going to finish this highway bill.

What happens after that remains to be seen. I shall consult with the minority leader and we shall proceed in an orderly way. But there is no intention nor has there even been any intention that I am aware of to lay aside this bill and take up anything else. On the contrary, it is my intention to finish this bill.

Mr. SARBANES. Will the majority leader yield?

Mr. BAKER. I yield.

Mr. SARBANES. Is there an intention to make such a unanimous-consent request after the disposition of this bill?

Mr. BAKER. Now, Mr. President, we are going to finish this bill. What happens after that is a matter that I shall discuss with the minority leader and with the Senator from Maryland and others, as they may wish. But I am not prepared to say what will come up next. The PIK bill is not a bill that has been cleared just on one side. It is my impression that it was mutually desired by the committee on both sides and that there is an objection to proceeding with it. If we could take it up sometime after we finish this bill, fine. If we cannot, we cannot.

I want to reassure Senators that there is no intention to set aside this measure and go to PIK. Whether or not we ever get to PIK depends on what we can arrange after we finish the highway bill. I just wanted to make that clear.

Mr. TSONGAS. Will the leader yield?

Mr. BAKER. I do not have the floor, but I shall yield if the Senator from North Carolina will permit me to.

Mr. HELMS. Yes, Mr. President.

Mr. BAKER. Mr. President, will the Senator permit me to yield for a question? I yield to the Senator from Massachusetts.

Mr. TSONGAS. I just want to say I have no objection to PIK. I will support that. I think it is an initiative that should be tried. That is not the issue here.

Mr. BAKER. It is the issue as far as I am concerned. What I am saying is that we are not going to lay aside this bill. We are going to finish it. We are going to decide after this bill is over what, if anything, we can take up. All I am saying is that there is no need for Members to object in advance to laying aside the highway bill, because we are not going to lay it aside.

Mr. HUDDLESTON. Will the Senator yield to me for a minute.

Mr. BAKER. Yes; I yield.

Mr. HUDDLESTON. Let me say that there are PIK bills and there are PIK bills. There is one that was approved over in the House and there has been some suggestion that we ought to do the same thing. Our committee dealt with the subject and felt that the PIK bill required some safeguards, and we have not been able to reach a decision because we have not had time to reach a decision. The reason we have not had time to reach a decision is that we have been going through this filibuster. We could have resolved the PIK bill yesterday afternoon. We spent 2 hours on it just talking. There were differences and there were some Senators who had concerns, but we could have worked those out. Now we are down here at nearly 1 o'clock on Monday night. The House has practically gone out already, and will be. I do not know whether we can get a conference. I do not know whether we can get a bill through that would be in any way acceptable to this body, so I do not know why we keep talking about the PIK bill as being some problem, because I think that opportunity left us. It left us because we had some Members with things that were very important to them, apparently more important than that

particular bill. I think the opportunity has left us as far as this particular session is concerned.

Mr. DOLE. Regular order.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I ask unanimous consent that the remainder of this article from the Wall Street Journal be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Nov. 30, 1982]

PUBLIC WORKS PROGRAMS DON'T CREATE JOBS

(By Mr. Bartlett)

The problem is twofold: First, federal public works projects must comply with Davis-Bacon regulations, which effectively force the payment of high, union wage rates on all projects.

Second, experience has shown that federal public works expenditures simply replace a large amount of state and local government expenditures for public works, meaning there is no net job creation. The amount of this substitution rises the longer a program is in place, reaching as much as 100% according to some estimates.

In addition to the problem of substitution, there is also the problem of job displacement. The jobs program will destroy some jobs even as others are created. This is because the program will cause a reduction in spending for some other federal program, an increase in taxes, or the displacement of private expenditures due to "crowding out."

Putting all this together, consider the current proposal to increase federal expenditures for road and bridge repair funded by a five-cent increase in the gasoline tax. We are already 15 months into the recession, with many indicators showing it to be ending. It will take Congress several weeks to enact the proposal even if it works at high speed, with the possibility that final action cannot be completed before adjournment. It isn't such a simple thing for Congress to raise the gasoline tax without also opening up the bill to other tax issues, such as President Reagan's plan to speed next year's tax cut.

Nor will it be easy for Congress to devise a formula for allocating public works money that is fair to everyone. Thus there will probably be considerable debate on the form of the legislation even if there is consensus on the need for it. Assuming Mr. Reagan signs such legislation this year, moreover, it is doubtful that the first dollar can be spent until next spring at the earliest, with fall being a more reasonable starting time.

Also, it is highly unlikely that economic conditions won't have improved by next fall. This means the program will end up being pro-cyclical—increasing, rather than diminishing, business fluctuations. The program will take effect just when it will end up doing harm rather than good.

Perhaps most important, the gasoline tax boost will have negative effects on employment that no one has taken into account. It is certainly not going to do any good for the hard-hit U.S. auto industry. It may simply accelerate the purchase of smaller, more fuel-efficient foreign cars just as the OPEC oil price increase did.

And even if we assume that as many jobs are created as are destroyed—a very questionable assumption—the tax is likely to be implemented first, meaning that the job-destroying effect of the tax will occur before the job-creating effect of the public works spending. Even if the public works spending and the tax could be matched in the timing of dollar flows, the effect would simply be a trade-off between construction-related jobs and auto-related jobs.

QUICK FIX ISN'T THE ANSWER

There also will be regional impacts, since the jobs created are unlikely to be exactly where the unemployed currently are or where the additional job loss from the gasoline tax will be. We may end up creating more unemployment in Detroit while creating a labor shortage somewhere else. Congress also ought to consider that any gasoline tax incresae will be permanent, whereas the public works will create jobs only temporarily. Thus there will almost certainly be more unemployment in the long run than if Congress does nothing.

The old-fashioned Keynesian remedy assumed that public works were paid for by deficits. Congress could adopt this method in lieu of enacting a new gasoline tax. But given a deficit already approaching $200 billion and the fact that it would require some $80 billion in public works expenditures to knock one percentage point off the national unemployment rate, this approach seems implausible.

Moreover, it is unlikely that politicans could argue today, as they did earlier, that there are no negative effects from federal deficits. Many people believe that they are primarily responsible for high interest rates. If this is the case, we would simply be trading jobs in construction for others in housing and other interest-rate-sensitive industries, not to mention the negative impact of higher interest rates throughout the country.

The human cost of 10.4 percent unemployment is unacceptable. But at some point we must admit to ourselves that quick-fix public works programs aren't the answer. Instead of reacting to the last recession we ought to be working to make sure that the recovery can be sustained.

Mr. HELMS. Then, Mr. President, on December 2, 1982, there was an article in the Washington Post written by Anthony S. Earl, Governor elect of the State of Wisconsin, headed, "Why the Gas Tax Hike Is a Bad Idea." It reads:

As governor-elect of an economically distressed Midwestern state, I have spent the four weeks since the election in transition briefings learning in minute detail about the problems and the policy choices that will confront me in January. Not once so far in the search for answers has anyone jumped up in a briefing and said, "What this country needs is a good 5-cent gas tax increase."

The PRESIDING OFFICER. Will Senators standing please be seated.

Mr. HELMS. I thank the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Again, I thank the Chair for his courtesy.

Then Governor-elect Earl continued:

So before Congress constructs a bona fide bandwagon for highway legislation during the lame-duck session, will somebody explain once again why this particular highway legislation is important and why those of us digging out of the economic rubble in the Midwest should be happy to see it?

It is not that the roads and bridges in Wisconsin and the Midwest do not need attention. On the contrary, the amount of investment needed for basic road preservation efforts is staggering, as it is in other parts of the country.

It is not that we feel that enough money is already being devoted to highway needs. Rather, stagnant highway revenues and repeated deferral of necessary revenue increases at all levels have contributed greatly to the current situation.

And it is not that jobs are not needed in the region. New jobs are in desperate demand, especially jobs related to a productive investment in our economic future, like highway jobs.

Yet, on balance, it appears that the legislation likely to be considered by Congress will do more harm than good for Wisconsin and much of the Midwest. Unless the highway legislation that is actually passed makes some significant changes in the traditional federal highway program, passage of highway legislation this session will be one more problem to be overcome by several distressed states.

First, the jobs issue: everyone agrees that the highway legislation being proposed is not a jobs bill, as such. But everyone recognizes that if there were not intense pressure for some federal action to stimulate job creation, this legislation would not have such a high priority.

Mr. President, I ask unanimous consent that the remainder of this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY THE GAS TAX HIKE IS A BAD IDEA

What seems to be overlooked in the rush for legislation is that the existing federal highway program, with its dedicated user taxes and categorical distribution formulas, is highly redistributive. It taxes all highway users equally, but sends far more back to some states in proportion to their contributions than to others. Thus a dollar of federal highway taxes will result in $1.50 in federal aid in one state, but will produce only 65 cents of federal aid in another.

For the "loser" states, the federal highway program actually exports jobs to other states. A 5-cent federal gas tax increase would cost Wisconsin highway users about $100 million annually, but we would expect to get back only about $70 million under existing formulas. The $30 million difference would be our contribution to highway construction employment in other states, most of which have lower unemployment than ours.

There are even bigger losers under the highway program who can afford their losses even less. Michigan (14.5 percent unemployment) would get back only 67 cents per dollar contributed, and would export about $150 million in fiscal year 1983 under the highway legislation under consideration by the House; Ohio (12.3 percent unemployment) would get 76 cents back, and export about $134 million; Indiana (11.4 percent unemployment) would get back only 68 cents, and export about $125 million.

This inequity exists in the current highway program at current tax levels. If the federal gas tax is raised and highway funding increased without changing the pattern of spending, the percentage relationships will remain the same, but the absolute

amount of dollar loss from these states will, of course, grow even larger.

Unless the highway legislation expressly recognizes unemployment as a factor for distributing funds, or some realistic minimum level of return on contributions is established, an expanded highway program could actually worsen the relative economic positions of some of the most severely affected states.

The other argument that is most often made in support of immediate action on an expanded federal highway program is that we can no longer ignore our decaying "infrastructure," especially the roads and bridges that serve as the basic arteries of mobility and commerce.

Again, this concern is valid. There is a need for greater resources to be devoted to highway system preservation at all levels.

Most often, rehabilitation of aging Interstate routes and repair or replacement of vital bridges are cited as examples of what increased emphasis on the highway program will accomplish.

But under last year's program, only 22 percent of the federal aid was directed at those two critically important needs. Under the bill to be considerd by the House for an expanded program, in FY 83 the proportion of federal aid for these catergories would rise only to 29 percent, By contrast, by conservative estimate, probably more than 40 percent of the expenditures from the Highway Trust Fund under the House bill would go for new construction. The remainder would probably be used for resurfacing, rehabilitation and reconstruction of routes not on the Interstate system.

Further, much of the work that is usually associated with road and highway repair is not done with federal aid: pothole repair, joint and shoulder repair, minor bridge repair and resurfacing of many older roads. These are specifically excluded from the federal program because they are defined as maintenance, which is a state or local responsibility, or because the most cost-effective repair or resurfacing alternative did not allow for widening shoulders, grading new sightlines or leveling hills, which is necessary to qualify for federal aid.

Two other factors about a federal gas tax increase and an expanded federal highway program appear to raise red flags at the state level.

First, most states are currently facing a need for increased revenues to fund their own basic preservation efforts. If a federal gas tax is passed along with a federal aid program geared to upgrading and new construction, many states may find it difficult to raise their own taxes next year enough to fund basic state and local preservation programs.

Second is the broad consensus that is developing in favor of completely redefining and restructuring federal-state highway relationships.

There is agreement that essentially local needs should be met locally, and that the future federal responsibility should only involve highways of overriding national concern. There is not yet agreement on where the lines of local and national interest should be drawn, on whether responsibilities and fiscal capacity will be passed in tandem to states, or on what the size and scope of the remaining federal programs should be.

Further, as documented by a Congressional Budget Office study this summer, there is increasing uncertainty regarding whether there exists either the fiscal capacity or the justification to continue blindly to pour money into a pot called "Interstate completion" since only one-quarter of the remaining cost actually represents unbuilt links in the intercity network, the rest being local segments primarily of benefit to commuters in various cities.

Considering the serious, informed questioning of the existing program that is going on, in contrast to the almost universal support that it has historically enjoyed, this does not appear to be the time for Congress routinely to authorize, and in fact to expand, the traditional program for four more years. If such authorization is enacted, it should come only after Congress has had time to examine the alternative approaches that have been proposed. The current session does not appear likely to offer an opportunity for realistic consideration of alternatives.

Mr. HELMS. Then, Mr. President, on December 12, 1982, we had an article in the Washington Post written by the distinguished Governor of Vermont, Gov. Richard A. Snelling, who was president of the National Governors Association during 1981–82. And the headline on this article is "Stop the 'Quick Nickel' Gas Tax."

No matter what combination of the three "quick nickel" highway bills now before Congress is ultimately passed as a result of the current steamroller in Washington, the bill will not do the things its backers have promised. Specifically, the quick nickel will not do anything about the current severe unemployment problem (except possibly make it worse) and it will not fill potholes.

The White House (correctly) denies that this is a jobs bill. Nevertheless, the Department of Transportation tells anybody who will listen that precisely 170,000 jobs will be created. The only reason the bill is being considered at all in the lame-duck session is the great need of Congress to appear to do something about the unemployment situation.

Mr. President, if anybody ever hit the nail on the head, Governor Snelling did it when he wrote that particular sentence. This is a pretense bordering on fraud.

I ask that the remainder of this article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 12, 1982]

STOP THE "QUICK NICKEL" GAS TAX

(By Richard A. Snelling, Governor of Vermont)

The bill is not going to create jobs. In its early years, it takes more money out of the economy than it puts back in. Neither a Keynesian nor a supply-side economist would claim that sending more money to Washington is a way to create jobs.

If we don't have to send that $5.5 billion a year to Washington, we will presumably spend it to buy something else. If we do send that money to Washington, we won't be able to use it to buy something else. Whoever makes that "something else" will lose his or her job. Eventually, some of the money will result in creating some new construction jobs while eliminating jobs elsewhere in the economy.

Since the money leaves our pockets well before it ever comes back from Washington, the short-term effect will be a loss of jobs and not a gain. To make things even worse as far as jobs are concerned, it is unlikely that all states will be able to spend all the money that will theoretically be available to them. This federal money must be matched by state money. Since many states are already having difficulty matching the federal funds they are now eligible for, it is unlikely that these states will be able to match any more federal funds—especially since the federal government is planning to preempt their ability to raise state gas taxes.

The bill is touted as a way to fill the nation's potholes. There are certainly plenty of potholes that need filling. However, this bill simply extends existing federal highway programs, and federal highway money is not available for filling potholes under these programs unless the whole road is repaved. As a matter of fact, the road also has to be "wide enough" and "straight enough" to meet federal standards in order to qualify for this repaving money.

There are roads that do need to be completely reconstructed. There are also other roads that simply need to have their potholes filled and their cracks sealed. It is because of a lack of pot-hole-filling and crack-sealing over the last decade that so many roads need to be completely repaved or reconstructed now. This bill continues the tradition of encouraging massive reconstruction rather than simple preventive maintenance.

Many states, including Vermont, already need to raise their own gas taxes this year to meet unmet maintenance requirements. It is unlikely that those states will want to impose any further "user charges" on top of a large federal increase. When states raise their own gasoline tax, they can use the money from that increase to meet their most urgent priorities—whether those priorities be pot-hole-filling or new construction. It has been known for a long time that state-only projects are cheaper and can be done more quickly than projects using federal money.

It is easy to understand why those who have been frustrated by Congress' inability to pass a multi-year highway bill are jumping aboard the quick-nickel steamroller. They are afraid that, if Congress does not pass this bill now, it will never address highway needs constructively. They are willing to accept any bill, even a bad bill, as long as there is some more money for highways.

Nevertheless, a bad five-year bill passed during the lame-duck session will be worse for the nation than no bill at all. It will neither create jobs nor fill potholes. It will frustrate the ability of the states to achieve these goals themselves.

Although many states will be winners from the quick nickel, others will be substantial losers. The Reagan administration dedicated itself to a restructured federalism, which recognized the diversity of needs and problems in the different states. It is ironic that this administration is pushing a bill that extends federal decision-making even further and cripples the ability of states to meet their individual highest priority needs.

This lame-duck Congress ought to go home. After the Christmas recess, a new Congress should come back and address the nation's transportation (and other) problems in a constructive way. The quick nickel ought to be allowed to die a quick death.

Mr. RANDOLPH. Reserving the right to object, and I will not object, I wonder if I might have charged to my

time perhaps 30 to 40 seconds just to make a statement in reference to this matter.

Mr. HELMS. I am delighted to yield to the able Senator.

Mr. RANDOLPH. I thank my friend from North Carolina.

Is it not a fact, I ask my colleague, that the Washington Post editorially has given strong support to this legislation? The Washington Post, as other newspapers throughout the country, prints letters from Governors and readers, but editorially is it not true that the Washington Post has strongly supported this measure?

Mr. HELMS. My response, I would say to my dear friend—and he is my friend—is that I do not claim to be an authority on what the Washington Post does or says or intends. Far from it. But my impression of the editorial published by the Washington Post is that it agreed, as I agreed, that there is a need for doing something about our highways and the bridges and the like. But I am not at all confident that the Washington Post thinks that this is a good bill, but I will be happy to stand corrected.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. In that connection, I ask unanimous consent that an editorial by the Washington Post entitled "Gas Tax: Repairs Needed" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GAS TAX: REPAIRS NEEDED

The highway tax-and-improvement bill, now speeding through Congress, needs some repair work of its own. Linking an increased tax on gasoline with a stepped-up effort to build and maintain highways, roads, bridges and transit systems was an obvious marriage of convenience; raising the gas tax promotes energy conservation; using the receipts for transportation improvements serves an obvious public need. And for those reasons, it deserved to be supported even though, at best, the measure was never ideal economic or social policy.

Despite all the job-creation enthusiasm now propelling the bill through Congress, this never was meant to be—and is not—a job-creation bill. That has always been understood. In fact, like previous anti-recession public-works measures, it could actually destroy more jobs than it creates. Construction jobs are very expensive. They require much heavy equipment and material, and construction wages—supported by the federal Davis-Bacon Act—are high. Construction projects also take a long time to complete. The extra $5.5 billion that the gas tax would raise almost surely would create more jobs if it were left in consumers' hands or devoted to public services with lower labor and overhead costs.

But the measure *can* be justified if the money raised is directed as closely as possible to essential transportation needs. The version of the bill passed on Monday by the House improves on the current federal highway program—the vehicle by which the money will be distributed—by earmarking 1 cent of the additional gas tax for mass transit capital improvements. However, the measure still directs too much money—about $4 billion annually—to construction of new interstate highway projects, many of which are of dubious national or even local interest. Why build more roads when the nation can't maintain those it has?

Then there's the matter of how the money is distributed. There is no perfect formula for distributing highway or any other federal money, but this one needs more work. Under the administration proposal, some severely distressed states would have paid much more in added gas taxes than they got back in federal aid. The House limited their losses to 15 cents on the dollar; but does it make sense for a state with a Depression-level unemployment rate, such as Michigan, to be losing at all while relatively prosperous states, such as Alaska and Hawaii, get back $3 to $4 for each dollar they contribute?

States will also have to put up $20 to $25 for each $100 in federal aid for maintaining state roads and bridges. Even with the House provision for one year of borrowing, this means that financially stricken states will have to forgo help or divert money from other pressing needs.

There are also good things in the House bill that may come under heavy pressure in the Senate. One is the inclusion of a stepped-up tax on heavy truckers—to cover their contribution to highway abuse—that the administration wanted. Another is the exclusion of changes in the current highway law that would be most harmful to the environment—also changes that the administration wanted. Time is short, but the Senate should be careful about how it proceeds. The changes it makes in the bill may make the crucial difference between one that is clearly not in the public interest and one that deserves full public support.

Mr. BAKER. Mr. President, will the Senator yield to me briefly without losing his right to the floor?

Mr. HELMS. Certainly.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. It is close to 1 o'clock in the morning, and I judge that the Senator from North Carolina still has 28 or 29 minutes left of his time under cloture.

Let me just say in the interest of Senators that what I would like to do is finish the consideration of this measure tonight, get final passage, take whatever action is necessary to complete the action of the Senate on this measure, and get it to the House of Representatives and go out until sometime tomorrow.

The adjournment resolution at the desk originated in the House of Representatives. It provides for their adjournment at any time today or tomorrow, which is now today, Tuesday, and providing that the Senate may adjourn at any time prior to January 3, which is a depressing thought, and also providing authority for us to recess from time to time if we may wish while they are gone.

Mr. President, my question to the Senator from North Carolina, in view of the fact that I am willing to acknowledge that after we pass this bill we are going to go out tonight and come back tomorrow and do whatever we can do tomorrow, is I wonder if the Senator could give me some idea whether or not he intends to proceed with the full 30 minutes or thereabouts that he has remaining and whether or not we might get on with final passage of this measure?

Mr. HELMS. The Senator will be delighted to learn that I intend to stop at 1 a.m. in any event or thereabouts.

Mr. BAKER. Then it was a happy and fortunate coincidence that I spoke at this time.

Would the Senator then be prepared to permit us to go forward?

Mr. HELMS. Not quite. I have a few things that I will say briefly.

Mr. BAKER. All right. I yield.

Mr. HELMS. Then I will conclude.

Mr. ANDREWS. Mr. President, will the majority leader yield for a short question?

Mr. BAKER. If the Senator from North Carolina permits me to continue for that purpose.

Mr. HELMS. Certainly.

Mr. ANDREWS. Mr. President, some of us are concerned what is going to happen next. We support this bill totally and the great job that our colleagues have done on it. It has to go to a conference with the House of Representatives, however, and it will come back from that conference sometime short of papers, short of information.

Because the House version of this bill would have a State like North Dakota and about 15 other States paying a 9-cent gas tax and getting less money than we now get under a 4-cent gas tax, could the majority leader assure us that before we vote on the conference report we will be able to vote on the basis of fact rather than on the basis of rumor and that we will in fact have the breakdown of the conference out in distribution so we will not be voting for a bill that does that kind of violence to a distribution formula that has been here for years.

Mr. BAKER. The Senator can be assured and I give him my assurance that before I ask the Senate to turn to any conference report that might be sent to us by the House-Senate conferees that we will have the data and breakdown and be prepared to approach it intelligently and thoroughly.

Let me say to my friend, who served in the House of Representatives so long, that he knows even better than I do that in advance of a House-Senate conference it is not unusual for the respective parties to stake out positions for themselves and even to utter statements about their absolute intransigence, that sometimes does not always prevail when the conference convenes.

Mr. ANDREWS. That is true.

I might add, Mr. President, and the fact that so many of our conferees had their training alongside of those friends from the other body, I think

that we at least will come out on the long end of this conference agreement, but I think it is imperative that we do have the information when we vote right in front of us so we can see category by category through the four major categories just what kind of changes are being brought and how close we did stay with the Senate version because it means a difference, and I might assure the majority leader of about 17 or 18 changes in votes on that basis.

Mr. BAKER. Yes, Mr. President, I have absolute confidence we can do that, and will do that, and I also have absolute confidence in the Senator to assist us so that we have the figures available and fully understand them.

Mr. President, right now, though, the issue before us is to get the bill out of here and get it to conference or to the House of Representatives in some way. So I hope we could get on with the matter.

Mr. HELMS. Mr. President, I say to the majority leader he will get on very shortly.

Mr. BAKER. I thank the Senator.

The PRESIDING OFFICER (Mr. RUDMAN). The Senator from North Carolina.

Mr. HELMS. Mr. President, let me first pay tribute to the majority leader. Throughout all of this he has been a model of patience. He and I have been as openhanded and forthright as any two people could be.

I know that tempers of Senators under the circumstances have been frayed, but I hope upon reflection during the holiday season they realize that on some future occasions they may be in the same position.

I also wish to pay tribute to my distinguished colleague, Mr. EAST, for the role that he has played in this battle. Whether we win it or lose it eventually, it remains to be seen in terms of what happens tomorrow.

Mr. President, the distinguished majority leader has enlivened the RECORD during this 97th Congress by the occasional insertion of items of verse. He has thereby provided readers of the RECORD with a wide variety of poetry for edification and delight.

As this Congress draws to a close, I will, this single time, follow his example, and for a particular purpose. I can think of no more appropriate poem to be put into the RECORD at this time than "Abraham Davenport," by John Greeleaf Whittier.

There was a day when all American schoolchildren read Whittier, along with Longfellow and the other great writers of our country's past. That literary heritage, based on enduring values and truths, seems to have been laid aside in favor of more modern reading. More's the pity.

This particular poem, I believe, stands as an appropriate tribute to our distinguished colleague, my fellow Senator from the State of North Carolina, JOHN EAST. In tribute to what he has done these past several days—in defending the rules of the Senate, in upholding the revered procedures of this body, and in asserting commonsense and foresight in our deliberation of public policy—I would like to share with the Members of the Senate, and with the American people, this fitting salute to a worthy servant of the people.

ABRAHAM DAVENPORT

In the old days (a custom laid aside
With breeches and cocked hats) the people sent
Their wisest men to make the public laws.
And so, from a brown homestead, where the Sound
Drinks the small tribute of the Mianas,
Waved over by the woods of Rippowams,
And hallowed by pure lives and tranquil deaths,
Stanford sent up to the councils of the State
Wisdom and grace in Abraham Davenport.

'Twas on a May-day of the far old year
Seventeen hundred eighty, that there fell
Over the bloom and sweet life of the Spring,
Over the fresh earth and the heaven of noon,
A horror of great darkness, like the night
In day of which the Norland sagas tell,—
The Twilight of the Gods. The low-hung sky
Was black with ominous clouds, save where its rim
Was fringed with a dull glow, like that which climbs
The crater's sides from the red hell below.
Birds ceased to sing, and all the barnyard fowls
Roosted; the cattle at the pasture bars
Lowed, and looked homeward; bats on leathern wings
Flitted abroad; the sounds of labor died;
Men prayed, and women wept; all ears grew sharp
To hear the doom-blast of the trumpet shatter
The black sky, that the dreadful face of Christ
Might look from the rent clouds, not as he looked
A loving guest at Bethany, but stern
As justice and inexorable Law.

Meanwhile in the old State House, dim as ghosts,
Sat the lawgivers of Connecticut,
Trembling beneath their legislative robes.
"It is the Lord's Great Day! Let us adjourn,"
Some said; and then, as if with one accord,
All eyes were turned to Abraham Davenport.
He rose, slow cleaving with his steady voice
The intolerable hush. "This well may be
The Day of Judgment which the world awaits;
But be it so or not, I only know
My present duty, and my Lord's command
To occupy till he come. So at the post
Where he hath set me in his providence,
I choose, for one, to meet him face to face,—
No faithless servant frightened from my task,
But ready when the Lord of the harvest calls;
And therefore, with all reverence, I would say,
Let God do his work, we will see to ours.
Bring in the candles." And they brought them in.

Then by the flaring lights the Speaker read,
Albeit with husky voice and shaking hands,
An act to amend an act to regulate
The shad and alewive fisheries. Whereupon
Wisely and well spake Abraham Davenport,
Straight to the question, with no figures of speech
Save the ten Arab signs, yet not without
The shrewd dry humor natural to the man:
His awe-struck colleagues listening all the while,
Between the pauses of his argument,
To hear the thunder of the wrath of God
Break from the hollow trumpet of the cloud.

And there he stands in memory to this day,
Erect, self-poised, a rugged face, half seen
Against the background of unnatural dark,
A witness to the ages as they pass,
That simple duty hath no place for fear.

One final point, Mr. President. The majority leader and others have mentioned the payment-in-kind legislation. I hope the majority leader will agree that I have done everything possible today to bring that bill before the Senate. I think it is absolutely essential that we do this for the farmers, and I do not say this in a derogatory way, but I simply cannot understand anyone who would deliberately prevent the passage of this bill because the payment-in-kind legislation is only a step in trying to pull the farmer back an inch or two from the brink of disaster, but that is water over the dam. I consulted with everyone I can possibly find on the matter, and it was to no avail. We got within one Senator of being able to have the bill considered tonight and passed, and the House of Representatives has already passed it, but in any case, I thank all Senators for their patience and I wish you Merry Christmas and a Happy New Year.

I yield the floor and yield back the remainder of my time.

Mr. ROBERT C. BYRD. Mr. President, I hope we will now vote on the passage of the bill.

I ask unanimous consent that any other Senators who wish to do so may also insert their statements in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUYE. Mr. President, after much thought and consideration I have decided to vote against the proposed gasoline tax.

The President has, on several occasions, repeated his intention that this is not a jobs bill. No one questions the President on this statement because it will do very little to alleviate the high rate of unemployment which we are experiencing this day. It will principally provide added employment to those contractors, builders, and workers who are involved in the business of roadbuilding and road repair.

Second, the evidence has clearly shown that there is a great deal of money in the highway trust fund, to wit, $8.3 billion. Currently, the exist-

ence of this huge surplus account is viewed primarily as due to the tragic fact that those States which are in desperate need of road repair and bridge rebuilding cannot provide the necessary matching funds to qualify for this Federal largesse. Further, as most Senators are aware, there is some correlation between these poorer States and a high rate of unemployment. The wealthier States with low rates of unemployment have very little difficulty in coming up with matching funds.

Third, this gasoline tax will make it virtually impossible for those less affluent States to levy their own gasoline tax.

Studies have shown that most drivers can understand and approve a 5-cent gasoline tax, but would resist a 10-cent gasoline tax. Therefore, if this Federal gasoline tax is approved, poorer States that had planned to levy their own State gasoline tax would be politically prohibited from doing so. And so the vicious circle continues to spin: The poorer States continue to have bad roads and high unemployment, and the more affluent States continue to have better road and bridge conditions and less unemployment.

I believe the gasoline tax will benefit the State of Hawaii. Hawaii's credit rating is an enviable one. But I do not believe that the people of Hawaii, with its legendary aloha spirit, would care to reap such benefits at the expense of those who are less fortunate.

Mr. EAGLETON. Mr. President, I think the 5-cent Federal gasoline tax has been heavily oversold on the numbers of jobs created—not very many in relation to 12,000,000 unemployed—and heavily undersold on the jobs lost—probably about as many as are created—by the diversion of consumer purchasing power into payment of the 5-cent tax. For example, Walter Heller, President Kennedy's chief economic adviser, believes that the 5-cent gasoline tax will eliminate more jobs than it creates. "This is an anti-jobs bill," he states. Wharton Econometrics Forecasting Service, in its analysis of the 5-cent gasoline tax, states: "It will have an insignificant effect on aggregate joblessness. It does not really address the problem of unemployment."

The bill has been heavily oversold on the promptness with which these few jobs will be created—it will not be prompt; it will be years—and heavily undersold on the damage to the highways of States like Missouri because the bill now mandates longer, wider, and heavier trucks. Missouri's voters rejected longer, wider, and bigger trucks in a referendum on April 6, 1982, and as, I might add, have Missouri voters rejected, on several occasions, an increase in the Missouri State gasoline tax.

The bill makes a real mockery of President Reagan's New Federalism because by raising the gas tax by 5 cents at the Federal level, it, for all practical purposes, forecloses that source of additional revenue to the States. Limited State gasoline funds will make it harder for States to maintain their own road system and harder to come up with present or future required State matching funds.

All in all, it is not a very good bill and I will vote against it.

There was a better way. I voted for a substitute jobs bill which would have been financed by repealing the third year of the tax cut for those making over $50,000. That measure would have provided many more jobs without adding new burdens to low- and middle-income workers. Unfortunately, that alternative was defeated.

Mr. President, I ask unanimous consent that the Wharton study mentioned previously be printed at this point in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

WHARTON LONG-TERM MODEL ALTERNATIVE SCENARIOS

(By Geoff Greene)

JOBS BILL IMPACT

With the aggregate rate of unemployment for November reaching 10.8 percent, well above the post-Depression record of 10.4 percent set in the previous month, concern over joblessness has become the central preoccupation of the public, the media and both major political parties. In response to this concern, Congress has revived an expanded highway spending program first suggested by Transportation Secretary Drew Lewis. Now relabeled a "jobs" program, the proposal has been endorsed by President Reagan and leaders of both parties, and seems sure to become law during the current post-election session of the 97th Congress.

The legislation calls for $5.5 billion a year in new Federal higway expenditures, to be matched by $1.1 billion by the states, for a total of $6.6 billion annually through 1988. The proposal is to be funded by a 5 cents per gallon increase in the Federal tax on gasoline and diesel fuel, with the states permitted to raise the matching funds as they see fit, and with deferred matching payments permitted for the most financially hardpressed states. The bill also calls for increases in the Federal excise taxes on equipment for heavy trucks and corresponding decreases in those for light trucks and automobiles in order to reflect the greater highway damage caused by heavy trucks, although this provision is expected to raise no new revenues.

Backers of the proposed legislation claim that 320,000 new jobs will be created by the expenditures, with 170,000 of these in the construction industry, where unemployment is currently over 22%. On the other hand, critics argue that the new taxes imposed to pay for these jobs will lead to job losses in other sectors of the economy, with little overall net increase in employment. A study conducted by the Wharton Long-Term Service suggests that while job losses attributable to the tax increase do partly offset the creation of new jobs by the highway reconstruction program, there would be some net positive effect on economy-wide employment. Because of the lag between the beginning of the tax increase and actual new highway spending, there will be a net job loss in 1983, but employment gains will average about 119,000 over the life of the program, with new jobs in contract construction representing about 70 percent of the increase.

EMPLOYMENT IMPACT OF THE JOBS BILL COMPARED WITH BASELINE OUTLOOK

	1983	1984	1985	1986	1987	1988
Baseline (millions)	101.474	104.482	106.898	107.964	110.072	112.101
Jobs created by spending	.026	.193	.269	.291	.291	.288
Jobs lost due to new taxes	.034	.075	.127	.150	.138	.120
Net job gain from jobs bill	—.008	.118	.142	.141	.153	.168
Net job gain in construction from jobs bill	.007	.074	.094	.099	.105	.112

The impact of the bill on the rest of the economy would be small, and not altogether positive. GNP Growth differs negligibly from the baseline, slightly higher in some years, lower in others. While average annual unemployment would decline, the drop would be trivial, amounting to no more than .14 percentage points in any given year, with the aggregate rate remaining above 7% through 1988, as expected in the Baseline outlook.

ECONOMIC IMPACT OF THE JOBS BILL

	1983	1984	1985	1986	1987	1988
GNP growth (percent change):						
Baseline	3.23	5.23	3.68	1.93	3.61	3.29
Jobs bill	3.20	5.02	3.61	1.91	3.62	3.30
Unemployment rate (percent):						
Baseline	9.67	8.88	8.12	8.30	7.80	7.27
Jobs bill	9.68	8.76	7.99	8.17	7.67	7.13

The tax pass-through to consumers increases overall price inflation slightly, slowing the forecast decline in interest rates. Long-term rates, in particular the effective new home mortgage rate, hang somewhat higher as compared to the general consumer price level, increasing the relative price of housing and leading to a slight weakening of housing demand. This results in a loss of about 89,000 housing starts over the five years of the jobs program. Housing activity increases over the last four years of the forecast horizon, partly in response to the additional demographic pressure caused by slower growth in the housing stock during the period of the tax increases and partly due to the additional household income generated by employment increases, resulting in a net gain of 35,000 starts over the ten year forecast horizon.

IMPACT OF THE JOBS BILL ON THE HOUSING SECTOR

	1983	1984	1985	1986	1987	1988
Mortgage rate (percent):						
Baseline	13.03	11.35	10.66	10.21	10.04	9.83
Jobs bill	13.06	11.43	10.77	10.30	10.10	9.85
Housing starts (millions):						
Baseline	1.449	1.751	1.923	1.776	1.902	2.112
Jobs bill	1.445	1.741	1.895	1.748	1.881	2.096

Perhaps surprisingly, the effect of the fuel tax/highway spending bill is expected to have a slightly positive effect on auto

sales over the 5 years of the program. While higher gasoline taxes increase vehicle operating costs, leading to an 88,000 unit decline in new car sales in 1983 relative to the Baseline, the incentive to purchase newer, more fuel-efficient cars combined with the small increase in income generated by additional jobs should lead to increased scrappage rates and a net gain of 6,000 sales through 1988. The increase in scrappage rates exceeds new car purchases, however, so that the stock of cars decreases relative to the Baseline forecast, and their average age declines. With auto stocks smaller relative to the number of drivers, sales are actually somewhat stronger when the tax increase expires after 1988, averaging about 46,000 units more than forecast in the Baseline.

IMPACT OF THE JOBS BILL ON THE AUTOMOTIVE SECTOR

	1983	1984	1985	1986	1987	1988
Automobile scrappage (millions):						
Baseline	8.762	9.287	8.308	8.903	9.448	9.670
Jobs bill	8.804	9.324	8.327	8.921	9.477	9.664
New car sales (millions):						
Baseline	9.355	10.573	11.074	10.594	11.141	11.400
Jobs bill	9.267	10.592	11.075	10.615	11.173	11.422
Stock of automobiles:						
Baseline	109.53	111.20	112.83	114.97	117.05	118.84
Jobs bill	109.45	111.09	112.68	114.82	116.91	118.69

Although the projected revenues from the gasoline and diesel fuel tax increase amount to about $.5 billion less annually than Federal expenditures on the program, the additional economic activity generated by the program would result in increased personal and business tax revenues, so that the Federal deficit actually drops by an average of about $1.25 billion a year relative to the Baseline outlook. The largest reductions in the deficit occur in the first two years of the program, reflecting the fact that tax collections will begin when the new law takes effect on April 1, 1983, but the typical start-up delays associated with expanded public works programs mean that expenditures probably will not reach nominal levels until early 1984.

IMPACT OF THE JOBS BILL ON THE FEDERAL DEFICIT

	1983	1984	1985	1986	1987	1988
Federal deficit (billions):						
Baseline	$160.8	$135.9	$116.7	$114.0	$93.9	$86.5
Jobs bill	158.0	134.1	116.0	113.5	93.2	86.2

The results of our study suggest that, as its proponents have argued, the highway spending/fuel tax bill should be properly viewed as an "infrastructure" measure rather than a "jobs" program, since it will have an insignificant effect on aggregate joblessness. Judging the bill on this criterion, there is little doubt that the nation's infrastructure is in need of renovation, and although benefits are difficult to evaluate explicitly, improvements to the stock of public capital would reduce the costs of vehicle maintenance and repair, as well as inconvenience and discomfort, to both business and consumers, and are probably justified in their own right. But, while estimates of the nation's infrastructure needs are notoriously vague, most observers say that as much as $300 billion would be required to renovate roads and highways along, with repairs to bridges, sewage and water systems, and public transit adding over $45 billion, $225 billion and $50 billion in expenditures, respectively, for a total of well over $600 billion dollars. In this context, the $33 billion in outlays called for in the current proposal seems small, but perhaps better than nothing at all.

Another aspect of the fuel tax worth noting is the probable effect of the increased user cost of energy on conservation. As compared to the Baseline, petroleum consumption by vehicles in gallons under the new program is expected to drop almost one percent, or roughly 800 million of gasoline and diesel fuel annually through 1988. Both the Ford and Carter administrations proposed an increase in the Federal gasoline tax to induce energy conservation, as a measure to partially insulate the U.S. economy against future energy price shocks. Since political turbulence in the oil-producing nations remains a significant possibility, any measure reducing U.S. vulnerability to energy supply shocks is perhaps justified in its own right.

But, while the current legislation has some merit on these grounds, it does not really address the problem of unemployment. With unemployment rates expected to remain over 10 percent for most of 1983, joblessness is likely to be at the center of public attention for some time. House Democrats have already moved toward additional public service jobs spending by amending a one year, $5.4 billion dollar plan to a Budget continuing resolution, and the White House has indicated it may be willing to accept a portion of this figure in exchange for House approval of the previously rejected $988 million dollar MX missile appropriation. The measure is directed toward renovation of public housing, parks and other facilities, with a goal of creating 350,000 jobs. Simulation results, however, suggest that the program will produce only about 140,000 new jobs, reducing the unemployment rate only about .13 percentage points, even if the entire $5.4 billion package were to be approved.

Some sort of jobs program seems inevitable in the opening session of the 98th Congress, perhaps an additional $5 to $6 billion in public works and $2 billion in housing subsidies for a period of three years or more. But it is quite possible that no jobs program could substantially cut unemployment—the kind of federal deficits necessary to fund massive public job creation would almost certainly lead to sharp interest rate increases, deepening, rather than alleviating the effects of the recession. It is perhaps in recognition of this that the political discussion surrounding the issue has focused on relatively modest proposals, in spite of the unprecedented level of joblessness.

While a major cause of the current high level of unemployment in the U.S. is the confluence of factors that led to very high interest rates throughout the period from mid-1979 through 1982, aborting the brief 1980 economic rebound before employment had recovered, the decreased international competitiveness of major U.S. industries is also important, and of greater long-run impact. Many workers formerly employed in declining U.S. industrial sectors may well have been permanently displaced, and new jobs for younger, less skilled workers may not be forthcoming from traditional sources. This suggests that retraining will become increasingly important as an unemployment policy option, and Congress has recently shifted funding from the widely-criticized CETA program to a system of Private Industry Councils (PICs) in the Job Training Partnership Act of 1982. The PICs, which emphasize jobs skills in demand in local areas, are administered jointly by business and government, and have demonstrated some success since the pilot program was initiated in 1978. With the efficacy of traditional jobs programs increasingly in doubt, it seems likely that future jobs legislation will focus on retraining ranging from remedial education to specific training for employment in industries based on emerging technology.

Mr. LEVIN. Mr. President, I want to take just a moment to remind my colleagues that the Levin-Specter amendment extending the number of weeks of Federal supplemental unemployment benefits which was overwhelmingly approved by the Senate is part of the Baker substitute to the highway bill. While I personally have some very strong disagreements with the apportionment formulas of the highway bill, I believe that it is absolutely essential to do something to respond to the outrageously high level of unemployment which this Nation is currently enduring.

Since the jobs portions of the continuing resolution has been stripped from that bill in the face of certain Presidential veto, the only action which we can take which will bring immediate relief to many of the unemployed is to extend the number of weeks of Federal supplemental benefits, and to do that we must pass the Baker substitute to the highway bill.

But something about the way we are handling this gasoline tax and jobs bill bothers me and raises the question in my mind whether the trust fund apportionment formulas make any sense at all.

Everybody knows that if it had not been for the terrible unemployment situation, there would not be the sense of urgency about passing this bill that there is now. The push for the bill is the product of double digit unemployment. If that is the case, then how can we pass a tax, when the revenues collected by that tax will increase the unemployment problems of some of the States which the recession has already hit the hardest? If it were not for the Levin-Specter-Robert C. Byrd-Dole-Domenici amendments extending supplemental unemployment benefits, so desperately needed, I would have rigorously opposed this bill.

Why, may I ask, should the people of Michigan support a gas tax bill which will cost Michigan jobs. This Congress should not ask that my State, which has suffered the most from the recession, to export some of its jobs any more than it could ask an accident victim to become a blood donor.

I know that there have been some efforts to correct the inequities which exist in the ways that the money contributed to the highway trust fund is redistributed to the States and with some success. But these efforts, as well

meaning as they are, are akin to throwing a 15 foot rope to someone drowning 25 feet offshore. The Washington Post also pointed to this problem in its recent editorial.

The House limited their losses to 15 cents on the dollar; but does it make any sense for a State with a depression-level unemployment rate, such as Michigan, to be losing at all while relatively prosperous States, such as Alaska and Hawaii, get back $3 or $4 for each dollar they contribute?

Let me hasten to add that Michigan is not the only State in this situation. Ohio, for example, now has an unemployment rate of 14.2 percent, but has averaged back 89 cents on the dollar, and California has a rate of 11.2 percent, but has averaged only 80 cents back on the dollar. Over the past 15 years, Michigan has lost on the average of $57 million each year, Ohio has lost over $42 million each year, and California has lost almost $160 million each year. So, Mr. President, this is no small change.

I recently joined my friend from Wisconsin, Senator PROXMIRE, in calling attention to the intolerable inequity of the gas tax. I pointed out that since 1957, when the first allocations were made, my State of Michigan has received back on an average only 83 cents for every dollar it has contributed to the trust fund. The national average during that same 15-year period was $1.07, with one State receiving $9 for every dollar put into the trust fund and other States receiving two to three times the amount they contributed.

Now, I understand that some may argue that this is a national roads system, and therefore it is only natural that some States will give a little and some States will get a little for the sake of the overall national benefit. However, that rationale breaks down when you contrast contributions to the trust fund with interstate and noninterstate apportionments from the trust fund. When this analysis is done, what one finds is that the inequity is often greater when it comes to noninterstates. For example, over the 1957–81 period, California contributed 10 percent of the funds to the trust fund at the same time that it received only 8.2 percent of the apportionments from the fund for interstates and only 6.2 percent of the funds for noninterstates. Ohio contributed 4.9 percent of the funds to the trust fund at the same time that it received only 4.5 percent of the apportionments from the fund for interstates and only 3.75 percent of the apportionments from the fund for noninterstates. Finally, my State of Michigan has over the same period of time contributed 4.3 percent of the funds to the trust fund at the same time that it received only 3.5 percent of the apportionments from the fund for interstates and only 3.19 percent of the apportionments for noninterstates. Therefore, the ultimate rationale for whatever inequities there are in the formulas cannot be the need to promote a national road system when the inequities are often the most striking when it comes to the noninterstate roads.

There seems to be no single answer why some States contribute so much and get so little in return. The current formulas for reapportionment of money for the primary and secondary road programs emphasize such factors as the State's land area, and miles of Federal-aid roads in each State. A formula based on land area is detrimental to my State, while formulas based on vehicle miles would more accurately reflect the actual use of these roads by the people of the State and this is what we should emphasize if we are really talking about a user tax. Michigan contributes 4.3 percent of the total trust fund revenues, but has an area of only 1.6 percent of the Nation as a whole, and only has 3.5 percent of the postal route mileage in the country. On the other hand, for 1981, for example, Michigan had 4.29 percent of the total vehicle miles traveled within the United States. Nevertheless, in that same year, Michigan received only 2.65 percent of the payments from the trust fund. This has the effect of leading to the incongruity that although Michigan ranks 7th in vehicle miles actually traveled on Federal-aid roads, it ranks 46th in its rate of return from the highway trust fund.

It is for these reasons that I recently addressed the following letter to the Finance Committee and Environment and Public Works Committee:

I am writing to urge you to correct an intolerable inequity which exists in the way money contributed to the highway trust fund, is redistributed to the States. Since 1957, when the first apportionments were made, the State of Michigan has received back on the average only 83 cents for every dollar it has contributed to the trust fund. The national average during the same period was $1.07, with one State receiving over $9 for every dollar contributed and many other States doubling their contributions.

The highway authorization bill under consideration by the Committee on Environment and Public Works will have a negative effect on many States which have historically contributed more to the highway trust fund, than they have received back. For these States, the 5-cent increase in the gasoline tax is not a job-creating proposal, but a job-exporting proposal.

The amendment which was approved this morning by the committee is an inadequate attempt to address this problem. Michigan has the highest unemployment rate of any State in the Union. We cannot afford to take more than $60 million a year out of the Michigan economy to support road building projects in other states.

The question, then comes, what specifically can be done. An 85-percent floor as was agreed to in the House is better than no floor, but it is not good enough. I think more should be done. A deferral of the requirement for matching funds by the States is better than a requirement of immediate payment, but it is not good enough. I would like to see a total waiver of the requirement for States who are enduring long periods of high unemployment.

In the words of the newly elected Governor of Wisconsin in an article which recently appeared in the Washington Post:

Unless the highway legislation expressly recognizes unemployment as a factor for distributing funds or some realistic minimum level of return on contributions is established, an expanded highway program could actually worsen the relative economic positions of some of the most severely affected states.

And it would not be the first time such a present was delivered by Uncle Sam. In a study done in 1980 of recent trends in the Federal balance of payments among the States, there was one very troubling and all too consistent result. For fiscal years 1975–79 Michigan consistently ranked last or second to last in the net dollar flow into the State from the Federal Government. In 1975 it ranked last with 65 cents for every dollar, and in 1979 is ranked last with 66 cents for every dollar.

I know that I have already made reference on a number of occasions to this as a jobs bill. I know that the administration does not like to call it that. I am also aware of a number of articles which have appeared suggesting that it will cost more jobs in labor intensive industries than it will create in capital intensive industries such as construction. This is an interesting debate, but unfortunately it does not matter for my State of Michigan because even if a dollar in gasoline taxes would create a dollar's worth of jobs in theory, in fact, if the historical average is to be a guide, my State of Michigan will not even have a chance to get the dollar's worth of jobs.

Again, I would have opposed this bill but for the successful battle we fought to add a critically needed supplemental unemployment benefit extension for up to 6 weeks.

That is so vital to Michigan that I must vote "yes" on this bill.

Mr. BRADLEY. Mr. President, for 3 full weeks the Congress has been working intensively on legislation to raise gasoline and highway excise taxes and devote these revenues to pressing transportation needs. After giving much thought and consideration to the many issues involved, I will not vote for the Surface Transportation Act of 1982 as it is pending in the Senate.

I will vote against the pending bill on the following grounds:

First, I want to send a strong message to the conferees that the Senate bill does not adequately reflect New Jersey's needs. Our transportation system, like that of other States, is central to New Jersey's economic activity. Yet our roads and mass transit system are deteriorating due to age, weather, and heavy use. These conditions are a drain on our economy and must be improved.

But the Senate bill is clearly inadequate to meet New Jersey's transportation needs. Historically, New Jersey has always fared poorly under the provisions of the Federal-aid highway program and the highway trust fund. Since 1956, for every dollar that New Jerseyites have contributed to the highway trust fund, they have received back only 82 cents in Federal highway financial assistance. The bill before us continues this practice. The Federal Highway Administration estimates that New Jersey will receive back only 85 cents for every $1 contributed to the highway trust fund. And, New Jersey will receive as much as 85 cents per dollar only because a minimum floor was added to this legislation. Without the minimum floor, New Jersey would have received even less.

As I have noted, our current highway program formulas are inadequate for our transportation needs. Sadly, the bill before the Senate is actually inferior to current law in a number of areas.

For example, it dispenses funds for the repair and replacement of bridges by looking to the average national unit cost of repair, not the actual cost of repair incurred by a State. This means that a State like New Jersey which has high bridge repair costs will receive an amount of Federal funds which is insufficient to meet local repair needs.

Also, the 4-R program which provides for the reconstruction, resurfacing, restoration, and rehabilitation of Federal highways is woefully inadequate. The Senate bill changes current law so that funds will be distributed to a greater extent on how many miles of lanes exist in each State and to a lesser extent on how many vehicles travel over those miles. We are in agreement that our highways are deteriorating due to 20 years of heavy traffic. Does it make sense, then, to provide repair money to States which have a lot of highways rather than to States, like New Jersey, which have a lot of vehicle traffic? Of course not, yet, the Senate bill changes the "4-R" formula so that it is less sensitive to highway traffic.

Unfortunately, the mass transportation portion of the bill also contains many unwise and unfair provisions. While the bill does provide for greater Federal assistance for mass transportation capital investments, it simultaneously imposes a major reduction in Federal mass transit operating assistance. Under this bill, the transit authority in my State will be forced to reduce Federal operating assistance by 20 percent under the levels of last year. If the local transit officials want to use more Federal assistance for operating expenses and less for capital expenses, they may do so, up to certain limits, but only if they suffer a federally imposed penalty. Under the bill, for every $2 which the transit agency wants to use for operating assistance, they must forego $3 in Federal funds which would have been used for capital investments. This provision of the bill contradicts the basic decentralized decisionmaking philosophy of the administration by penalizing local officials who want to use Federal funds in accordance with local needs. It penalizes States such as New Jersey which have good capital investment programs but need operating assistance to keep mass transit available for people of moderate means and to prevent gridlock on our highways.

This bill not only ties the hands of local officials, it also unwisely ties the hands of the Secretary of Transportation. An amendment accepted by the Senate limits the discretion of the Secretary so that he may not approve a Federal grant for a highway or transit project if the funding for a State under the grant exceeds one half of 1 percent of the funds available under the transit capital infrastructure program. This program is designed to let the Secretary distribute funds for important and necessary mass transit investments, but the amendment in the Senate bill limits the Secretary's power to invest where investment is needed.

In addition to these substantive problems, there is a real question as to whether New Jersey will actually get anything out of this new program. The reason is that eligibility for a share of the gas tax revenues requires that a State come up with matching funds. New Jersey faces a serious budget crisis and there is no assurance that revenues will be available to meet the matching requirement. The fact that the bill cuts mass transit operating subsidies will only exacerbate the budget crunch and decrease the likelihood that New Jersey will benefit from the gas tax revenues. This means that if this bill passes, New Jersey runs the risk that our residents will have borne the brunt of higher gas taxes without the State getting any extra transportation money or any new jobs in return. Unless I am assured that we can avoid this outcome, and that there will be a fair deal for New Jersey, I cannot vote for this legislation.

I also object to the way this bill raises revenues. A gasoline tax is like a sales tax. It is levied on consumption and, unlike an income tax, takes no account of ability to pay. In other words, a gas tax is regressive, imposing the same burden on the poor and the well-to-do, even though the former can ill afford a new tax hike.

I offered two amendments that would have addressed this problem. One would have exempted families making below $10,000 from the gas tax by indexing the so-called earned income tax credit. The other amendment would have financed the transportation program by deferring the third year of the Reagan tax cut for families over $65,000. Both amendments were defeated.

The bill also does not do enough to promote jobs for the victims of the Reaganomic recession. Unemployment is approaching an alltime high. A large part of the impetus for the gas tax bill has been Congress desire to respond constructively to this alarming situation. Yet, the highway legislation proposed by the administration would have created very few jobs. To remedy this, I, along with other Democrats, offered an amendment that would have provided an extra $840 million for high priority jobs and retraining for about 100,000 additional unemployed persons. Moveover, these new revenues would have been raised in a much fairer manner.

Let me emphasize, Mr. President, that these would not have been dead-end, make-work jobs. They would have been real jobs repairing roads, bridges, sewers, and water systems—the skeleton of our vital infrastructure.

This, too, was defeated.

As I have noted, I am voting against the bill because it is inadequate. The revenue provisions which increase the gasoline tax and other highway taxes are inadequate. The spending provisions which are needed to create jobs are inadequate because they do not address the employment and infrastructure needs of the country in a comprehensive manner. The highway provisions of the bill are inadequate because highway funds are dispensed in a manner which is insensitive to our National and State transportation needs and priorities. And, the mass transportation provisions are inadequate, because they reduce Federal operating assistance and limit the actions of local transit authorities.

I sincerely hope that the conference who will settle the differences between the House and Senate bills produce a bill which makes corrections on all of these points. I am voting against the bill at this time as a signal to the conferees that I am not satisfied with the bill as in the Senate because I want a Surface Transportation Act which fairly raises revenues, wisely dispenses Federal funds, and one which meets both the employment and infrastructure needs of our Nation. The bill

before us meets some of those needs, but it does not go far enough, so I must vote against the measure.

Mr. GLENN. Mr. President, I rise to support the proposed increase in the gas tax to fund an expanded highway program. I do so because the need for increased spending on our transportation system is clear and immediate. America's transportation infrastructure—the foundation upon which our economy is built—is crumbling. Our roads are breaking up, our bridges are falling down, and our mass transit systems are grinding to a halt.

The amount of investment needed to preserve and repair these systems is staggering, but we can no longer postpone such expenditures. Our infrastructure problems will only grow worse through neglect; and, as these problems grow, our economic productivity will continue to decline. Simply stated, we cannot hope to strengthen the heart of our economy unless the arteries that deliver its lifeblood are healthy and robust.

In addition to general productivity increases, an expanded highway program holds out the promise of creating jobs that are in critical demand. Unemployment nationwide continues to rise, and in my home State of Ohio has reached 14.2 percent. The bill will not dramatically reduce this onerous statistic, but it will provide some new jobs immediately—and we can hardly afford to quibble over how many when the need for job creation is so great.

Additionally, this legislation, for the first time in our history assures a steady and reliable source of funding for mass transit. It does so by estabishing a separate mass transit account within the highway trust fund. This dedicated fund, which will provide $16.5 billion in transit aid over the next 4 years, will help put our transit programs on firmer footing, thereby alleviating inner-city traffic congestion and the need to build additional highways in urban areas.

Against this background, the expanded transportation program we are considering today would seem to merit unqualified support. Regrettably, this is not the case. The bill is flawed in many respects, and it is important to highlight these flaws because they portend trouble down the line for our transportation systems and for the future of our national transportation programs.

First, we should not delude ourselves or the public into thinking that this additional tax will immediately make our transportation system whole. The $5.5 billion in revenues that we project will be raised annually by the tax falls far short of our repair, rehabilitation, and replacement needs.

In fact, the formulas in this legislation do not even focus expenditures on our 3R needs. These formulas will lead to the allocation of more than 40 percent of outlays on new construction, while devoting only 29 percent to more labor intensive, job creating 3R work.

Now I realize that 5 percent of our Interstate Highway System is yet to be completed, but would it not be a more judicious and effective use of tax funds to: repair the 4,000 miles of interstate that needs immediate resurfacing; rehabilitate the 8,000 miles of the system and the 13 percent of its bridges that are beyond their designated service lives; and conduct a more thorough review of remaining interstate projects with special concern for their budgetary, employment and environmental impacts? Several studies, including one by the Congressional Budget Office, suggest that many of the uncompleted portions of the Interstate System are particularly local or regional in their nature and significance. It would seem to be far more prudent to defer such projects and concentrate our funds where they will have the most impact on employment and structural rehabilitation.

Second, the distribution formulas in this legislation are highly inequitable. Although the citizens of every State pay the same amount of gasoline tax, they do not share equally in its rewards. The formulas send far more funds back to some States—in proportion to their contributions—than they do to others. As a practical matter, this means that some States are actually exporting taxes and jobs to other States.

As a result of these disparities, my own State of Ohio currently recaptures barely 76 cents for every dollar it contributes to the trust fund. Although an effort has been made to inject some sorely needed equity into the program—by guaranteeing a minumum return of contributions—I do not believe that the "equity issue" has been adequately resolved. Although we all understand that redistribution is a necessary component of any effort to construct a national transportation infrastructure, the existing, pronounced disparities between donor and donee States can only undermine the cooperative spirit on which these programs depend.

Third, I think it is important to recognize that the trucking community is being asked to shoulder a heavy burden under this bill. We can argue forever whether truckers will be assuming their fair share of taxes under the new formulas, but one fact is beyond dispute: These increases are significant and they are painfully abrupt; so abrupt, in fact, that they will almost certainly cause true hardship for many carriers. Over the coming months, we should carefully monitor their impact and be ready to make adjustments should that be necessary. At the very least, we should insist that our Senate conferees fight to retain the adjustments in the trucking tax provisions that we adopted.

Finally, I think it is no small disappointment that by rejecting the Buy America amendment, the Senate declined the opportunity to truly make this legislation a "jobs bill." Under normal economic conditions we might not need such an amendment. But today's economic conditions are anything but normal. Unemployment is at its highest level since the Great Depression, and plant capacity utilization rates are at their lowest levels since World War II. Our steel industry's capacity utilization rate is at the depression level of 31.8 percent, and more than 160,000 steelworkers are unemployed. It seems to me only sensible and fair that the tax dollars Americans contribute to the highway program be used to create jobs for American workers.

The problems I have outlined are serious ones, but they can be corrected. Our more pressing concern is the sad state of our transportation infrastructure, and our more immediate need is to stimulate employment. Delaying enactment of this legislation will not bring us one step closer to addressing this agenda. And so I urge my colleagues to adopt H.R. 6211.

Mr. LEAHY. Mr. President, the Senate today is considering a 5-cent-a-gallon increase in the fuel tax and an increase in taxes on trucks. The revenue raised by these tax increases will be used to repair the Nation's roads, bridges, and transit systems.

There is no question that our rapidly deteriorating transportation infrastructure—the roads, bridges, transit, and other facilities upon which the Nation depends to deliver essential services—must be repaired. Roads and bridges in disrepair are dangerous, increase gasoline use, and lead to costly repairs on cars and trucks. Inadequate transit systems force more traffic onto already overcrowded highways, which only increase their deterioration and add to the Nation's energy bill.

It is also clear that the 320,000 jobs that will be created by this bill are desperately needed. Although these jobs will benefit but a small percentage of the over 11 million Americans forced out of work by the deepest recession of my lifetime, it is a positive step toward our common goal of putting people back to work.

The real question is whether this 5-cent increase in the fuel tax and increase in taxes on trucks is the best way to pay for this needed program of repair and rehabilitation. No one wants to pay more at the gas pump for their cars and trucks. But I feel that this device—a pay-as-you-go user fee—rather then an across-the-board tax or any spending measure that would increase the deficit, is the proper way to accomplish our common objective of

repairing the Nation's crumbling infrastructure.

My greatest concern is that this program, while funding the nationwide repair and rehabilitation efforts, not constrain the States in their effort to improve roads that urgently need repair, but are not eligible for funding under the Federal-aid highway program. Repairs of these roads will have to be financed by the States themselves, not the Federal Government.

For this reason, I support the compromise reached by the Senate Environment and Public Works Committee that will allow Vermont and other States to make full and immediate use of the additional highway funds provided under this bill. This compromise will give Vermont time to provide the significant increased matching funds necessary to receive the additional Federal funds and give it greater flexibility to meet its unique and specific highway needs.

After carefully considering this bill, I have concluded that it will be good for Vermont and good for the Nation. Vermont will continue to receive considerable more money for its roads, bridges, and transit system than it contributes in Federal taxes. This bill will specifically benefit Vermont as it contains a separate $50 million authorization for the important Essex junction circumvential highway demonstration project.

And, on the national level, we will finally be addressing the long neglected needs of our transportation system. It is essential to our economy and the safety of those traveling our roads and bridges that we face up to this responsibility now. To do otherwise will only add to the cost of making the repairs later.

For these reasons, I will today vote in favor of the highway gas tax bill.

THE SURFACE TRANSPORTATION ACT OF 1982

Mr. KASTEN. Mr. President, I strongly support the goals of the legislation before us today—to create jobs and to repair our decaying roads and bridges. If the Surface Transportation Act could actually accomplish these two goals, I would be the first to vote for it. In reality, however, this bill promises only to exacerbate the economic problems our country, and my State of Wisconsin, already face.

Wisconsin is currently suffering from an unemployment rate higher than the national average, and new jobs are in desperate demand. Yet if this legislation becomes law, Wisconsin will lose 15 cents of every extra dollar it sends to Washington. Wisconsin's economy is not strong enough to financially underwrite jobs in Alaska, Mississippi, and South Dakota.

I appreciate the efforts that were made to guarantee a minimum return of these new gas tax funds to each and every State. Yet under this bill, for every $100 million that leaves Wisconsin, only $85 million will come back to pay for highway and bridge construction. The rest will pay for new jobs somewhere else.

Some have questioned if this legislation would create any net new jobs at all. Council of Economic Advisers Chairman Martin Feldstein has said that a 5-cent-a-gallon Federal gas tax increase "may actually increase unemployment in the first year or two." Although the extra public spending on roads and bridges will provide jobs for some, the gas tax increase that pays for the program will take work away from others.

In other words, the $5.5 billion in extra Government revenue from the gas tax will mean $5.5 billion less spending power in the hands of consumers. Small cutbacks in spending here and there will add up across the economy, reducing jobs in a variety of industries. The trucking industry will be especially hard hit by these increased taxes, and small businesses nationwide will see their costs increase. The tax increase could become one more drag on the economy, one more impediment to the economic recovery our country so desperately needs.

The Surface Transportation Act could also reduce the ability of States to deal with their own decaying infrastructure problems. Much of the work that is usually associated with highway repair is done with State and local funds: Pothole repair, minor bridge work, and resurfacing of many older roads. The Federal program has been, and remains, geared to upgrading and expanding the interstate road system. If the Federal Government raises gas taxes to pay for this upgrading and construction, many States may find it difficult, if not impossible, to raise their own taxes to fund basic State and local preservation programs. We may end up forcing States and localities to sacrifice their own priorities for Federal ones.

Mr. President, the problems are clear. Too many Americans are out of work, and something must be done. Our roads and bridges are decaying, and they must be repaired. Yet the legislation before us today will not solve these problems, in fact, it could make them worse. I cannot support legislation which will penalize the people of Wisconsin by using their tax dollars to create jobs somewhere else. I ask my colleagues to join me in voting down the Surface Transportation Act of 1982.

SAFETY ON HIGHWAYS—TO SAVE LIVES

Mr. MELCHER. I am supporting this highway construction bill to provide for substantial repair, reconstruction, and rehabilitation of the highways in all of the 50 States. In addition the bill also provides for expedited completion of the Interstate System.

But the major significance in this measure is the resulting increase in safety on the highway by the upgrading of our Federal highway system, improvements on secondary roads, and the help it provides for those portions of the funds available for cities. We can save lives with the passage of this bill.

There are also the obvious benefits of more efficient operations of cars and trucks on improved roads. But that immeasurable result of safety on the highway resulting from better roads is the most important reason for the bill's passage.

For all Americans, saving and protecting lives is the most vital purpose for this bill.

The PRESIDING OFFICER. The question is on the passage of the bill, as amended.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The majority leader is recognized.

UP AMENDMENT NO. 1582

Mr. BAKER. Mr. President, earlier today a series of amendments that had thought to be agreed to by sponsors on both sides of the aisle were objected to as qualified notwithstanding provisions of rule XXII.

I think those measures are fully cleared with the exception of one or two objections, and I hope at this time the junior Senator from North Carolina might withdraw his objection so that we could adopt those amendments now and include them in this measure as we send it to the House of Representatives.

Does the Senator wish to pursue it?

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Mr. President, I believe that we had indicated a moment ago which objections to amendments to which we had objections would be withdrawn.

Now is the request currently to reconsider those that we are still objecting to?

Mr. BAKER. Mr. President, the request that I make is that seven items be qualified for consideration at this time notwithstanding the provisions of rule XXII, and I yield to the distinguished chairman of the Finance Committee to identify them.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I say again that one is the Roth amendment, which would have been a germane amendment, that deals with the taxation of retread rubber; the other is a technical nontax amendment offered by the Senator from Oklahoma (Mr. NICKLES), and another extends eliminating architectural and transportation barriers; a technical amendment to the Byrd amendment and the Byrd-Long amendment dealing with ferro alloy; another is the public utility amendment; another one is the Domenici technical amendment on synfuels; and the final one is the Eastern Airlines safe harbor leasing modification that passed the Senate on two other occasions.

Either we are going to—there are four technical amendments and three of some substance, and two of them impact directly on North Carolina.

Mr. President, while they are taking a look at the amendments, I would say so far as I know there are no objections to the amendments. They all ought to be adopted or none ought to be adopted. Some are very important to many Members of this body. They have been cleared by both sides, they have been cleared by everyone who has an interest in them, and I hope the distinguished junior Senator from North Carolina will permit us to proceed with all of the amendments or if he has an objection will will proceed with none of the amendments.

Mr. WALLOP. Mr. President, will the Senator from Kansas yield for a comment?

Mr. DOLE. I would be glad to yield.

Mr. WALLOP. I just saw one of our colleagues fleeing from the Chamber with tears in his eyes. He said he saw a note on his kitchen table which said:

MY DEAREST: The day before yesterday you arrived home yesterday. Yesterday you arrived home today. Now, my darling, if today you arrive home tomorrow you will find I left home yesterday.

[Laughter and applause.]

And it is already yesterday, and he has gone.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. I thank the Senator from Wyoming. I await the reply of the Senator from North Carolina.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Is there objection to the unanimous-consent request on the engrossment of the Baker amendment and that these amendments be included?

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Mr. President, as I understand it now we are asked to give unanimous consent to seven amendments. There is, with all due respect, probably another example of a tremendous amount going through the waning hours of the "lameduck" session—like a gas bill where most people have not the slightest idea what these amendments do, not the slightest.

I gave my approval of No. 1, No. 2, and No. 3; and I had given it on 6 and 7. On No. 4, on the Byrd amendment, I frankly have strong reservations about it, but I have great respect for the minority leader and I will acquiesce in that one.

That brings me down to the seventh one, which I am asked at this late hour to give my consent to, and because of the time pressure and all the colleagues staring at me, I shall do so in the name of harmony of this institution.

It has to do with the California public utilities provisions which, I daresay, anybody around here would not have the slightest idea what it deals with. It is my understanding that there are some negatives in it in terms of the advantages that it gives in this particular case, and I do not mean to be disrespectful of those who are supporting it. I am simply saying to the argument I have been making, having made it this evening time and time again, I am a little worried because of the late hour and not only because everyone is fatigued and tired, but you get more requests to push things through that people have not had the slightest idea as to what they will do, and when they did have some kind of reflection of a week or 10 days or 2 weeks ago they obviously had some reservations about it.

But I will accept the word of my colleagues, if I am the only one how holding out, that the California public utilities provision is a sound one, it is a good one, and as only one Senator here who does not feel it is, after the other 99 have examined it with great care and attention, that it is a good one, I guess that is the position you are putting me in, that I will not acquiesce as a single holdout, and if that is where we are on it and everybody else is thoroughly convinced it is that sound, I have strong reservations about it, but I will yield on it.

I would be willing to give unanimous-consent agreement to the seven amendments, but I will say with all due respect to the distinguished chairman of the Committee on Finance I am deeply troubled with this kind of procedure which has run rampant tonight, where one is constantly asked to approve last ditch, last minute bills, amendments, ad infinitum that candidly people do not have the slightest idea as to what they deal with.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Let me finish. I do acquiesce in the seven amendments, although I have strong reservations about the value of one or two in varying degrees of intensity, but I will acquiesce.

Mr. DOLE. Mr. President, I thank the distinguished junior Senator. I might say I can assure the Senator from North Carolina, as much as I can assure the Senator from North Carolina, that we have debated the California utilities amendment on this floor. We have tightened up the amendment more than many thought we should in an effort to make certain that we met the requirements of everyone in this Chamber, and I appreciate the Senator's not objecting to the amendments.

The PRESIDING OFFICER. Is there objection? Without objection, the amendments are considered adopted en bloc.

The amendment (UP No. 1582) is as follows:

On page 31 of the matter proposed to be inserted, strike lines 8 through 10 and the matter between lines 10 and 11, and insert in lieu thereof "(3) Tread rubber, 6 cents per pound.

On page 41, strike line 21 and all that follows through line 3 on page 42 and redesignate the subsequent subsections accordingly.

On page 31 of the matter proposed to be inserted, in the table following line 6, strike "9.75" and insert "10", and strike "$4.875" and insert "$5.00", and strike "$12.375" and insert "$12.50".

Section 244 of the matter proposed to be inserted is amended—

(a) in subsection (a) by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1984";

(b) in subsection (c)—

(1) by striking out "fiscal year 1983 under section 104(b) of this Act" in paragraph (1) and inserting in lieu thereof "the year in which certification is made pursuant to subsection (b)"; and

(2) by striking out "fiscal year 1982" in paragraph (2) and inserting in lieu thereof "the preceding fiscal year"; and

(c) in subsection (d) by striking out "September 30, 1984" and inserting in lieu thereof "September 30, 1985".

At the end of title I of the matter proposed to be inserted, insert the following:

SEC. . DEDUCTION FOR ELIMINATING ARCHITECTURAL AND TRANSPORTATION BARRIERS TO THE HANDICAPPED AND ELDERLY.

Subsection (c) of section 2122 of the Tax Reform Act of 1976 (relating to the effective date for allowance of the deduction barriers to the handicapped and elderly) is amended by striking out "January 1, 1983" and inserting in lieu thereof "January 1, 1984".

SEC. . AFFIRMATIVE COMMITTEE RULE.

Clause (iii) of section 46(a)(2)(C) (relating to longer period for certain long-term projects) is amended by inserting "or (VII)" after "subclause (I)".

SEC. . TAX TREATMENT OF PUBLIC UTILITY PROPERTY.

(a) NORMALIZATION METHOD FOR PURPOSES OF DEPRECIATION.—

(1) IN GENERAL.—Paragraph (3) of section 168(e) of the Internal Revenue Code of 1954 (relating to special rule for certain public utility property) is amended by redesignating subparagraph (C) as subparagraph (D)

and by inserting after subparagraph (B) the following new subparagraph:

"(C) Use of inconsistent estimates and projections, etc.—

"(i) IN GENERAL.—One way in which the requirements of subparagraph (B) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adustment which is inconsistent with the requirements of subparagraph (B).

"(ii) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of clause (i) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under subparagraph (B)(ii) unless such estimate or projection is also used, for ratemaking purposes, with respect to the other 2 such items and with respect to the rate base.

"(iii) REGULATORY AUTHORITY.—The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in clause (ii)) which are to be treated as inconsistent for purposes of clause (i).".

(2) AMENDMENT TO SECTION 167(1).—Subparagraph (G) of section 167(1)(3) of such Code (defining normalization method of accounting) is amended by adding at the end thereof the following new sentence: "For purposes of this subparagraph, rules similar to the rules of section 168(e)(3)(C) shall apply.".

(b) COMPUTATIONS FOR PURPOSES OF INVESTMENT CREDIT.—Subsection (f) of section 46 of such Code (relatiog to limitation in case of certain regulated companies) is amended by adding at the end thereof the following new paragraph:

"(10) Use of inconsistent estimates and projection, etc., for purposes of paragraphs (1) and (2).—

"(A) IN GENERAL.—One way in which the requirements of paragraph (1) or (2) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of paragraph (1) or paragraph (2), as the case may be.

"(B) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of subparagraph (A) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's qualified investment for purposes of the credit allowable by section 38 unless such estimate or projection is consistent with the estimates and projections of property which are used, for ratemaking purposes, with respect to the taxpayer's depreciation expense and rate base.

"(C) REGULATORY AUTHORITY.—The Secretary may be regulations prescribed procedures and adjustments (in addition to those specified in subparagraph (B)) which are to be treated as inconsistent for purposes of subparagraph (A).".

(c) EFFECTIVE DATES.—

(1) GENERAL RULE.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1979.

(2) SPECIAL RULE FOR PERIODS BEGINNING BEFORE MARCH 1, 1980.—

(A) IN GERERAL.—Subject to the provisions of paragraphs (3) and (4), notwithstanding the provisions of sections 167(1) and 46(f) of the Internal Revenue Code of 1954 and of any regulations prescribed by the Secretary of the Treasury (or his delegate) under such sections, the use for ratemaking purposes or for reflecting operating results in the taxpayer's regulated books of account, for any period before March 1, 1980, of—

(i) any estimates or projections relating to the amounts of the taxpayer's tax expense, depreciation expense, deferred tax reserve, credit allowable under section 38 of such code, or rate base, or

(ii) any adjustments to the taxpayer's rate of return,

shall not be treated as inconsistent with the requirements of subparagraph (G) of such section 167(1)(3) nor inconsistent with the requirements of paragraph (1) or (2) of such section 46(f), where such estimates or projections, or such rate of return adjustments, were included in a qualified order.

(B) QUALIFIED ORDER DEFINED.—For purposes of this subsection, the term "qualified order" means an order—

(i) by a public utility commission which was entered before March 13, 1980,

(ii) which used the estimates, projections, or rate of return adjustments referred to in subparagraph (A) to determine the amount of the rates ot be collected by the taxpayer or the amount of a refund with respect to rates previously collected, and

(iii) which ordered such rates to be collected or refunds to be made (whether or not such order actually was implemented or enforced).

(3) LIMITATIONS ON APPLICATION OF PARAGRAPH (2).—

(A) PARAGRAPH NOT TO APPLY TO AMOUNTS ACTUALLY FLOWED THROUGH.—Paragraph (2) shall not apply to the amount of any—

(i) rate reduction, or

(ii) refund,

which was actually made pursuant to a qualified order.

(B) TAXPAYER MUST ENTER INTO CLOSING AGREEMENT BEFORE PARAGRAPH (2) APPLIES.—Paragraph (2) shall not apply to any taxpayer unless, before the later of—

(i) July 1, 1983, or

(ii) 6 months after the refunds or rate reductions are actually made pursuant to a qualified order,

the taxpayer enters into a closing agreement (within the meaning of section 7121 of the Internal Revenue Code of 1954) which provides for the payment by the taxpayer of the amount to which paragraph (2) does not apply by reason of subparagraph (A).

(4) SPECIAL RULES RELATING TO PAYMENT OF REFUNDS OR INTEREST BY THE UNITED STATES OR THE TAXPAYER.—

(A) REFUND DEFINED.—For purposes of this subsection, the term "refund" shall include any credit allowed by the taxpayer under a qualified order but shall not include interest payable with respect to any refund under such order.

(B) NO INTEREST PAYABLE BY UNITED STATES.—No interest shall be payable under section 6611 of the Internal Revenue Code of 1954 on any overpayment of tax which is attributable to the application of paragraph (2).

(C) PAYMENTS MAY BE MADE IN TWO EQUAL INSTALLMENTS.—

(i) IN GENERAL.—The taxpayer may make any payment required by reason of paragraph (3) in two equal installments, the first installment being due on the last date on which a taxpayer may enter into a closing agreement under paragraph (3)(B), and the second payment being due one year after the last date for the first payment.

(ii) INTEREST PAYMENTS.—For purposes of section 6601 of such Code, the last date prescribed for payment with respect to any payment required by reason of paragraph (3) shall be the last date on which such payment is due under clause (i).

(5) NO INFERENCE.—The application of subparagraph (G) of section 167(1)(3) of the Internal Revenue Code of 1954, and the application of paragraphs (1) and (2) of section 46(f) of such Code, to taxable years beginning before January 1, 1980, shall be determined without any inference drawn from the amendments made by subsections (a) and (b) of this section or from the rules contained in paragraphs (2), (3), and (4). Nothing in the preceding sentence shall be construed to limit the relief provided by paragraphs (2), (3), and (4).

(J) AFFIRMATIVE COMMITMENT RULE FOR SYNTHETIC FUEL.—Clause (iii) of section 46(a)(2)(C) of the Internal Revenue Code of 1954 (relating to longer period for certain long-term projects) is amended by adding at the end thereof the following new sentence: "In the case of property described in clauses (iii) or (v) of section 48(1)(3)(A), property described in clauses (vi) or (vii) of section 48(1)(3)(A) which is related to such clause (iii) or clause (v) property, or property described in clause (v) of section 48(1)(2)(A), this clause shall be applied by substituting 'January 1, 1985' for 'January 1, 1983.'"

SEC. LEASING OF CERTAIN AIR CRAFT.

Subsection (d) of section 208 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended—by adding at the end of subparagraph (D) of paragraph (3) the following new sentence "For purposes of sections 47 and 168(f)(8) of the Internal Revenue Code of 1954, if any property described in this subparagraph—

"(I) is sold (or assigned) pursuant to a title 11 or similar case (within the meaning of section 368(a)(3)(A)), or is transferred subsequent to such sale or assignment, and

"(II) is used outside the United States,

such property shall, with respect to the lessor under any agreement with respect to such property under section 168(f)(8), be treated as property described in seciton 48(a)(2)(B)(i), except that none of the benefits provided in this subparagraph shall inure to a foreign air carrier; however, it shall not be considered a benefit for a foreign air carrier to purchase airplanes sold in circumstances described in subclause (I)."

THE CALIFORNIA UTILITY TAX AMENDMENT TO H.R. 6211

Mr. HAYAKAWA. Mr. President, the amendment offered on my behalf by the chairman is the so-called California utility tax bill. As passed by the House, the corresponding bill rectifies a long standing dispute between the Internal Revenue Service (IRS) and the California Public Utilities Commission (CPUC) regarding the normalization requirements associated with eligibility for Federal tax benefits. It is a noncontroversial matter which I hope the Senate can accept.

In 1960, the CPUC decided that California utilities could, at their discretion, claim accelerated depreciation under the Internal Revenue Code of 1954, but the benefits derived from the reduced tax expense would have to be flowed-through to the ratepayers. With the exception of Pacific Telephone and Telegraph Co. (Pacific) and General Telephone Co. of California

(General), all utilities in the State chose accelerated depreciation, and reduced their rates accordingly.

In 1968, the CPUC ordered that, for ratemaking purposes, the use of accelerated depreciation would be imputed regardless of which accounting method was used for tax purposes.

The following year, Congress enacted the Tax Reform Act of 1969, establishing in section 167(1) of the Internal Revenue Code that public utilities not then using accelerated depreciation could not switch to that method unless normalization accounting was used for ratemaking purposes. Subsequently, the two telephone companies elected to use accelerated depreciation with normalization, and the CPUC issued interim regulations authorizing the election with full normalization. In 1971, the California Supreme Court annulled the interim regulations, holding that the CPUC failed to consider "lawful alternatives," and remanded the decision for further consideration by the Commission.

In 1974, the CPUC again approved normalization accounting as a prerequisite for the utilities to qualify for accelerated depreciation and, in a separate rate case, the investment tax credit.

In December 1975, the California Supreme Court again annulled the CPUC normalization order, and again remanded it to the Commission for further consideration of alternatives. In 1977, the CPUC issued an order adopting a unique interpretation of the requirements set forth in the Internal Revenue Code, such that new accounting methods allowing a partial flow-through to ratepayers must be used by the utilities. Average annual adjustment (AAA) for accelerated depreciation and annual adjustment (AA) for the investment tax credit were adopted calling for reductions in the rate base and cost of service.

In a private letter ruling sought by the utilities, the IRS determined that the AAA and AA accounting methods did not meet the eligibility requirements for the Federal tax benefits.

Notwithstanding the differing interpretations of the eligibility standards by the IRS and the CPUC, in 1977 the California Supreme Court refused a petition of the telephone companies for review, and the U.S. Supreme Court refused to review the State court denial. In 1979, the companies filed a petition for rehearing, which was subsequently denied by the California Supreme Court, and the review of which was denied by the U.S. Supreme Court.

With all avenues of litigation exhausted, the CPUC ordered the telephone companies and Southern California Gas Co. (for its election of investment tax credit benefits) to make refunds to ratepayers. To date, Pacific has made refunds of $321 million, with an additional interest component of $97 million, and General has made refunds of $91 million, with an additional interest component of $34 million. Southern California Gas Co. has received a stay, but faces a refund order of $6 million.

Having made the refunds, the three California utilities are subject to the denial by the IRS of all the accelerated depreciation benefits and investment tax credits claimed by the utilities between 1971 and 1980. Including tax and interest, the potential liability of the California utilities amounts to approximately $1.7 billion.

This series of events places the California utilities in a serious dilemma. The utilities have obeyed the orders of their regulator, while also doing everything in their power to avoid the situation in which they now find themselves. They have, in effect, distributed funds to ratepayers that the IRS is seeking to deny them. If that is not bad enough, the IRS must attempt to extract from the utilities funds taken long ago as tax credits and depreciation benefits, the vast majority of which have been spent on plant and equipment, as Congress had intended. The companies are being forced, not only to pay twice the amount actually flowed through to the ratepayers, but to come up with payments to the Treasury of, in one case, nearly 40 percent of the company's equity. This situation, which was clearly beyond the control of the California utilities, seriously threatens the continued operation of the companies.

Mr. President, the legislation which we are today considering, seeks to rectify this situation by clearly defining normalization procedures and relieving the utilities of their potential tax liability. It seems to me that this solution is the only truly acceptable means of resolving the dispute between the IRS and the CPUC. In proposing restrictive language with respect to normalization requirements, the bill addresses the cause of the problem—a difference in interpretation of congressional intent. If adopted, I believe the language will ensure that State public utilities commissions do not pursue unique interpretations of the Internal Revenue Code with respect to normalization. The California experience has been a nightmare which this language will keep from happening again. The second part of the bill, as passed by the House, treats the utility companies in the only sensible manner it can—namely as victims. Because the companies have been at the mercy of the IRS and CPUC, and have done everything in their power to mitigate the dispute while still complying with the orders made by their regulators, they ought not to be penalized.

The amendment includes a proposal offered by the chairman of the Finance Committee and Senator HEINZ which seeks to extract from the California utilities a penalty equal to the tax savings experienced by the utilities and passed on to the ratepayers in the refund order. The provision is based on the notion that California ratepayers experienced a subsidy equal to the amount passed on, because the CPUC ordered a refund which violated the intent of Congress, at the expense of utility ratepayers across the country.

While I am willing to accept the provision purely because the parliamentary situation would keep the amendment from passing at all if it were not added, I want to register my sincere belief and protest that the amendment is ill conceived and will not achieve the ends that the Senator intends. First of all, I think the premise of the provision is fallacious. Where the chairman and the Senator from Pennsylvania believe that the utility ratepayers in California received a subsidy in the form of rate reductions, I contend that California ratepayers suffered a long term loss of the benefits of normalization, and the attendant investment in and improvement of productivity, by experiencing a modest short term reduction in rates. In addition to the loss of investment capital occasioned by the flow-through, the California utilities have experienced bond rating reductions which have exacerbated both capital financing and operating ability. So far from providing a subsidy to the people of California, this dispute has proved to be a current hinderence to the utility companies, and a future burden on California ratepayers that will be forced to bear higher financing costs to make capital expenditures that could have been made earlier and with funds generated by normalization. Thus, the premise of the provision to force the State of California to repay a subsidy is simply unfounded.

As a second matter, the penalty which the chairman and the Senator from Pennsylvania seek to extract from the CPUC for their actions, and the California ratepayers for their subsidy, will be entirely misdirected. This provision will not penalize either group; it will penalize the victims of this dispute—the utilities. There is no guarantee—indeed it is highly unlikely—that the CPUC will adjust the rates of the three utilities to compensate them for their loss. Instead, the utilities will have flowed-through benefits plus interest while being forced also to refund those same benefits to the Treasury; in effect, they will be paying twice for a matter over which they have no control and derive no gain.

While I am unhappy about this provision it was included in the amendment in order to accommodate the concerns of the chairman and the Senator from Pennsylvania, and facilitate passage of the amendment.

I urge the adoption of the amendment.

Mr. GRASSLEY. Mr. President, I am pleased to be a prime cosponsor with Senator ROTH in introducing an amendment for a 6-cent per pound Federal excise tax on all tread rubber tires at the manufacturer's level. This reduction will be financed by an increase in the Federal excise tax on new tires to 10 cents per pound for the first 50 pounds of a tire's weight. Our proposal retains the current law requiring the tread rubber manufacturer remit the Federal excise tax to Treasury at the time of sale.

This proposal would replace the provision agreed to by the Senate Committee on Finance which would subject tread rubber to a tax of 5 cents per pound when used for tires under 50 pounds, 8 cents per pound when used for tires between 50 and 100 pounds. Our proposal will also increase the Federal excise tax on new tires to 10 cents per pound for the first 50 pounds, and increase from the current levy of 9.75 cents per pound, which was retained in the Finance Committee's bill. The committee's provision imposes the Federal excise tax on tread rubber on two levels, the manufacturer and the retailer. This would be a very difficult tax to collect since manufacturers rarely know the total weight of the tire after the retreader applied the new rubber to the old tire. Under our proposal, the tax would be levied only on the manufacturer at the time of sale.

Of particular concern to me is the energy conservation aspect of retread rubber. In order to manufacture one new tire, 7 gallons of oil are used; only 2½ gallons of oil are required to make a retread. These figures translate into a savings of 400 million gallons of oil every year by retreading.

If the Federal excise tax on retread rubber is increased, either by the administration's proposed 25 cents per pound, or by the Finance Committee's proposed 5 cents, 8 cents, and 16 cents per pound on retread tires weighing up to 50 pounds, 50 to 100 pounds, and over 100 pounds, respectively, the price differential between new tires and retreads is narrowed considerably. At the present time, retread tires are sold for between 50 and 60 percent of the cost of a new tire. This would inevitably discourage the purchase of retreads, which is bad from both an energy conservation and cost factor point of view.

One-fifth of all passenger and light truck tires are retreads. Any increase in the Federal excise tax will ultimately increase the cost of retread tires for the consumer. Faced with a higher priced tire, the consumer is apt to delay making such a purchase long beyond the point of safety and retreadability. There are approximately 3,000 independent retreaders in the United States today, employing between 45,000 and 50,000 people. As the demand for retread rubber decreases, many small establishments will be forced to close due to lack of business, thus increasing our country's increasingly grave unemployment problems.

I ask that my esteemed colleagues support this amendment to S. 6211, the Surface Transportation Act of 1982. It is extremely important that our infrastructure be maintained and the cost borne by the users; however, we cannot allow an additional waste of energy to occur by discouraging the use of retread tires, nor can we take any chances of increasing our present unemployment situation.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass? The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

I also announce that the Senator from Utah (Mr. HATCH) is absent due to illness.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY) would vote "nay."

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 56, nays 34—as follows:

[Rollcall Vote No. 467 Leg.]

YEAS—56

Abdnor	Baker	Bentsen
Andrews	Baucus	Boschwitz
Brady	Hart	Pell
Burdick	Hayakawa	Percy
Byrd, Harry F., Jr.	Huddleston	Pressler
Chafee	Jepsen	Quayle
Chiles	Kassebaum	Randolph
D'Amato	Laxalt	Roth
Danforth	Leahy	Rudman
DeConcini	Levin	Schmitt
Dixon	Long	Specter
Dodd	Lugar	Stafford
Dole	Mathias	Stennis
Domenici	Matsunaga	Stevens
Durenberger	McClure	Symms
Glenn	Melcher	Thurmond
Gorton	Murkowski	Tsongas
Grassley	Nunn	Warner
	Packwood	Weicker

NAYS—34

Armstrong	Ford	Nickles
Biden	Garn	Proxmire
Boren	Hawkins	Pryor
Bradley	Heflin	Riegle
Bumpers	Helms	Sarbanes
Byrd, Robert C.	Humphrey	Sasser
Cochran	Inouye	Simpson
Cohen	Johnston	Tower
Denton	Kasten	Wallop
Eagleton	Mattingly	Zorinsky
East	Metzenbaum	
Exon	Mitchell	

NOT VOTING—10

Cannon	Hatfield	Kennedy
Cranston	Heinz	Moynihan
Goldwater	Hollings	
Hatch	Jackson	

So the bill (H.R. 6211), as amended, was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate insist on its amendments and seek a conference with the House on the disagreeing votes of the two Houses and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed: for title I, Mr. DOLE, Mr. PACKWOOD, Mr. ROTH, Mr. DURENBERGER, Mr. LONG, Mr. HARRY F. BYRD, JR., and Mr. MATSUNAGA; for title II, Mr. STAFFORD, Mr. DOMENICI, Mr. CHAFEE, Mr. ABDOR, Mr. SYMMS, Mr. BENTSEN, Mr. RANDOLPH, Mr. BURDICK, and Mr. MOYNIHAN; for title III, Mr. GARN, Mr. TOWER, Mr. LUGAR, Mr. PROXMIRE, and Mr. RIEGLE; for title IV, Mr. PACKWOOD, Mr. DANFORTH, and Mr. CANNON.

HOUSE CONCURRENT RESOLUTION 438—SINE DIE ADJOURNMENT OF BOTH HOUSES OF CONGRESS

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate a message from the House on House Concurrent Resolution 438.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A House concurrent resolution (H. Con. Res. 438) providing for the sine die adjournment of the Ninety-seventh Congress.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The concurrent resolution (H. Con. Res. 438) was considered and agreed to.

Mr. BAKER. I move to reconsider the vote, Mr. President.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The concurrent resolution reads as follows:

Resolved by the House of Representatives (the Senate concurring), That the House of Representatives shall adjourn Monday, December 20, 1982, or on Tuesday, December 21, 1982, pursuant to a motion made by the Majority Leader, or his designee, in accordance with this resolution, and that when it adjourns on said day, it stand adjourned sine die; and be it further

Resolved, That the consent of the House of Representatives is hereby given to an adjournment sine die of the Senate at any time prior to January 3, 1983, when the Senate shall so determine; and that pending such sine die adjournment, the Senate may adjourn or recess for such period or periods in excess of three days as it may determine.

ORDER FOR RECESS UNTIL TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 12 noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend not past the hour of 2 a.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

DR. COMMONER PRAISES DEVELOPMENT OF GASOHOL

Mr. PERCY. Mr. President, the distinguished director of the Center for the Biology of Natural Systems (CBNS) has written in support of the accelerated development of alcohol fuels.

Dr. Barry Commoner has written an eloquent letter to Senator ROBERT J. DOLE, chairman of the Finance Committee, addressing important questions raised about the future of this valuable domestic source of motor fuel.

I ask unanimous consent so that the letter from Dr. Commoner can be entered in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CENTER FOR THE BIOLOGY OF NATURAL SYSTEMS,
Flushing, N.Y., December 14, 1982.

Hon. ROBERT J. DOLE,
Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR DOLE: The exemption of gasohol from the proposed 5¢ per gallon increase in the federal road use tax is an important way to help the country break out of the pattern of blunders which has frustrated the efforts to establish sensible national policies on energy, agriculture and the economy. Continued dependence on non-renewable energy sources, such as oil—which inevitably escalate in price as the more accessible, less costly deposits are depleted—is eroding the standard of living, especially of the poor, and diverting capital from productive investments. By stimulating the production of ethanol from renewable agricultural sources, the exemption would move the nation's energy system in the right direction—toward renewable, solar sources which, because they are not depleted, need not rise in cost or cannibalize the economy. By expanding an on-going, domestic ethanol industry in place of imported oil, the measure would permanently increase the national base of employment, thus contributing to the implied purpose of the increased tax. Finally, the exemption would provide much needed long-term support for the faltering farm economy.

For all these reasons, I urge the passage of the gasohol exemption. It is important to recognize, however, that these gains can be realized only if further actions are taken.

The federal exemption can help to expand and stabilize the ethanol production industry if we take this opportunity to end the confusion and uncertainty engendered by the present variety of state-by-state subsidies by rescinding them in favor of the national one.

It should be recognized, as well, that while the exemption can act as a strong incentive to ethanol producers and thereby expand this important, solar, industry, the subsidy could make an even greater contribution to this purpose if it were shared with consumers. I would therefore urge Congress to ensure that unfair oil industry practices do not interfere with the reduction in price of gasohol, below that of comparable gasoline, which will become possible as ethanol supplies increase. In this way, the subsidy would help mitigate consumers' energy costs. Moreover, by enhancing the demand for gasohol, this process would in turn intensify the impact of the tax exemption on the development of the ethanol industry.

Finally, it should be recognized that unless ethanol production is properly integrated into agricultural policy, it is likely to exacerbate the instability of the farm economy, and burden consumers with higher food prices. In my opinion, the enactment of the tax exemption obligates Congress to take steps to retionalize our present policy toward agriculture—which keeps hands off until some economic or political crisis impels a short-term *ad hoc* action. First, ethanol production should be acknowledged as an on-going, expanding market for agricultural crops, and as a means of stabilizing overall agricultural production at higher levels and avoiding cutbacks. Second, it should be recognized that if agricultural ethanol production is to be expanded appreciably (that is, on the scale that is likely to be encouraged by the tax exemption) without interfering with the availability of food, then the crop system must be reorganized to enhance production of carbohydrate-rich crops, such as sugar beets. A study which CBNS has done for the U.S. Department of Energy shows that be a net addition of carbohydrate to the present crop output, such a crop system, can provide the carbohydrate feedstock for ethanol production, without significantly reducing the availability of the nutrients needed for food production. In turn, this requirement should condition the structure of the ethanol propduction industry, for example, by encouraging the construction of distilleries with the necessary feedstock handling equipment close to the site of the production of such alternative crops, which are necessarily more bulky and difficult to transport than grain.

I support the tax exemption for gasohol as an opportune vehicle for moving toward sensible national policies on energy, agriculture and the economy. And I urge that in enacting this measure, Congress accept the responsibility of taking the further actions that are needed if this potential is to be realized.

Sincerely yours,

BARRY COMMONER,
Director.

TRUCK SAFETY ACT

Mr. PERCY. Mr. President, I am pleased to address the Senate concerning the commercial motor vehicle safety provisions of this legislation. Sections 401 through 418 of title IV of S. 3044 include the elements of S. 1390 that I introduced in the last Congress.

I am delighted that the Commerce Committee has included these provisions, and want to express gratitude for its action. I am particularly grateful to the chairman Mr. PACKWOOD, the ranking minority member, Mr. CANNON, as well as Senator DANFORTH and the other members of the committee for the earnestness with which they have pressed for this matter. I commend their abiding interest in truck safety. I thank the committee. And, American motorists and truck drivers will be thankful.

Along with the distinguished chairman of the Commerce Committee, Mr. PACKWOOD, Senator KENNEDY, and former Senator Magnuson, I introduced the Commercial Motor Vehicle Safety Act on June 21, 1979. S. 1390 was the subject of a Commerce Committee hearing on July 17, 1979, reported by the committee on December 20, 1979, and passed by the Senate on February 20, 1980. With only minor changes, the committee has included this legislation in S. 3044.

Title IV of S. 3044 includes the following provisions of S. 1390.

First, the Secretary of Transportation is provided with regulatory power to assure that: Commercial motor vehicles are safely maintained, equipped, loaded, and operated; the responsibilities imposed upon truck drivers do not impair the driver's ability to operate safely; the physical condition of drivers is adequate to enable them to

drive safely; the operation of a truck does not create deleterious effects on the physical condition of such drivers.

Second, the Transportation Secretary is provided with expanded civil and criminal penalty authority to enforce the provisions of the act: $10,000 civil penalty for substantial health and safety violations that could lead to serious injury or death; $25,000 criminal penalty, or 1 year imprisonment, for an employer who violates the act; and, $2,500 for an employee who violates the act.

Third, disciplining, discriminating against or discharging an employee for filing a complaint or exercising rights provided under this act is prohibited. Employees who refuse to operate an unsafe vehicle are protected provided that they sought and were unable to obtain correction of the unsafe condition. Employees may appeal to the Secretary of Labor, who may order affirmative action to abate the violation, reinstatement to the employees original position, compensatory damages and exemplary damages.

Mr. President, this is a key provision of the Truck Safety Act. Because truck drivers are threatened with firing for cooperating with enforcement agencies, or for refusing to drive hazardous or overloaded vehicles, they have little choice other than to comply with their employer's instructions to violate the law. But, with the "whistle-blower" protection of this legislation, drivers will be given the protection to refuse to violate the law. Through the years, Congress has enacted legislation that makes it unlawful for an employer to discriminate against or discharge employees for seeking enforcement of legislation or for cooperating with the government. One of these laws, the Occupational Safety and Health Act, protects nearly every worker in America except those of the trucking industry. It was not applied to truckers because, it was argued, the Department of Transportation already had authority to regulate trucking industry safety practices. As a result, drivers were denied the OSHA protections against employer recrimination for their attempts to secure safe working conditions.

Last, this legislation authorizes the Secretary of Transportation to make grants to States to enforce Federal commercial motor vehicle safety laws and regulations. The Federal Government may pay up to 80 percent of State enforcements costs and, for this purpose, is authorized: $10 million in fiscal year 1984; $20 million in fiscal year 1985; $30 million in fiscal year 1986; $40 million in fiscal year 1987; and $50 million in fiscal year 1988.

S. 1390 originally authorized $250 million over 3 years for State grants, but I fully support this reduced authorization in S. 3044. Presently, the Federal Government has an extremely limited number of truck inspectors, and there is no systematic Federal/State cooperative program concerning truck safety. This provision will help insure effective enforcement of the act. According to the Bureau of Motor Carrier Safety, 41 percent of all trucks that were randomly inspected were found to have safety defects that were imminently hazardous and were ordered off the road until repaired. Yet, the Bureau was able to inspect less than 1 percent of 3 million trucks under its purview. It is reasonable to believe, therefore, that many more unsafe vehicles and conditions go undetected.

Mr. President, the legislation proposed by the administration included two elements of S. 1390—expanded civil and criminal penalties, and State grants to enforce Federal commercial motor vehicle safety laws and regulations. Section 406 of S. 3044, as introduced, corresponds with sections 110 and 111 of my original legislation, and section 407 corresponds to section 107 of S. 1390. I commend the administration for the inclusion of these provisions. By including virtually all elements of S. 1390 in S. 3044, however, we will expand upon and improve the administration's proposal, further enhancing motor carrier safety.

The International Brotherhood of Teamsters, in testimony before the Senate Commerce Committee urged the adoption of the full scope of S. 1390. According to their testimony that bill, "was a masterful compromise of competing interests, one which would greatly increase highway safety without imposing an undue burden on the trucking industry". Mr. President, the Teamsters raise an important point. By including the full scope of the Truck Safety Act in this bill we retain the balance resulting from legislative compromises. Were we to include only portions of the Truck Safety Act we would threaten to undermine the careful balance that the bill represents.

In line with this, I wish to commend the American Trucking Association on its cooperation on this proposal. The ATA has displayed a sincere and abiding commitment to upgrading the safety of its industry and they have made an outstanding contribution to this legislation.

Mr. President, this commercial motor vehicle safety legislation will address a serious problem. In my home State of Illinois, for example, there were 232 deaths reported in 1981 related to trucking accidents; 36,081 trucking accidents were reported in 1981. According to the U.S. Department of Transportation, there were 9,031 deaths reported in 1981 in which trucks were involved.

The provisions of this bill would greatly enhance the effectiveness and efficiency of DOT in regulating and enforcing truck safety. Abuse of present regulations has resulted in countless deaths, injuries, and loss of property. The time to crack down is now. The Highway Users Foundation predicts that, during the next 15 years, the number of trucks on the roads will double. Our highways should not be death traps—they were built for the safe enjoyment and use of all Americans.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS CONFERENCE REPORT

Mr. COHEN. Mr. President, I rise to provide clarification on the conference report to accompany H.R. 7356, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes. Included in this report and the accompanying legislation is the Indian Claims Limitation Act of 1982, an act to extend the current Federal statute of limitations (28 U.S.C. 2415) in a manner that will provide an orderly resolution of outstanding Indian claims. My remarks relate specifically to the provisions of section 3(a) of the proposed legislation which requires the Secretary of the Interior to publish a list of Indian claims which might be affected by 28 U.S.C. 2415. Under this section the Secretary of the Interior is given discretion to exclude from such list any matter which was erroneously identified as a claim and which has no legal merit whatsoever.

Mr. President, when this matter was before the House and Senate conferees I urged that this proviso be amended to further provide that the Secretary shall not exclude from the list any claim solely because of the absence of Federal acknowledgment of tribal existence or formal recognition. The administration informally opposed this on the grounds that such a provision was unnecessary and that the Department did not intend to exclude claims of tribes on this basis. In other words, their policy would be to err on the side of inclusion rather than exclusion. While I believe my proposed amendment would have made this provision clear, nevertheless I am satisfied that this is the intent of the bill and that the administration will carry out the requirements of the act in this fashion.

I would note that to treat this question otherwise would be self-defeating. To refuse to include claims of tribes on the grounds that they were not federally recognized would necessarily lead to the conclusion that the statute of limitations does not and never did apply to these tribes. Refusal to list the claims of unrecognized tribes would defeat the purposes of this stat-

ute in a number of respects, one of which is to gain a clear delineation of the outstanding claims; the second of which is to bar future claims not included on the lists of claims required by the act; and the third of which is to provide an orderly process for resolution of outstanding claims in a manner which avoids arbitrary time limits and allows adequate time for negotiation without mandating disruptive litigation.

Mr. President, this is my understanding of the legislation embodied in the Indian Claims Limitation Act of 1982. As a backdrop to this statement I would simply note that I chaired both of the hearings before the Select Committee on Indian Affairs dealing with administration compliance with the requirements of the 1980 extension of the statute of limitations; that following those hearings I introduced S. 2978 to extend the statute in this Congress; that following introduction of this bill, my committee staff worked closely with the staff of the House Interior Committee in the development of the bill eventually reported out that committee as House Joint Resolution 553; and that this is the bill ultimately adopted by the conferees to accompany H.R. 7356 making appropriations for the Department of the Interior.

THE MX IS VITAL

Mr. DECONCINI. Mr. President, Congress and the President have once again wrestled over the issue of how and where to base the MX missile system, and once again, it has been the American people who have lost. Although I am not a supporter of the Dense Pack basing mode and have told the President this, I am a strong supporter of the MX missile system and believe that it is vitally important that our land-based missile system be upgraded as soon as possible.

Tragically, the deployment debate has become politicized to such an extent that it may result in the demise of the MX missile system itself. When President Reagan first entered office—for reasons which have never been quite clear—he rejected the basing system which had been selected after exhaustive study by the Carter administration. This system, known as the multiple protective shelter or MPS system, was the first choice of the Air Force and was generally accepted by Congress as a workable albeit expensive system which would provide a high degree of survivability to our land based missile forces and was sufficiently flexible to allow for modifications in response to changing technology.

In the place of the well researched MPS system, the President offered the Nation an interim basing mode consisting of placing the MX in so-called superhardened Minuteman missile silos. It was quickly determined that the superhardening of these old silos could in no way provide the survivability necessary to deter a Soviet first strike. Congress torpedoed the interim basing system.

As a result, the administration has now proposed the closely spaced basing mode—better known as Dense Pack—for congressional approval. In addition to the prima facie challenge to this system that it places all the Nation's strategic eggs in one basket, the survivability of the Dense Pack based MX depends on the highly theoretical and basically untestable concept of "fratricide."

The legislation we pass today gives the President another chance to develop a realistic basing mode. I sincerely hope that he makes the most of this opportunity by swallowing a little pride and offending a few political allies and returning to the MPS system as conceived by the previous administration.

No matter which system the President picks, he is going to have to convince the Congress that it can meet our national strategic objectives. However, I am gravely concerned that if the President remains committed to the Dense Pack system, he will destroy our last chance to deploy the MX missile and he will delay the upgrading of our land based missile system for an unforeseeable amount of time.

My words of advice to the President, then, are to steer away from Dense Pack. My words of advice to my colleagues here today are somewhat different.

We do need the MX or a comparable missile system, and I think the vast majority of my colleagues here in the Senate agree. We also need to insure that whatever new missile system we deploy meets the minimum requirements of survivability. What concerns me, Mr. President, is that we may be losing sight of the forest in our detailed discussions about the trees.

Let us keep in mind what purpose survivability serves. The United States is not going to initiate a nuclear war. Our objective is to deter our enemies present and future from being tempted to initiate such a war. Our land-based, counterforce weapon—that is, MX—must be based in such a manner that it draws off most, if not all, of the adversary's first-strike force in an initial attack. It is, in that sense, little more than a lightning rod which exhausts the adversary's major first-strike counterforce weapon.

Should the very worst case scenario actually occur, and the Soviets launch a preemptive strike against our survivably based MX, the missile system would have succeeded if the Soviets were forced to utilize most of its own first-strike, counterforce system in the effort. Because, this would leave both sides with their second-strike capabilities intact and thus, at bay. Obviously, the outcome makes the initial undertaking foolish and costly—therefore, deterrence has been achieved.

My point, Mr. President, is simple. We delude ourselves if we continually search for a basing mode that is perfect. No basing mode is perfect or absolutely survivable. The beauty of MPS was its ability to draw-off most of the Soviet's first-strike, counterforce capabilities thus eliminating their incentive to do it in the first place. We must evaluate the system that the President submits to us by March 1, with these factors foremost in mind, regardless of how tempting it is for partisan reasons, for cost reasons, for nuclear freeze reasons, for whatever reasons, to pick apart any basing proposal because of its weaknesses and consequently to obscure its strengths.

I pray for the successful conclusion of the process we have set forth in this continuing resolution which allows for a structured appraisal of the President's chosen basing mode—an appraisal which will have a definite beginning and end. I pray that we will soon have the MX based in a survivable and workable mode and that we can move on from this position of strength to challenge the Soviets to join with us in negotiating a substantial and long lasting arms control agreement.

Mr. President, I ask unanimous consent that my December 8 letter to President Reagan be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C., December 8, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Thank you for your letter discussing the importance of the MX missile to our nation's security and your decision to deploy 100 MX missiles in the so-called dense-pack configuration.

First, let me emphasize that I wholeheartedly agree that our nation needs the MX missile system and that it should be deployed as soon as possible in a survivable basing mode. I have always supported all facets of development of the MX missile, and I assure you that I will continue to do so.

Unfortunately, I must respectfully disagree with your decision to use the dense-pack mode of deployment for the MX. Because the dense pack system is based on the untestable theory of fratricide, the basing mode violates the tried and true maxim of never putting all your eggs in the same basket.

In addition to the fact that its workability depends on an untestable concept, the dense pack system would be vulnerable to a variety of Soviet countermeasures, including the use of high yield re-entry vehicles or of earth penetrator re-entry vehicles or the

timing of an attack so that the attacking missiles would arrive simultaneously (avoiding fratricide) or so that the attacking missiles would pindown the MX.

In the best interest of our nation, I urge you to reconsider the dense pack plan. I have long believed that some version of the multiple protective shelter (MPS) option proposed by the previous administration with the strong backing of the Air Force would form the optimal basis for a survivable MX system. If this basing mode could be combined with an ABM system or some other form of protective or concealment device, I believe that our nation would have a land based missile system which would protect our nation well into the next century.

Again, Mr. President, thank you for asking for my counsel on this vital issue. I assure you that I will do all I can to help achieve our goal of substantially improving the security of our nation.

Sincerely,

DENNIS DECONCINI,
U.S. Senator.

THE CONTINUING RESOLUTION

Mr. D'AMATO. Mr. President, as part of the continuing resolution, the Congress has added a provision postponing until March 15, 1983, the effective date of the recent rate increase by the Copyright Royalty Tribunal. I was greatly pleased to see that the House conferees recognized the importance of providing some relief, from the CRT's proposed January 1, 1983, implementation date. In fact, I have been informed just today that had the Congress not acted to delay the implementation of the rate increase, as many as 1.4 million cable homes in New York State alone would have lost one or more signals that they have been receiving under the current rates. Such a dramatic impact should result if at all only from an agency decision that has been thoroughly tested by the judicial process.

I am hopeful, Mr. President, that the new March 15 deadline provides the possibility of court review before the extension expires. If it does not, however, there is a possible liability for the higher rates retroactive to March 16. It is clear that the conferees intend that these higher rates will be applied only to those days after March 15 that the signal is actually carried, not applied retroactively back to January 1 even on a prorated basis. Thus, an operator who carriers a distant signal on January 1 through the 6-month period ending June 30, 1983, would incur a liability for royalties at the current rate from January 1 to March 15 and at the new rate from March 16 to June 30 if the CRT decision is not reversed as I expect it will.

I also hope, Mr. President, that the Copyright Office of the Library of Congress will promulgate new regulations to account for the special circumstances interposed by this new provision. Under current regulations as I understand them, a cable operator who carried a distant signal from January 1 to March 15 but who decided to drop the signal on March 15, rather than incur the possible liability of the increased rate in the event the CRT decision was not yet reversed, would nonetheless be required to pay for a full 6 months of carriage at the current rates. If this 6-month policy remains, such an operator who dropped signals on March 15, 1983, would still be required pay at the old rate, for the entire 6-month period.

This is a fair reading of the current regulations but it is hardly a fair treatment of the operators faced with the unusual circumstances of this new March 15 deadline. I would think that the Copyright Office would take this unique circumstance into account and provide an exception to their rules that would charge an operator only for that period the signal was carried—January 1 to March 15—and not for the entire 6 months. Thus, a cable operator who drops a signal on March 15, 1983, should only be liable at the current rates for the 2½ months—from January 1 to March 15—that they actually carried the signal.

Such an accommodation is fully consistent with Congress intent as we declared it in the continuing resolution to preserve the maximum availability of diverse program sources for the viewing public.

INACTION ON BANKRUPTCY

Mr. DECONCINI. Mr. President, it is with deep regret that I have come to the realization that we will not be able to adopt legislation this session in the bankruptcy area of the law. Not to dwell on the point, our lack of action will cause untold hardships for the literally millions of people who each year come into contact with the bankruptcy courts and the bankruptcy laws. It was senseless for us not to act to address the problem of the constitutionality of the bankruptcy courts placed on our laps as a result of the Supreme Court's Marathon decision. It was equally senseless and bullheaded of us not to correct some of the obvious inequities and faults with the bankruptcy law that have come to light since its last revision in 1978.

The game of chicken that has been acted out between the House and Senate, and also internally within each body, might have left some bruised egoes among our Members but it will result in economic catastrophe for the millions of Americans that will have to live with the fruits of our stubborness and shortsightedness for the remainder of their lives. I am not going to point a finger at any given party and try to lay the blame at their feet—there would be many feet I could choose from. I will make a plea that next year we address the issues of bankruptcy substantive law and the bankruptcy court structure in a more reasoned atmosphere. I will urge flexibility. I will urge compromise. Nobody should have the foolish gall to say "take it or leave it" as was all too prevalent with our efforts this year. Those who refused to compromise this year will have to live with nothing. They can content themselves with knowing they fought the good fight for whatever clean bill they espoused, but they will also have to realize their role in the crisis they will have caused in our Federal court system and the hardships they will have brought about needlessly.

I do not look forward to again addressing the issue of bankruptcy next year—but I will. I will try to take an open view of the issues as they are brought before us and again work for a resolution of the problems in a fashion that is acceptable to the vast majority of my colleagues. I do hope that those of my colleagues here and in the House who have expressed an interest in this legislation will try extra hard next year to come to grips with the issue and find a middle ground. I hope that the various lobbying groups, judicial organizations, educators, private interest groups, and conferences who have an interest in bankruptcy, will see the benefit of compromise and not stalk off sulking into their corners. Our inaction today will probably result in less than full article III status continuing to apply to our bankruptcy courts for some time into the future. The opportunity to place these courts on sound constitutional pinnings has been lost. I can only hope that the judges that continue to serve as bankruptcy judges under their more restrictive jurisdiction and the district court judges whose role in the orderly processing of bankruptcy cases will be so greatly augmented, will rise to the challenge, work hand in hand, and get the job done.

I would like to acknowledge the monumental efforts at compromise that have been engaged in by Senators DOLE and HEFLIN and their staffs, also special thanks to Bob Fiedler of my staff. I can assure them that I will again try to assist them in their future efforts in this area.

NATIONAL SECURITY EMERGENCY PREPAREDNESS TELECOMMUNICATIONS REQUIREMENTS

Mr. HOLLINGS. Mr. President, in September 1982, the Commerce Committee reported S. 2469, the International Telecommunications Act of 1982. There was hope that this bill could pass the Senate before the end of the 97th Congress; however, that now appears unlikely. I had prepared a statement concerning national security/emergency preparedness telecommunications needs that was to be part

of the floor debate on S. 2469. Since I consider this statement important to our future debate on this issue, I ask unanimous consent to have it printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE INTERNATIONAL TELECOMMUNICATIONS DEREGULATION ACT

This international telecommunications legislation, S. 2469, offers further proof that we have made a firm commitment to a pro-competitive policy and away from government regulation. We have found that an effectively working marketplace in telecommunications provides us with so many more goods and services at lower cost that government oversight pales by comparison. We have also found, however, that this pro-competitive approach should not be followed blindly.

We must temper this new policy so it best serves our national interests. First, we must ensure that we have a marketplace that is effectively competitive prior to deregulation. Many sectors of the telecommunications market are competitive today; others clearly are not. Second, in the international arena, it is clear that we must continue to coordinate use of the electromagnetic spectrum and to deal with foreign nations whose interests in a free market often diverge with ours. In such an environment, a role for the federal government remains necessary. Third, we must continue to promote "universal service." Access to our communications system is far more a necessity than a luxury and, all people must be offered a reasonable opportunity to use these services and facilities. Such an objective, if properly approached, can be fully consistent with the new, pro-competitive path. Finally, we must ensure that our telecommunications system is capable of meeting our national security/emergency preparedness needs. Again, this objective, if properly addressed, can be met consistent with the marketplace approach.

Congress has been examining telecommunications legislation intensely for over six years. In that time, we have focused almost exclusively on the question of whether and how to achieve a pro-competitive policy and how to mesh this new approach with the objective of universal service. With Congressional leadership and key actions by the Federal Communications Commission and the Federal courts, we are now well on the way to moving from a monopoly to a competitive era in telecommunications. We have also taken major steps to resolve how universal service is to be achieved in a competitive era. Just how far we have gone and what remains to be done should be evident later this month when the Commission meets to decide how to structure the local exchange access charge.

We, on the other hand, have paid little attention to the issue of how to resolve potential conflicts between our national security/emergency preparedness needs and this new marketplace approach. This is despite having provisions in all of the bills that have been before us, including S. 2469, that have addressed this problem. I believe this lack of attention has been largely due to the fact that we have been focusing on the fundamental issue of whether and how to move from a monopoly to a competitive environment. Other issues, such as those regarding national security/emergency telecommunications needs, were dependent on this outcome and thus could not be precisely identified.

I believe now that it is imperative that we pay greater attention to this subject. We are facing unprecedented threats to our national security, and a sound communications system is vital to our response. Congress has a responsibility to ensure as precisely as possible that such a communications system is constructed and well-run. In furthering my own needs of being thoroughly informed and in helping structure the debate, I would like to set forth three areas that require greater attention prior to proceeding: needs; authority; and cost.

(1) What telecommunications facilities, services, personnel, research, and development are required to fulfill our national security/emergency preparedness needs?

In the past, we depended with few exceptions upon the established common carriers to meet our national security/emergency preparedness needs. Such reliance was not unusual. Other users acted similarly in meeting their needs. In effect, everyone called the telephone company to get total service.

In a competitive era, such an approach is not possible. A call to the telephone company will not ensure the most innovative, lowest price end-to-end service. The opportunities created by the new environment can only be seized by users if they work vigorously to determine their own needs and then to take action to achieve them. Private telecommunications users have already convincingly demonstrated that this greater effort will result in better service at lower rates. The federal government must follow the same path. It must change its thinking and become more independent and aggressive in identifying and meeting its telecommunications needs.

A second factor in structuring a telecommunications network to meet our national security needs is our new approach for nuclear war. Because of the strategies in recent Presidential Directives, a premium is placed on a communications system that can endure a possible prolonged nuclear war. We are required to fashion telecommunications faciliites and operations with a capability that has little precedent. Such a task will require an enormous effort in research, development, and planning, and a tremendous expenditure of resources. Again, this points to a more independent role for the federal government in determining its telecommunications needs.

The national security and emergency preparedness agencies in the government have been working diligently for the past few years to determine how best to carry out their new responsibilities and what type of communications system we need. Their work is beginning to bear fruit. But, many proposals remain far too general and need significant refining. In other areas, basic information still needs to be gathered. Once this has occurred, we can have a clearer picture of the amount of money required for research and development and to construct and operate the needed facilities. We will also then know what additional statutory authority is needed by the government to ensure our national security and emergency preparedness.

(2) What government authority is required to ensure our national security/emergency preparedness telecommunications needs are met?

The 1934 Communications Act (Section 606) gives the President broad authority over the communications network in time of war and declared national emergency. The President is able to suspend or amend FCC rules, to order carriers to use their facilities for certain purposes upon just compensation, to give preference to any communication, and to use force to keep lines of communications open.

There are other provisions of the 1934 Act that also further national security/emergency preparedness. Under the general purpose provisions of Title I, the Commission has the responsibility to consider national security/emergency preparedness concerns in any determination. The Commission also has the authority to issue regulations to address any such concerns. In Title II (Section 214), the Commission has authority to require carriers to plan and act in concert for national security/emergency preparedness purposes.

Common carriers know they have obligations under the 1934 Act to promote national security/emergency preparedness communications. They have acted responsibly in fulfilling these obligations. Currently, they are meeting with Department of Defense officials to plan how best to meet these telecommunications needs. It is thus doubtful that the Commission will ever have to use its authority to compel reluctant carriers to meet. But, we should all know this important authority does exist today.

The authority in the bill now before the Senate and in the domestic common carrier bill we passed a year ago (S. 898) goes beyond the authority in the 1934 Act. Section 609 of S. 2469 gives the President the authority (1) to establish arrangements for interconnection of facilities as may be necessary to avert public peril or to ensure continuity of essential telecommunications and (2) to order carriers to furnish facilities if there exists a war or threat of war or state of public peril or if there is an immediate need for such facilities and such need cannot be otherwise met. This authority is quite broad, and I believe a very persuasive case needs to be made if we are to grant additional authority.

If the current authority is clearly insufficient, I believe we then should move expeditiously to grant necessary additional authority. Any such authority must, of course, be precisely drawn. The authority should be triggered only in well defined circumstances, and there must be accountability for any decision to use it. Further, any actions by carriers in response to the use of this authority must be linked directly and closely to the act triggering the use of this authority. Finally, any authority must lapse within a certain designated time and be extended only if proven necessary.

Congress has an obvious responsibility to guarantee that our national security/emergency preparedness needs are met. Broad, general pronouncements and ambiguous authority do not serve to meet such a responsibility.

(3) How should we pay the cost of developing, constructing, and operating a telecommunications system to meet our national security/emergency preparedness needs?

During the monopoly era of communications, we were merely able to turn to established common carriers for service for national security/emergency preparedness needs. The charges for these services were imposed like those for other telephone services: they were not based on cost but rather on some vague concept of value of service. In effect, we never knew what it truly cost to meet these important telecommunications needs.

As we enter the new, competitive era, we have firmly determined that if the market is to work price must be based on cost. This principle should extend to all areas of telecommunications.

It is my belief that any telecommunications facilities, services, personnel, research, and development needed by the government to meet our national security/emergency preparedness goals could best be determined and authorized through the normal appropriations process. By following such a procedure, all concerned can best ensure these essential needs are met. Further, such a process would least effect the pro-competitive pricing structure. In addition, by ensuring competitive procurement, such a process would promote a competitive environment. Finally, it would comport with Congress' obligation and authority to ensure that sufficient goods and services are procured to meet our national security/emergency preparedness needs.

The funding granted for national security/emergency preparedness telecommunications should be as specific as possible. If we must grant any general authority, it should be very carefully circumscribed. Decisions by executive branch and independent agency officials should be restricted as discussed in the previous section and, as in the current Section 606 of the 1934 Act, any use or acquisition of private sector property or services should be accompanied by just and timely compensation. While such a standard of compensation is traditional, I believe that in any legislation we pass we must define such a standard more precisely to avoid complaint and litigation.

CONCLUSION

As I have said at the outset, I believe it is vital that we upgrade our telecommunications facilities, services, personnel, research, and development to meet our national security/emergency preparedness needs. Such a program can be accomplished fully consistent with the new, pro-competitive approach in telecommunications—an approach we need to foster and maintain with the fewest restraints.

The national security and emergency preparedness agencies are well on the way to determining what we need, but they have a long way to go. They are now meeting with the telecommunications industry to further determine what is needed and what can be done. I strongly urge that the dialogue between the public and private sectors continue.

I am hopeful that a consensus can be reached by all parties involved on the issues I have set forth. If such a consensus is produced and legislative action is required, it could then proceed quickly. Otherwise, we might well again be mired in legislation that never becomes law, an event all too familiar to those of us who have worked on past telecommunications legislation.

THE RETIREMENT OF ALBERT A. APPLEGATE DECEMBER 20, 1982

Mr. WARNER. Mr. President, on October 1 of this year, my chief legislative assistant, Albert A. Applegate, retired as an employee of the U.S. Senate.

Al has devoted nearly 10 years of his professional life to the Senate. He came to the Senate as a member of the staff of the distinguished former Senator from Michigan and minority leader, Robert P. Griffin. Al served as the Senator's press secretary, director of communications, and administrative assistant. On January 2, 1979, Albert joined my staff as my administrative assistant.

A native of Michigan, Al began his career as an instructor and assistant professor of political science at Eastern Michigan University. Later he became administrative assistant to Gov. George Romney. When Governor Romney became Secretary of Housing and Urban Development, he was able to persuade Al to come with him to Washington as his executive assistant.

In a very large way I owe George Romney a debt of gratitude. Had he not urged Al to work in Washington back in 1968, I may never have benefited from Al's wisdom and skill.

Al's outstanding experience proved invaluable to me during my first year in the Senate. In order to maximize my use of Albert's expertise, we made the decision that he would become my chief legislative adviser with responsibility for my legislative department. His keen understanding and in-depth knowledge of the political process cannot easily be matched. Nor can his masterful knowledge of the English language be equaled by many.

My staff and I wish Albert well in future endeavors. He and his wife, Beverly, are looking forward to the new and exciting life that waits ahead of them which, hopefully, will be much calmer than the hectic Senate pace.

There are many of you in the Chamber who had the occasion to work with Albert Applegate during his time as a Senate employee. I am certain you join with me in extending our best wishes to him.

GOV. GEORGE BUSBEE

Mr. NUNN. Mr. President, George D. Busbee soon will step down after 8 highly successful years as Governor of my home State of Georgia.

Many of my colleagues because familiar with George Busbee when he served as chairman of the National Governors' Association in 1980. Under his leadership, the association took on an enlarged role in national affairs, and he became one of the foremost experts and spokesmen on federalism.

Governor Busbee's leadership of the Governors' Association brought to national attention what we in Georgia have known all along—that George Busbee is a man of intellect and dedication, of foresight and sound judgment, of vision and an abiding faith in the ability of men and women to solve difficult problems by working together.

As pointed out recently by David S. Broder, the reporter and columnist the the Washington Post, Governor Busbee "has a genius for negotiation and consensus-building."

George Busbee has served the people of Georgia with great distinction for 26 years. He began his political career in the Georgia General Assembly, where he served for 18 years and became the majority leader of the house representatives.

In 1974 he was elected Governor, and under his leadership Georgia has become one of the leading States of our Nation.

Throughout his administration, Governor Busbee placed the quality of education and economic development of Georgia as his two highest priorities, improving and increasing the opportunities and benefits for our people in these two distinct but related areas.

As a result, Georgia has steadily improved every aspect of its education structure. More attention than ever has been focused on remedial, vocational, and postsecondary education as well as on the teaching profession.

In terms of economic development, Georgia has become one of the fastest growing States. Despite the troubles in the national economy, Georgia has recorded well over $5 billion worth of new and expanded industry over the last 5 years of the Busbee administration.

During this time, our capital city of Atlanta has exploded on the international scene. Businesses from throughout the world have been locating in the Atlanta area, and the city now has offices of 15 international banks. Much of his growth can be credited to industry-seeking missions Governor Busbee has led to Europe, Japan, and other parts of the world.

Georgia also now has one of the finest transportation systems in the world. Hartsfield Atlanta International Airport is the largest and second busiest airport on Earth, with many new international flights—successfully promoted by Governor Busbee—going in and out of Georgia.

Under Governor Busbee's direction, Georgia's two natural seaports have been upgraded and expanded.

President Carter recognized Governor Busbee's record on foreign trade by naming him to the President's Export Council, a position he has retained under President Reagan.

Governor Busbee's contributions to Georgia have not stopped with education, economic development, and foreign trade.

He completely reorganized our State's department of human resources and created a new department of medical assistance. He helped to create a statewide network for mental health and retardation. He guided through a new State constitution which was approved by the voters in the 1982 election.

As crime has increased throughout the Nation, Governor Busbee expanded the State crime laboratory, beefed

up the Georgia Bureau of Investigation, and constantly pushed for more and better anticrime legislation. He also launched a massive effort to solve the many problems of our State's prison system, which is faced with a growing inmate population.

Finally, in an effort to protect all the citizens of Georgia, Governor Busbee has created within his administration an office of consumer affairs, an office of fair employment practices, and an office of the consumer utility counsel.

Governor Busbee's record of accomplishments was recognized by the Georgia General Assembly and the people of our State, who together amended our constitution to allow him to run for a second term. In 1978 George Busbee was overwhelmingly reelected—making him the first person in modern times to serve two consecutive terms as Governor of Georgia.

I am proud of what George Busbee has done for the State of Georgia. George has made an indelible imprint on our State. Future generations of Georgians will benefit from his foresight and his leadership.

George Busbee will soon become a private citizen, but I am certain he will continue to contribute his energy and his wise leadership to the citizens of Georgia and the Nation.

POLITICAL ACTION COMMITTEE

Mr. DECONCINI. Mr. President, I rise on a matter of great concern to me both as a citizen and as an elected official.

A dark cloud is drifting over the American political landscape. I fear we may be in the midst of a transformation of the values that underlie our political dialog. Distortion, misrepresentation, and downright lies are becoming increasingly evident in political campaigns. The currency is being debased and we seem helpless to restore its former value. American politics has never been perfect, and politicians have always been a rough and tumble lot. But politics is not without its rules—though they be both tacit and somewhat elastic. On the whole, however, the public has demanded—and received—a degree of honesty which, if not exemplary in the absolute sense, certainly distinguishes American politics from the politics of most of the rest of the world.

The moral consensus which has propped up the system is starting to crack because of the introduction of new players who, quite simply, do not want to play by the rules. Given enough time, these forces will permanently change the nature and quality of American politics. The voting public will find itself devoid of real information about candidates and with no means of separating truth from malicious fiction. Politics will become "content-less."

The great irony of this changing ethos in our politics is that it was made possible by the very Federal election laws that were initially designed to bring more accountability to the political process. Although unintended consequences, they are nonetheless grave consequences.

The new players who reject the traditional values are the freestanding political action committees. These organizations are free standing in the sense that they represent no settled and identifiable interest group, such as a political action committee associated with a company or an association. Nor are these new organizations connected with traditional political parties or specific candidates.

They tend to be organizations created for the express purpose of raising money under the banner of some ideological principle and disbursing those funds to defeat candidates who hold opposing points of view. Under existing law, these committees can spend whatever they like to defeat a candidate as long as they do it independently, that is, separate from the campaign organization of their target's opponent.

Existing Federal election law limits the amount of funds that a candidate can receive from any single source, the theory being that too much indebtedness will result in special interest obligations that translates into bad national policy. The independent committees are also limited in the amount they can contribute to a candidate; they are not limited in how much they can spend against a candidate.

The law thus creates a basic lack of symmetry which gives freestanding committees virtual carte blanche. They are free to raise unlimited amounts of money for the purpose of defeating a particular candidate. Thus, to the extent that the law was concerned with limiting the influence of any group or individual, it has not succeeded. The freestanding political action committee is limited only by the amout of money it can collect and disburse. And even though its large contributors must be identified, this does nothing to inhibit its ability to spend hundreds of thousands of dollars—perhaps milions—to defeat candidates it opposes.

They argue that there is a material or substantive difference between directly assisting a candidate and spending vast sums to defeat that candidate's opponent is difficult, if not impossible. Although the actual intent may be slightly different, the effect is not. Viewed from that perspective, our campaign laws have created a set of super political organizations which are not governed by the same limitation that govern more conventional—I am tempted to say, "legitimate"—organizations.

The negative effects of that free rein is compounded by the lack of responsibility and accountability of the freestanding political action committees. These are the only major political groups which do not have to account to someone. A candidate must account to the voter, a PAC must account to the company or association it represents and political parties must account to its members.

However, committees like the National Conservative Political Action Committee—NCPAC—are responsible to no one. They raise funds through mass mailings on the basis of ideological principles. The only accounting they need provide for the money they raise is the actual money they spend in a political campaign, but this accounting does not affect the amount they can spend nor does it cover the money they raise and do not spend.

Mr. President, I admire entrepreneurial initiative. But somehow, I find myself appalled by the prospect of our politics being fundamentally affected by such totally freelance, self-serving organizations. I suppose my perspective would be different if those organizations had demonstrated some responsibility to the system in which they participate. However, they have not. Not only have they proved themselves to be irresponsible in a technical sense, but they are irresponsible in a moral sense, as well.

NCPAC, Mr. President, targeted my recent reelection effort. Mr. Terry Dolan and company decided that they would wage a negative campaign against me. They did considerable research on my voting record, and shared this information with my opponents. As it turned out, the person they indicated would coordinate their efforts against me had already been paid by my opponents to do work for them. Frankly, I began to question the extent to which NCPAC was operating independently. Indeed, that independence was a legal fiction. The reality is that they supported my opponents and every dollar they spent against me was the equivalent to a dollar spent on their behalf.

The documents that NCPAC provided my opponents were entirely misleading. They painted a picture of my voting record which was inconsistent with the facts. The entire document was a total misrepresentation. Substantive and philosophical differences between me and my opponents abounded, and I would have been happy to debate and defend those differences. But the NCPAC document sought to make me defend not what I had done, but what I had not done. It was not my voting record that was the issue—and that would be a perfectly legitimate issue—but a gross and mali-

cious distortion of that record, twisted around to serve a purely partisan objective.

Another of the freestanding committees with which my campaign came into contact was the National Right-to-Work Committee. This organization used tactics perhaps even more blatantly dishonest than those of NCPAC.

The Right-to-Work Committee targeted my race for reasons unrelated to their stated objective. As a long-time supporter of right-to-work there was agreement on that central issue. But the Right-to-Work Committee is a fundraising front which is responsible to no one. In fact, I am convinced that it is generally a partisan organization which supports Republican candidates over Democratic candidates as a matter of course. A candidates's position on their major issue—right-to-work—seems to mean little.

The Right-to-Work Committee launched an attack on me that was based on a total and outright lie. It sent telegrams to all its Arizona members stating that I was part of a conspiracy to prevent consideration of the Hobbs Act by failing to make a quorum. In actual fact, I was among the handful of Senators—which included the chairman, Senator THURMOND and my colleague from Alabama, Senator HEFLIN—who consistently showed up for meetings. It was the Republican majority who for reasons totally unrelated to the Hobbs Act were not making the quorum.

A number of my friends and supporters in Arizona who are also supporters of the Right-to-Work Committee wrote its president, Reed Larson, to bring these facts to his attention. Judging both from Mr. Larson's response and subsequent behavior, it is clear that the truth was irrelevant to his narrow partisan purpose. It is unfortunate that organizations like the National Right-to-Work Committee have abused the public's trust by acting irresponsibly.

NCPAC did not ultimately spend the money it had originally earmarked to defeat me—and promote my opponents—because we made NCPAC itself an issue early on. In a television ad, we listed some of the more radical and ridiculous objectives that NCPAC had, made it clear that NCPAC would be campaigning in the State to oppose me and support—indirectly—my opponents, and further suggested that if the voting public did not want our race contaminated by NCPAC to make its views known. The response was considerable, and a few days later my opponent asked NCPAC not to participate in the race and NCPAC withdrew.

Our strategy of making NCPAC negative baggage to carry was made possible not only by the extremism of NCPAC's own political objectives, but also by the growing bad press it is receiving nationwide as the result of its irresponsible behavior.

Although we made NCPAC a political liability for those it had determined to help—albeit indirectly by opposing me, the NCPAC legacy permeated the campaign, dragging me and the voters of Arizona through the mud. One of the State's major dailies was moved to say that the campaign against me was "the dirtiest campaign for major office in Arizona in a long time. It has been a negative campaign which has distorted the DeConcini record."

The irresponsible activities carried out or inspired by organizations like NCPAC and the Right-to-Work Committee raise difficult problems for all of us. For example, I had irrefutable documentary evidence that these organizations were either lying or totally distorting the truth. Yet, the lies and distortions were being broadcast almost hourly as paid campaign commercials. How can this type of base and irresponsible campaigning be effectively dealt with?

Jefferson has argued that in the free marketplace of ideas the truth would ultimately prevail. In the long run, that is in all likelihood true. But what about the short run of a political campaign? Television with its intimacy and impact has changed communications forever. If the unscrupulous launch an attack of lies and distortions during the waning days of a political campaign and have enough funds to insure substantial air time, truth may not win out.

I do not know if there is an answer—let alone, an easy answer—to this dilemma. We have two pretty basic rights standing in opposition to one another. There is the right of individuals and organizations to express their views—even if those views are lies and distortions—and the right of the public to be informed about issues and candidates. The dilemma becomes acute when it is recognized that present trends, if continued, will inevitably debase the quality of American politics.

Congress does need to address this question. However, I am convinced that we cannot approach it from the point of view of placing any limitation on what organizations choose to say or not to say in campaign commercials. The principle of free speech must remain inviolate. Nor, can we ask the press corps to serve as the arbiter of truth.

If we are to deal with this problem at all—and I believe we must—then it will have to be in terms of reforming election laws. Frankly, I believe we must reexamine the provisions which allow freestanding committees to expend however much they want in a political campaign. I am not sure that the distinction which has been drawn between contributing to a political campaign and working to defeat a candidate is a valid one.

In any event, it is my understanding that the Senate Rules Committee upon which I will be sitting in the 98th Congress intends to consider Federal election laws. I look forward to those hearings to address the issues I have just raised as well as others.

ESCAPE FROM SOBIBOR

Mr. PROXMIRE. Mr. President, on Tuesday, December 14, 1982, the Washington Post featured a review of the book "Escape From Sobibor." On October 14, 1943, 300 Jews successfully fled Sobibor, a Nazi death camp where thousands reportedly died in the gas chambers. According to this review, the author, Richard Radke, traveled extensively throughout the United States and abroad in order to talk with survivors. His book recounts these individuals' memories of Sobibor, their flight from the camp, and finally, their fearful life afterward.

When characterizing those interviewed by Radke, the reviewer says: "Those who made it out of Sobibor speak and live as we do. And yet they feel as though they are still there. They are trapped in another prison by their memories." She goes on to say, "* * * They would like to forget, but for the sake of all those they lost, they cannot. And that is the point of a very good book—for the sake of all those lost, no one must be allowed to forget."

Mr. President, her words are both a tribute to the author of "Escape From Sobibor" and a warning against indifference on the part of the reader. Indeed, they remind us all of the horrors of the Nazi Holocaust and of our duty to forestall another attempt to systematically destroy any racial, religious, or ethnic group.

Mr. President, it is not enough simply to bemoan the horrors of the Nazi Holocaust or any other incident of genocide in history. We must take concrete action to prevent this heinous act. And, in order to meet our full responsibility, our Nation must ratify the Genocide Convention, a treaty currently ignored by this body. Once again, I urge the Senate to ratify the Treaty on the Prevention and Punishment of Genocide.

CONVERSION OF CIVILIAN TECHNICIANS IN NATIONAL GUARD

Mr. THURMOND. Mr. President, during debate on the continuing resolution on December 18, 1982, I offered an amendment concerning conversion of civilian technicians in the National Guard. Some supporting documents, however, were not printed in the RECORD.

I ask unanimous consent that those documents be included in the permanent RECORD following my original remarks.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

DEPARTMENTS OF THE ARMY AND THE AIR FORCE, NATIONAL GUARD BUREAU,
Washington, D.C., December 10, 1982.
Hon. STROM THURMOND,
U.S. Senate,
Washington, D.C.

DEAR SENATOR THURMOND: In response to your inquiry, the Guard has budgeted the voluntary conversion of 1,200 technician positions in fiscal year 1983.

Conversion of technician positions to military positions began in fiscal year 1979 after studies revealed that some technicians were not viable mobilization assets to the units for which they worked because of loss of military status or disqualification for military assignment in the unit of civilian employment. Technicians should serve concurrently as full-time civilian employees of a Reserve Component and as part-time military member of that same unit. They perform the day-to-day administrative, supply, maintenance and training tasks as civilians and participate in weekend military training (drills) as military members. Upon mobilization, they are to deploy as active duty military personnel with their units.

Since the conversion program's inception in fiscal year 1979, the Guard has converted 7,808 technician positions to military. These conversions were accomplished entirely through attrition or voluntary action, except for those involuntary conversions in the Air National Guard directed by Congress in fiscal year 1979.

The SAC and the HAC have recommended the elimination of our fiscal year 1983 budgeted conversions. I fully agree that their rationale that the conversion program should only continue where it is cost effective and where readiness is enhanced. It is true that in the beginning of the program there were a few instances where technician positions were converted to military that resulted in a higher rate of pay than that authorized by the technician grade. However, we corrected this situation by establishing military grades for our technician positions that could not be exceeded. At the same time we directed that those military personnel who held military grades higher than that authorized be reduced or reassigned. Additionally, in the distribution of our conversion spaces we have placed emphasis on converting technician positions that will enhance our readiness in the areas of training, administration, personnel and supply at unit level.

Based on our experience, the estimated 1983 attrition in our technician program is approximately 4,500. Since we have budgeted only 1,200 conversions, there are ample Technician vacancies that will not be impacted by our Conversion program

If the conversion program is allowed to proceed as programmed, we will consider for conversion only vacant technician positions and assure that military technician positions will not be abolished while incumbered for the purpose of changing them to military status. Military technicians will be allowed to change to military status only voluntarily; no involuntary conversions will be directed.

Sincerely.

EMMETT H. WALKER, Jr.
Lieutenant General, USA,
Chief, National Guard Bureau.

SECRETARY OF THE ARMY,
Washington, December 10, 1982.
Hon. STROM THURMOND,
U.S. Senate,
Washington, D.C.

DEAR SENATOR THURMOND: As I am sure you are aware, the Army National Guard (ARNG) has budgeted the voluntary conversion of 600 technician positions in fiscal year 1983 whereas the Army Reserve (USAR) has planned the elimination of 43 senior technician positions. These actions have precipitated the issue of conversion of technician positions to full-time military positions.

Conversion of technician positions to military positions began in fiscal year 1979 after studies revealed that the majority of USAR technicians were not viable mobilization assets to the units for which they worked because of loss of military status or disqualification for military assignment in the unit of civilian employment. Technicians are supposed to serve concurrently as full-time civilian employees of a Reserve Component unit and as part-time military members of that same unit. They perform the day-to-day administrative, supply, maintenance, and training tasks as civilians and participate in weekend military training (drills) as military members. Upon mobilization, they are to deploy as active duty military personnel with their units.

Since the beginning of the conversion program in fiscal year 1979, a total of 5,691 ARNG and 1,639 USAR technician positions have been converted by attrition or voluntary action to military status. This amounts to 20 and 29 percent of the technician force respectively. Further conversions of technician positions are planned this fiscal year, and beyond, and will result in a total reduction in the technician force of 25 percent for the ARNG and 58 percent for the USAR over the ten year period fiscal year 1979 through fiscal year 1988. All conversions are designed to enhance deploying unit readiness. No further conversions are planned beyond fiscal year 1988 when the technician force level will stabilize at 21,000 for the ARNG and 3,500 for the USAR.

Addition of a general provision to the fiscal year 1983 Appropriation Bill or a new "Continuing Resolution" to prohibit programmed conversions will impede the efforts of the Army to upgrade the readiness of its Reserve Component units and will deny to individual technicians the freedom to voluntarily assume military status. In addition, such a prohibition may be inconsistent with the labor management relations provisions of 5 USC 71 granting authority to agencies to determine the number and kinds of positions to be used in accomplishing the duties of such agencies. It will also place an arbitrary, non-mission related, manpower utilization constraint on the Army that will degrade readiness and which can not be justified on the basis of cost. Indeed, a comparative cost analysis of the full-time support (FTS) program was completed in October 1982 by a private consulting firm under contract to OSD. This study shows that the conversions planned for fiscal year 1983 to be cost-effective and that the cost-effectiveness of any future conversions would depend upon comparative grade structures.

The Army, as a matter of policy, does wish to inform you that in 1983 it will consider for conversion only vacant positions or those technicians who volunteer for conversion, and will not eliminate any technician position as long as an incumbent chooses to remain in the technician program.

I trust that my comments will assist the Senate in its deliberations concerning the fiscal year 1983 Defense Appropriation Bill.

With warm personal regards, I am

Sincerely,

JOHN O. MARSH, Jr.

DEPARTMENT OF THE AIR FORCE,
OFFICE OF THE SECRETARY,
Washington, D.C., December 10, 1982.
Hon. STROM THURMOND,
U.S. Senate,
Washington, D.C.

DEAR SENATOR THURMOND: This is in regard to your request for the Air Force position on the Senate Appropriations Committee recommendation to prohibit the Air Force from converting 600 Air National Guard military technicians to full-time active duty Guardsmen (page 18 of the SAC Report.) I strongly support the proposed conversions as both cost effective and mission enhancing. Our proposed mix of military technicians and full-time active duty guardsmen is based first and foremost on mission requirements; readiness is enhanced by the ability to provide a more dynamic full-time active duty guardsman resource in more military oriented areas and technicians where more stability is necessary. However, cost effectiveness has been and will remain a principal factor in the overall decision. Positions identified for conversion require a wide range of experience in military duties and are better suited for full-time guardsmen. Further, our proposal is not forcing any involuntary conversions to full-time active duty. Thus, we have minimized personnel turbulence that might otherwise result.

I would appreciate your support in allowing the Air Force to continue with the programmed conversions as requested in the President's Budget request.

Sincerely,

VERNE ORR,
Secretary of the Air Force.

AFGE VICTORIOUS IN STOPPING CONVERSIONS

AFGE has been successful in getting Congress to pass legislation which prohibits any further conversions of civilian technicians to military status for fiscal year 1983. The Joint Resolution of the Ninety-Seventh Congress of the United States of America making continuing appropriatons for the fiscal year 1983 provides:

That pending passage of the regular Department of Defense Appropriation Act for fiscal year 1983, none of the funds appropriated or made available pursuant to this paragraph shall be available for the additional conversion of any full time personnel in support of the Army Reserve, Air Force Reserve, Army National Guard, and Air National Guard, from military technician to Active Guard/Reserve status.

In addition, the Report which accompanied the House version, H.J. 559, states that:

The language in the joint resolution is intended to put a stop to conversion of military technicians.

Our success on Capitol Hill would not have been possible without the extensive grassroots support which you provided and the thousands of letters which you sent to

your Congressmen and members of the House and Senate Appropriations Committees.

Congratulations.

1983 INTERIOR APPROPRIATIONS BILL

Mr. PRESSLER. Mr. President, I must speak against the decision of the House/Senate conference on the 1983 Interior appropriations bill, H.R. 7356, to close the Spearfish and McNenny hatcheries headquartered in South Dakota. While these facilities have been an invaluable source of trout fry for stocking Federal waters in the Black Hills region, at the same time, the Spearfish hatchery has served as an educational facility for thousands of students and visitors every year.

The Black Hills of South Dakota offer many interesting vacation sites, as well as ample opportunity for hunting and fishing. I strongly believe that the decision of the conferees to accept the original position of the House bill to provide no funding is a grave error.

Tours are available at these hatcheries to give people from all over the country a chance to see first hand the great improvements made in managing and improving our natural resources. The employees of the Spearfish and McNenny operations have made their facilities more than a factory for hatching fish. Significant scientific progress has been made in understanding these biological and environmental patterns. These important scientific goals will no longer be advanced.

I have made detailed arguments in support of the Spearfish complex time and time again to my colleagues in the Senate and the House. This year, the House version of the 1983 Interior appropriations bill eliminated funding for the entire complex along with a number of other hatcheries around the country. I contacted my colleagues to voice my concern and oppose the closing of these facilities. I was pleased when the Senate version went to conference with funding included for Spearfish and McNenny. Unfortunately, the conference report did not include this funding. I regret that the facts, but not the votes, were on the side of South Dakota in this debate.

FREEDOM AND RADIO MARTI

Mr. PRESSLER. Mr. President, I wish to note with regret the Senate decision not to include funds for Radio Marti in the continuing resolution.

As a cosponsor of the effort to secure appropriations for Radio Marti, I believe it is essential that we continue to press for the establishment of this vehicle of free communication to the people of Cuba.

Mr. President, Cubans are denied access to factual information about conditions in their own country and the rest of the world. They are unaware of the facts they need to properly assess the true nature of the totalitarian political system which dominates them. The key pillar upon which totalitarian systems such as Cuba rest is state control of communications and the flow of information. This sharply contrasts with democracies such as the United States in which freedom of expression and alternative sources of information are regarded as the principal guarantees of political and economic freedom. Realization of the hope for a free life requires overcoming the ignorance and illusions which are the real strength of totalitarian regimes.

The desire for freedom is unquenchable and undeniable. But those of us who already enjoy the advantages and the blessings of liberty have a responsibility to assist those who are not so blessed. The most appropriate way to provide such assistance is to expand the opportunities of oppressed peoples to receive information that is truthful and accurate. If we who enjoy freedom can use the airwaves to communicate factual information, then we will have helped to open the intellectual doors through which Cuban liberty eventually may stride. In this way we will have done our duty to support the interests of those who thirst for freedom.

Mr. President, to support the need for better information sources for the Cuban people—to provide some partial documentation of the need for Radio Marti—I ask unanimous consent that an article from the Miami News be printed in the RECORD following my remarks. The article reports on political prisoners in Cuba. I also ask unanimous consent that the letter referred to in this article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Miami News, Nov. 12, 1982]

A CRY FROM CUBAN JAIL

(By Kathy McCarthy)

"We appeal to . . . free men everywhere and plead for a mobilization in our behalf. We pray our outcry for justice will reach the heart of all Cuban exiles as well as that of humanity.

"Only an outraged world's response and the mercy of God can help us."

An open letter from Cuban political prisoners pleading for help from the free world has been smuggled out of a Cuban jail into Miami, says the exile son of a prisoner.

The letter, entitled "Declaration of the Cuban Political Prisoners to the Exile Community" is dated Sept. 15, and bears the signatures of 11 political prisoners, most of whom have spent half their lives in the island's Boniato Prison.

The letter says that some 33 political prisoners at Boniato have completed their jail sentences, ranging from nine to 20 years, yet Fidel Castro refuses to release them.

In protest, the prisoners declared a hunger strike set to begin Oct. 10—33 days ago—on a patriotic holiday commemorating Cuba's independence from Spain.

The letter bore an Oct. 12 Cuba postmark but did not reach the home of a Hialeah woman whose husband is in Boniato Prison until last Saturday.

Translated into English, the letter reads in part: "Mr. Castro still is arbitrarily keeping in prison, as state hostages, those who have long since served their sentences of 15, 18 and 20 years . . . The authorities have negated the right—recognized by every citizen in a civilized country—to regain freedom once a sentence has been served and return home to their families.

"We have in essence, been sentenced to life in prison."

Cristina Valls of Hialeah received the letter Saturday and gave it to Fort Lauderdale engineer Victor Pujals, whose 58-year-old father, Jose Pujals Mederos, has been imprisoned at Boniato since Aug. 8, 1961. Pujals said he was "amazed" that the letter reached the United States.

"Apparently, this is one of several copies that they tried to get out," Pujals said. "We don't know how many made it."

Pujals' father was not one of the signers of the letter.

Printed in Spanish on thin, waxlike paper that was folded several times, the letter arrived in Valls' mailbox. Valls' husband, Jorge, is a prisoner at Boniato, but his name does not appear on the letter, either.

Victor Pujals, 30, believes several of the men who signed the letter have relatives in Miami, and he would like to find them.

The letter gives the men's names, ages, the year they were imprisoned and the dates they were scheduled to be released. Seven of the men had been scheduled for release this year, while another has waited six years since his 12-year sentence was up in 1976.

They range from Julian Dominguez Lima, 53, the eldest prisoner who has served 20 years and five months, to Santos Mirabal Rodriguez, 28, the youngest. He has been in jail since he was 12.

The other names are Hector Cabrera Torres, age 50, who has served 21 years; Eduardo Capote Rodriguez, 51, served 16 years; Jose del Pino Gonzalez, 46, served 18 years; Alejandro Novo Alvarez, 38, served 20 years; Pedro Gonzalez Rodriguez, 40, served 20 years; Pedro Montey Hernandez, 47, served 18 years; Augusto Duque Fabelo, 39, served 20 years; Servando Infante Jimenez, 40, served 17 years, and Roberto Azcuy Cruz, 41, served nine years.

"Since Castro took power, the treatment of the political prisoners is worse than it's ever been," said Victor Pujals, who has not seen his father since he left Cuba at nine.

Pujals said his father was sentenced to die before a firing squad in 1961. Instead, he was spared and is serving 30 years. Pujals Mederos has not been heard from since June, and his wife in Cuba has not been allowed to see him for nearly two years, Pujals said.

Last night, Pujals sat with his wife and two children he fears his father will never see and read the letter again.

"Although our bodies are undermined with sickness, the product of many years of barbaric and subhuman prisoner conditions, we have strengthened our spirits and moral fortitude for this hunger strike.

"I am proud of being Cuban, proud because of my father and men like these," Pujals said, clutching the thin, folded letter in his hand.

DECLARATION OF THE CUBAN POLITICAL PRISONERS TO ALL CUBAN EXILES AND TO WORLD PUBLIC OPINION

We, the undersigned, Cuban political prisoners from the "tapiadas"[1] of Boniato Prison, appeal to a just World's conscience regarding the unmerciful incarceration policies which the ruling Communist regime of Cuba enforces on its imprisoned ideological opponents. We also make known the just reasons which force us to declare ourselves on a hunger strike. While the illegal circumstances which constitute a flagrant violation of our human rights and all universal rules of conduct toward political prisoners persist, we have decided in an assertion of our right to freedom that starting October 10, 1982—an honorable date in our Country's history—to consume only water, unless this right is negated by prison authorities as in previous occasions.

On September 6, 1978, in a press conference with a group of North American news correspondents, and Cuban-exile representatives, Mr. Castro responded to a question formulated by Manuel de Rios Vazquez ("La Prensa", New York) regarding the political prisoners that were excluded from the amnesty: "Well, of course, they have their sanctions; when they fulfill them they will go in liberty."

Demonstrating once more his total disregard for justice and the honor of keeping his word, Mr. Castro still is arbitrarily keeping in prison, as state hostages, those who have long since served their sentences of 15, 18 and 20 years. The authorities have negated the right—recognized by every citizen in a civilized country—to regain freedom once a sentence has been served and return home to their families. Thirty-three of us political prisoners find ourselves in this Medieval situation; we have, in essence, been sentenced to life in prison.

Although our bodies are undermined with sickness, the product of many years of barbaric and subhuman prison conditions, we have strengthened our spirits and moral fortitude for this hunger strike. We are true followers of Jose Marti's ideology regarding the dignity of man and are fully aware of our historical responsibility. We make the Communist government of Havana solely responsible and guilty of the consequences. We appeal to all international organisms and free men everywhere and plead for a mobilization in our behalf. We pray our outcry for justice will reach the heart of all Cuban exiles as well as that of humanity.

Only an outraged world's response and the mercy of God can help us.

Name	Age	Case No.	Sentence (years)	Served sentence
Hector Cabrera Torres	50	134/61	20	Mar. 24, 1981.
Eduardo Capote Rodriguez	51	1411/66	15	Mar. 28, 1981.
Jose M. del Pino Gonzalez	46	53/64	18	Jan. 17, 1982.
Alejandro M. Novo Alvarez	38	471/62	20	Apr. 14, 1982.
Pedro Gonzalez Rodriguez	40	283/62	20	May 19, 1982.
Julian T. Dominguez Lima	53	313/62	20	June 15, 1982.
Pedro M. Montey Hernandez	47	398/64	18	June 18, 1982.
Augusto Duque Fabelo	39	465/62	20	Sept. 19, 1982.
Santos O. Mirabal Rodriguez	28	284/66	(1)	June 24, 1971.
Servando Infante Jimenez	40	46/65	12	Dec. 24, 1976.
Roberto A. Azcuy Cruz	41	148/73	9	June 16, 1982.

[1] Of age.

[1] "Tapiadas" word used to describe Cuban prison cells whose bar openings are covered with metal plates.

INTERNATIONAL TERRORISM

Mr. PRESSLER. Mr. President, the terrorist is a self-appointed executioner who uses the instruments of war—guns, bombs, landmines—to kill or injure unsuspecting civilians. His victims include women, children, and the helpless. Indeed, terrorism is an outrage against mankind.

Terrorists frequently try to justify their criminal actions on the grounds they are "liberating" the oppressed or representing a counterforce to an authoritarian regime. These are unacceptable rationalizations. There can be no justification for terrorism by anyone, at anytime, any place, or for any reason.

Negotiations and compromise are the civilized and orderly democratic processes for resolving international disputes. Turning a blind eye on terrorism or making feeble efforts to explain it away only contribute to further erosion of the democratic process in the international community.

The Soviets and their fellow travelers finance, equip, and train terrorists, mankind in the plumage of "freedom fighters". Usually these terrorist groups are surrogates trying to advance Soviet interests in the Middle East, Africa, and the Caribbean.

A December 16, 1982, Washington Times article by Thomas Gulick of the Heritage Foundation calls attention to the fact that the United Nations, supported by U.S. taxpayers as a peace-promoting parliament of the world, has helped to sponsor numerous Soviet-backed terrorist groups, such as the Palestine Liberation Organization (PLO), the Southwest Africa People's Organization (SWAPO), Castro-Cuban proxies, and others. Indeed, a Washington Post senior editorial writer not long ago described the United Nations as an "institutional outrage" and "a moral swamp which operates much of the time by the mob rule of its Third World Majority to close alliance with the Soviet Bloc".

The U.N. General Assembly, in violation of its own charter, has reallocated millions of U.S. taxpayers' dollars to finance activities which support Soviet-backed terrorist groups. For example, several sources have questioned PLO use of U.N. "refugee" camps as military bastions in Africa and Lebanon and SWAPO use of Institute for Namibia (Southwest Africa) facilities in Africa to train more SWAPO terrorists in furtherance of a Soviet proxy campaign to seize control of Namibia in the same way a Soviet proxy seized control of Angola in 1975.

Fortunately, the Congress, working with President Reagan, has enacted legislation requiring that the massive U.S. contribution to the United Nations be reduced by any sums the U.N. misuses in support of the terrorist activities of SWAPO, the PLO, Cuba, and other Soviet-dominated terrorist organizations. The Washington Times article to which I have referred suggests why it is imperative that the U.S. assert better leadership in halting the spread of terrorism and preventing U.N. support of terrorist activities.

Mr. President, I ask unamimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times, Thursday, Dec. 16, 1982]

TRAINING TERRORISTS IN U.N. CAMPS

(Thomas Gulick)

The military use of United Nations refugee camps by the Palestine Liberation Organization, which was revealed during the Israeli occupation of Lebanon, is just the tip of the iceberg. There is now considerable evidence that Soviet-backed guerrillas are also using U.N. camps in southern Africa and Central America for similar purposes. Even more disheartening is the fact that the United States is picking up the tab for 25 percent, and often more, of the operating costs of these training camps.

Recently captured PLO documents show that the Siblin Training Center, a U.N. trade school near Beirut, was used to train PLO military recruits.

Yet another document intercepted by Israeli forces reveals that the PLO used U.N. International Force in Lebanon intelligence reports to monitor Israeli troop movements. The captured documents were dated May 26, 1981.

A Heritage Foundation report dated April 8, 1982—several months before the Israeli move into Lebanon—quoted Lebanese officials as saying the PLO had "transformed most of the (Lebanese) refugee camps—if not all—into military bastions." The charges were emphatically denied by U.N. officials.

As early as 1976, U.N. General Kurt Waldheim had been informed in writing that the PLO had installed "heavy weapons" in U.N. refugee camps in Lebanon. Lebanese officials also told Waldheim that the PLO had "even occupied the UNRWA (U.N. Relief Works Agency) offices in the camps." This was confirmed by the Israeli invasion discoveries.

The use of U.N. camps and "schools" in other parts of the world by Marxist terrorists has gone virtually unreported in the press.

For instance, in southern Africa, the Southwest African People's Organization, another Marxist guerrilla organization, is recognized by the U.N. as the "sole and authentic" representative of the Namibian people, even though there are some 45 political parties in that African country. The U.N. and its specialized agencies have allocated some $40 million to SWAPO for U.N. programs begun between 1977 and 1981 and new programs slated for the 1982-to-1986 period.

Among these programs is the SWAPO-controlled Institute for Namibia, located in Lusaka, Zambia. Between 1977 and 1981, about $1 million in U.N. funds went annually to finance the institute. In 1982 a handful of U.N. member-nations pledged an additional $2 million. The United States' pledge of $500 thousand for 1982 was by far the largest.

While the institute is charged by the U.N. with responsibility to train administrators

for a future independent Namibia, serve as an information center on Namibia; perform research on Namibia, and aid in the "struggle for freedom of the Namibian people" in practice, it would appear that only SWAPO members are accepted as students at the institute and that the school is used for SWAPO military training.

Located in Zambia, the Institute for Namibia provides SWAPO with a strategic site for a military training center. With its common border with Angola—the point from which SWAPO launches its terrorist attacks into Namibia—a more suitable spot would be hard to find.

One might ask why no U.N. members have questioned whether the Institute is being used by SWAPO to train officers and troops for guerrillas warfare in Namibia.

On March 28, 1981, New York Times correspondent Barnard Nossiter reported from Angola that yet another U.N. facility was being commandeered by SWAPO for its terror campaign—the Namibian Health and Education Center in Luanda, Angola. The camp is run by the U.N. High Commissioner for Refugees. Nossiter said SWAPO was using this camp to train students aged 5 to 18 as guerrillas to be returned to Namibia.

The Times newsman also said a nearby U.N. women's camp with a population of 25,000 seems to be SWAPO-dominated.

Futher evidence of U.N. support of Marxist terrorism is evident in Botswana, just south of Zambia. Here, the African National Congress, a thoroughly Marxist terror organization aimed at overthrowing the government of South Africa, uses a U.N. refugee camp in Dukwe as a recruiting center for territorists, according to military sources there.

And within the very borders of South Africa, the tiny country of Lesotho hosts another refugee center run under the UNHCR auspices, which also is suspected of being an ANC recruiting center. Refugees recruited there and in Botswana are moved to military and terriorist training centers in Angola, Tanzania, Algeria, Eastern Europe and the U.S.S.R. This was confirmed in recent testimony by former ANC members during hearings before the U.S. Senate Subcommittee on Security and Terrorism.

In the Western Hemisphere, there also is strong evidence that the U.N. refugee camps in Central America are being used to train Marxist guerillas and terrorists.

A UNHCR camp at La Virtud, Honduras has supplied food and medicine to Marxist guerillas staging raids into El Salvador, according to Heritage Foundation Latin American expert Richard Araujo. In addition, Araujo says, the French medical volunteer group, Medecins Sans Frontieres, which is part of the UNHCR operation in the Honduras refugee camps, is funneling intelligence reports to the Communists-oriented Sandanista army of Nicaragua.

It is high time the United States and its Western Allies demand a full internal investigation of U.N. aid and support for terrorist groups which operate freely in refugee camps in the middle East, southern Africa and latin America.

These investigative teams should include representatives of the United States and the Western nations, which pay the lion's share of the tab for the U.N. refugee program.

In addition, the U.S. Congress, General Accounting Office, and Central Intelligence Agency should conduct their own intensive investigation into all aspects of U.N. support for terrorist and guerrilla groups and subversives of all kinds—including those directed by the Soviet KGB, the U.S.S.R.'s secret police, which considers the U.N.'s New York headquarters its home away from home.

The United States and the West can make a big dent in U.N. funding of international terrorism and Marxist guerrillas movement by cutting off all U.S. contributions to U.N. organizations backing terrorist and guerrillas cadres until this practice is stopped. U.S. taxpayers can help stop the flow of aid to terrorists simply by refusing to give their money to those at the U.N. who would abuse our trust and the legitimate needs of the world's refugee population.

NO ONE WOULD PREVAIL IN A NUCLEAR WAR

Mr. PROXMIRE. Mr. President, the innocuous-sounding word "prevail" has become part of the nuclear arms vocabulary, and the administration's use of the word makes its murky stand on nuclear war even less clear.

The administration says one of its goals is to prevail in the event of a nuclear war. But what does it mean by this? The dictionary tells us that to prevail means to "gain the advantage or mastery; be victorious; triumph." It can also mean, "to become stronger or more widespread; predominate," and, finally, to prevail means to "exist widely, be in general use."

The word "prevail," as used by the administration, suggests that a nuclear war can be won. This is a suggestion many laugh at. Administration officials deny that they are saying a nuclear war could be fought and won. They deny they are planning weapons with winning in mind. But then the word "prevail" keeps popping up, casting doubt on their denials. The result is a confusing and contradictory picture of the adminstration's view of nuclear war.

The New York Times reported in November that Secretary of Defense Caspar W. Weinberger has privately endorsed a strategy calling for American nuclear capabilities that can "prevail even under the conditions of a prolonged war." Publicly, Secretary Weinberger rejects the thesis that a nuclear war can be won. Weinberger berates the Kremlin for carrying out offensive-minded programs that suggest a philosophy of winning a nuclear war. But then he promises similar programs for our own forces.

Secretary Weinberger's double speak is typical of the administration's wishywashiness on what it means when it says prevail.

A top Presidential aide describes what he meant by prevail. The Washington Post quoted him November 10. He said:

> Prevailing means achieving the objectives of preserving the institutions of the United States, protecting economic interests and the possibility to rebuild.

Does that definition, Mr. President, clear up for you the perplexing questions about prevail? It does not for me.

I would suggest that the administration reread the final dictionary definition of prevail—"to exist widely, be in general use."

In my view, Mr. President, the only way anyone in the United States can prevail is to never experience a nuclear war. And one way to help insure that a war never happens is to freeze the production of the nuclear weapons that would be used to fight a war in which, I assure you, no one or nothing would prevail.

Mr. President, I ask unanimous consent that two articles from the Washington Post and New York Times be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 10, 1982]

ADMINISTRATION'S NUCLEAR WAR POLICY STANCE STILL MURKY

(By Michael Getler)

Virtually from the moment it took office the Reagan administration has generated controversy because of its supposed attitudes toward nuclear war.

It has created an impression that it is more inclined to fight than its predecessors, and that it believes a nuclear war, even possibly a protracted one, could be fought and won. That belief, critics say, lowers the nuclear threshold by making nuclear war less unthinkable and so more likely to occur.

Such charges of nuclear recklessness have come more frequently in recent months. The administration vigorously rejects them. Presidential aides say that there has been no fundamental change in U.S. nuclear strategy in this administration. They stress that President Reagan has said there can be no winners in a nuclear war.

They also say that Reagan a year ago signed a top secret directive basically reaffirming the nuclear strategy that had evolved gradually under several preceding presidents including Jimmy Carter, who stiffened it in several ways.

Officials describe the Reagan plan as a "nonpolitical strategy rather than a Reagan strategy," one consistent with the longstanding idea that this country should have enough strength to deter Soviet attack, and if deterrence fails, to fight either a limited or prolonged nuclear war that would deny the Soviets a victory.

The officials claim the main difference between Reagan's National Security Decision Directive 13 of November, 1981, and Carter's comparable Presidential Directive 59 of July, 1980, is that Reagan's directive was accompanied by another presidential order at about the same time. This required the Pentagon to file a "master acquisition plan" that would link the development and procurement of specific weapons and communications systems to the carrying out of U.S. strategy.

Interviews with several senior officials produce private acknowledgement that the administration itself is largely responsible for its bellicose image.

They ascribe this in part to loose talk about nuclear alternatives, especially in the first year of the administration, as well as to some intended toughening of rhetoric and policy toward Moscow. They also attribute it to a search for words in official documents to make the Reagan approach to

strategic nuclear doctrine seem somewhat different from what has gone before.

In addition, they say there has been some considerable misinterpretation by the media.

Nevertheless, the crucial issue of where this administration stands on nuclear war policy remains murky. One major reason is that the administration frequently uses the word "prevail" to describe its military goals. It is a term that previous administrations have avoided because it suggests nuclear wars can be won.

The actual wording of some of the most important strategic documents, such as NSDD-13, remains highly classified, so that very few officials and probably no journalists know exactly what they say. Even the existence of NSDD-13 has never been publicly confirmed.

One key document that has become public, however, is the five-year guidance issued to the military early this year by Defense Secretary Caspar W. Weinberger and leaked to The Washington Post and then some other newspapers in May.

On May 30, The New York Times headlined the guidance as the "first strategy for fighting a long nuclear war" and described Reagan as embarking on a "new nuclear strategy."

On Aug. 15, Los Angeles Times reporter Robert Scheer also disclosed for the first time the existence of NSDD-13 and described it, without any attribution and without quoting any language from it, as "the first reported time the U.S. government has declared that nuclear war with the Soviets can be won." Scheer, who has since written a book about the subject that also has no details on NSDD-13, also used the leaked Weinberger guidance to back up his reporting.

Late in August, without reference to specific reports, Weinberger sent a letter to some 70 editors here and abroad complaining about "completely inaccurate" stories "that portray this administration as planning to wage protracted nuclear war or seeking to acquire a nuclear war-fighting capability."

Weinberger stressed that "there is nothing new about our policy." A policy of deterrence demands that the United States always have forces that can survive an initial attack or prolonged battle and retaliate if the Soviets are to be dissuaded from attacking in the first place, he said.

Experienced civilian and military officials agree with this explanation. Weinberger, however, never mentions the leaked guidance and the problem is that the language of that classified document provides ample grounds for a different interpretation.

For example, the guidance says:

"Should deterrence fail and strategic nuclear war with the U.S.S.R. occur, the United States must prevail and be able to force the Soviet Union to seek earliest termination of hostilities on terms favorable to the United States."

The United States must have plans that assure U.S. strategic nuclear forces can render ineffective the total Soviet military and political power structure . . . and forces that will maintain, throughout a protracted conflict period and afterward, the capability to inflict very high levels of damage against the industrial/economic base of the Soviet Union . . . so that they have a strong incentive to seek conflict termination short of an all-out attack on our cities and economic assets."

"U.S. strategic nuclear forces" and their command and communication links should be capable "of supporting controlled nuclear counterattacks over a protracted period while maintaining a reserve of nuclear forces sufficient for trans- and post-attack protection and coercion."

Aside from the defense guidance, the administration has used the word "prevail" in a number of public descriptions of security policy toward Moscow, although not always specifically in the nuclear context. White House deputy for national security Thomas C. Reed, for example, has used it several times in speeches this year and even the White House "Program for Economic Recovery" issued just one month after the administration came to office in 1981 contained the little-noted call to prevail if deterrence fails.

Top White House officials decline to say whether the word prevail is also used in Reagan's NSDD-13, which is the basic nuclear policy document. But they say they are confident that the word win is not included.

So what does prevail man in a nuclear battle if not to win?

Here is how one top presidential aide describes it:

"Prevailing and winning are two different things. Winning implies an army of occupation" as in World War II. "Prevailing means achieving the objectives of preserving the institutions of the United States, protecting economic interests and the possibility to rebuild."

Another senior White House official says prevailing "is not intended to be oriented toward anything other than avoiding losing. In other words, how can you stop escalation to the lowest possible level. That is the definition in this administration . . . preventing escalation from getting willy-nilly beyond our control."

Both officials claim that NSDD 13 did not, as one put it, "get into prevailing in any way that wasn't intended by PD-59," the Carter directive on nuclear doctrine, or that it wasn't "the exact same sense that was put into NSDM-242," which was the National Security Decision Memorandum signed by President Nixon in January, 1974. All of those documents are secret.

The Nixon policy, developed by then defense secretary James R. Schlesinger, was the first important shift in U.S. policy in many years. It pointed this country toward an ability to fight a limited nuclear war if necessary by being able to strike back at selected military targets rather than simply launching an immediate, all-out retaliatory strike.

Carter's PD-59 carried this idea further, giving a president more options, putting more emphasis on denying the Soviets a military victory by destroying their forces and leadership and setting in motion efforts to buy the equipment that would enable a president to keep more precise control of his forces during a nuclear exchange.

Carter aide Zbigniew Brzezinski recently described PD-59 as "essentially a war-fighting doctrine, not in order to fight a war but in order to deter the other side."

The Carter administration said this new doctrine was needed in part because there were signs that Moscow considered victory in a nuclear war as possible and that such a war could be prolonged.

So one top Reagan administration official claims that NSDD-13, despite charges that it is a dangerous new commitment to win a protracted nuclear war, "is highly overrated as a document of change. It really is not that. It is a document which confirms both PD-59 and NSDM-242. The fact is that the United States adopted a counter-force doctrine," meaning one capable of knocking out an opponent's military targets, "under Jim Schlesinger and it has been essentially the same doctrine ever since."

A high-ranking military officer who has served several administrations and is intimately familiar with actual war-fighting plans said that, in fact, "most of the changes in doctrine over the years have been rhetorical," with little real impact on the targets that are already cranked into the vast array of American nuclear weapons. Frequently, he said, the money never catches up to the rhetoric.

The officer said the Reagan administration has put more emphasis and some more money into an ability to fight a protracted nuclear war, if necessary, where other administration did not, even though these these others also recognized the potential need.

And he said that the idea of prevailing has, in fact, been around a long time, although other administrations have been careful to express it in other ways, such as in terms of serving the interests of the nation. "They all have struggled for words that are different than winning," he said, "but this administration has had a little problem with rhetoric."

A number of officials made the point that the Reagan administration came into office with many ideologues and few strategic experts. "At first," one senior officer said, "there were a number who thought you could get a meaningful capability to prevail. But as time went on, the sober realities of being in office resulted in the realization that you can't achieve some of the more ambitious plans."

Weinberger is right in what he says about policy, the officer said, "but previous administrations have been far more careful about not leaving the perception with the public of fighting and winning a protracted nuclear war. Frankly we were starting to scare people . . . and I don't think this administration can escape scot-free that they've left that impression around the world.

"Reagan, in essence, let a hundred flowers bloom early in his administration and that has caused many of the problems with the anti-nuclear movement in Europe and the United States," he said.

Now, he believes, the administration is trying to correct this impression. "I think we will be hearing less and less about protracted nuclear war as time goes on," he said.

[From the New York Times, Nov. 29, 1982]

ARMS NONPOLICY

(By Michael Krepon)

WASHINGTON.—President Reagan's address supporting "dense pack" basing for the MX missile, deep cuts in strategic arms and a stable strategic balance was a testament to confused and contradictory thinking.

How can the accumulation of nuclear war fighting capabilities by either side lead to a stable strategic balance? How can a buildup lead to deep reductions? The Administration, approaching its two-year mark, still has not come close to offering a coherent strategy to improve national security.

The Reagan team rejected the Carter Administration's "race track" plan for deploying the MX as not assuring survivability against a Soviet first strike. Instead, it offers a bizarre basing proposal that hinges

the MX's survival on attacks easily directed against it.

Contradictions abound in other areas, too. The Reagan proposals for deep cuts require reductions by two-thirds in Soviet land-based missiles while allowing a net increase in our strategic forces. Why? Because our negotiating proposal does not encompass cruise missiles, the primary "growth stock" in our arsenal over the next decade. Not surprisingly, the Start negotiations in Geneva are dead in the water.

The Administration could have cut into Soviet land-based missiles quite simply by percentage reductions from the SALT II agreement. But SALT II was "fatally flawed." Why? Because the Soviet Union's Backfire bomber was excluded and the Russians had the sole right to "heavy" missiles. The Reagan negotiating proposals do not cover bombers and still confer the sole right to heavy missiles on the Soviet Union.

The Pentagon's new strategic doctrine is no less confusing. Secretary of Defense Caspar W. Weinberger has privately endorsed a strategy calling for American nuclear capabilities that can "prevail even under the condition of a prolonged war," while publicly rejecting the thesis that a nuclear war can be won. He charges the Kremlin with carrying out offensive-minded programs that suggest a philosophy of winning such a war, and then promises similar programs for our forces.

Meanwhile, an Administration that accused its predecessor of standing still in the face of a Soviet strategic buildup is now dismantling aged B-52 bombers and Titan missiles. The Titans represent one-third of the land-based-missile throw-weight available to us. Throw-weight is one measure of destructive power that can be launched against an adversary—another one of the Soviet advantages that so troubled Mr. Reagan's advisers during the SALT debate.

* * * * *

At least, negotiations over deep cuts are under way, even though the American and Soviet positions are far apart. Other arms-control initiatives have not fared as well. The Threshold Test Ban Treaty limiting the yield of underground nuclear tests has been shelved by the Administration. That treaty mandates exchanges of geological and test data to help both countries monitor compliance. Unlike the intelligence community's assessment in 1977, Mr. Reagan's advisers now deem this data insufficient to monitor Soviet compliance; the necessary improvements have yet to be defined. The Peaceful Nuclear Explosions Treaty with its provisions for on-site inspections for non-military tests has also been put on hold. Negotiations banning antisatellite and space warfare remain dormant. Why? Eugene V. Rostow, Director of the Arms Control and Disarmament Agency, says: "Any space weapon limitations which limit the threat to United States satellites will necessarily protect threatening Soviet satellites as well."

No one should expect total logical consistency, for once nuclear weapons were designed the logic of a stable international political system turned several degrees off axis. Nor can we expect every utterance of a new Administration to fit neatly into a coherent design. But we have every right to expect more sense from this Administration on nuclear questions than has been the case up to now. We also have the right to expect concrete arms-control achievements. At this point, however, contradictions in national-security policies are becoming more, not less, pronounced. And concrete results in arms reductions appear no closer to fruition than on the day Ronald Reagan took office.

TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982

Mr. BAKER. Mr. President, I call the Senate's attention to the December 16, 1982, decision by the U.S. District Court for the District of Columbia dismissing a challenge to the constitutionality of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). In August of this year, 19 Members of the House filed two lawsuits challenging the constitutionality of the legislation on the grounds that it violated the origination clause of the Constitution. The plaintiff named the Senate, the President of the Senate, and the Secretary of the Senate as three of the defendants; and the Senate, by Senate Resolution 477, directed the Senate Legal Counsel to defend the Senate parties. M. Elizabeth Culbreth, the Deputy Senate Legal Counsel, presented the Senate's argument to the district court.

The plaintiff argued that TEFRA was invalid because it was "revenue raising" legislation which had not originated in the House. Their objection had been considered and rejected by the House of Representatives during its consideration and passage of TEFRA.

The district court has now dismissed the lawsuits because the plaintiffs had a remedy with their fellow legislators and they lack standing to bring the case. Mr. President, I ask unanimous consent that the memorandum opinion and order of U.S. District Judge Joyce Hens Green in these cases be printed in the RECORD.

There being no objection, the memorandum opinion and order were ordered to be printed in the RECORD, as follows:

U.S. DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

W. HENSON MOORE, ET AL., PLAINTIFFS, V. THE U.S. HOUSE OF REPRESENTATIVES, ET AL., DEFENDANTS—CIVIL ACTION NO. 82-2318

RON PAUL, PLAINTIFF, V. THE UNITED STATES OF AMERICA, ET AL., DEFENDANTS—CIVIL ACTION NO. 82-2352

Memorandum Opinion and Order

These consolidated cases, before the Court on plaintiffs' motion for summary judgment and defendants' motions to dismiss, present the threshold question whether plaintiffs, 19 members of Congress, have standing to challenge the constitutionality of the "Tax Equity and Fiscal Responsibility Act of 1982," Pub. L. No. 97-248 ("TEFRA"), which the President signed into law on September 3, 1982. Upon consideration of the supporting documentation, the record as a whole and oral arguments presented by the parties, it is determined that plaintiffs lack standing [1] to maintain these actions and that the actions therefore must be dismissed.

Plaintiffs brought their complaints against the United States,[2] the United States House of Representatives, the United States Senate, and officials of those two bodies, seeking a declaratory judgment that the actions of Congress in enacting TEFRA infringed upon the prerogatives of the House in contravention of the "origination clause" of the United States Constitution, U.S. Const. art. I, § 7, cl. 1. The origination clause provides: "All Bills for raising revenue shall originate in the House of Representatives; but the Senate may propose and concur with Amendments as on other Bills."

On November 13, 1981, H.R. 4961, denominated "Miscellaneous Revenue Act of 1981," was introduced in the House of Representatives. After certain amendments, the bill was reported out of the House Ways and Means Committee on December 14, 1981. The House Report estimated that the net effect of the tax provisions of the bill would reduce revenues by 976 million dollars over five years. H.R. Rep. No. 404, 97th Cong., 1st Sess. 9 (1981). The bill was passed by the House on December 15, 1981. 127 Cong. Rec. 31515-18

Thereafter, the bill was referred to the Senate Finance Committee, which reported it out on July 12, 1982 under the new name, "Tax Equity and Fiscal Responsibility Act of 1982" (TEFRA). S. Rep. No. 494, 97th Cong., 2d Sess. (1982). Although carrying the House number, the bill that left the Senate Committee, unlike the bill passed by the House, was designed to raise revenues in the amount of 99 billion dollars over three years. The Senate passed this bill on July 19, 1982. 128 Cong. Rec. 16833-16902. The difference between the bill as passed by the Senate and as passed by the House prompted the Senate to seek a conference with the House. 128 Cong. Rec. 18253.

In response to the Senate's request, plaintiff Rousselot offered this privileged resolution: "*Resolved*, that the Senate Amendments to the bill, H.R. 4961, in the opinion of the House, contravene the first clause of the seventh section of the first article of the Constitution of the United States, and are an infringement of the privileges of this House and that the said bill, with amendments be respectfully returned to the Senate with a message communicating this resolution." 128 Cong. Rec. 18375, July 28, 1982.

Representative Dan Rostenkowski, Chairman of the Committee on Ways and Means, immediately moved to table the resolution, with 229 members voting yea, 169 voting nay and 36 not voting. Each of the plaintiffs voted against the motion to table. Id. at 18375-76. At the direction of this committee, Representative Rostenkowski then moved to send the bill to conference with the Senate. Id. at 18376. This motion passed after debate, which included plaintiffs, on the constitutionality of the Senate amended bill. 128 Cong. Rec. 18376-87, July 28, 1982. Each of the plaintiffs voted against the motion to go to conference. Id. at 18385-86.

During the following two weeks the constitutional issue was addressed by several Representatives. See Statements of Representative Bereuter, 128 Cong. Rec. 19142, 19158, August 3, 1982; Representative Dreier, 128 Cong. Rec. 206324 (daily ed.,

[1] For this reason other grounds for dismissal advanced by defendants need not be addressed.

[2] Only plaintiff *Paul* named the United States as a defendant. However, the United States successfully moved to intervene as a defendant in *Moore*.

August 11, 1982); Representative Porter, 128 Cong. Rec. 27155-56, August 13, 1982. On August 17, 1982, a conference bill was reported, substantially similar to the Senate version but including two tax provisions of the House version which the Senate had deleted. Conference Report to Accompany H.R. 4961, H.R Rep. No. 760, 97th Cong., 2d Sess. 267-68 (1982). Plaintiffs in *Moore* promptly filed suit on August 18, 1982.

The next day the constitutional issue was debated further on the House floor, 128 Cong. Rec. 22155, August 19, 1982. Plaintiff Rousselot introduced a second resolution to have the bill returned to the Senate. 128 Cong. Rec. 22155 August 19, 1982. This resolution was also rejected, with 268 members voting yea, 144 voting nay and 22 not voting, in favor of a motion to table. Each of the plaintiffs voted against this motion. 128 Cong. Rec. 22155, August 19, 1982. The bill was passed by both Houses on August 19, 1982, 128 Cong. Rec. 22446-47, August 19, 1982, with each of the plaintiffs exercising their voting rights on this legislation. Plaintiff Williams voted in favor of passage. All other plaintiffs voted against passage. Id. at 22339-40. Plaintiff Paul filed his action on August 20, 1982. On September 3, 1982, President Reagan signed the bill into law.

When voting on a motion to dismiss for want of standing the court "must accept as true all material allegations of the complaint, and must construe the complaint in favor of the complaining party." *Warth* v. *Seldin*, 422 U.S. 490, 501 (1975). However, even assuming the legal conclusion [3] that TEFRA was enacted in violation of the origination clause of the Constitution, plaintiffs have not demonstrated the injury-in-fact required by Art. III to invoke the judicial power. At a minimum, a plaintiff must show that he personally has suffered an actual or threatened injury which reasonably can be traced to the challenged conduct of the defendant and would likely be redressed by a favorable decision, *Valley Forge Christian College* v. *Americans United for Separation of Church and State*, 459 U.S. , 102 S. Ct. 752, 758 (1982). "In this manner, does Art. III limit the federal judicial power 'to those disputes which confine federal courts to a role consistent with a system of separated powers and which are traditionally thought to be capable of resolution through the judicial process.'" id. (quoting *Flast* v. *Cohen*, 392 U.S. 83, 97 (1968)). Thus, a court should refrain from adjudicating the constitutionality of an act of a co-equal branch of government unless the claimant has suffered a cognizable injury. Id. at 759.

The separation of powers concerns which underlie the concept of standing are particularly acute when plaintiffs are members of Congress. Although "there are no special standards for determining Congressional standing questions," *Harrington* v. *Bush*, 553 F.2d 190, 204 (D.C. Cir. 1977) (emphasis deleted), injury-in-fact for a congressional plaintiff "must amount to a disenfranchisement, a complete nullificaton or withdrawal of a voting opportunity." *Goldwater* v. *Carter*, 617 F.2d 697, 702 (D.C. Cir. 1979 (en banc), vacated on other grounds, 444 U.S. 996 (1979) (mem.). *Riegle* v. *Federal Open Market Committee*, 656 F.2d 873 (D.C. Cir. 1981), cert. denied, 102 S. Ct. 636 (1982); *Reuss* v. *Balles*, 584 F.2d 461, 467 (D.C. Cir.), cert denied, 439 U.S. 997 (1978); see also *Kennedy* v. *Sampson*, 511 F.2d 430 (D.C. Cir. 1974).

As the legislative history plainly reflects, plaintiffs had ample opportunity to exercise their voting rights and in fact, save for plaintiff Williams, voted their disapproval of TEFRA at every turn. Plaintiffs fully participated in the legislative process which culminated in the passage of the act they now challenge. They were simply out voted. The argument that plaintiffs' votes were effectively nullified by the Senate's usurpation of their right to originate revenue raising bills, and the House acquiescence therein, is unpersuasive. To support this contention, plaintiffs rely on *Kennedy* v. *Sampson*. In that case, however, the plaintiff had standing because his successful vote had been nullified by the allegedly illegal packet veto of the President. But where, as in this case, "Congress itself, and not the Executive, renders any individual legislator's vote ineffective, the courts have no role." *Goldwater* v. *Carter*, 617 F.2d at 712. See also *Korioth* v. *Briscoe*, 523 F.2d 1271, 1278 (5th Cir. 1975) (state legislator denied standing to challenge the validity of a statute passed over his objecting vote); *McClure* v. *Carter*, 513 F. Supp. 265, 270 (D. Idaho), aff'd mem. sub nom., *McClure* v. *Reagan*, 102 S. Ct. 559 (1981) ("Certainly no one would contend * * * that the losing senators in any vote should automatically have the right to appeal to a federal court for a determination of the correctness of the result approved by a majority of their colleagues").

In short, plaintiffs speak as a frustrated minority. Unless the institution of Congress itself has suffered injury-in-fact at the hand of the Executive, an individual legislator has no standing to complain of impairment to the effectiveness of his vote. "His injury can only be derivative." *Goldwater* v. *Carter*, 617 F.2d at 712. Here, Congress specifically considered and rejected the suggestion of any constitutional infirmities in the enactment of TEFRA, and in fact opposes this lawsuit. Judicial interference into this intra-legislative dispute is constitutionally precluded.

Even if plaintiffs' claim of injury to their rights as members of Congress to originate bills for raising revenue could be deemed constitutionally sufficient to confer standing, the doctrine of equitable discretion announced by this Circuit in *Riegle* v. *Federal Open Market Committee* squarely governs this action and mandates dismissal.

In *Riegle* an individual senator challenged the constitutionality of the section [4] of the Federal Reserve Act which provides for the election of five representatives of the Federal Open Market Committee by the Board of Directors of the Federal Reserve Banks, claiming that the selection of these individuals without submission of their nominations to the Senate deprived him of his constitutional right [5] to advise and consent regarding the appointment of these United States officers. Declining to distinguish between Congressional and private plaintiffs, [6] the court determined that Senator Riegle had standing. Nevertheless, the fundamental constitutional principle of separation of powers required that his action be dismissed. Because suits by Congressmen present "the possibility of thwarting Congress' will by allowing a plaintiff to circumvent the process of democratic decisionmaking," a court should, as a matter of equitable discretion, dismiss a Congressman's action where he "could obtain substantial relief from his fellow legislators through the enactment, repeal, or amendment of a statute." *Riegle* v. *Federal Open Market Committee*, 656 F.2d at 881. Application of the *Riegle* doctrine is especially appropriate where a plaintiff's dispute is not with the executive branch but with his fellow legislators. See *Reuss* v. *Balles*, 584 F.2d at 468. In this way a court may avoid intrusion into the internal functioning of the legislative branch.

In the instant case, plaintiffs must be relegated to their legislative remedies, despite their previous failures to convince their colleagues of the rightness of their views, and no matter how remote their chances for success in the future. "It would be unwise to permit the federal courts to become a higher legislature where a congressman who has failed to persuade his colleagues can always renew the battle." *Riegle* v. *Federal Open Market Committee*, 656 F.2d at 882.

Before dismissing an action under the *Riegle* doctrine a court must also inquire whether "a similar action could be brought by a private plaintiff." Id. Although the *Moore* plaintiffs refuse to discuss this part of the analysis, and refer to it as "baggage", *Moore* plaintiffs' memorandum in opposition to defendants' motions to dismiss at 26, plaintiff Paul argues that "[i]n this instance a private plaintiff has no immediate redress." Plaintiff Paul's opposition to defendants' motions to dismiss at 5. Yet, Representative Paul acknowledges that a taxpayer could challenge the constitutionality of TEFRA by filing for a refund after January 1, 1983. Id. Private taxpayer plaintiffs have asserted claims under the origination clause before. See *Rainey* v. *United States*, 232 U.S. 310 (1914); *Flint* v. *Stone Tracy Co.*, 220 U.S. 107 (1911); *Miller* v. *Roberts*, 202 U.S. 429 (1906); *Twin City Bank* v. *Nebeker*, 167 U.S. 196 (1897); *Bertelson* v. *White*, 65 F.2d 719 (1st Cir. 1933); *Hubbard* v. *Lowe*, 226 F. 135 (S.D.N.Y. 1915), appeal dismissed, 242 U.S. 654 (1916).

It is, accordingly, this 16 day of December, 1982

Ordered, That plaintiffs' motion for summary judgment be and it hereby is denied; and it is

Further ordered, That defendants' motions to dismiss be, and they hereby are, granted, and that these actions stand dismissed.

JOYCE HENS GREEN,
U.S. District Judge.

---

[3] In its response to plaintiffs' opposition to defendants' motion to dismiss, the United States rightly points out that "standing in no way depends on the merits of plaintiffs' contention that particular conduct is illegal." *Warth* v. *Seldin*, 422 U.S. 490, 500 (1975).

[4] 12 U.S.C. § 263(a) (1976).

[5] U.S. Const. art. II, § 2 ("appointments clause").

JOHN RHODES

Mr. DECONCINI. Mr. President, as the 97th Congress winds down and prepares to slip into history, I rise today to call attention to a Member of the Arizona delegation who is retiring with the end of the 97th Congress and has distinguished himself over nearly a 30-year period, JOHN RHODES was elected to the U.S. House of Representatives nearly 30 years ago and has,

during the ensuing time, been a true leader among his colleagues, Arizonans are very proud that JOHN RHODES has represented them so well and faithfully over the years.

JOHN RHODES rose quietly in the House hierarchy, becoming the second ranking member on the Appropriations Committee and chairman of the House Republican Policy Committee, and in 1973, when Gerald Ford became Vice President, RHODES was elected House Minority Leader. JOHN RHODES served honorably in that very difficult and challenging post through the 96th Congress.

In the 6 years that I have been in the Senate, from the other side of the political aisle, and from the other side of the Capitol, I have seen JOHN RHODES and respected him for his initiative, industry, and integrity. I congratulate him on his years of distinguished service,

The 1982 edition of the Almanac of American Politics states, "A word should be said about Arizona's House delegation. What other State with such a small delegation has had two leaders, of different parties, of the brainpower, clout, and integrity of MORRIS UDALL and JOHN RHODES?"

When the 98th Congress convenes, JOHN RHODES will be sorely missed by the remaining Members of the Arizona delegation, by the people of Arizona, and most importantly, by the people of the United States. What greater gage is there of the worth of a man than to see how sorely he is missed at such time as he passes from the national scene. JOHN RHODES will indeed be sorely missed.

Thank you, Mr. President.

CARIBBEAN BASIN LEGISLATION

Mr. PERCY. Mr. President, I communicate to my colleagues my very strong support for the Caribbean Basin legislation and my hope that we may yet be able to bring the bill, H.R. 7397, to a vote before Congress adjourns.

The House of Representatives passed the CBI late Friday afternoon with a vote of 260 to 141.

I commend my distinguished colleague, the chairman of the House Ways and Means Committee, DAN ROSTENKOWSKI, for the creative and effective leadership on this issue.

The House of Representatives passed the CBI late Friday afternoon with a vote of 260 to 141. Senator DOLE's Finance Committee is holding its markup of the bill today. Mr. President, if there is any opportunity to bring this legislation to a vote before the 97th Congress adjourns, I urge my colleagues to seize that opportunity and to give the CBI our full, bipartisan support.

Over the past 9 months, nearly every leader in the Caribbean has come to Washington to ask for our support for the CBI. We have all given assurances of our concern for the economic troubles those tiny countries face. It would be a tremendous, perhaps irreparable, disappointment if we were to reject the chance to affirm our support for these neighbor countries.

In September, we voted $350 million in economic assistance, the first leg of the CBI. But, the Caribbean leaders said that more than aid, they wanted opportunities such as those offered by the 12-year duty-free trade provision of the CBI. I remember well that President Monge of Costa Rica said that the Caribbean countries have been waiting for 30 years for this kind of relationship with the United States.

What is important is that new production in the Caribbean Basin will create jobs. Unemployment ranges from 20 to 40 percent there. Jobs are desperately needed and people are eager to work. The CBI will provide an important stimulus to economic activity by removing some of the risk from new investments.

The United States is a very large country, especially seen from the small countries of the region—countries with populations as small as 80,000 and gross national products only as large as $7 billion. Our neighbors in the Caribbean will be tremendously disappointed if we cannot meet their expectations on this issue.

I recognize that labor in this country is concerned about the impact of the CBI on their jobs. I am convinced that this legislation will have only a minuscule negative impact on jobs in this country. If the Caribbean countries take full advantage of the CBI, the principal impact will be felt by producers like Singapore, Taiwan, or Korea. But even then, production in the Caribbean Basin will hardly dent the dominant position those countries have. More importantly, by stimulating economic activity in the Caribbean countries, the CBI will be creating demand for U.S. goods and services. The Chicago Association of Commerce & Industry saw the CBI and immediately understood that economic activity in the Caribbean means opportunity for U.S. businesses, too. The United States will provide plant, technology and materials to Caribbean producers, and as the countries expand economically, they will buy more in this country. The United States already supplies 50 percent of Caribbean countries' imports. These are worth about $7 billion to us each year. If the Caribbean countries grow, they will buy more from us, supporting U.S. employment in the process.

Time is of the essence. The House Ways and Means Committee performed exhaustive study on the trade and tax provisions of this legislation. Seven members went to the Caribbean to see firsthand what the prospects are there. The bill now represents the best bill we can produce.

This bill was debated for 3 hours on the House floor on Friday. The support for it was extremely enthusiastic. It is the right thing to do. It is good policy for the United States. If we dissect the CBI, and look at its individual components, it may not seem to be a momentous package. It certainly is not a Marshall plan. Because it is not, it is all the more important that we take this small initiative to help our very deserving hemisphere neighbors.

As an example of one country of importance to the United States, the country of Jamaica is extremely anxious that this bill be passed. My lifelong friend, Bill Hewitt, former chairman of the John Deere Co., and now Ambassador in Jamaica called this weekend to relate how important this package is to Jamaica. Just today, the Prime Minister of Jamaica, Edward Seaga called to reemphasize the importance of the trade provisions to his country. That country is trying to overcome tremendous obstacles to put its economy back on track. The trade legislation in this bill will allow Prime Minister Seaga to plan for the future rather than just dealing with the immediate crises. Other countries in the Caribbean are as anxious as Jamaica that we pass the CBI.

The United States has tremendous interest in the economic prosperity and stability of the Caribbean Basin. It is our southern border and what happens there is ultimately reflected back here in the United States.

Equally important, I can think of no better way to signal Fidel Castro that we will give our full support for the struggling democracies in the Caribbean Basin.

Mr. President, I urge my colleagues to give their full and unqualified yea to the CBI.

MAJOR LEAGUE SPORTS COMMUNITY PROTECTION ACT

Mr. HEFLIN. Mr. President, it is apparent that in this session Congress will be unable to act on S. 2784, the Major League Sports Community Protection Act of 1982. Last July, I introduced this legislation along with several other members of the Judiciary Committee, and the legislation has been cosponsored by more than 180 Members of the House and Senate. In my view, the antitrust laws, as sometimes applied to sports leagues, neither reflect business or legal realities nor operate in a fashion that serves the interests of the public, taxpayers, and sports fans.

It is most unfortunate that Congress will not enact this legislation in the current session. This issue has already been extensively studied by both Houses of Congress. The Committee

on the Judiciary, of which I am a member, has held in-depth hearings on this legislation under the skilled direction of STROM THURMOND. We received a great deal of testimony—virtually all of it supportive of the major goals of this legislation.

Most significantly, the legislation has received enormous support from public officials and civic leaders across the Nation. Over 50 mayors, Governors, and county executives have endorsed this bill as being vital to the economic and social well-being of their communities. In our Judiciary Committee hearings, a number of distinguished mayors—Mayors Feinstein of San Francisco, Caliguiri of Pittsburgh, Berkley of Kansas City, Halloin of Green Bay, Hance of Phoenix, Schaefer of Baltimore, and Wilson of Oakland—testified as to the urgent need for passage of this legislation to protect the public and pro sports fans in this country. Among the other mayors supporting this legislation, for example, are those from Boston, Chicago, Cleveland, Dallas, Houston, Indianapolis, Jacksonville, Memphis, Milwaukee, Minneapolis and St. Paul, New Orleans, Philadelphia, Portland, San Diego, San Antonio, and Tampa. I am including in the RECORD a partial listing of the many mayors supporting S. 2784/H.R. 6467, a formal resolutiuon of support signed by many of these mayors, and excerpts from statements of a number of mayors summarizing their reasons for supporting enactment of this measure.

In addition to the overwhelming support of mayors and Governors, the Major League Sports Community Protection Act has been endorsed throughout the Nation by leading newspapers in editorials and other commentary. A sampling of these editorials are included in the RECORD with this statement.

Mr. President, a recognition of the business nature of a professional team sports league leads inevitably to the conclusion that a league is not a collection of ordinary business competitors of the same character as the members of a trade association. The member clubs of a sports league have no valid interest in driving each other out of business or in maximizing profits at each other's expense. Rather, as Justice Rehnquist recently observed in an NFL case:

> The NFL owners are joint venturers who produce a product, professional football, which competes with other sports and other forms of entertainment in the entertainment market. Although individual NFL teams compete with one another on the playing field, they rarely compete in the marketplace. * * * This arrangement, * * * is largely a matter of necessity.

Other courts, as well as commentators and congressional committees, have often recognized the joint venture nature of sports leagues, and it is time for Congress to clarify antitrust law based upon that recognition.

Justice Rehnquist has, in my view, accurately described the unique nature of a professional team sports league. Leagues are joint ventures and there is no reason why a league's members should be regarded as business competitors in dealing with most phases of their operations, including team location and revenue-sharing matters. The courts have been remiss when they fail to recognize the unique business nature of a sports league and to have that uniqueness reflected in the application of the antitrust laws to professional sports. I hope that in the near future, Congress will fashion a statute that reflects these business realities.

With respect to the bill before us in this session S. 2784, there is a clear consensus that the two limited antitrust provisions of the bill deserve enactment. Those provisions would, first, allow leagues to keep successful teams where they are, and, second, allow leagues to share revenues to the benefit of teams in the less well-situated markets. Both of these provisions will protect the enormous financial and civic investments that taxpayers, fans, and communities make on behalf of their professional sports teams.

Recently another reason for prompt congressional action became apparent. Throughout our consideration of this bill, we have been aware of the tangled legal situation involving the effort of the Oakland Raiders of the NFL to transfer their home operations to Los Angeles, Calif., over the objection of both the city of Oakland and the NFL itself. Among the lawsuits currently pending is an action by the city of Oakland to acquire the Raiders franchise in eminent domain in order to maintain the team in Oakland. Last June, a unanimous California Supreme Court held that the State's eminent domain statute would permit precisely such an acquisition by the city. Now a State trial judge has implemented that Supreme Court decision by ruling that the Raiders must return to Oakland in 1983 pending a final decision approving the city's eminent domain purchase of the Raiders. This action underscores the direct conflict between State law and Federal antitrust law on this matter of the location of a sports league's member teams. This latest California court decision demonstrates the inadequacy of inflexible antitrust rules that fail to recognize and promote public and consumer interests. It underscores the need to clarify the Federal antitrust laws.

S. 2784 is a simple clarification that would avoid the need for cities to take expensive—and unprecedented—steps in eminent domain to keep their sports teams. And S. 2784 does not realistically seek any antitrust "immunity" at all. The team relocation provision basically seeks confirmation of an earlier Federal court decision which held that league decisions on team relocations represent decisions of a common enterprise that do not pose antitrust issues. That decision was properly based upon recognition of the league as the relevant "firm" with the member clubs engaged in a joint effort to promote and sell their common product much like a national accounting firm operating as a partnership. Similarly, the bill's revenue-sharing provision basically reconfirms what would normally be regarded as the inherent prerogative of joint ventures to agree on the appropriate allocation of their jointly produced revenues.

Prompt congressional action in the next session will establish a uniform Federal law standard on team location matters, preserve the status quo in Oakland by protecting the interests of both the Raiders and the Oakland community, and eliminate the evident conflict between State eminent domain law and Federal antitrust law that threatens to keep the city of Oakland-Raiders dispute in State and Federal courts for almost a decade.

Mr. President, the U.S. Supreme Court has often said that the sports-antiturst issue needs to be addressed by the Congress, and not left exclusively to the courts. The Supreme Court has said that professional sports leagues, as businesses operating in interstate commerce, should be subject to uniform, Federal law standards, rather than varying State standards. S. 2784 would establish a sensible, uniform standard to govern team location decisions and revenue-sharing agreements in professional sports. It would establish a standard that would operate in the public interest, a standard that would protect taxpayers and communities, and a standard that puts legal and commonsense back into the antitrust laws. And for that reason, Mr. President, this bill deserves promptly to be taken up again and reported by the Judiciary Committee to the full Senate early in the next session.

There is, in my view, little question but that this bill would have been enacted into law except for two events that in no way reflect on its merits or on the clear need for it. First, it became a hostage of the labor-management dispute the NFL experienced earlier this fall. I do not understand why that was so, since the bill quite clearly had no effect whatsoever on player rights or union prerogatives. Nonetheless, some of my colleagues were unwilling to take action on the bill until that strike was satisfactorily resolved, as it now has been.

Second, as with so much other legislation, the bill has simply been mired in the pressures of this postelection

session, with a few able to thwart action by the threat of filibusters or other procedural maneuvering. But it would be erroneous to suggest that this Congress thought it a bad idea for successful, well-supported sports teams to stay in their home communities or for leagues to share revenues in order to preserve the viability of teams in small and mid-sized communities. The Congress has long supported stable team-community relations and geographic and competitive balance within sports leagues. S. 2784/H.R. 6467 is simply a further expression of that public policy.

Finally, Mr. President, I think it important to remember that if the Congress does not sensibly resolve these issues, there is likely to be years of additional, costly litigation in the courts that will continue to yield uncertain and conflicting results. Further, our failure to act does not put an end to legislative activity. Indeed, last summer a parochial, special interest effort was made to persuade the California State Legislature to enact legislation that would amend the State eminent domain law in a fashion that would retroactively extinguish the city of Oakland's lawsuit against the Oakland Raiders. I was heartened that Mr. Al Davis, in his testimony before the Senate Judiciary Committee, stated that the Raiders had no involvement in that activity, that he did not condone it, and that he would attempt to have others working for such State legislation cease their activities in Sacramento. A national sports-antitrust policy should be established at the Federal level, not through conflicting State legislative actions, and it should reflect the interests of taxpayers and communities throughout the Nation, not simply those of a particular locale.

Mr. President, it is my hope that when the new Congress assembles next month, one of its early priorities will be to finish the work that we have begun on this legislation. The foundation has been established. There is no credible argument against a national policy of team stability and community protection. There is a strong case for even a broader antitrust clarification for professional sports leagues. I recognize that there are many important matters presently before us and that many of those will require action in the next Congress. Nonetheless, enactment of the Sports Community Protection Act is one clear way in which the Congress can show that its concern is with sound legal principles and with the interests of the public and taxpayers.

Mr. President, I ask unanimous consent that the materials to which I referred earlier in my statement be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RESOLUTION OF MAYORS ON S. 2784/H.R. 6467

Whereas, the United States Congress has introduced the Major League Sports Community Protection Act of 1982 (H.R. 6467), which would exempt professional sports leagues from certain anti-trust provisions; and

Whereas, such legislation would be helpful in preventing professional sports teams from abandoning cities which have expended large sums of money in attracting such teams to these cities; and

Whereas, cities would be unable to recoup their investments if such teams were to leave prematurely; and

Whereas, it is in the best interest of cities to support H.R. 6467 which would exempt professional sports leagues from certain anti-trust provisions,

Now, therefore, be it resolved by Mayors in support of Major League Sports:

Section 1. That the Mayors lends its wholehearted support for the passage of the Major League Sports Community Protection Act of 1982 (H.R. 6467).

Section 2. That the undersigned Mayors shall be directed to send a copy of this Resolution to all members of the United States Congress as evidence of this Conference's support for the passage of the aforementioned bill.

PARTIAL LIST OF MAYORS AND COUNTY EXECUTIVES SUPPORTING S. 2784 (AND H.R. 6467)

City—Mayor or County Executive
Alameda, Calif., C. J. Corica.
Albany, Calif., Ruth Ganong.
Atlanta, Ga., Andrew Young.
Baltimore, Md., William D. Schaefer.
Berkeley, Calif., Gus Newport.
Boston, Mass., Kevin White.
Buffalo, N.Y., James D. Griffin.
Carson City, Nev., Harold Jacobson.
Chicago, Ill., Jane M. Byrne.
Cleveland, Ohio, George V. Voinovich.
Dallas, Tex., Jack W. Evans.
Erie County, N.Y., Edward Rutkowski.
Fairfield, Calif., Gary Falati.
Farmers Branch, Tex., John Dodd.

San Leandro, Calif., Valerie Gill.
Steubenville, Ohio, William Crabbe.
Stockton, Calif., Arnold I. Rue.
Tampa, Fla., Robert Martinez.
Union City, Calif., Tom Kitayama.
Vallejo, Calif., Terry A. Curtola, Jr.

SAMPLE STATEMENTS OF MAYORS SUPPORTING THE MAJOR LEAGUE SPORTS COMMUNITY PROTECTION ACT

Mayor Richard Berkley: "As the Mayor of Kansas City . . ., I know the importance of our profesional sports teams—the Chiefs, the Royals, the Kings and the Comets—to our local economy and to our sense of community pride. For this reason, I strongly support the provisions of S. 2784, the 'Major League Sports Community Protection Act'. . . ."

Mayor George Voinovich: "I am not concerned that the present ownership of our sports franchises would consider any move from Cleveland. Their commitment and dedication to Northeastern Ohio . . . is unquestionable. However, what future ownerships might consider is unknown. Thus, I urge passage of this legislation to insure that Cleveland's future is protected from any possible attempt to move our teams out of our area."

Mayor Andrew Young: "Swift enactment of this legislation during this Congress is badly needed by Atlantans and the residents of all sports communities because it would protect their interests and those of sports fans by keeping competitive teams and the needed tax revenues they generate at home."

Mayor Donald M. Fraser: "The stability provided by this Act is very important to all cities with sports franchises and cities who may acquire franchises in the future. As the Mayor of a city [Minneapolis] with a brand new stadium, I am particularly aware of the need to protect our stadium bonds and to prevent the economic dislocations that would occur should our team be wooed away by another city."

Mayor William J. Green: "As Mayor of Philadelphia, I cannot overstate the tangible as well as intangible benefits which our sports teams have brought to this city. The Eagles, the Phillies, and the Flyers have brought pride, prestige, a unique spirit and a common purpose to the fans of greater Philadelphia, and the entire community has responded with loyal public support. Philadelphia's teams have also enjoyed the support of sports fans in New Jersey and throughout the Middle Atlantic states. It is that stable relationship and loyalty among fans, a community, and a home team which is essential to the long term viability of professional sports and to the public interest which this legislation is designed to protect."

Mayor Dianne Feinstein: "From my perspective as mayor [San Francisco], I believe that this legislation is of critical importance to my community and to many others. . . . [Professional sports] leagues and their teams enrich the lives of our cities, metropolitan areas and States. They also serve important economic roles in many communities, and the leagues and teams have been the recipients of public monies in facilities of many kinds".

Mayor Williams Donald Schaefer: "Baltimore needs passage of the Major League Sports Community Protection Act. It affords the kind of protection we think we have earned over a period of nearly 30 years. Prevailing antitrust law only helps to fuel an already unfortunate circumstance. We are seeking stability from a business which is a bit different from most others. Our support for the Colt franchise deserves protection and antitrust law should be adjusted as necessary to work for caring fans and communities."

[From the Detroit News, Nov. 7, 1982]

SCRIMMAGING ON THE HILL

The National Football League is trying to score on Capitol Hill, and has manned its rush with an impressive array of bipartisan lobbying muscle.

The league entered the legislative arena because of the precedent set by Al Davis, maverick owner of the Oakland Raiders.

Mr. Davis moved his successful Oakland team, over NFL opposition, to the even more lucrative fields of Los Angeles. He gained legal support for the move when the courts ruled that the league requirement of approval from 24 of 28 owners was in violation of anti-trust laws. But Mr. Davis earned general condemnation for betraying supportive Oakland fans.

The NFL hopes the public's outrage at Mr. Davis will help pass House Bill 6467, which would give the league an anti-trust exemption so that it could deny, without threat of suit, any owner's request to move his team. The exemption would be retroactive to scotch the Davis damage suit against the NFL.

In the same legislative package, the league seeks an anti-trust exemption for its sharing of revenues. The league now divides gate receipts 60-40 and television revenues equally among all teams. But such revenue sharing is unsupported in law, and the league fears it could be the next target of anti-trust action.

We agree with the NFL that professional sports require special consideration in anti-trust law. Athletic competition is not necessarily furthered by economic competition.

Stability of franchise location is important. Clubs that hop from town to town destroy the fan loyalties upon which interest in pro football depends. And communities that provide facilities and support for a team are unfairly penalized when it moves away to ostensibly greener pastures.

A caveat: The NFL bill doesn't guarantee that no club will ever move again. An owner, particularly one who is losing money, could still convence the other owners of the need to move. However, an enforceable NFL veto is likely to prevent franchises that are doing well from shifting location, as the Oakland Raiders did.

The case for revenue sharing is even clearer, because it guarantees that franchises in smaller markets can survive slumps and come back to win. It has permitted clubs with below average revenues, such as the Pittsburgh Steelers, to win Super Bowls.

Were there no revenue sharing, clubs with big TV markets—New York, Chicago, and Los Angeles—could easily dominate. Too, geographic distribution would be less diverse. And without revenue sharing, it is unlikely the league could support all of the more than 1,500 players at their present high salaries.

Revenue sharing hasn't discouraged the league from expanding or clubs from trying to mount the best teams. The NFL has added two teams since 1970 and plans further expansions. Since the 1970 merger of the NFL and the old American Football League, all but two clubs have qualified for the playoffs. Mediocre clubs that could have coasted on revenue sharing have instead spent big money to hire and keep superstars. What else explains Billy Sims' salary?

It's easy to be suspicious of a group that, in 1980, had revenues of $377 million and recently signed a $2 billion, five-year contract with the networks. But, in this case, protecting existing NFL policies means as much to fans as it does to owners. We add our support of this legislation to that of 40 U.S. mayors and 158 House co-sponsors, including 13 of Michigan's 19 congressmen.

[From the New Orleans Times-Picayune, July 30, 1982]

FRANCHISE MOVES CAN COST TAXPAYERS PLENTY

(By Bob Roesler)

Folks who used to visit the Polo Grounds never thought it would happen. Neither did the Flatbush fanatics who made Ebbetts Field one of baseball's most hallowed baseball homes.

But Horace Stoneham did, indeed, move his Giants from New York to San Francisco. And didn't Walter O'Malley tear the heart and soul out of the borough of Brooklyn when he shifted his Bums to Los Angeles.

OK, so reflect a bit before you laugh at the question I'm about to pose:

What if John Mecom decided to move the Saints from New Orleans when their Superdome lease expires in 1984?

A hypothetical question, to be sure.

But there is nothing hypothetical about the plight of Oakland's (Alameda County) taxpayers. With Al Davis getting the green light in a Los Angeles courtroom, he is now calling his team the Los Angeles Raiders. Al's move is going to cost Oakland taxpayers a bunch.

The county needs $1.5 million a year to retire bonds issued to build the coliseum that Raider fans had filled for years. The coliseum is going to miss the dollars that were generated by the Raiders.

Davis' move has brought fear to those communities that provide homes for National Football League teams, especially if a team's stadium lease is almost up. What has happened to Oakland could happen to New Orleans, or anywhere else in Pete Rozelle's troubled empire.

The NFL, if enough owners begin to think like Davis, could become a nomadic nation, a Foreign Legion moving about North America in search of more and more gold.

There should be some protection for communities like Oakland and New Orleans, Baltimore or Miami. Where is it to be found?

In Washington, a bipartisan group of congressmen that includes Don Edwards, Calif., Fortney Stark, Calif., Jerry Hyde, Ill., Dan Glickman, Kan., and Jack Brooks, Texas, are behind a bill that would help protect cities from franchise moves.

According to the bill's sponsors, it would ". . . clarify the application of the antitrust laws to professional sports leagues, to protect the public interest in maintaining the stability of professional team sports leagues, and for other purposes."

Basically, the bill would enable the NFL to "enforce rules requiring approval by the membership of the league for any relocation of a member club" and "to enforce rules for the division of league or member club revenues that tend to promote comparable economic opportunities for the member clubs of such a league."

Louisiana Congresswoman Lindy Boggs is not only working to have the bill passed, she has added her name as a co-sponsor. "I found the legislation to be advantageous to the Saints and certainly beneficial to the Louisiana Superdome," Mrs. Boggs said from her Washington office. "As such, I am happy to cosponsor and work for its passage as soon as possible."

Congressman Bob Livingston says he is studying the bill, but as yet has made no final determination. The part of the bill dealing with team movement doesn't give Livingston trouble. But the revenue-sharing section does.

"I am definitely in sympathy with the plight of the people of Oakland," Livingston said by phone. "I don't feel that a team ought to be able to pick up and take off at whim. But I am still hung up on the second part of the bill which would seek to take from the prosperous teams and give to the less prosperous. The reason the teams are less prosperous may be of their own making."

Maybe so. But to me, what has been the NFL's strength the fact that all teams shared the television plum equally, to the tune of about $12 million per annum. What would happen if each team made its own deal? Would the Saints get as much for their TV package as New York? Obviously not, since New York is the No. 1 market and New Orleans is No. 34, which is even smaller than Green Bay's. So revenue sharing is a big help to clubs like the Saints and the Packers.

But back to the hypothetical question. What if the Saints were to pull up stakes?

Suppose a fat cat from Memphis, Birmingham, Indianapolis, Jacksonville or Phoenix would make Mecom a deal he couldn't refuse. John would say yes, pocket the millions, and the Saints would become the Memphis Muggers or Phoenix Pickpockets.

Possible? Certainly. Probable? Unlikely. But Louisiana has stadium bonds to retire, just like Oakland. The Superdome needs the Saints. The Superdome also needs protection against franchise piracy.

Would the Saints really ever move? I posed the question to Eddie Jones, the club's president. Read his reply carefully.

"I don't think John (Mecom) would ever move the team," Jones said slowly, "No I don't think he would. Out of loyalty to the fans, out of pride. You know, though, money does strange things."

Jones is aware of the bill in Congress and is in favor of it. As he put it, "I want to make it clear that we are concerned with the availability of the loophole in our situation."

"In any city where there is fan support, there is always that remote possibility. With someone able to do it (move a franchise without league approval), an Al Davis, then it makes those kind of situations possible."

In June 1966, Sen. Russell Long of Louisiana spoke of the "orderly development and improvement" of pro football that was brought on by the merger of the American Football League with the NFL.

At that time Long offered these words of wisdom:

"It is important to note that the expansion to new cities will not be brought about at the sacrifice of franchises in cities which enjoy this sport now. All of the existing 24 franchises in both existing leagues will be maintained."

[From the San Diego Union, July 10, 1982]

THIRD AND GOAL

The public at large and the sports world share some significant stakes in the outcome of the struggle to decide whether the Oakland Raiders can be uprooted from their highly supportive community where they have been since 1960, and be transplanted to the Los Angeles Coliseum.

After the Los Angeles Rams moved to Anaheim some two year ago, Al Davis, the managing general partner of the Raiders, and Los Angeles leaders agreed to move the

Oakland team to the Coliseum. But not a single owner in the National Football League voted to permit this move in recognition that Oakland deserves to keep its professional football team after more than a decade of sellouts and unmatched support by Oakland fans.

Whereupon Mr. Davis and the Los Angeles Coliseum Commission sued the NFL for violation of the Sherman Antitrust Act, asking respectively $160 million and $53 million in damages. The first trial ended last year with a deadlocked jury. Then, in May of this year, came the shocker. In Los Angeles (which trial locale itself has raised eyebrows on the question of impartiality), a federal court jury of six women decided the Raiders have a right to move to Los Angeles despite the NFL's constitution and its vote to the contrary.

But before Mr. Davis could fold his tents in Oakland, that city and its football fans won an amazing reprieve. The California Supreme Court, in a bizarre ruling, said the city of Oakland may exercise its power of eminent domain and acquire the Raiders. The decision sends the Oakland case back to a Monterey County Superior Court for trial, which could require years.

This ruling may be shaky law, as legal scholars contend, but it is not without substantial justice. Mr. Davis is guilty of unconscionable conduct in suing the owners of the NFL whose revenue sharing has led the Raiders to compete successfully with franchises in much larger cities. And it's a rotten business for Mr. Davis to desert loyal fans who have brought him fame and fortune.

The proposed kidnapping of the Raiders from Oakland has prompted introduction of legislation in Congress which would protect Oakland and other cities that support their sports franchises.

Beyond the Oakland consideration, we have a parochial interest in this legislation. Such a law might defeat the effort by Los Angeles to snatch away our San Diego Clippers. We trust therefore that the legislation known as the Major League Sports Community Protecton Act of 1982 (H.R. 6467) will gain early passage. Otherwise there could be mounting chaos in professional sports across the country. An unscruplous franchise owner could skim off the cream in a given area for a few years, make unreasonable demands upon the city, and move on to greener pastures if they are not met.

[From the Baltimore Sun, July 9, 1982]

GET ON THE TEAM, SENATORS

The National Football League has a rule that an owner may not move a franchise without the votes of 24 of the 28 club owners. The owners believe that "stability" of franchises ought to be maintained, except where there is real economic distress. When the Oakland team decided that dispite years of capacity crowds there, it would move to the bigger, richer Los Angeles market, the owners voted "no." Oakland went to court contending this was a violation of anti-trust laws—and won.

The verdict is on appeal but, however it turns out, Congress should give the league some help. This could be either an anti-trust exemption insofar as such questions as franchise-jumping are concerned, or a law that merely requires the courts to interpret anti-trust laws differently when dealing with an entity like the NFL.

A professional football club is not your basic garden variety industry. It can't go it alone. Without a league making decisions for the good of all clubs—scheduling, national broadcast arrangements, etc.—no club could be in business. The law ought to recognize that.

Our concern is that the Colts might seek greener pastures someday if the league can't insist on owner loyalty. It would be devastating to this city to lose the Colts. The economic benefits the club brings in are substantial. The intangible benefits to civic spirit are so large as to be immeasurable.

A number of members of Congress recognize this. They support a bill that declares "the public has an interest in preserving the stability in the relationship between professional sport teams and the communities in which they operate" and allows the league to keep franchises put. It also would allow the league to continue its practice of revenue sharing. Under this, teams all receive approximately the same revenue each year. This promotes both meritocracy and democracy. It's a wise practice that organized baseball ought to adopt.

Representative Parren Mitchell was an early co-sponsor of this bill. Yesterday, Representative Barbara Mikulski became a co-sponsor. Good for them both. They (and Mayor Schaefer) have been urging Maryland's two senators to support the bill. So far to no avail. That legislation of such importance to Baltimore and Maryland would not have the support of Senator Paul Sarbanes and, more especially, of Senator Charles Mathias, whose committee would write the legislation, is troublesome. Come on, senators. Get on the team.

[From the Seattle Post-Intelligencer, July 28, 1982]

SPORTS FRANCHISES COMMUNITY ASSETS

The California Supreme Court ruling this week in connection with the controversy swirling around the proposed move to Los Angeles of the Oakland Raiders was good news for all National Football League cities including Seattle.

The court ruled that the City of Oakland has the right if it chooses to exercise it to acquire the Oakland football team under its power of eminent domain. That's the power granted to governmental bodies to acquire private property if there is an overriding public interest in its acquisition.

Although it's doubtful that Oakland will pursue ownership of the Raiders, the ruling did serve to recognize a community-wide, public interest in retention of sports franchises.

A bill that would recognize such community interests throughout the nation and give them the force of law is presently before Congress. Known as the "Major League Sports Community Protection Act of 1982," it was introduced last month by Rep. Fortney H. Stark (D-Calif.)

Stark's bill would do two things—require that sports franchise owners obtain approval of a majority of their league members before abandoning communities, and encourage the sharing among league members of revenues from televison and other revenue sources to assure successful operations of teams in smaller and mid-sized communities.

Stark argues persuasively that taxpayers often have financial stakes in stadium facilities, as King County taxpayers do in the Kingdome, and he adds: "These professional sports teams serve vital interests in their communities and represent invaluable community assets. The teams are a source of deep; and lasting pride to the metropolitan areas in which they are located."

Well, not all teams are sources of "deep and lasting pride" each and every season, but Stark's point is well taken. His bill deserves serious congressional consideration.

MAYORS BACKING OAKLAND

Minneapolis (AP)—Mayors of cities with National Football League teams and some who wish they had professional sports teams organized on Monday to push for passage of a bill that would make it harder for owners to move teams.

Twenty-seven mayors attending the annual convention of the U.S. Conference of Mayors signed a resolution supporting a bill introduced in the House last month and aimed at blocking efforts to move the Oakland Raiders to Los Angeles.

"Such legislation would be helpful in preventing professional sports teams from abandoning cities which have expended large sums of money in attracting such teams to these cities," the resolution said.

The resolution also says cities that make big investments in luring teams would be unable to recover their money if teams pull out prematurely, leaving empty stadiums and big municipal debts behind.

Among signers were Mayors Dianne Feinstein of San Francisco, Robert Martinez of Tampa, Richard Berkley of Kansas City, Ernest Morial of New Orleans, Richard Caligiari of Pittsburgh, Samuel Halloin of Green Bay, Wis., Jane Byrne of Chicago, Jack Evans of Dallas and Lionel Wilson of Oakland.

The resolution was drafted after a meeting of interested mayors sponsored by the city of Oakland.

"What happened to Oakland could really happen to you," said Ray Ward, manager of the Oakland Coliseum.

Raiders owner Al Davis won a recent court decision in California which would allow him to move the team to Los Angeles. Oakland and the league are appealing the decision.

The House bill sponsored by Rep. Fortney H. Stark, D-Calif., would grant the league right of approval over franchise transfers, something that was knocked down in the court ruling, and guarantee the right to continue the practice of sharing revenue among the league's 28 teams.

Participants at the meeting were provided kits by Oakland containing copies of the bill and suggested letters to send to members of Congress in support of the bill.

NATURAL GAS PRICING

Mr. JEPSEN. Mr. President, I rise to express my disappointment in this so-called lameduck session of the Congress. We have assembled here to address many serious problems facing our Nation. We have debated the highway and bridge situation at great length, I think too long. We have debated the MX missile, and we have debated appropriations which we should have passed a year ago.

However, Mr. President, we have not addressed a very serious problem which our Nation faces, and that causes me great concern. We have failed to address the serious and economically disrupting problem of natural gas pricing.

This is a problem which affects millions of Americans. Early in the debate

on the so-called gas tax bill, we briefly touched on this subject. And much to my disappointment, the Senate declined to proceed on proposed solutions by myself and the distinguished Senator from Kansas, Mrs. KASSEBAUM. It was pointed out in that brief debate that this is a serious problem affecting low-income and middle-income Americans. This problem is here today. The solution to the problem is needed today. As I have said before, Americans have a right to expect that their energy conservation efforts and the natural forces of the marketplace work properly and fairly in their behalf. That is clearly not the situation now.

I commend the Appropriations Committee for including funds in the continuing appropriations resolution for low-income energy assistance. This helps to address part of the problem. But the situation extends far beyond that area to include middle-class Americans. They are in need of some form of assistance also. In doing this, we are addressing not the natural gas problem, but rather, one of the results of that drastic problem. In effect, Congress has once again proposed a solution to the symptoms rather than a solution to the problem. Skyrocketing natural gas prices are the problem. If we take action to control this, low-income energy assistance will become less necessary.

Rest assured, Mr. President, this problem will not disappear. In fact, it will in all likelihood get worse. I am therefore putting my colleagues on notice that I intend to reintroduce my natural-gas-pricing legislation during the 98th Congress and seek its early consideration.

TRIBUTE TO SENATOR HARRISON SCHMITT OF NEW MEXICO

Mr. STENNIS. Mr. President, one of the greatest adventures initiated in our time is the exploration of space. I had the privilege of participating in the initiation of the space program and have continued to follow the effort with great interest. We all recognize how much the great achievements of this program have contributed to the advancement of our Nation in science and technology. It is widely recognized that we as a nation have prospered in a positive, material way because of the discoveries and inventions which came out of the space program. But this program's greatest achievement is the contribution to the Nation's wealth in human capital. The thousands of men and women who participated in this program are a tremendous storehouse of knowledge and experience which will continue to serve our Nation for generations to come.

At the forefront of the men and women in the space program are those selected to serve as astronauts. They are men and women of exceptional courage and ability who are bonded by an experience which only a few have shared. One of these men is Senator HARRISON SCHMITT of New Mexico. A man with great intellectual ability; a man with great energy; a man recognized for his tenacity and spirit. He has distinguished himself as an astronaut and as a Member of the Senate. He is a leader for our future.

His special interest and experience in energy and science has made his contribution to the Nation as a Member of the Senate especially timely. His counsel and advice was extremely valuable during a very difficult period in the Nation's history. He has served New Mexico and the Nation well. I am confident in his ability and know that he will continue to serve and distinguish himself as a leader and citizen of our Nation. Certainly he has my good wishes and I wish him well in every way.

MESSAGES FROM THE HOUSE

At 2:02 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 436. Concurrent resolution relating to the enrollment of House Joint Resolution 631.

At 4:20 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 6094) to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ROSTENKOWSKI, Mr. GIBBONS, and Mr. FRENZEL as managers of the conference on the part of the House.

The message also announced that the House insists upon its disagreement to the amendments of the Senate to the bill (H.R. 5002) to improve fishery conservation and management; asks a further conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. BIAGGI, Mr. ANDERSON, Mr. BREAUX, Mr. STUDDS, Mr. SNYDER, Mr. MCCLOSKEY, and Mr. PRITCHARD as managers of the conference on the part of the House.

The message further announced that the House has passed the following bills, without amendment:

S. 717. An act for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor;

S 1364. An act for the relief of Jose Ramon Beltron Aivenda Ostler; and

S. 1838. An act for the relief of Cesar Noel Jump.

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 135. Concurrent resolution instructing the Clerk to make corrections in the enrollment of H.R. 2330.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2481. An act for the relief of Cynthia Gambon Rabena; and

H.R. 5633. An act for the relief of Dana Bradford Baretto.

At 7:04 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House agrees to the amendment, in which it requests the concurrence of the Senate:

H.R. 3963. An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated;

H.R. 5161. An act to designate certain lands in the Monongahela National Forest, W. Va., as wilderness; and to designate management of certain lands for uses other than wilderness; and

H.R. 7154. An act to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes.

The message also announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 1978. An act to quiet title and possession with respect to a certain private land claim in Livingston Parish, La.

The message further announced that the House agrees to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 9, 10, 11, 12, and 14 to the bill (H.R. 7173) to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations; and that the House agrees to the amendments of the Senate numbered 8 and 13 to the bill, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House recedes from its amendment to the bill (S. 1501) entitled the "Educational Mining Act of 1982".

The message further announced that the House has passed the following bills and joint resolution, without amendment:

S. 2955. An act to establish the Cheaha Wilderness in Talladega National Forest, Ala.;

S. 3103. An act to amend section 1304(e) of title 5, United States Code; and

S.J. Res. 270. Joint resolution to designate 1983 as the "Bicentennial of Air and Space Flight."

The message also announced that the House agrees to the following concurrent resolution, without amendment:

S. Con. Res. 136. Concurrent resolution providing for printing a report by the Joint Committee on Taxation.

The message further announced that the House insists upon its amendment to the amendment of the Senate to the bill (H.R. 4566) to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ROSTENKOWSKI, Mr. GIBBONS, and Mr. FRENZEL as managers of the conference on the part of the House.

The message also announced that the House has passed the following bill and joint resolution, in which it requests the concurrence of the Senate:

H.R. 4746. An act for the relief of Kin Chi Eng Sims; and

H.J. Res. 635. Joint resolution establishing the dates for submission of the budget and economic report.

ENROLLED BILL SIGNED

The message further announced that the Speaker has signed the following enrolled bill:

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 9:40 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House agrees to the amendments of the Senate to the amendments of the House to the bill (S. 503) to authorize the purchase, sale, and exchange of lands by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation, N. Dak., and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes.

The message further announced that the House has passed the following bill and joint resolution, without amendment:

S. 3105. An act to modify the judicial districts of West Virginia, and for other purposes; and

S. J. Res. 258. Joint resolution to authorize and request the President to designate the month of December 1982 as "National Closed-Captioned Television Month."

The message also announced that the House insists upon its amendments to the amendments of the Senate to the bill (H.R. 3420) to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. JONES of North Carolina, Mr. BIAGGI, Mr. RODINO, Mr. SNYDER, and Mr. MCCLOSKEY as managers of the conference on the part of the House for title I of the amendment of the House to the bill; and appoints Mr. DINGELL, Mr. FLORIO, and Mr. LENT as managers of the conference on the part of the House for titles II through VIII of the amendment of the House to the bill and modifications committed to conference.

The message further announced that the House has passed the following joint resolution and concurrent resolution, in which it requests the concurrence of the Senate:

H.J. Res. 636. Joint resolution directing the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia; and

H. Con. Res. 437. Concurrent resolution expressing the sense of the Congress concerning the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia.

The message also announced that the House agree to the amendment of the Senate to the following bills:

H.R. 9. A bill to designate components of the National Wilderness Preservation System in the State of Florida; and

H.R. 7102. A bill to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor, and for other purposes; and

H.R. 7159. A bill to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH.

The message further announced that the House agrees to the amendments of the Senate to the bill (H.R. 3731) to amend the Act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission of the Court of Claims; and

H.R. 4001. A bill to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED

At 11:04 a.m. a message from the House announced that the House Speaker has signed the following enrolled joint resolution:

H.J. Res. 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year ending September 30, 1983, and for other purposes.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED BILLS SIGNED

At 11:40 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills:

S. 187. An act to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont., and to remove certain reservations from prior conveyances;

S. 3113. An act to make certain minor and technical amendments to the Job Training Partnership Act;

H.R. 1952. An act authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1983, 1984, and 1985, and for other purposes;

H.R. 5204. An act to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians;

H.R. 6588. An act to provide for Federal recognition of the Cow Creek Band of Umpqua Tribe of Indians, to institute for such tribe those Federal services provided to Indians who are recognized by the Federal Government and who receive such services because of the Federal trust responsibility, and for other purposes;

H.R. 6946. An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes;

H.R. 7144. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes;

H.R. 7155. An act to settle certain Indian land claims within the State of Florida, and for other purposes; and

H.R. 7377. An act to designate the Lakeview Lake project, Mountain Creek, Tex., as the "Joe Pool Lake."

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 11:53 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5002) to improve fishery conservation and management;

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 3809) to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel,

to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 438. Concurrent resolution providing for the sine die adjournment of the 97th Congress.

HOUSE BILLS REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2481. An act for the relief of Cynthia Gambon Rabena; to the Committee on the Judiciary.

H.R. 4746. An act for the relief of Kin Chi Eng Sims; to the Committee on the Judiciary.

H.R. 5633. An act for the relief of Dana Bradford Baretto; to the Committee on the Judiciary.

ENROLLED BILLS PRESENTED

The Secretary reported that on today, December 20, 1982, he had presented to the President of the United States the following enrolled bills:

S. 1340. An act to provide for the use and distribution of Clallam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes;

S. 2611. An act to amend the Peace Corps Act; and

S. 3073. An act to provide for the distributions within the U.S. Information Agency Film entitled "Dumas Malone: A Journey With Mr. Jefferson."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 1730. A bill entitled the "Freedom of Information Reform Act" (with supplemental views) (Rept. No. 97-690).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PRESSLER:

S. 3120. A bill to repeal employer reporting requirements with respect to tips; to the Committee on Finance.

By Mr. HART:

S. 3121. A bill entitled the "Joint Research and Development Ventures Act."; to the Committee on the Judiciary.

By Mr. JEPSEN:

S. 3122. A bill to prohibit the use of Federal financial assistance for political advocacy; to the Committee on Governmental Affairs.

By Mr. COHEN:

S. 3123. An bill to give priority to conserving the biological integrity and genetic diversity of naturally spawning populations of anadromous fish and to make improvements in the Fish and Wildlife Coordination Act; to the Committee on Commerce, Science, and Transportation.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BOSCHWITZ:

S. Res. 524. A resolution to express the sense of the Senate that the Secretary of Agriculture use his existing authorities to export surplus dairy products; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PRESSLER:

S. 3120. A bill to repeal employer reporting requirements with respect to tips; to the Committee on Finance.

REPEAL OF TIP INCOME REPORTING REQUIREMENTS

Mr. PRESSLER. Mr. President, today, I am introducing legislation to repeal the tip income reporting requirements contained in the Tax Equity and Fiscal Responsibility Act (TEFRA).

I opposed the tip income provisions during the passage of TEFRA. Since that time, I have only become more alarmed at the possible effects of this legislation.

As chairman of the Business, Trade, and Tourism Subcommittee, I believe that the burden on our tourism industry is simply too large. Tourism is the second most important industry in my home State of South Dakota, and during these difficult economic times no industry is in need of further regulation which would harm business.

In addition, I have heard from many waitresses in South Dakota. They have formed a grassroots movement to see this legislation repealed. They feel, and I believe justly, that they will suffer the most as a result of the tip income requirements.

These requirements presume that each and every waiter or waitress makes at least 8 percent in tips for his or her services. This may be a very conservative estimate by Washington standards, but in rural South Dakato it is nothing short of outrageous.

South Dakota waitresses have estimated that their tips amount closer to 4 percent. This means that South Dakato waitresses will be paying taxes on money they have not even made. I think that we would all agree that such a situation is not in the best interest of anyone. It is particularly punitive to a group of employees who are not making a great deal of money in any case.

The tip income legislation would also be a burden on small restaurants of South Dakota. For these small businesses, the reporting requirements will be particularly onerous. The language of the requirements stipulate that only "large restaurants" would be subject to this law. However, the law defines as "large" a restaurant having more than 10 employees. When you count up cooks, waiters, busboys, bartenders, et cetera, it is easy to see that 10 employees are very few and would in fact indicate a very small establishment.

I believe that increasing taxpayer compliance is a very commendable goal. However, tax laws regarding nonpayment of tip income prior to passage of TEFRA were already sufficient if enforcement was not. I would prefer to see more efficient efforts by the IRS to find those not reporting tip income rather than possibly taxing honest taxpayers for money they did not receive.

I ask unanimous consent that the text of my bill be printed in its entirely in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3120

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled, That Section 314 of the Tax Equity and Fiscal Responsibility Act of 1982 is hereby repealed.

By Mr. HART:

S. 3121. A bill entitled the "Joint Research and Development Ventures Act"; to the Committee on the Judiciary.

JOINT RESEARCH AND DEVELOPMENT VENTURES ACT

● Mr. HART. Mr. President, I am today introducing the Joint Ventures Research and Development Act with the cosponsorship of Senator CHARLES MATHIAS. This legislation is designed to encourage more efficient use of our Nation's research and development funds by facilitating the development of joint venture R&D activities.

This bill is needed because the high and increasing cost of many large-scale complex R&D projects is slowing our investment of pure, state-of-the-art research. Technology has been a key driving force behind the unprecedented growth the United States has enjoyed during this century. But today, we can no longer rely solely on intracompany R&D efforts to achieve continued pushing back the technological frontier. Indeed, the only way that many such projects can be afforded is by a pooling of resources and scientific and technical talent through R&D joint venture efforts.

Currently, such efforts are hindered or blocked altogether by the treble damages provision of the Antitrust Code and the great uncertainty with regard to the conditions under which legal R&D joint venture activities may be conducted. The result is that very

few business leaders dare commit their company to participating in an R&D joint venture.

PROVISIONS ON THE BILL

The primary purpose of this bill is to specify a set of objective criteria under which a R&D joint venture activity would be judged legal. This would greatly diminish the uncertainty and, hence, a company's perception of the risk involved in participating in such a venture.

The thrust of the legislation would be to clarify the explicit legality of joint ventures. But it would not restrict the ability to initiate a suit alleging antitrust violations of any kind against a joint R&D venture. All individuals participating in the venture would be subject to all the existing conditions of the antitrust laws. If, for example, the participants of a venture engaged in price fixing, those participants could be sued. The venture and its participants would be libel for treble damages of any antitrust activity that stems from the venture or its individual participants.

The bill would allow joint ventures to be formed through a self-certification process, monitored by the Department of Justice. A company found in violation of the qualifications set forth in this legislation would be ordered by Justice to either disband and discontinue activities or take corrective measures to bring the venture back within the confines of the qualifications.

The criteria for self-certification would include:

All projects would be of a pure research nature. No product development or design would be allowed.

All participants would have to pay equal shares of the cost associated with the project and would derive equal benefits.

Any company which wished to join the venture could not be excluded, with the exception of a company that accounted for 25 percent of the world market of its goods for any one of the 3 years preceding the venture and where their participation would bring the total world market share of all partners above 50 percent. This particular component of the present language may pose some potential problems with existing Antitrust Codes, and could be further clarified in debate on the legislation.

Notification of the venture would be made to the Department of Justice under section 553 of title 5 of the United States Code. The notification would include the names of all participants, description of the nature of the project, projected duration, explicit exposure of any agreements between partners with regard to the project, and a detailed statement of compliance with the qualifications as set forth in this legislation.

If new technologies or knowledge are developed through the joint venture, it would be required, upon completion of the project and when proper legal patents are secured, to sell the information at an acceptable and reasonable rate to other companies and businesses that did not directly participate in the project.

Based on my discussions with business leaders, I believe this kind of legislation is vitally needed as part of an overall strategy to enhance our economic vitality and ability to develop innovative technologies. The time has come to take action on this issue, and I hope that Congress will move swiftly to put into place one strategic element for our country's industrial revitalization.●

By Mr. JEPSEN:

S. 3122. A bill to prohibit the use of Federal financial assistance for political advocacy; to the Committee on Governmental Affairs.

FINANCIAL ASSISTANCE FOR POLITICAL ADVOCACY

● Mr. JEPSEN. Mr. President, I submit the attached bill, the "Tax Funded Advocacy Act of 1982," in order to bring a serious misuse of tax dollars to the attention of my colleagues for future debate. This bill may need some minor alterations but the principles of preventing the use of taxpayer dollars from advocating political philosophy is clear. By opening the forum for debate, I believe we can address this problem and prevent future misuse of the dollars that have been entrusted to us by our constituents.

In addition, I ask unanimous consent that the two attached articles, one from the Washington Post and one from the Washington Times, be included in the CONGRESSIONAL RECORD preceding the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3122

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Tax Funded Advocacy Act of 1982".

SEC. 2. The Congress finds that—

(1) whereas the Constitution and the Bill of Rights protect the rights of all citizens to be free from government financed propaganda, State religion, and the imposition of the views of one faction by the government, in whatever manner;

(2) whereas Thomas Jefferson, in the Virginia Declaration of Religious Liberty of 1777, said, "To compel a man to furnish funds for the propagation of ideas he disbelieves and abhors is sinful and tyrannical.";

(3) whereas the function of government under the Constitution is a limited power, restrained by the tenth amendment, to reside in the people and their local government, there is no need for the advocacy and speech of factions to be subsidized in any manner whatsoever by the Federal Government;

(4) whereas the first amendment protects the speech and ideas of all citizens, it is unconstitutional for the Federal Government to promote political factions with taxpayer dollars;

(5) whereas the separation of church and State forbid the mingling of subsidies which even indirectly contribute to the ideological purposes of sects and religions, the same doctrine commands the integrity of government can only be maintained with a similar policy in matters of secular culture, political parties, parapolitical organizations, by those trying to affect public policy by lobbying legislature, affecting public opinion on matters of government policy, supporting others with financial and political influence with government resources, and in any way furthering one ideology with the tax dollars extracted from taxpayers by the Federal Government; and

(6) wherefore the Congress of the United States finds that henceforth the policy of Federal Government will be one of abject neutrality in so far as political factions may attempt to derive their income and sustenance from the Federal Treasury, allowing none to use the powers of taxation for private ideologies, religious views or sects, in any form whatsoever.

SEC. 3. (a)(1) No Federal funds may be disbursed directly or indirectly by grant, (contract, loan, cooperative agreement, or by any similar means whatsoever,) to any person who engages in advocacy or who is allied (either by common officials, personnel, resources, or in any other way) to any organization which engages in advocacy.

(2) No funds in any form which are received from the United States or from one of its instrumentalities or agents, may be used for lobbying or advocacy.

(3) Only enterprises incorporated as nonprofit under Internal Revenue Service rules are covered by this Act.

(b) DEFINITIONS.—For the purposes of this Act—

(1) "Advocacy" includes, but is not limited to lobbying, travel, propaganda, union activities, training, networking, publication, dues paying, holding or attending conferences, and other activities intended in any way to influence public policy formation or to advance particular viewpoints with the Congress or any legislative body, administrative office or administrative individuals, litigation, or the general public.

(2) "Lobbying" means any activity to influence (with respect to legislation, regulations, executive pronouncements, judicial decisions, and all other pronouncements and decisions, formal and informal, which bear on matters of public policy) officers or employees of the executive, legislative, or judicial branches of either the Federal Government, of State or local government at any level. Moreover, any activity to procure legislative decision on matters of appropriated dollars which benefits the recipients is a violation of this statute.

(3) "Propaganda" includes any activity which would be reasonably expected to have the effect of influencing opinion in support of or in opposition to any question of public policy or organizational activity.

(4) "Training" means activities related to influencing public policy formation of the advancement of particular viewpoints, or any concerted action to further grass roots lobbying on matters of public policy or public issues.

(5) "Networking" includes activities intended to aggregate resources and further organizational cooperation in the context of

influencing public policy formation or advancing particular viewpoints.

(6) "Publication" means the preparation, production, and distribution of writings, films, radio, television, and telephone communications, books, pamphlets, journals, newsletters, newspapers, articles, public appearances, press interviews, and other communications related to public policy formation and/or the advancement of particular viewpoints on issues of public policy.

(7) "Dues paying" includes direct and indirect, cash and in kind, financial support or endorsement tendered to organization or individuals engaged in advocacy and includes the purchase, lease, or rental of services, products, publications, subscriptions, which either directly or indirectly are intended to subsidize the advancement of matters of public policy, and/or public opinion. No recipient of Federal dollars may launder funds or contribute them to any organization or individual which could not certify as to its own lack of advocacy and present intent to refrain from engaging in advocacy. Recipients of Federal funds from any intermediary are subject to all provisons of the Act.

(8) "Holding or attending conferences" includes, but is not limited to, participation in meetings, either in person or by electronic communications, which have as their purpose, in whole or in part advocacy as herein defined.

(9) "Union activities" include any direct or indirect assignment of human, material, or financial resources to aid or hinder union activity.

(10) "Travel" means any movement beyond a fifty-mile radius of a funded organization's established offices, using the organization's funds, when such movement relates in any way, directly or indirectly, to advocacy, training, propaganda, lobbying, networking, publication, conference attending, dues paying, or any of the other activities prohibited by this Act.

(11) Litigation includes class action suits or amicus curiae briefs. No legal fees may be paid from any government source whatsoever in excess of the wage rate paid to civil service lawyers for legal fees to any person receiving Federal funds as described herein.

(12) "Recipient" means any person who receives any funds, directly or indirectly by grant, loan, contract, or cooperative agreement administered by the Government of the United States, as defined in Section 3(a)(3).

SEC. 4. ENFORCEMENT.—

(1) All recipients of Federal funds by grant, contract, loan, or any other means shall certify to the granting agency, as a prior condition to consideration of their funding, that they do not presently and will not in the future engage in advocacy, as defined in this Act.

(2) All government officials, independent corporations, agents, or anyone disbursing Federal funds by grant contract, loan, cooperative agreement, or any similar means, shall be responsible for establishing, prior to any consideration of funding, that all applicants for Federal funds subject to their consideration, do not presently, and will not in the future engage in advocacy.

(3) In addition to an action entitled to be brought under this section, the United States or an appropriate instumentality thereof, shall have a civil cause of action against any person who has unlawfully expended, or is or has been in possession or control of monies expended by any person in violation of the provisions of this Act, and shall be entitled to recover an amount equal to three times the amount so expended, possessed, or controlled.

(4)(A) Whoever, being an officer or employee of the United States, or of any agency or other instrumentality thereof, or an officer or employee of any corporation chartered by the United States, or of any "recipient" (as defined in section (2 of this Act, intentionally violates any provision of this Act, shall be fined not more than $10,000 or imprisoned not more than six months, or both.

(B) Whoever, being an office or employee of the United States, any agency or other instrumentality thereof, or an officer or employee of any corporation chartered by the United States, or of any "recipient" (as defined in section (2 of the Act) negligently violates any provision of this Act shall, upon such a finding by the appropriate district court of the United States, be subject to such personnel action as his employer, in his sole discretion, shall determine to be appropriate.

(C) Whoever makes a material statement that he knows is false in connection with any certification submitted under this section shall be fined not more than $10,000, imprisoned not more than two years, or both.

(D) Any interested person shall have a civil cause of action on behalf of such person and on behalf of the United States or an appropriate instrumentality thereof, against any person violating the provisions of this Act in an appropriate district court of the United States, and shall be entitled to recover—

(a) actual damages, but not less than liquidated damages of $1,000 or of $100 per day for each day of violation, whichever is greater;

(b) in the case of a judgment entered on behalf of the United States or of any instrumentality thereof, three times the damages sustained by the United States or the instrumentality;

(c) such equitable relief as the court shall deem appropriate;

(d) in the case of a recipient, an order disbarring such recipient from direct or indirect receipt of any funds from the United States or any agency or instrumentality thereof;

(e) a reasonable attorney's fee and other investigation and litigation costs reasonably incurred;

(f) punitive damages; and

(g) in the case of an individual acting on behalf of the United States or an instrumentality thereof, an amount not to exceed 10 per centum of all moneys recovered on behalf of the United States or the instrumentality.

(5) Self certification by recipients with respect to noninvolvement in advocacy activity is required prior to any renewal or extension of contract, grant or loan, or any other provision of funds. Any intentional misrepresentation with respect to the self certification requirement shall constitute a felony, punishable by a fine up to $10,000 per offense, or a prison term not to exceed two years per offense.

(6) Prosecution for violation of this Act will extend to all employees of the Federal Government, federally chartered corporations, as well as officers and employees of recipient organizations.

(7) Whoever fails to comply with an order by the United States Department of Justice—

(A) to appear at a specified time and place as a witness in an official proceeding arising under the provisions of this Act;

(B) to remain at a specified place where he is to appear as a witness in an official proceeding arising under the provisions of this Act;

(C) to be sworn or to make an equivalent affirmation as a witness in an official proceeding arising under the provisions of this Act;

(D) to answer a question in the course of an official proceeding arising under the provisions of this Act, or to produce a record document, or other object material to such proceeding, shall be subject to a civil penalty not to exceed $10,000 for each violation. Any agency or instrumentality of the United States responsible for the disbursement of funds shall, as a condition of disbursing such funds—

(A) require that every recipient certify to such agency or instrumentality that such recipient is nor engaged in advocacy and will not engage in advocacy;

(B) require that every renewal or extension of Federal funds to any recipient contain certifications described in subsection (a) of this section;

(C) require that the officers, agents, and employees of such agency or instrumentality establish procedures necessary to guarantee that no recipient is engaged in or will engage in advocacy;

(D) require that all recipients submit such reports as the agency or instrumentality determines to be reasonably necessary to assure compliance with this Act;

(E) conduct such audits as are necessary to insure compliance with the provisions of this Act;

(F) require that any application for funds contain such information as the agency or instrumentality determines to be necessary to insure compliance with the provisions of this Act.

(8) Any violation of this statute shall be the basis of total disbarment of Federal benefits from any source or agreement whatsoever.

[From the Washington Post, Apr. 26, 1982]

FINANCING THE LEFT?

Is the federal government financing the left? Yes, says the April issue of Conservative Digest, published by New Right direct-mail king Richard Viguerie. "Cold bureaucrats and committed leftists," the magazine tells us, are "working hand-in-glove to achieve their political and social goals—using your tax dollars."

There is something to these charges. The magazine has its lists of foolish-sounding research projects. It seems to have come up with some examples of government subsidization of political advocacy—a business government certainly should not be in. And it is surely correct in suggesting that there are many buddy systems, of grant givers and grant recipients, spending tax dollars in ways many—perhaps most—taxpayers wouldn't like.

When you look in more detail at many of the charges Conservative Digest makes, however, you get a different and much less objectionable picture than its headlines suggest. Many of the organizations that receive the largest sums receive them as contractors performing services successive congresses and presidents have said they wanted performed and for which they have consistently appropriated money. Examples are the monies the government pays Planned Parenthood for providing family planning services and the National Council of Senior Citizens for administering "senior aide" employment programs. These organizations

take care to separate these government-financed activities from the programs they finance with money they raise from private sources; they are audited regularly and in enough depth that, in the case of Planned Parenthood, there have been charges of harassment by audit.

The programs they administer have received political scrutiny and have survived largely intact. Reagan administration proposals last year to merge family planning and "Senior aide" programs into block grants were rejected by Congress; administration proposals this year to "zero" them out have not been accepted. Congress has voted to continue the legal services program. Conservative Digest's quarrel, then, is not so much with federal bureaucrats who defy the law—though there may be a few of them—as it is with Congress, which declines to change the law. The "funding of the left" is not a public scandal but a political issue.

As a political issue it is, of course, debatable. We can expect that the Reagan administration will "defund" some organizations its supporters dislike. And on a broader level, we agree that there is something disturbing about organizations that strongly advocate positions many sensible people find politically or morally repugnant, acting at the same time as administrators of government programs. It is easy to believe that the advocacy groups' employees will sometimes proselytize the program's beneficiaries in ways we would consider inappropriate (though not unheard of) for a civil servant. Advocacy organizations might also want to ask themselves whether they risk compromising their own purposes by accepting government money, and whether they want to assume the inevitable risk that it might be withdrawn suddenly for legitimate political reasons. This is not an area you should rush into with a set of hard and fast rules. But Conservative Digest, though it does not prove all it claims, raises some difficult questions that thoughtful people of right, left and center should ponder.

[From the Washington Times, Nov. 11, 1982]

FUNDING THE LEFT WITH TAX MONEY

(By Allan Brownfeld)

Although most Americans do not know it, one reason for our high tax burden is the fact that the U.S. government has, for many years, been in the business of subsidizing private organizations which seek to impose their own radical political agenda upon the country.

Consider some of the uses being made of our tax dollars:

New Ways Ministries of Mount Rainier, Maryland received $18,416 to study "the coming out process and coping strategies of gay women" from the Department of Health and Human Services (HHS). In 1979-80, HHS gave $167,724 to the California State University at San Francisco's Center for Homosexual Education, Evaluation and Research to study "civil liberties and sexual orientation."

Planned Parenthood, which urges abortion on demand and abortion referrals for teenagers without telling their parents, received $12.8 million in tax dollars—more than half of its budget. Planned Parenthood affiliates operated 36 abortion clinics and performed 75,000 abortions. In addition, Planned Parenthood used taxpayers' funds to advocate sex education in the public schools based on the Swedish model, preaching value-free "reproductive freedom."

In a pamphlet, entitled The Great Orgasm Robbery published by Rocky Mountain Planned Parenthood in 1977 it is written: "Sex is fun and joyful . . . and it comes in all types and styles, all of which are OK. Do what gives pleasure and enjoy what gives pleasure. Don't rob yourself of joy by focusing on old-fashioned ideas."

VISTA gave $792,156 to the Youth Project, a self-described "tax-exempt foundation which supports a wide range of grassroots social change efforts." The Youth Project gave cash and technical support to the Nevada Uranium Project, which opposes nuclear power and the basing of the MX missile in Nevada. It gave funds to the radical American Indian Movement's Freedom for Survival Group and to the California Indian Land Acquisition Project, which seeks to reclaim large portions of California for Indian ownership. This group, using taxpayers' funds, has sued to place land in San Diego and Yosemite National Park under Indian control.

In 1981, the Department of Education gave PUSH, headed by the Rev. Jesse Jackson, $656,644. President Reagan's then-Assistant Education Secretary Vincent Reed called PUSH's accounting system unstable and "not adequate to safeguard assets." Two studies by the department had severely criticized PUSH's handling of federal funds. "This does not add up to a program," said one study. While receiving federal funds, Jesse Jackson has engaged in partisan political activity. He was a major participant in the anti-Reagan Solidarity Day and is lobbying for more food stamps, more welfare, and less defense spending.

Legal Services is giving tax dollars to 325 private legal groups that are accountable only to themselves. The governor of Pennsylvania blames Community Legal Services of Philadelphia for helping to cause violence at Graterford prison in October and November, 1981. Thirty persons were held hostage by a three-time killer, who was returned to the general prison system as a result of a 1975 Legal Services suit. "Never again should government permit 'cause' groups . . . to place the purported rights of vicious criminals above the safety of law officers," said Gov. Richard Thornburgh. This was a typical case of Legal Services working against not for the public interest.

The anti defense lobby is largely being supported by taxpayer funds. The American Friends Service Committee, which urges unilateral American disarmament, received a total of $596,092 in federal funding during 1980. The National Council of Churches received $435,775 from the Department of Labor in 1980. The Marxist-led U.S. Student Association received $107,630 from the Department of Education.

It is high time that such funding of partisan political organizations be brought to an end. To use our tax dollars to finance social and political ideas with which we may disagree is an abuse of government power. This was understood by Thomas Jefferson who, in the Virginia Declaration of Religious Liberty of 1777, declared: "To compel a man to furnish funds for the propagation of ideas he disbelieves and abhors is sinful and tyrannical."

If the National Council of Churches and Planned Parenthood and Operation PUSH and the others want to advance their opinions they have every right in a free society to do so. They should solicit funds from those who agree with their views and engage in the free and open debate of the marketplace of ideas. They have no right, however, to use government funds in this pursuit.

President Reagan once seemed to understand all of this. Under his administration, however, such radical groups continue to be funded by the government. The Legal Services Corporation, which has been fomenting radical litigation with taxpayers' money for years, will not be abolished by President Reagan but will be continued.

Rather than end the subsidization of radical political groups, David Stockman, the director of the Office of Management and Budget, issued a memorandum on April 26 to the heads of U.S. departments and agencies. Discussing this memorandum. Howard Phillips, chairman of Conservative Caucus and former head of O.E.O., declared: "The memorandum indicates that the administration will continue to award grants and contracts . . . Thus, political advocacy groups may continue to receive . . . awards. This decision by David Stockman fails to deal with the civil liberties concerns of millions of Americans who voted for conservative government in the 1980 election and are outraged to see federal grants and contracts go, as a matter of administrative discretion, to liberal activist groups which oppose the basic public policy changes for which Ronald Reagan compaigned."

Why does this administration continue to finance those whose goal for the future of American is radically different from the stated principles and purposes for which it was elected? The president has it within his power to end the funding of the left whenever he resolves to do so. If he does not, he will find his enemies increasingly strong and vocal—using tax dollars to fuel their increasing destructive efforts.●

By Mr. COHEN:

S. 3123. An act to give priority to conserving the biological integrity and genetic diversity of naturally spawning populations of anadromous fish and to make improvements in the Fish and Wildlife Coordination Act; to the Committee on Commerce, Science, and Transportation.

ANADROMOUS FISH CONSERVATION AND PROTECTION ACT OF 1982

● Mr. COHEN. Mr. President, today I am introducing a bill that would conserve the biological integrity and genetic diversity of the naturally spawning populations of anadromous fish that originate in the rivers and streams of the United States.

The purpose of this legislation is to focus national policy on the importance of our naturally spawning anadromous fish stocks and on the necessity of assuring that the health and viability of this resource is sustained. By providing language that would coordinate several existing fishery-related laws, this bill would accomplish that purpose.

The House Committee on Merchant Marine and Fisheries' report on the Anadromous Fish Conservation Act authorization for fiscal year 1983, explains that the U.S. commercial harvest of salmon generated between $700 million and $1 billion to the U.S. economy in 1980. The recreational fishery for salmon and steelhead trout gener-

ated $73 million in the States of Oregon and Washington alone.

In Maine, our Atlantic Sea-Run Salmon Commission estimates that one pound of sport-caught salmon brings between $50 and $100 to the economy. Since 1947, when this commission was created to enhance the salmon population by the Maine State Legislature, the amount of watershed habitat where salmon can be found has increased from 462 square miles to 9,000 square miles.

Today, the annual run of salmon returning to Maine rivers and streams is estimated at over 7,000 fish. This represents an increase in the salmon population of over 300 percent since the commission began their conservation efforts in 1948 when a population of 1,500 fish was estimated.

The most important tool that the Atlantic Sea-Run Salmon Commission has employed in realizing these successes is the salmon hatchery program. The responsibilities for this effort are shared between the Commission and the U.S. Fish and Wildlife Service.

Hatchery fish provided by the Fish and Wildlife Service are offspring of the wild stocks that have been returning to Maine's rivers and streams for centuries. As I have described, this population is thriving. The purpose of the bill that I am introducing today is to make sure that the integrity of all of this country's anadromous fish resources is protected by similarly responsible hatchery programs whether they are run by government or by private industry.

Mr. President, the salmon, like all species of anadromous fish, is a unique creature, and one that is specially adapted to survive a particularly rigorous existence.

In Maine, due in great part to the success of the Salmon Commission, thousands of Atlantic Salmon return each fall to our rivers and streams to spawn. These remarkable fish have endured many perils during their adult lives at sea. These include predatory birds, seals, commercial fishermen, and fly fishermen who crowd the banks of the mouths of the rivers where the returning fish, after migrations of thousands of miles, mill about before beginning their arduous passage upstream to the places of their births.

After their return, spawning begins. The spawning process takes about 2 weeks. Afterwards, in smaller rivers and streams, many adult salmon return to the sea; in larger rivers, the spent adults usually over winter in lakes or in deadwater areas before making their way offshore for another year. These returning fish have gone a long time without feeding and are in very poor physical condition. In most years, only about 1 in 10 fish return to spawn for a second time, even fewer return to spawn for a third time.

Mortalities at sea are very high. An average female salmon may produce 71,000 eggs. Of these, 100 live to return to sea as adults after spending 2 to 3 years in the freshwater streams where they were hatched, and only 2 or 3 of these fish return to spawn. Under the best possible situation, salmon have only a 0.5 percent chance of survival to maturity.

Anadromous fish need to be protected against the introduction of disease and genetic inefficiences which may result from the irresponsible release of inferior hatchery fish or fish which originated outside of the wild stock's habitat. By introducing inferior individuals into the breeding stock, the long run result would be the decline, and perhaps the ultimate extinction of this valuable national resource.

If we do not insure that a coordinated system of regulation is provided to protect our naturally occuring anadromous fish populations, all of the efforts that have been made to protect and enhance these fish stocks would become a tragic waste of time and money.

The problems of our anadromous fishery resource are problems that require a broad range of international, Federal, State, and private coordination and expertise.

The Atlantic salmon, for instance, migrates from Connecticut to Greenland and back. These fish, which originate in U.S. rivers and streams, are intensely harvested by Canadian and Greenland fishermen. It has long been a goal of Federal fisheries management that stocks such as these should be managed throughout their range to provide for their conservation.

Mr. President, in September, the Senate voted to accept the Convention for the Conservation of Salmon in the North Atlantic Ocean which provides for international management of salmon and will be a useful conservation tool. The Atlantic Salmon Convention Act of 1982, which would provide for U.S. participation under the Salmon Treaty, is ready for Senate approval and I urge the leadership to bring the bill to the floor for a vote, before the end of this session, so that the long sought goal of management of this important resource, throughout its range, can be attained.

I am encouraged that the salmon treaty will work for the international protection of this remarkable fish. I am also encouraged that the proposed amendments to the Magnuson Fishery Conservation and Management Act, (MFCMA) which are found in S. 2450 will emphasize the importance of our anadromous fishery resources by requiring that all the fisheries management plans, developed by any of the eight regional management councils, "assess and specify the effect which * * * the plan will have on the stocks of naturally spawning anadromous fish in the region."

Mr. President, S. 2450 is also ready for Senate consideration and I urge the leadership to bring this bill to the floor for a vote before the end of this session.

The legislation that I am introducing today would go a step further than S. 2450 goes, regarding the MFCMA, by requiring the regional councils, when considering management plans that would impact upon anadromous fish stocks, to conserve and protect the biological integrity of, and genetic diversity represented by, each naturally spawning stock of anadromous fish. The bill is also designed to provide this conservation consideration under the—

Salmon and Steelhead Conservation and Enhancement Act of 1980,

Anadromous Fish Conservation Act,

Dingell-Johnson Fish Restoration Act,

Commercial Fisheries Research and Development Act of 1964,

Fish and Wildlife Coordination Act,

Columbia River Initiative, and

Pacific Northwest Electric Power Planning and Conservation Act.

Mr. President, a responsible, coordinated management effort is essential if this country is to protect, and enhance, our valuable anadromous fish resource. We are making some progress toward this goal but greater consideration of the complexities involved in such an effort is necessary. The legislation that I am introducing today would require the consideration of the biological and genetic complexities of the hatchery-rearing of anadromous fish to be used in enhancing our naturally occurring wild stocks. I believe that this is an essential part of responsible fishery management.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3123

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Anadromous Fish Conservation and Protection Act of 1982".

FINDINGS AND PURPOSE

SEC. 2. (a) Congress finds that—

(1) through homing instincts and natural selection, discrete populations of anadromous fish have evolved genetic diversity that ensures the greatest likelihood of their survival under the particular conditions of their home environments;

(2) the biological integrity and genetic diversity of individual populations of fish that have adapted to different environments are essential to the survival of the species to which they belong;

(3) anadromous fish stocks produced by hatchery systems are frequently characterized by marked fluctuations in abundance and are maintained only through constant

human intervention, high energy requirements, and high economic costs;

(4) artificial propagation of large numbers of hatchery fish produced from narrow genetic base has created populations that are vulnerable to disease, competition, predation, fluctuations in physical environments, and changes in budget priorities;

(5) in the past, indiscriminate releases of hatchery-produced fish into streams have adversely affected the survival of naturally spawning populations; and

(6) the most practical and economical means of preserving a species is to protect those inherited traits that assure the biological integrity and maintain the genetic diversity of individual naturally spawning populations of fish.

(b) The purpose of this Act is to provide for the conservation and protection of naturally spawning populations that have adapted to the unique and diverse environments into which they are born by preserving their biological integrity and genetic diversity.

MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT

SEC. 3. (a) Section 303 (a) of the Magnuson Fishery Conservation and Management Act of 1976 (Public Law 94-265; 16 U.S.C. 1853 (a)) is amended by adding at the end thereof the following: "With respect to a fishery having species of anadromous fish, excluding lampreys, the conservation and management measures of the fishery management plan shall be designed to conserve and protect the biological integrity of, and genetic diversity represented by, each naturally spawning population of such species originating in a specific river or lake. Such measures shall include standards for managing spawning escapements for each such population and the management of harvests consistent with such standards throughout its migratory range. Such measures shall not apply to a naturally spawning population if the affected Federal, State, and tribal managers agree that such population should be so exempt, notify the appropriate Council in writing of such agreement and the reasons for it, and include such reasons in the plan. For purposes of this subsection, the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces; the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

SALMON AND STEELHEAD CONSERVATION AND ENHANCEMENT ACT OF 1980

SEC. 4. (a) Section 120(d)(2) of the Salmon and Steelhead Conservation and Enhancement Act of 1980 (Public Law 96-561; 16 U.S.C. 3321(d)(2)) is amended to read as follows—

"(2) conserve and protect the naturally spawning populations of salmon and steelhead and their biological integrity and genetic diversity by such means as may be necessary, including, but not limited to, establishing policies for managing spawning escapements for each naturally spawning population and minimizing significant adverse interaction, including competition, between naturally spawning and artificially propagating stocks;".

(b) Section 120(d) of such Act is further amended by adding at the end thereof the following: "For purposes of clause (2), the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces; the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

ANADROMOUS FISH CONSERVATION ACT

SEC. 5. Subsection (a) of the first section of the Anadromous Fish Conservation Act (Public Law 92-362; 16 U.S.C. 757a(a)) is amended by adding immediately after the first sentence the following new sentence: "Such agreements shall include as their primary goal the conservation and protection of the naturally spawning populations of such fish and their biological integrity and genetic diversity. For purposes of the preceding sentence, the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces; the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

DINGELL-JOHNSON FISH RESTORATION ACT

SEC. 6. Section 2 of the Act of August 9, 1957 (commonly known as the "Dingell-Johnson Act" (64 Stat. 431; 16 U.S.C. 777a)) is amended by adding at the end thereof the following: "Each fish restoration and management project applicable to anadromous fish shall be designed to conserve and protect the naturally spawning populations of such fish and their biological integrity and genetic diversity. For purposes of the preceding sentence, the term 'anadromous' refers to those species of fish, excluding lampreys, that are born in freshwater lakes or streams, migrate to the sea of the Great Lakes, and then return as adults to the lakes or streams of their birth to reproduce; the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces; the term 'nationally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

COMMERCIAL FISHERIES RESEARCH AND DEVELOPMENT ACT OF 1964

SEC. 7. (a) Section 6(a) of the Commercial Fisheries Research and Development Act of 1964 (Public Law 86-797; 16 U.S.C. 779d(a)) is amended by adding at the end thereof the following new sentence: "No project involving anadromous fish may be approved by the Secretary under this section unless the project includes appropriate measures to conserve and protect the naturally spawning populations of such fish and their biological integrity and genetic diversity.".

(b) Section 6(a) of such Act is further amended by inserting "(1)" after "(a)" and adding at the end thereof the following new paragraph:

"(2) For purposes of this subsection—

"(A) the term 'anadromous' refers to those species of fish, excluding lampreys, that are born in freshwater lakes or streams, migrate to the sea or the Great Lakes, and then return as adults to the lakes or streams of their birth to reproduce;

"(B) the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces;

"(C) the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces;

"(D) the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and

"(E) the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

SIKES ACT

SEC. 8. Section 205(6) of the Act of September 15, 1960 (commonly known as the Sikes Act (Public Law 96-797; 16 U.S.C. 670k (6))) is amended by adding immediately before the last sentence the following new sentence: "Such methods and procedures shall also, in the case of anadromous fish, conserve and protect the naturally spawning populations of such fish and their biological integrity and genetic diversity. For purposes of the preceding sentence, the term 'anadromous' refers to those species of fish, excluding lampreys, that are born in freshwater lakes or streams, migrate to the sea or the Great Lakes, and then return as adults to the lakes or streams of their birth to reproduce; the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genet-

ic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reporduces; the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

FISH AND WILDLIFE COORDINATION ACT

SEC. 9. The Fish and Wildlife Coordination Act (48 Stat. 401; 16 U.S.C. 561 et seq.) is amended—

(1) in section 2(b) (16 U.S.C. 662(b)) by adding immediately before the last sentence the following new sentence: "In any case in which the impoundment, diversion, or other control or modification as set forth in subsection (a), affects anadromous fish, such report and recommendations shall give priority to the conservation and protection of naturally spawning populations of anadromous fish and their biological integrity and genetic diversity.";

(2) in section 3(a) (16 U.S.C. 663(a)) by adding at the end thereof the following new sentence: "In any case in which such impoundment, diversion, or other control or modification affects anadromous fish, such conservation, maintenance, and management shall give priority to the conservation and protection of naturally spawning populations of such fish and their biological integrity and genetic diversity."; and

(3) in section 8 (62 Stat. 1080; 16 U.S.C. 666(b) by adding at the end thereof the following: "As used in sections 2 and 3 of this Act, the term 'anadromous' refers to those species of fish, excluding lampreys, that are born in freshwater lakes or streams, migrate to the sea or the Great Lakes, and then return as adults to the lakes or streams of their birth to reproduce; the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces; the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

COLUMBIA RIVER BASIN

SEC. 10. Section 2 of the Act of May 11, 1938 (52 Stat. 345; 16 U.S.C. 756) is amended by adding at the end thereof the following new sentences: "The Secretary, in carrying out these provisions, shall include such measures as are necessary to conserve and protect the naturally spawning populations of anadromous fish in the Columbia River and their biological integrity and genetic diversity. For purposes of the preceding sentence the term 'anadromous' refers to those species of fish, excluding lampreys, that are born in freshwater lakes or streams, migrate to the sea, and then return as adults to the lakes or streams of their birth to reproduce; the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces; the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".

PACIFIC NORTHWEST ELECTRIC POWER PLANNING AND CONSERVATION ACT

SEC. 11. Section 4 of the Pacific Northwest Electric Power Planning and Conservation Act (Public Law 96-501; 16 U.S.C. 839b) is amended—

(1) in subsection (e)(2) by adding at the end thereof the following: "Such plan shall ensure the conservation and protection of the naturally spawning populations of anadromous fish in the rivers and lakes in the region and also their biological integrity and genetic diversity. For purposes of the preceding sentence, the term 'anadromous' refers to those species of fish, excluding lampreys, that are born in freshwater lakes or streams, migrate to the sea, and then return as adults to the lakes or streams of their birth to reproduce; the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces: the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.";

(2) in subsection (h)(6)(E)—

(A) by striking out "and" at the end of clause (i);

(B) by striking out the period at the end of clause (ii) and inserting in lieu thereof "; and"; and

(C) by adding at the end thereof the following new clause:

"(iii) conserve and protect the naturally spawning populations of such fish and their biological integrity and genetic diversity."; and

(3) in subsection (h)(6) by adding at the end thereof the following: "For purposes of this paragraph, the term 'anadromous' refers to those species of fish, excluding lampreys, that are born in freshwater lakes of streams, migrate to the sea, and then return as adults to the lakes or streams of their birth to reproduce; the term 'biological integrity' means the genetic characteristics of a given population that ensure the greatest likelihood of their survival under the specific environmental conditions associated with the location where the population reproduces; the term 'genetic diversity' means the genetic differences between populations in a collection of genetically distinct populations of a species, where each population has become adapted to the specific environmental conditions associated with the location where it reproduces; the term 'naturally spawning' refers to fish which, regardless of ancestry, spawn on a natural substrate without the need for significant human intervention; and the term 'population' means a group of fish of the same species that spawn at approximately the same time of year in the same lake or stream or part thereof.".●

ADDITIONAL COSPONSORS

S. 1939

At the request of Mr. BAKER, the name of the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 1939, a bill to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal Diseases.

S. 2642

At the request of Mr. WALLOP, the name of the Senator from Alabama (Mr. HEFLIN) was added as a cosponsor of S. 2642, a bill to amend the Internal Revenue Code of 1954 to provide for the establishment of reserves for mining land reclamation and for the deduction of amounts added to such reserves.

S. 2792

At the request of Mr. HOLLINGS, the names of the Senator from New Jersey (Mr. BRADLEY), and the Senator from New York (Mr. MOYNIHAN) were added as cosponsors of S. 2792, a bill to establish an ocean and coastal development impact assistance fund and to require the Secretary of Commerce to provide to States national ocean and coastal development and assistance block grants from moneys in the fund, and for other purposes.

S. 3048

At the request of Mr. THURMOND, the names of the Senator from New Jersey (Mr. BRADLEY), the Senator from Georgia (Mr. NUNN), the Senator from South Dakota (Mr. PRESSLER), and the Senator from Idaho (Mr. SYMMS) were added as cosponsors of S. 3048, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic and other products with intent to cause personal injury, death, or other harm.

SENATE RESOLUTION 516

At the request of Mr. GRASSLEY, the names of the Senator from Kentucky (Mr. FORD), the Senator from Wyoming (Mr. WALLOP), the Senator from South Dakota (Mr. PRESSLER), the Senator from Ohio (Mr. METZENBAUM), the Senator from South Dakota (Mr. ABDNOR), and the Senator from Virginia (Mr. WARNER) were added as cosponsors of Senate Resolution 516, a resolution expressing the sense of the

Senate on urging Presidential action pursuant to section 103 of the Revenue Act of 1971, 26 United States Code, section 48(A)(7)(D) to disqualify certain Japanese-manufactured, numerically controlled machine tools from the U.S. investment tax credit.

AMENDMENT NO. 4983

At the request of Mr. THURMOND, his name was added as a cosponsor of amendment No. 4983 proposed to H.R. 3809, a bill to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low-level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes.

AMENDMENT NO. 4998

At the request of Mr. WARNER, his name was added as a cosponsor of amendment No. 4998 proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

AMENDMENT NO. 5011

At the request of Mr. RIEGLE, the names of the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of amendment No. 5011 proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

At the request of Mr. CRANSTON, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of amendment No. 5011 proposed to H.R. 6211, supra.

AMENDMENT NO 5190

At the request of Mr. BUMPERS, the names of the Senator from Texas (Mr. BENTSEN), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of amendment No. 5190 proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

AMENDMENT NO. 5613

At the request of Mr. SASSER, his name was added as a cosponsor of amendment No. 5613 proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

UP AMENDMENT NO. 1579

At the request of Mr. PROXMIRE, the name of the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of UP amendment No. 1579 proposed to H.R. 3809, a bill to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low-level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes.

SENATE RESOLUTION 524—RELATING TO EXPORT OF SURPLUS DAIRY PRODUCTS

Mr. BAKER (for Mr. BOSCHWITZ) submitted the following resolution; which was considered and agreed to:

S. RES. 524

Whereas the Secretary of Agriculture has been given the authority under the Agriculture and Food Act of 1981 to export surplus Commodity Credit Corporation dairy stocks and has been urged to use that authority in both the Omnibus Budget Reconciliation Act of 1982 and the Agriculture Appropriations Act for Fiscal Year 1983; and

Whereas there is a tremendous surplus of dairy products, including butter, cheese, and nonfat dry milk in the United States being maintained at a considerable cost to the United States taxpayer; and

Whereas there currently is known demand for dairy products in the world market; Now, therefore, be it

Resolved, That the Secretary of Agriculture is strongly encouraged to use those authorities available to him to move surplus dariy products into the international market.

NOTICES OF HEARINGS

COMMITTEE MEETING NOTICE

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will conduct its first meeting of the 98th Congress on Tuesday, January 25, 1983, at 9:30 a.m., in room 301, Russell. The committee has on its agenda both legislative and administrative business, including the adoption of the committee's rules of procedure, the selection of members for the Joint Committee on Printing and the Joint Committee on the Library, the consideration of the committee's 1983 funding resolution, the authorization of tests of computer equipment in Senators' offices, and the consideration of any other pending business.

For further information regarding this meeting, please contact Carole Blessington of the Rules Committee staff on x40278.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, the Committee on Rules and Administration will hold hearings early in the 98th Congress on congressional and Presidential campaign finance laws. At 9:30 a.m., on Wednesday and Thursday, January 26 and 27, 1983, in room 301, Russell, the committee will hear testimony from witnesses on the operation and possible modification of current campaign finance laws governing congressional and Presidential campaigns.

These hearings are being held early in the session so that the committee may forward any recommendations for legislative changes to the Senate by mid-1983. If legislative changes are to be made, they should occur well in advance of the 1984 elections.

Proposals for changes have come from many quarters. The Campaign Finance Study Group of Harvard's Institute of Politics, in its report to the Rules Committee, has recommended a series of changes in the Presidential campaign finance laws. Copies of the report may be obtained from the Rules Committee (224-3449).

Let me briefly outline other areas in which the committee will invite the comments and recommendations of witnesses:

First. The desirability of adjusting either individual or political committee contribution limits;

Second. The consequences of removing the State-by-State expenditure limits;

Third. The desirability of permitting increased political party spending on behalf of the party's candidate; and

Fourth. The need for clarification and revision of the public funding provisions that apply to third party and independent presidential candidates.

Senators and other interested parties are invited to present testimony, or to submit written statements for the hearing record, concerning revisions of the campaign finance laws. For further information, please contact the elections staff of the Rules Committee at 224-3449.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, on Wednesday, February 2, 1983, at 9:30 a.m., in room 301, Russell, the Committee on Rules and Administration will meet to receive testimony from Senators and other interested parties on mass mailings and the use of postal patron mail.

On September 13, 1982, I brought to the attention of the Senate the high cost of the newsletters that Senators send to their constituents. To recap the central fact, it is estimated that Senators' mass mailings, most of which are newsletters, will cost the American taxpayer $37 million this year. Most of that amount, $31 million, is for postage.

On December 20, 1982, I shared some additional information on this subject and some ideas for reform. Anyone who would like to read my re-

marks will find them beginning on page S11332 in the September 13 CONGRESSIONAL RECORD and in the RECORD for December 20, 1982.

I hope Senators and other interested parties will ponder this difficult matter and give the Committee on Rules and Administration the full benefit of their reflections at the hearings.

Senators and other individuals who wish to testify or to submit a statement for the record should contact Ron Hicks of the Rules Committee staff at 224-9078.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, the Committee on Rules and Administration has set aside Tuesday, Wednesday, and Thursday, February 15, 16, and 17, 1983, to receive testimony from committee chairmen and ranking minority members on their committees' 1983 funding resolutions. These hearings will begin at 9:30 a.m., in room 301, Russell.

Mr. President, I ask unanimous consent that the letter my distinguished colleague, Senator FORD, the ranking member on the Rules Committee, and I sent to all committee chairmen on December 17, 1982, be inserted in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON RULES AND ADMINISTRATION,
Washington, D.C., December 17, 1982.

DEAR MR. CHAIRMAN: Pursuant to paragraph 9 of rule XXVI of the Standing Rules of the Senate, each Senate committee (excluding the Select Committee on Ethics) must report to the Senate not later than January 31 a resolution authorizing it to make expenditures to defray its expenses during the period March 1, 1983, through February 29, 1984.

To assist committee in preparing and expediting their request for funds, the Committee on Rules and Administration has issued a revised edition of its committee print entitled "Expenditure Authorizations and Requirements for Senate Committees." Copies of that publication, the standard budget form, and a questionnaire are included herewith. Additional copies of each are obtainable from the Rules Committee office.

The committee print will provide you with detailed information on the requirements for expenditure authorizations in effect at the beginning of the 1983 funding year. Included in the print are sample resolutions, a sample budget form, regulations in respect to procurement of consultants and the training of professional staff members, and rates of compensation for staffs of Senate committees which, pursuant to P. L. 97-276 (the Continuing Appropriations Resolution, H.J. Res. 599) and the Order of the President Pro Tempore of October 1, 1982, were effective October 1, 1982.

If a committee thinks it will be requesting the services of consultants or the training of professional staff during the course of the year, the committee should include authority for such spending in its resolution. A committee may not exceed the specific dollar authority provided for in the resolution for consultants or training, but it may utilize unexpended funds within the limitations of that authority for other authorized purposes. It should be noted that, even if authority for consultants and training of professional staff is included in the resolution, requests for individual consultants or training of professional staff must be approved in advance by the Rules Committee.

Since every effort has been made to include sufficient details within the text of the enclosed document, we will stress here only the most important considerations in respect to expenditure authorizations which should be borne in mind by Members of the Senate and their committee personnel who will be involved with the funding procedure.

Fiscal year—The fiscal year for expenditure authorizations will be the 12-month period from March 1, 1983, through February 29, 1984, except for the Select Committee on Indian Affairs whose fiscal year is March 1, 1983, through January 2, 1984, when it is due to expire.

Budgets, supporting materials, and questionnaires—(1) Committee budgets should be prepared on the standard forms obtainable from the Rules Committee office; (2) an original and 30 legible duplicate copies of the budget, supporting materials, and questionnaire should be submitted to the Rules Committee not later than the date committees report their respective resolutions to the Senate, but no later than January 31; (3) the supporting letter should be signed jointly by the Chairman and the Ranking Minority Member of the committee; and (4) the questionnaire should be signed jointly by the Chairman and the Ranking Minority Member or by the staff director and the minority staff director unless the minority does not concur with the information supplied therein.

It should be noted that the Rules Committee will not schedule a committee for hearings on its authorization resolution before the resolution has been reported to the Senate and its budget, supporting materials, and completed questionnaire have been submitted to this committee.

In the line item "cost-of-living salary increase (5 mos. @———percent)" on page 1 of the budget form, the Committee on Rules and Administration suggests that all committees use 4 percent as the rate of increase. The Committee makes the suggestion only because of the fairness of all committees to use the same percentage when compiling their budgets. It should be noted that it is not the Rules Committee's intention to estimate what percentage of cost-of-living salary increase will be granted October 1, 1983—if any.

Medicare—On the committee budget forms for the coming year a new item has been added under the heading "Administrative Expenses: Agency Contribution To:". The new item reads: "Medicare (1.3 percent of the first $35,700 of each salary)". This is the maximum amount to be withheld for those employees who earn $35,700 or more. For those employees who earn less than $35,700, the maximum deduction would be 1.3 percent of their annual salary.

Rooms—On the questionnaire please list the rooms the committee will be occupying in 1983 if they have been assigned by the Rules Committee. If not, list the rooms the committee currently occupies.

We remind all Senate committee chairmen that the 1983 expenditure authorization resolutions must be reported not later than January 31, 1983. Committees are urged to submit their budgets, supporting materials, and completed questionnaires to the Rules Committee at the earliest possible date, since it is the Committee's intention to schedule these resolutions as one of its first orders of business in 1983.

The cooperation of all involved Members and staff personnel in expediting this procedure will be deeply appreciated. If the Members or staff of the Committee on Rules and Administration can be of any assistance, please do not hesitate to call upon us.

With all best wishes,
Sincerely,

WENDELL H. FORD,
Ranking Minority Member.
CHARLES MCC. MATHIAS, JR.,
Chairman.

COMMITTEE MEETING NOTICE, COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, the markup of Senate Committees' 1983 funding resolutions and the consideration of proposed regulations for Senate mass mailings will comprise the agenda for the Rules Committee's meeting on Tuesday, February 22, 1983, at 9:30 a.m., in room 301, Russell.

For further information concerning this meeting contact Rules Committee staff on x40278.

ADDITIONAL STATEMENTS

THE A-10: A VITAL WEAPON SYSTEM

● Mr. D'AMATO. Mr. President, I rise to respond to some comments made by the senior Senator from Texas regarding the A-10 aircraft program. This aircraft has been the victim of changes in signals by two administrations and by a failure to support foreign military sales efforts in its behalf.

The fact remains that the A-10 is the best close air support aircraft in the world. It is also the most reliable and maintainable combat aircraft in the Air Force inventory. The Air Force itself has testified to those points.

There is no question that the Air Force can use the 20 aircraft in the defense appropriations bill. With these 20 aircraft, the Air Force will have a total inventory of 727 A-10's. That number of A-10's will not allow the Air Force to maintain its A-10 units at full strength beyond 1987. Simple peacetime attrition will reduce the combat capability of the A-10 units just as Soviet armored strength becomes dominant in Europe.

I believe the Air Force should purchase enough A-10's to match the 825 aircraft objective contained in Secretary Brown's last 5-year defense plan. If the Air Force completed that buy, the A-10 force structure would remain at full strength through 1993. I strongly believe that choice would be the wisest policy the Air Force could follow.

Why is this important? After all, the Army and the Air Force are now boosting deep strike air interdiction. Their "air-land battle" concept calls for complex, expensive new aircraft—F-15E's or F-16E's—which can carry large bomb loads deep into an enemy's rear areas. If this new concept is correct, why do we need to keep our close air support force strong?

The answer is simple "Air-land battle" is directed at an attacking force's second echelon—those enemy units at least 72 hours' travel away from the front lines. Our analysis has shown that if that second group of enemy forces arrives intact and on time at the battlefront, they would probably overwhelm our defenders, forcing us to resort to a nuclear option. We must avoid that if we can. In theory, we can use long-range attack forces to slow down and disrupt that second echelon, so our forces have time to resort to maneuver warfare. Using maneuver warfare, we can then attack on the ground, destroying the enemy's first echelon and throwing back their second echelon.

That is a good concept. But we must not forget that the condition of the second echelon will not matter if we lose the battle with the first echelon. If we do not have the power to stop the first wave of attacking armor, all of our efforts to stop the second wave are irrelevant.

That is why the A-10 force is so critically important. Only the A-10 force, working with army attack helicopters, can be moved quickly from place to place to destroy enemy armored spearheads. Given Soviet air power and the lack of depth on the western side of the German border, our ground reserves cannot maneuver to block attacking spearheads. If we weaken our A-10 force in this decade, we risk being forced to move to a nuclear option to stop the attacking first wave of enemy units.

Opponents of the A-10 will say that the aircraft is not fast enough to survive along the battlefront. They claim that Soviet air defenses will prevent both the A-10 and attack helicopters from performing their antiarmor missions. Then, they talk in favor of buying many more F-16's and using them for close air support.

Those arguments ignore some basic facts. First, no aircraft has been built which can outrun a surface-to-air missile. If a F-16 is able to make a bombing run and then zoom into the sky, it will zoom right into the radars of tens of Soviet antiaircraft systems. It will zoom right up into the range of hundreds of antiaircraft guns and missiles. It will zoom to its destruction with blinding speed.

In contrast, the slow, simple, maneuverable A-10 is able to follow the contours of the ground. Its great agility allows it to fly around hills, in radar shadow from the majority of the enemy's antiaircraft weapons. Those weapons which can detect the aircraft may not be able to lock on and fire before it dodges behind a ridge or a tree line. Finally, if they do fire on an A-10, the A-10 is a much tougher, more survivable aircraft than an F-16.

The A-10's vital areas are armored. The cockpit is located within a titanium bathtub. Critical flight controls are redundant and protected. The A-10 is a twin engine airplane, with the engines carried in nacelles on opposite sides of the fusilage. If one engine is hit and destroyed, the aircraft can continue to fly using the other engine. The aircraft is so designed that if it does suffer battle damage, it can be quickly and easily repaired.

Contrast, if you will, those characteristics with the characteristics of those systems the opponents of the A-10 would advocate. They tout the F-16 as the answer to close air support. That aircraft is unarmored, has a single engine, and was not designed to operate close to the ground. If its single engine is knocked out, it does not come home. If it comes home with battle damage, it is not as simple or easy to repair.

If one of those fragile F-16's is lost, you have lost an airplane with a program acquisition unit cost of $21.02 million, according to the September 30, 1982, Selected Acquisition Report. If you lose an A-10, you have lost an aircraft with a program acquisition unit cost of $7.39 million according to the March 31, 1982, Selected Acquisition Report, the most recent report available on A-10 costs.

Thus, in the A-10, you have a cost-effective, very reliable, easy to maintain aircraft which does a vital job as part of our national defense. Its characteristics are appealing to those of you who have been pressing for the purchase of simple weapons in larger numbers which we know work.

Let me now return to the issue of cost. Some of my colleagues may have received a letter quoting a cost of $17 million each for A-10's. If you divide 20 aircraft into $357.3 million, you get that sort of an answer. However, as I said a moment ago, the program acquisition unit cost for this aircraft, which is the standard way of measuring the cost of a system, is $7.39 million. In anyone's eyes, that has to be a bargain.

At this time, I want to express my sincere thanks to those who have supported my efforts to sustain the A-10 program. I believe the test of time will prove that we have acted wisely and in the best interests of our national defense. I intend to press for authorization for those funds which have been appropriated in the continuing resolution.●

LEGAL SERVICES

● Mr. SARBANES. Mr. President, in recent weeks newspapers across the country have carried accounts of the administration's efforts to dismantle Legal Services Corporation and to thwart the Senate's execution of its advice and consent responsibilities with respect to the Legal Services Corporation. To those accounts have now been added others reporting the increase in the budget of the Corporation's Board of Directors from $113,721 to $273,731 in the period from October 1, 1981 through September 30 of this year, the increase in board appointees consulting fees from $72,029 to $156,201 over the January-November, 1982 period, during which members collecting the fees have continued to serve on recess appointments. This information was presented to the Subcommittee on Courts, Civil Liberties, and the Administration of Justice of the House Judiciary Committee at a hearing held Tuesday, December 14.

Mr. President, there are several obvious and deplorable inconsistencies evident here: Between the administration's often-expressed desire to dismantle the office which makes legal counsel available to those who could not otherwise afford it and its willingness to give a free hand, financially speaking, to Legal Services appointees; between the administration's concern with budget cuts, notably with cuts in important and effective domestic programs from childhood immunization to housing, and its indifference to the dramatic escalation in consulting fees which the President's own appointees are drawing from the Corporation. The actions of the Administration with respect to the Legal Services Corporation and the actions of the administration's appointees to the Legal Services Board have been widely reported and also condemned, and I ask that these newspaper stories and editorials be printed in the RECORD:

The material follows:

[From the New York Times, Dec. 19, 1982]

POLITIC AND PERKS REVISE REAGAN FIGHT ON LEGAL AID

(By Stuart Taylor, Jr.)

WASHINGTON.—The people President Reagan appointed to tame the Legal Services Corporation bowed out last week in a blaze of recriminations. After seeing their nominations for full terms on the board of directors unceremoniously dumped by the President, they were tongue-lashed by a Congressional panel, harangued by a hostile crowd at their last public meeting and temporarily blocked at the door by a stooped old black woman as they tried to go into closed session.

The main legacy of the factionalized Reagan board, even some of the President's supporters say, was a public-relations debacle, an appearance of flailing away relentlessly at a program for the poor that has broad Congressional and public support. But Mr. Reagan's feud with legal aid lawyers is also a paradigm of the ideological

hostility that divides the President and his allies from people they consider troublemakers.

Mr. Reagan's view is that legal aid lawyers have subverted the democratic process by using unelected Federal judges to promote social change. The corporation, created by Congress in 1974 to take the program out of politics, distributes Federal funds to locally administered programs that provide free legal aid to indigents in noncriminal cases. Its 4,300 attorneys spend most of their time handling the routine legal problems of individual poor people—evictions from public housing, family disputes, wage claims, bankruptices, installment contracts. But they also bring class-action lawsuits challenging governmental actions such as welfare cutoffs without hearings and disciplinary rules in jails.

The parting blast of William J. Olson, a Reagan appointee, typifies the White House view. He declared the program riddled with "abuses and rampant illegality" and a "waste of the taxpayers' money through the funding of the left." Mr. Olson and others on the 11-member parttime board were on the receiving end too last week, in Congress, for paying themselves five-figure "consulting fees" ($19,726 in Mr. Olson's case) for less than a year of part-time work. There were also attacks on the full-time president the departing directors hired, Donald P. Bogard, a conservative Republican corporate lawyer whose experience with legal aid lawyers comes from fighting them in court. He hedged his bets by negotiating a contract with a year's severance pay at his full $57,500 salary and membership in the private club of his choice.

CRITICIZED COMING AND GOING

"It sounds an awful lot like the first thing they do was to go and put all four feet and a snout in the trough," Representative M. Caldwell Butler, a Virginia Republican who is no friend of "the left," said at the oversight hearing conducted by the Subcommittee on Courts, Civil Liberties and the Administration of Justice. The President found some of his appointees disappointing in a different way. Not "philosophically in tune with his policies," is the way White House spokesman Larry Speakes put it in announcing the withdrawal of all nine nominees for full terms. Asked to explain, he said "I could look back at some (Presidential) campaign rhetoric."

The history is more instructive. When he was Governor of California in 1970, Mr. Reagan and Edwin Meese 3d, a top adviser then and now, tried but failed to cut off the funding of a legal aid group that kept suing the state and winning. Charges of improper activities were dismissed as unfounded and irresponsible by a panel of state jurists appointed by the Nixon Administration. Mr. Reagan renewed the attack soon after he became President in 1981, asking Congress to abolish the Legal Services Corporation and to eliminate direct Federal legal aid funding. Congress refused, though the program's budget was cut $80 million, to $241 million. So the President tried to exert control by appointing conservatives to interim terms on the board while Congress was in recess.

But some of these members agreed that while legal aid lawyers had sometimes used tax dollars improperly for politically motivated activities, the program was basically sound and needed only modest reforms. The leader of this group was Howard H. Dana Jr., a longtime Reagan supporter who chaired his 1980 campaign in Maine. Mr. Dana became embroiled in bitter disputes with Mr. Olson and William F. Harvey, the board chairman, who advocated drastic restrictions including a virtual prohibition of class actions against Government units.

The Senate made it clear earlier this month that it would approve Mr. Dana and five other nominees, but not Mr. Harvey, Mr. Olson and George E. Paras, who was criticized for calling a California judge who used to be a legal aid lawyer a "professional Mexican." The President's response was withdrawing his nominations.

That leaves only two members, who were appointed more recently on an interim basis. Presumably, the rest of the seats could be filled with a new batch of recess appointees. But this time, Mr. Speakes said, Mr. Reagan will be more careful to find "fine, upstanding citizens who believe like he believes." Friday, Harold S. Sawyer of Michigan and six other Republican Congressmen wrote Mr. Reagan, suggesting that this time he heed their recommendations. "We are alarmed," they said, "by the growing public perception of this Administration's and our party's lack of sensitivity for the poor and the elderly, which is exacerbated by the recent actions of the Legal Services Corporation's board." Mr. Sawyer also said he would ask the Justice Department to recover the consulting fees paid to Mr. Reagan's appointees.

[From the Washington Post, Dec. 16, 1982]

SABOTAGING LEGAL SERVICES

Even opponents of the administration's efforts to abolish the Legal Services Corporation must give the administration credit for ingenuity. The strategic attacks and counterattacks, the creative use of the recess appointment power and the bold regulatory assaults at the last minute illustrate the determination and resolve of the corporation's foes. But while these efforts have confused and frustrated backers of legal services for the poor, they have not succeeded in convincing Congress or the public that we can do without this program.

The courts have guaranteed free legal services to the indigent in criminal, but not civil cases. Until the creation of the corporation in 1974, attorneys to represent those who could not afford to pay were provided by volunteers, often through local legal aid societies. The corporation was created to supplement this fragile and fragmented system with a permanent corps of federally paid lawyers, based in neighborhoods, who could assist the poor. In some areas of the country, most notably California, the legal services lawyers went far beyond providing standard individual legal services and brought class action suits on behalf of the poor against businesses and state and local governments. The man who was then governor of California—and feeling the brunt of much of this activity—is now President of the United States, and he wants to abolish the Legal Services Corporation altogether.

Because Congress will not go along, and stubbornly keeps appropriating money for the corporation's work, another lateral attack was devised: load up the corporation's board with those who can be counted on to subvert its work. That's what the President thought he had done, but last week he withdrew eight nominations—the board has 11 members—that have not yet been confirmed by the Senate and indicated some of them would be replaced by individuals who are even more zealous in opposition to the program. The President can make a new set of recess appointments as soon as Congress adjourns, and these people will continue to serve, even though unconfirmed by the Senate, until the next Congress adjourns. Thus, even a board that has not a single member who has been confirmed can continue to make decisions binding on the corporation.

This week four proposed regulations will come before the current lame-duck board of directors. They would, if adopted, prohibit class actions, the most efficient and effective means of vindicating the rights of large numbers of citizens, and severely hamper the work of poverty lawyers in a number of other ways.

Perhaps it is asking too much of such an avowed foe of the Legal Services program, but the president could mend some fences with Congress and help the poor in a time when they need all the help they can get by putting an end to all this fooling around with the program. Accept the fact that Congress will not let it die, find some people who are conservatives but who see merit in it, and put them in charge. There is broad support in Congress for some changes that would clarify the rules for class actions and set guidelines for this important work. But there is also a determination to save the program, because it is truly worth saving. Killing it by bits and pieces, regulations and recess appointees just won't work. There's a real need for poverty lawyers out there in a country savaged by recession and unemployment, and all who are concerned about the fate of those who suffer will not let the program die.

As a footnote to the above, we give you a quotation from Rep. Caldwell Butler, the Virginia Republican who is retiring this year: "It sounds like the first thing they did was put all four feet and a snout in the trough."

Mr. Butler was speaking of the administration's appointees to the Legal Services board and the consulting fees they have billed the government. Chairman-designate William Harvey, for example, has submitted $25,028 in consulting bills for the first 11 months of this year. Overall, the 11-member board collected $156,201 in consulting fees through November. Members are entitled, we should add, to reimbursement for expenses and consulting fees for the time they work. But previous members billed the government far, far less.

Do these men have to give the impression that they're getting rich in the process of cutting programs for the poor?

[From the Washington Post, Dec. 16, 1982]

LEGAL SERVICES HEAD'S CONTRACT SWEET

(By Mary Thornton and Juan Williams)

The new president of the Legal Services Corp. has negotiated a contract with his former law professor, now the chairman of the board, that gives the president extensive government-financed fringe benefits, including paid membership "in a private club of [his] choosing."

The board of the corporation was attacked earlier this week for collecting large consulting fees. As criticism mounted yesterday President Reagan said it is "highly unfortunate" that his appointees have been billing the corporation—the federal program of legal assistance to the poor—at more than twice the rate of that of any previous board.

"We think the expenses are high," said White House spokesman Larry Speakes. "We'd like to know why."

Speakes said White House counselor Edwin Meese III had asked the Office of Management and Budget to review the matter.

However, Meese told NBC Tuesday night, "I think if people have been working or have special responsibilities where they donate a lot of time and the law provides consulting fees. . . then they should take consulting fees."

Meanwhile, documents obtained by The Washington Post indicate that Donald P. Bogard, who started Monday as president of the Legal Services Corp., has been given substantial benefits in addition to his $57,500 annual salary.

The contract was negotiated by board chairman William F. Harvey, a former law professor of Bogard, without the participation of the other 10 board members, board members said.

Besides the club membership, the contract contains a severance clause that would entitle Bogard to a full year's pay, benefits and expenses if he were fired.

In addition, since Bogard's family prefers not to move to Washington until the end of the school year, the corporation will pay an unlimited amount for his food and lodging, plus two trips month to Indianapolis until June 15. Round-trip, tourist-class air fair to Indianapolis is $350.

Bogard said yesterday that private club membership has been standard in the contracts of previous Legal Service presidents.

Asked if he will join a club, he said, "I haven't thought about it." Bogard also said he had no comment on Reagan's statement.

Bogard, 41, is an Indianapolis lawyer who spent eight years in the Indiana attorney general's office and then moved to Stokely-Van Camp Inc., where he defended the firm against lawsuits brought by Legal Services Corp. attorneys on behalf of migrant farmworkers.

On Oct. 29, the Legal Services Corp. board voted to authorize a three-man committee of Harvey, board member Howard Dana, and acting president Clint Lyons to negotiate Bogard's contract. Instead, Harvey negotiated it himself, board members said.

Rep. Barney Frank (D-Mass.), a member of the House Judiciary oversight subcommittee, said, "I think that was clearly a violation. * * * The terms of that contract were negotiated improperly—in violation of an explicit vote of the board."

Reagan has twice tried to persuade Congress to eliminate all funding for the Legal Services Corp., saying that the private bar would handle these cases at no charge and at no cost to the government. He named the board members only after Congress rejected his efforts to eliminate the program.

Meanwhile, the corporation has been operating on a reduced budget—25 percent below 1980.

The board is scheduled to meet today to consider changes in regulations to limit the kind of cases that Legal Services attorneys may bring.

According to Legal Services records, Reagan's board members charged consulting fees of $29 an hour, totaling $156,201 for their part-time work for the first 11 months of the year, more than twice the $72,029 that the previous board charged for all of 1981.

Speakes said yesterday that the White House was not aware of the fees until Tuesday, when the matter came up in a House hearing. He said Reagan "expressed the view this morning that he believes it to be highly unfortunate that expenses for the board have apparently doubled over the past year, and it is his hope that future expenses could be reduced to an absolute minimum."

In another matter affecting the corporation, U.S. District Court Judge Norma Holloway Johnson yesterday refused to block Friday's scheduled Legal Services board meeting. A group of former board members had sought to prevent the meeting on grounds that Reagan has withdrawn the nominations of nine recess appointees to the board.

But Johnson said that if the Senate's rights to confirm the appointees "are being abridged . . . there is no reason why the Senate cannot file suit on its own behalf."

Moreover, she said, the president's withdrawal of the nominations does not affect the validity of the recess appointments, which will expire when the lame-duck session of Congress ends.

INQUIRY BEGINS INTO FEES PAID LEGAL SERVICES BOARD

(By Francis X. Clines)

WASHINGTON.—The White House began an inquiry today into reports that President Reagan's appointees to the Legal Services Corporation have been paying themselves five-figure consulting fees while services to the poor were being cut.

Mr. Reagan's spokesman quoted him as saying it was "highly unfortunate" that expenses for the board had practically doubled over last year. And the White House spokesman, Larry Speakes, said that Edwin Meese 3d, the President's counselor whose duties include acting as legal services liaison, had asked the Office of Management and Budget "to assemble the facts."

Mr. Speakes was asked whether the White House's concern was over the higher fees and expenses submitted by some appointees, or over what one Congressman termed the spectacle of supposed legal service reformers putting "all four feet and a snout into the trough."

"A little of both," Mr. Speakes replied. "They're both basically the same: One, that they're getting a lot of money, the other that they're getting a lot of money.

Appointees to the 11-member corporation board perform part-time services in overseeing Government-financed legal services for the poor. According to records presented Tuesday at a Congressional oversight hearing, $244,096 in the fees and reimbursement for various expenses has been charged by the board so far this year, at least twice as much as any previous board's annual total.

Mr. Meese said in an interview that he expected to hear from budget examiners in the next day or two, and would decide what to do based on their report.

"This is the first we've heard about it," said Mr. Meese, who added that one possible reason for the increase was that "conceivably, they're busier and hold more meetings."

At the White House briefing, a questioner noted that all 11 board members has been appointed by Mr. Reagan. "That's true," Mr. Speakes said, "but he's also indicated what they can do with our nominations." This was a reference Mr. Reagan's action last week in withdrawing the names of the appointees amid resistence by many members of Congress to his attempts to abolish or restrict the legal services program.

William F. Harvey, the board's chairman, who received consulting fees of $25,028, was reimbursed for such expenses as $55.85 for two days of local taxi rides, according to Congressional sources, and $221 a day for time spent in driving back and forth from Indianapolis. Mr. Harvey, a law professor, called the basic consulting fee of $29 an hour as "small sums for a very large amount of work."

Mr. Speakes stressed that the corporation was independent and said, "There's a limit to what we can demand of this board." The Congressional hearing showed expense records indicating Mr. Harvey had made 72 phone calls in a seven-month period to the White House, including 30 to Mr. Meese's office.

Mr. Meese said the calls probably were related to the attempts to obtain Congressional confirmation of the appointees. He denied the charges of critics that the Reagan Administration, frustrated in its attempt to abolish the program, had kept tight control over the program through its appointees.

LEGAL SERVICES BOARD MEMBERS CRITICIZED ON FEES

(By Stuart Taylor Jr.)

WASHINGTON, December 14.—President Reagan's appointees to the board of the Legal Services Corporation were criticized at a Congressional hearing today for paying themselves five-figure consulting fees at a time when the corporation's services to its poor clients have been slashed.

"I must tell you that it has a bad appearance," Representative M. Caldwell Butler of Virginia said as William F. Harvey and William J. Olson of the unpaid corporation board testified. They have received "consulting fees" of $25,028 and $19,725, respectively, from the Government since Mr. Reagan put them on the board of the independent Federal corporation Dec. 31. Mr. Harvey is the chairman and Mr. Olsen a member of the board.

"I'm a Republican and we bring in these Republicans to take charge of this corporation in an effort to reform it," Mr. Butler said, "and it sounds an awful lot like the first thing they do was to go and put all four feet and a snout into the trough."

Mr. Harvey, a professor and former dean at Indiana University Law School, defended the consulting fees of $29 an hour, or $221 a day, for the 11 board members as "small sums for a very large amount of work."

All of the board members combined have charged the corporation for a total of $156,201 in consulting fees since Jan. 1, and $87,896 additional for expenses such as travel to and from meetings and food and lodging while on board business, according to corporation records.

The corporation's regulations authorize such payments, and the board allocates funds for them in the corporation's overall budget.

Mr. Olson said the appointees, who continue with their own careers while serving on the board, had spent long days learning their jobs and seeking to reform the program, which he, Mr. Harvey and other conservatives say was used in the past by legal aid lawyers to pursue a leftist political agenda.

Mr. Olson, a Washington lawyer, said that the consulting fees were far less than he normally billed private clients.

The exchange came in an oversight hearing into the troubled legal program before the House Subcommittee on Courts, Civil Liberties and Administration of Justice.

The corporation distributes Federal funds to locally administered programs around the country that provide legal aid to poor people in civil cases.

Mr. Reagan filled all 11 board positions on an interim basis in Congresssional recesses, after Congress rebuffed his efforts to abolish the program.

He also nominated eight of the interim members and one other man for full terms on the board. But last week he withdrew the nominations after it became clear that the Senate was ready to confirm six, but not Mr. Harvey and Mr. Olson.

Mr. Harvey and Mr. Olson have called for severe restrictions on the activities of legal aid lawyers, including a virtual prohibition on the bringing of class action suits against Government units.

Sources close to the board said the White House had been pleased with their performance but not with that of other members.

The total of $244,096 in consulting fees and expenses for board members since January is small in relation to the corporation's $241 million total budget.

But Representative Harold S. Sawyer, Republican of Michigan, said at the hearing that "it seems kind of generous" for people in charge of providing free legal services to the poor.

In other testimony today, Donald P. Bogard, who began his $57,500 job as the corporation's new full-time president Monday, said he had an "absolute commitment" to continue the program, but was noncommittal about changes.

The board is scheduled to meet Thursday and Friday to consider proposed restrictions on class actions and other activities by legal aid lawyers.

[From the Washington Post, Dec. 15, 1982]

LEGAL SERVICE APPOINTEES GET FAT FEES

(By Mary Thornton)

President Reagan's appointees to the board of the Legal Service Corp., the program that provides free legal help to the poor, have been collecting large consulting fees for their part-time jobs, at least twice as large as those paid to any previous board in the program's history.

"I must tell you that it has a bad appearance," Rep. M. Caldwell Butler (R-Va.) told a congressional oversight hearing yesterday. "I'm a Republican, and we bring in Republicans to reform [the program], and it sounds a lot like the first thing they did was put all four feet and a snout in the trough."

Rep. Harold S. Sawyer (R-Mich.) said, "It really offends me that you people are doing this." He noted that board Chairman William F. Harvey submitted consulting bills for $25,028 in the first 11 months of this year.

"Here the board members are making a substantial amount of money for just a part-time thing," he said. "I know there are top-flight lawyers in the U.S. . . . who would devote pro bono [free] time without taking this kind of money out of the program." Sawyer added that the president of the American Bar Association serves a one-year term which is virtually full-time with no payment besides expenses.

Documents provided by Legal Services to the House Judiciary subcommittee on oversight indicate that the 11-member Reagan board collected $156,201 in consulting fees in the first 11 months of 1982, compared to $72,029 for the previous board in a year.

In fact, the overall budget for the board of directors has grown from $113,721 on Sept. 30, 1981, under the old board, to $273,731 on the same day this year, according to Legal Services Corp. figures.

Since the program was created in 1975, directors have been entitled to reimbursement for expenses and to a consulting fee for the time they work.

But in most cases those fees have been small. Last year, for example, former board chairman William McCalpin, who was appointed by President Carter, collected $4,704 in consulting fees.

William Olson, a Reagan board member who testified yesterday, rejected a suggestion by Butler that the $221-a-day consulting fee be limited, suggesting that this board may be working harder than previous ones.

Olson, 33, a Washington lawyer, collected $19,721 in consulting fees, but he said he considers his work on the board to be "pro bono work" because the $29-an-hour consulting fee is less than he earns at his law firm.

Reagan twice has tried unsuccessfully to persuade Congress to abolish Legal Services.

Last week, he withdrew all his formal nominations for the board when he received word from the Senate that neither Harvey nor Olson would be confirmed.

The board has been serving all year in recess appointment that will expire when Congress adjourns for the year, possibly by the end of this week.

Legal Services payment records obtained by the Washington Post indicate that Harvey, who does not like to travel on airplanes, frequently billed the corporation at the $221-a-day rate for his driving time. Under Legal Services guidelines, board members are allowed to charge as consultants for the time they spend traveling.

In some cases, the 615-mile trip each way from Indianapolis to Washington was billed for two days in each direction, in addition to automobile expenses, lodging expenses and meals on the trips.

Harvey also had some substantial expenses during his trips on official business.

On a trip to Washington in late October and early November for a two-day board meeting and related business, Harvey was reimbursed for $194.22 in postal expenses and $55.85 in taxi expenses.

He tried to charge the program for his four nights at the Watergate Hotel at 131.80 a night, but the corporation paid only $69.78 a night.

On another trip in May in which he spend five nights in Washington, Harvey spent $147.05 on taxis and $63 on long-distance phone calls. On a six-day trip in March, he collected on a long-distance phone bill of $118.28, in addition to other travel expenses.

Harvey, who did not return telephone calls yesterday, is not the only board member with large consulting fees or expenses.

Daniel Rathbun, 23, an under-graduate student who was added to the board by Reagan in late October, collected $1,032.07, not including his travel expenses, by working for 35 hours over six days.

Another board member, Clarence McKee, has flown first-clas several times.

He said yesterday that he needs the larger seats because he suffers from sciatica, a back condition, and that he had submitted letters from his doctor to the board to justify the expense.

A source at Legal Services said yesterday that the doctor's note was not turned in until last week, after Congress requested the travel records. McKee collected $15,757 in consulting fees.

[From the New York Times, Dec. 13, 1982]

INSULT TO THE POOR, AND THE CONSTITUTION

Not content with abusing the poor by trying to gut their legal services program, President Reagan is extending the insult to the United States Senate. His sudden withdrawal of all his nominations for the Legal Services Corporation's board of directors brings chaos to the organization and cynically frustrates the Senate's ability to protect it with its advise-and-consent power. The maneuver is a gross abuse of the President's authority to make so-called recess appointments.

The Constitution lets Presidents fill vacancies during Senate recesses to keep the Government running, on the understanding that those so appointed will be duly nominated and subjected to the confirmation process when the Senate reconvenes. Mr. Reagan, unable to persuade Congress to scrap Legal Services altogether, has installed recess appointees who aim to cripple the program.

The leaders of the wrecking operation are William Harvey, a law professor who is chairman of the legal services board, and William Olson, a former officer of the Young Americans for Freedom. They have offered rules that would make it impossible for the poor to file class actions, an effective legal device that settles the claims of numerous people in a single lawsuit.

Though sloppily drafted, their proposals convey an unmistakable contempt for the poor by denying them access to an avenue of justice fully available to the affluent. Last week 53 Senators asked their leadership to hold the Harvey and Olson nominations while confirming six other directors who have acted more independently of the White House.

That's when President Reagan pulled all the names. His spokesman, Larry Speakes, explained with appalling candor that the six—but not Mr. Harvey and Mr. Olson—had failed their screen tests. "The President has had the opportunity to observe these nominees in a recess appointment capacity over the past year," he said. "He will submit names that he feels are more philosophically in tune with his policies."

The practical effect of the withdrawal is to leave the recess appointees in place, where they may continue to undermine the program. In fact, the lame duck board may give its approval to the Harvey/Olson class action rules this week.

This wild procedure assaults the constitutional system. Presidents may try to influence courts and agencies by their choice of nominees, but they are not supposed to make provisional appointments and then yank them when the appointees behave independently. Nor are they supposed to perpetuate recess appointees in office by withdrawing their nominations when the Senate shows hostility.

The whole performance reveals a shocking disregard for the sense of Congress when it created Legal Services in 1974. The lawmakers made clear that the corporation's directors were to be willing to support lawyers who might find it necessary to file lawsuits offensive to some politicians.

But the main issue is larger still: Mr. Reagan is simply refusing to grant the Senate its constitutional power of advise and consent. His actions are so far out constitutionally that even an aroused Senate may not easily correct them. One place to begin might be a sense-of-the-Senate resolution that reasserts Congress prerogatives

and notifies the White House that this valuable program—not to mention the Constitution—will be defended.

[From the New York Times, Dec. 5, 1982]

MORE LEGAL INSULTS FOR THE POOR

What would you think of a law that gave you the right to sue the Government for depriving you of your rights—provided only that no public funds be used to redress the grievance if you win? No one ever dreams of such a law for suits by those who can afford a lawyer, but President Reagan's appointed guardians of the national poverty law program want just such a rule for the poor.

Their proposal takes the form of draft guidelines for the Legal Services Corporation, the federally funded system for helping the poor in civil cases. Congress told the corporation to write rules for class actions, which are lawsuits filed on behalf of large groups of people who share a legal grievance. But instead of regulating class lawsuits, the new proposal would eliminate them for the poor—and only the poor.

Class actions are useful tools in business litigation and other cases involving persons too numerous to sue individually. A unanimous Supreme Court praised the device in a complicated 1979 Social Security case because it "saves the resources of both the courts and the parties by permitting an issue potentially affecting every Social Security beneficiary to be litigated in an economical fashion." The device gives the plaintiffs the strength of numbers, if they can afford to sue.

The idea of banning awards from public funds is only the most blatant discrimination against the poor. The other proposed technical hurdles are dazzling. For example, a legal services program could not sue in the name of all injured families over a maladministered school lunch program without the advance consent of every affected family. Even the courts have no right to require litigants, rich or poor, to run that obstacle course.

A staff lawyer who so misread the commission's purpose and the law's intent ought to be sent to retake the bar exam. But these guidelines were written not by staffers or clerks but by directors named by the President: Chairman William Harvey, a law professor in Indianapolis, and William Olson, a Washington attorney. Both share Mr. Reagan's hostility to legal services.

Congress tried mightily in 1974 to nourish legal services by creating an independent corporation that would foster competent, fearless legal representation free from political meddling. The White House has frustrated this system by nominating directors, notably Mr. Harvey and Mr. Olson, who are unacceptable to Senate friends of the program but serve under recess appointments. Required by the 1974 law to appoint some directors who are eligible clients, the Administration picked a 23-year-old son of middle-class parents who is working his way through college.

Such parodies of poverty law are ridiculous but not amusing. They not only cheat but insult the poor. Congress has little time to rescue this program from the Reagan wrecking crew. The Senate can begin by voting promptly to reject the Harvey and Olson nominations.

[From the Washington Post, Oct. 30, 1982]

LEGAL SERVICES BOARD, HIT BY PROTESTS, OFFERS PRESIDENCY TO INDIANA LAWYER

(By Mary Thornton)

The Legal Services Corp. board of directors voted yesterday to offer the job of president to a lawyer who has no poverty law experience and who represents Stokely-Van Camp Inc. against migrant farm workers.

Donald Bogard of Indianapolis, who said he has not decided whether to accept the $57,000-a-year job, said yesterday in a telephone interview that he sees "no conflict" in having handled cases for the company against farm workers represented by legal services lawyers.

In an emotional and often angry meeting, the board members were berated by citizens and legal services lawyers demanding to be heard and charging that the board's makeup is illegal because none of the 11 members has been confirmed by the Senate and the board no longer includes the required two bona fide poor people.

The 11-member board sat impassively through the proceedings, despite continuing angry outbursts from spectators who jammed the hearing room. The decision to offer the job to Bogard was made on a voice vote with only two members making it clear they opposed him.

President Reagan named two new members of the board last weekend in what critics have called a last-ditch effort to "stack" the board.

The White House refused to provide any information on the two new members, other than their names: Frank Donatelli and Daniel M. Rathbun. Donatelli is a Washington lawyer who worked in the Reagan campaign and is a former member of National Conservative Political Action Committee (NCPAC) and Young Americans for Freedom. Rathbun, 23, is a student at Christendom College, a 95-student school located in Front Royal, Va.

There were widespread complaints from critics of the board's philosophy that Rathbun, who has declared financial independence from his parents, is filling one of the spots on the board reserved for a poor person eligible for help from legal services.

Mary Lanier of Washington, a stooped, elderly woman leaning on a cane, told the board: "I'm a client. There's not one of you that is an eligible client. You do not feel what clients feel. You hardly know what it is to speak to a client, some of you. There are some of you all that have had a silver spoon in your mouth and all that your've wanted. How can you speak for poor people?"

"I'm poor," she said, asking the board members to "search their souls" and resign if they do not feel they can serve the nation's poor. If they don't, she warned, "God's going to move you off."

Earlier, legal services sources had said the two leading candidates to assume the presidency were Robert D'Agostino, a former Justice Department official who raised a furor in the department by writing a memo suggesting that blacks are more likely than whites to be emotionally disturbed, and Alfred S. Regnery, a Justice Department official who once called for the abolition of legal services.

Some of those sources said D'Agostino and Regnery were dropped from consideration because of an onslaught of negative publicity.

Bogard is a former law student of William F. Harvey, the Indiana Law School professor who is board chairman of the Legal Services Corp.

Referring to Bogard, Dennison Ray of the North Carolina legal services program shouted angrily, "He may be an expert in pork and beans law, but what does he know about poverty law?"

A number of legal service representatives asked the board to postpone the vote on the presidency until after a majority of the members are confirmed by the Senate. The president of the American Bar Association and a bipartisan group of 32 senators asked the committee to either postpone the vote or prevent the two new board members from voting.

Do we have to sue you?" asked Mary Ellen Hamilton of Louisiana, questioning the rush in choosing a president. "You aren't confirmed and you might never be confirmed after this."

Clarence McKee, one of two blacks on the board, asked for a postponement of the vote on Bogard until the board could look into whether his current work constitutes a confict of interest. He was defeated on a voice vote.

Only two members voted against Bogard, Howard H. Dana, who headed the presidential search committee, and Annie L. Slaughter, the only woman on the board.

The Reagan administration had made it clear that it wants to eliminate the Legal Services Corp. but it has not been able to persuade Congress to go along. Reagan made his first appointments to the board during the New Year's weekend last year, in a futile attempt to stop funding that had already been allocated.

The former board filed a lawsuit against the current board, questioning the legality of actions by unconfirmed board members in a semi-independent agency designed to be insulated from political pressures. That suit failed at the district court level but was appealed yesterday to the U.S. Court of Appeals here.

[From the New York Times, Oct. 29, 1982]

SENATORS PROTEST CHOICES BY REAGAN

(By Stuart Taylor, Jr.)

WASHINGTON, October 28.—Thirty-two Senators, including nine Republicans, expressed "grave concern" today over President Reagan's appointment last week of two new members to the board of the Legal Services Corporation.

"These 'recess appointees,' on the eve of a board meeting at which a new president of the corporation will be selected, create a disturbing suggestion that the responsibility of the Senate to approve nominations is being directly circumvented," the Senators said in a letter to Mr. Reagan.

The letter complained that the timing of the appointments had created "the impression of undue political interference with a board of directors which was created for the express purpose of removing the legal services program from political manipulation."

The letter is the latest round in a battle between the Administration and backers of the federally financed program of legal aid for the poor, which the corporation administers.

TWO KEY POSTS TO BE FILLED

That battle heated up at the approach of a meeting Friday and Saturday at which the board is to choose a chairman as well as a new president.

The board met in closed session today to interview candidates for the vacant $57,500

job as president. The president runs the program under general guidelines set by the board.

The two leading candidates for the job, Alfred S. Regnery and Robert J. D'Agostino, are conservative Republicans. Both have been termed unacceptable by the National Legal Aid and Defender Association, which is made up of legal aid lawyers and public defenders.

The letter urged Mr. Reagan to request his two new appointees to refrain from voting at this week's board meeting, saying that they "have little apparent knowledge of the corporation" and an "unknown" degree of commitment to legal services for poor people.

Mr. Reagan, whose attempts to abolish the $241 million program have been rebuffed by Congress, has not filled all 11 seats on the board, under his power to make temporary "recess appointments" while Congress is out of session without first submitting nominations to the Senate for confirmation.

Last Saturday he added Frank J. Donatelli, a Washington lawyer, and Daniel M. Rathbun, a student at Christendom College, in Front Royal, Va.

SPECULATION ABOUT MOVES

The timing of the appointments prompted assertions by sources in the corporation that they had been made to strengthen the hand of William F. Harvey, the current chairman, whom the sources view as sharing Mr. Reagan's hostility to legal aid lawyers.

Today's letter was signed by 23 liberal and moderate Democrats and nine Republicans. The Republicans were Dave Durenberger of Minnesota, John C. Danforth of Missouri, John H. Chafee of Rhode Island, John Heinz of Pennsylvania, Slade Gorton of Washington, Lowell P. Weicker, Jr. of Connecticut, Mark O. Hatfield of Oregon, Robert T. Stafford of Vermont and Charles McC. Mathias Jr. of Maryland.

The Democrats were Edward M. Kennedy of Massachusetts, Thomas F. Eagleton of Missouri, Alan Cranston of California, Donald W. Riegle, Jr. and Carl Levin of Michigan, Claiborne Pell of Rhode Island, Dale Bumpers and David Pryor of Arkansas, Jennings Randolph of West Virginia, Paul S. Sarbanes of Maryland, Bill Bradley of New Jersey, Joseph R. Biden Jr. of Delaware, Gary Hart of Colorado, Daniel Patrick Moynihan of New York, Alan J. Dixon of Illinois, Patrick J. Leahy of Vermont, Henry M. Jackson of Washington, John Glenn of Ohio, Christopher J. Dodd of Connecticut, Daniel K. Inouye and Spark M. Matsunaga of Hawaii, Jim Sasser of Tennessee and Howard M. Metzenbaum of Ohio.

SENATORS RAP REAGAN ON LEGAL SERVICES

(By Nick King)

A bipartisan group of US senators yesterday charged President Ronald Reagan with "political interference" in his handling of appointments to the board of the Legal Services Corp.

In a letter delivered to the White House, 30 senators accused Reagan of trying to pack the Legal Services board by filling vacancies while Congress was in recess.

His naming of two such nominees last Saturday, the letter said, raised "grave concerns" and "creates the impression of undue political interference with a board of directors created for the express purpose of removing the legal services program from political manipulation." Under current federal rules, recess appointees are allowed to serve on boards without congressional confirmation until the end of the session.

The letter also said the timing of Reagan's two appointments was suspect—just five days before the board began meeting yesterday to select a new president and chairman and to decide the future of the program that provides legal services for poor people.

The letter noted that one of the positions had been vacant for more than a year and the other for six months. Because of the timing and the lack of any evidence of the nominees' commitment to legal services for the poor, the senators urged him to ask the new members to refrain from voting this week.

Among those signing the letter were Sen. Edward M. Kennedy, Howard Metzenbaum (D-Ohio) and Lowell Weicker (R-Conn.).

The White House said it was unaware of the letter yesterday and declined comment.

Two hardline conservatives are rumored to be frontrunners for the board presidency. One is Alfred S. Regnery, a Justice Department lawyer who helped prepare a 1980 Heritage Foundation report calling for the abolition of the Legal Services Corp.

The other is Robert J. D'Agostino, a former Justice Department official who ignited controversy last year by writing that "blacks, because of their family, cultural and economic background, are more disruptive in the classroom on the average" than whites.

The letter is the latest in a long controversy over Reagan's handling of the federally funded legal services program. Last year, he tried to abolish the $320 million-a-year agency but was overruled by Congress, which cut its budget to $240 million.

In January, Reagan made nine conservative recess appointees to the eleven-member board, but the group has split on the direction of the program. The nine appointees have not yet been confirmed.

[From the Los Angeles Times, Oct. 29, 1982]

32 SENATORS QUESTION QUALIFICATIONS OF LEGAL SERVICES APPOINTEES

(By David Treadwell)

WASHINGTON.—A bipartisan group of 32 senators Thursday expressed "grave concern" over President Reagan's two recent appointments to the board of the Legal Services Corp., the government agency that funds legal aid projects for the poor.

The senators said that the appointments—made when Congress was in recess and only a week before the 11-member board is to choose a new chairman and corporation president—create a "disturbing suggestion" that the White House wants to circumvent Senate confirmation of the appointees, who could sit through the life of the next Congress without being confirmed.

In a letter to Reagan, the senators questioned the qualifications of the appointees, saying, "The two individuals have little apparent knowledge of the corporation, and their commitment to the provisions of legal services for the poor is unknown.

"We urge you to request these two appointees to refrain from voting or from taking any action which would affect the affairs of the Legal Services Corp." when the board meets today, the letter said.

White House spokesman Anson Franklin said that the White House had not received the letter, and he withheld comment.

The letter adds fuel to the already heated controversy over Reagan's appointment last Saturday of Frank J. Donatelli, a Washington, D.C., attorney, and Daniel Rathbun, 25, an undergraduate at Christendom College in Front Royal, Va., to fill the remaining vacancies on the board.

Sources closely associated with the board have charged that the latest appointments are an attempt to stack the voting for chairman in favor of William F. Harvey, and Indiana University law professor and the current chairman, who allegedly shares Reagan's view that the agency should be abolished or at least sharply curtailed.

Liberal groups have also protested that the two leading candidates for corporation president—Robert D'Agostino, a former Justice Department official, and Alfred Regnery, an assistant attorney general—are hostile to the program.

Because Donatelli and Rathbun were named to the board when Congress was in recess, they were given interim appointments subject to Senate confirmation after the lawmakers return to Washington on Nov. 29. But any action taken by interim appointees is binding.

Twenty-three Democrats and nine Republicans signed the letter to Reagan, including Sen. Lowell P. Weicker Jr. (R-Conn.), chairman of the Senate Appropriations subcommittee that has jurisdiction over the legal services agency.

In a separate letter to Harvey, Weicker urged that the board postpone selection of a new chairman and corporation president.

FEDERAL COURTS AND THE RULE OF LAW

● Mr. HELMS. Mr. President, unrestricted power has always been the mortal enemy of the rule of law. In our day we have learned that this is as true in the case of judges as it has been in the case of tyrannical kings and communist dictators.

The American Constitution gives Federal judges substantial power to do their job. This power, however, is subject to a variety of checks both by Congress and the President. Unfortunately, many of these checks have in practice atrophied from disuse. Emboldened by congressional and presidential inaction, Federal judges in recent years have moved ahead to wield more and more power—more than the framers ever intended. At this point the de facto power they exercise is virtually unlimited. Therein lies the problem: Unchecked power is dangerous power that inevitably subverts the rule of law.

Mr. President, the irony in the present case is that the division of Government tempted by the availability of unrestricted power is the division whose special responsibility is to uphold the rule of law. Tragically, the temptation has proved too much, and the courts themselves have done more to undercut the rule of law in the recent past than any other division of Government.

We have seen Federal judges take over local school systems and order massive busing of school children to achieve racial quotas. We have seen Federal judges eliminate centuries of tradition and tell children and their teachers that they could not pray in

school. We have seen Federal judges wipe out virtually all the power of the States to protect unborn children from abortion. We have seen Federal judges rob the States of their constitutional authority to punish criminals largely as they see fit.

In each of these instances and in countless others, Federal judges have abdicated their role as upholders of the rule of law and become instead tyrants who substitute their own personnal views for law. We are indeed becoming a nation of men not laws. On this point I can only agree with the distinguished former Senator from North Carolina, the Honorable Sam J. Ervin, Jr., when he said in the December 1982 ABA Journal, "I abhor judicial usurpation and deem tyranny on the bench as reprehensible as tyranny on the throne."

Mr. President, in the Washington Post of December 19, 1982, Hadley Arkes had an article dealing with how far afield the courts have gone on the subject of abortion. He points out the sheer arrogance of Justice Blackmun in the abortion matter and how the justice has even tried to change the meaning of Supreme Court precedents to serve his own purposes on abortion. The article is another glaring indictment of the corruption of law effected by Justice Blackmun's original opinion in Roe against Wade.

As this Senator has pointed out before, Congress fortunately has authority to correct judicial abuses such as the abortion and prayer decisions of the Supreme Court. I urge my colleagues to consider the available congressional remedies and move expeditiously to put them into law during the next session. The survival of the rule of law is at stake, and therefore it is imperative that we in Congress act.

Mr. President, I ask that the article by Hadley Arkes, Cromwell professor of jurisprudence at Amherst College and currently a visiting Leavy professor at Georgetown University, appearing in the December 19, 1982, Washington Post, be printed in the RECORD at the conclusion of my remarks.

The article follows:

[From the Washington Post, Dec. 19, 1982]

(By Hadley Arkes)

ABORTION: THE COURT WASN'T PERSUASIVE

Where does sedition lurk these days in the minds of Americans? Justice Harry Blackmun knows: behind every effort to restrain the practice of abortion, he sees the willful refusal to concede that when the Supreme Court has spoken, the final, authoritative word has been said on the meaning of the Constitution. And so Blackmun loosed his terrible swift sword on the solicitor general very recently, during an argument before the court over the laws on abortion.

The justice asked Rex Lee whether the administration was requesting the court, in effect, to overrule *Roe* v. *Wade*, the decision that made abortions legal for virtually any reason, at any stage of the pregnancy. When Lee denied that the administration was seeking that change just yet, Blackmun replied with sarcasm that "it seems to me . . . you are asking that or you're asking that we overrule *Marbury* v. *Madison*."

It is apparently a long while since Justice Blackmun has studied *Marbury* v. *Madison*, or he has absorbed now the fable that has been fashioned mainly by judges: that the case that established the authority of the courts to interpret the Constitution also established the court as the *sole*, authoritative interpreter of the Constitution. In this superstition he is joined by most judges.

And yet, that understanding was not shared by the Founders, and it found no expression in the Constitution they framed. Nor was that understanding ever set forth by Chief Justice Marshall in his classic opinion in *Marbury* v. *Madison*. In later years, the supporters of the Dred Scott decision claimed that the court must be sovereign in settling the meaning of the Constitution. But that argument was rejected officially, decisively, by the Lincoln administration with reasoning—and precedent—that we could not wish to overturn, even today.

In *Marbury* v. *Madison*, Marshall had to confront a case in which a statute passed by Congress came into conflict with an explicit provision of the Constitution. If the court failed to give precedence to the Constitution, then it would implicitly lower the Constitution to the plane of an ordinary statute, which could be altered and superseded by any piece of subsequent legislation. But if the Constitution had to be regarded as "fundamental law," then it had to follow, as Marshall said, that "those who apply the rule to particular cases, must of necessity expound and interpret that rule. If two laws conflict with each other, the courts must decide on the operation of each."

This "judicial duty," as Marshall described it, was modestly drawn: Marshall simply recognized that the court had an obligation to be governed by the Constitution as it sought to settle the particular case that was submitted for its judgment. In that sense, nothing was claimed for the judges that could not be claimed for other officers of the government: presidents and congressmen would also be obliged to consider whether their decisions were compatible with the text or the principles of the Constitution.

Such, at any rate, was the understanding of Thomas Jefferson and Andrew Jackson, and without that traditional understanding, it would be hard to grasp Lincoln's resistance to the Dred Scott decision. In that infamous case, the court "established" that blacks could not have the standing of citizens to sue in the courts, and that no man could be deprived of his property in slaves, even if he brought that property into the territories in which slavery had been forbidden by Congress.

In respecting the processes of law, Lincoln was willing to respect the disposition made by the court in settling the fate of Dred Scott in this case. But he and his party would "oppose that decision as a political rule which shall be binding on the . . . members of Congress or the President to favor no measure that does not actually concur with the principles of that decision."

Lincoln was willing, that is, to accept the judgment of the case as it bore on the conflict between two litigants. What he was not obliged to accept was the principle or the broader rule of law that the court was trying to create in the case. As Alexander Hamilton once remarked, the court had neither the power of the sword nor of the purse; its authority would ultimately depend on the force of its reasoned argument. In that spirit, Lincoln insisted that other officers of the government could not be obliged to accept any new "law" created by the court unless they, too, were persuaded by the force of the court's reasoning.

The Lincoln administration came to discover very quickly just how far the executive branch had been willing to apply the principle of the *Dred Scott* decision. In two notable cases arising from Boston, a black student had been denied a passport to study in France and a black inventor had been denied a patent on a new invention. Since the court had decided, in *Dred Scott*, that blacks were not citizens, the local agents of the federal government now reasoned that blacks could not carry the passports of American citizens and they could not receive patents under the laws of United States.

The Lincoln administration reversed both decisions. The attorney general announced that the administration would be guided by its own understanding: that free blacks born in the United States were citizens of the United States. A year later Lincoln would sign new legislation that banned slavery from the territories of the United States—as the president affirmed, again, that in the decisions which came under his hand he would not be bound by the "principles" declared by the court in the *Dred Scott* case.

And yet, in the understanding that now dominates the federal courts, these moves of the Lincoln administration would be regarded as unconstitutional. They would be defensible only on the understanding held by Lincoln and the Founders about the separation of powers and the responsibility of each branch to interpret the Constitution. But when Congress and the state legislatures seek, in our own day, to restrict the practice of abortion, their efforts are instantly branded as unconstitutional if they seem to be acting on the premise that abortion is wrong. Since the Supreme Court "established," in *Roe* v. *Wade*, that abortion is a legitimate medical procedure, it is assumed now that it is impermissible for Congress or the states to legislate upon any other premise. To do that would be treason to *Roe* v. *Wade*, and in the temper of Justice Blackmun, treason to *Roe* v. *Wade* is treason to the Constitution itself.

But if Blackmun persistently faces, on the matter of abortion, an opposition that will not be stilled, it is precisely because the court has not passed the test proposed by Hamilton: 10 years after *Roe* v. *Wade*, people of serious reflection have simply not found compelling or persuasive the reasons offered by the court. A majority of women remain convinced that life begins at conception, that the offspring of Homo sapiens cannot be anything other than human from its very beginning, and that the matter cannot be, as Blackmun suggested, an inscrutable religious question.

In the spirit of Lincoln, legislators in Congress and the states are claiming their right to honor their own judgments in the matters that come before them; and in the spirit of the separation of powers—the spirit of shared powers and reasoned exchange—they would urge the court to take a sober second look at what it has done and consider the possibility that it might have been mistaken.●

SENATOR COHEN'S ARTICLE ON "PRESIDENTIAL PARADOXES"

● Mr. NUNN. Mr. President, the New York Times printed a column on December 19, 1982, by the senior Senator from Maine, Senator COHEN, which I want to bring to the attention of my colleagues.

Senator COHEN, the chairman of the Armed Services Seapower and Force Projection Subcommittee, has spent a significant amount of time studying and working on strategic nuclear issues and arms control.

His thoughtful column on "Presidential Paradoxes" is a perceptive analysis of some of the current dilemmas in the national security area. I believe this excellent column provides a perspective that is worth the Senate's attention, and I ask that the article be reprinted in the RECORD at this point.

The article follows:

PRESIDENTIAL PARADOXES

(By William S. Cohen)

WASHINGTON.—A majority of voters in 1980 supported the proposition that the United States had to modernize its strategic and conventional forces if we were to avoid having to choose one day between conflict or capitulation. But something happened on the road to redemption.

Perhaps it was all the loose talk of firing a nuclear shot across the Soviet bow, confining a nuclear war to European soil, preparing for and surviving a long nuclear conflict, or throwing a shovel full of dirt on an underground shelter for every household in America. Maybe it was a sense of betrayal that we experienced in discovering we had elected a President who was putting into practice the very things he promised as a candidate.

Whatever the reason, it is clear that a new consensus evolved during 1982 that said significant defense cuts could and should be made. It was not that the world had become less dangerous, that the Soviet Union was not still butchering innocent people in Afghanistan, that Gen. Wojciech Jaruzelski was cutting the pressure of his water cannons in Poland, that the skies of Cambodia were not quite so yellow with poison, that the Middle East was any less volatile or Persian Gulf oil more secure. Rather, we concluded that President Reagan's military program was no longer affordable or desirable—that we must reduce our deficits and rebuild our domestic economy before our military capability, and should refuse to build systems that the Soviet Union would use as threatening and destabilizing.

By noting the radical shift in public opinion within a two-year time span, I do not seek to denigrate the perceptions or wishes of the electorate. Nor do I suggest that the defense budget should be sacrosanct or immune from a surgeon's knife. Defense cuts can be made, although they should not be so substantial as to move us immediately within field-goal range of a balanced budget.

The shift in public opinion represents a political phenomenon more deeply rooted than fear or fickleness. It suggests that conservative Republican Presidents (moderates or liberals need not apply) may be able to open doors to China and secure support for arms control treaties yet be unable to sustain a significant or even stable growth in military spending.

By contrast, liberal or moderate Democratic Presidents may be able to secure support for strategic and conventional modernization (few questioned the need for the MX, Stealth aircraft, Trident submarine, or a Rapid Deployment Force under Jimmy Carter) but will be less able to obtain ratification or arms control treaties.

Ronald Reagan is viewed by many as being overly aggressive in word and deed—too likely to produce war rather than preserve peace. By contrast, if Jimmy Carter had proposed an MX "dense pack" or hardened silos reinforced by ballistic-missile defense, he would have stood a better chance of achieving Congressional approval. Mr. Carter was a self-proclaimed peace candidate who wanted to abolish nuclear weapons from the face of the earth. He was a religious man who prayed daily and publicly. Paradoxically, the perception of his weakness in the face of Soviet aggression would have provided the basis of bipartisan Congressional support for arms modernization. With Ronald Reagan, just the opposite appears to be the case—rearmament is seen by an increasing number of people as being unnecessary, unaffordable or dangerous.

Shortly before the November elections, the Kremlin revealed that it would welcome a new Congress that would be more moderate in character. It would be logical to conclude that it would also welcome a change in the occupant of the White House in 1984. But Yuri V. Andropov may possess a subtler turn of mind. He may prefer President Reagan to run as a peace candidate in 1984 with a ratified arms control treaty in hand. In the long run, Mr. Andropov may see the wisdom of having a Republican President with a treaty and without an arms buildup rather than a Democratic President with an arms buildup but without an arms control treaty.●

APPOINTMENT OF MARINE MAMMAL COMMISSIONERS

● Mr. PACKWOOD. Mr. President, the Senate and House of Representatives recently passed H.R. 3942, a reauthorization of the Commercial Fisheries Research and Development Act. Included in the legislative package was a requirement that all future members of the Marine Mammal Commission shall be confirmed by the Senate. To insure that there is no confusion about the intent of this provision, I want to take this opportunity to add some additional clarification.

First, we are only talking about future Commissioners. The members of the Commission currently in place are not covered by this change in procedure.

Second, the Congress in taking this action is insisting on an orderly transition to the new system of advice and consent appointments to the Commission. Congress intends that the current Commissioners shall continue to serve until they are replaced by a new nominee, or nominees, who have been confirmed by the Senate in the 98th Congress or thereafter.

Third, I want to remind all interested parties that the provision in question is retroactive to September 1, 1982, so that any appointments after that date shall be subject to confirmation by the Senate.●

VERMONT VIETNAM WAR MEMORIAL

● Mr. LEAHY. Mr. President, on October 30, 1982, I stood with hundreds of other Vermonters at the Vermont Vietnam War Memorial. It was a bright fall day, and all of us were brought together to honor the Vietnam veterans.

Certainly one of the most moving statements made that day was by Louise Ransom. She and her husband were there, and she spoke of her son, Mike, who died in Vietnam.

There is no way that I could adequately paraphrase what she said. However, what she said was so important that I will momentarily ask the permission of the Senate to have her remarks printed in full.

I hope that everyone within this body and outside will take these words to heart. Mr. President, I ask that the remarks of Louise Ransom be included in the RECORD in full.

The remarks follow:

DEDICATION OF VERMONT VIETNAM WAR MEMORIAL

(Remarks of Louise Ransom)

My son, Mike, died over fourteen years ago in May of 1968 at Chu Lai, Vietnam. He was an infantryman with the American Division, near My Lai.

I am proud to join you here today to dedicate this most fitting memorial to the young Vermonters who gave their lives in Southeast Asia.

The minister of our church read Archibald MacLeish's poem, "The Young Dead Soldiers" at Mike's funeral. Ted Pickett read it here last Memorial Day at the ground-breaking ceremonies. Its words keep coming back again and again. It begins:

"The young dead soldiers do not speak.
Nevertheless they are heard in the still houses. They say
We were young, We have died, Remember us * * *"

And what is it that we remember?

First, we remember how they looked the last time we saw them—the shiny buttons on their new uniforms pressing into us as we hugged them goodbye, trying to shield them with our love.

We remember how we awaited the letters home. In one Mike wrote: "There is not a man over here that wants to see this war go on any longer. This is not to say that anybody shrinks from doing a job. But everyone is as confused as I as to exactly what, if anything, we're accomplishing."

Then we remember our desperate prayers during those last few days in a surgical field hospital after we had learned of the critical wounds.

We remember sadly now the things that will not be: The weddings never attended; the children never born; the houses never built and the fields not ploughed; the books never written; the songs never sung; even possibly from among those listed here, the Governor or the Senator not elected.

But this is our personal pain. We also remember our national pain:

Our anger at our government:

For covering up so many truths about the war, including how we got into it, and for lacking the courage to pull out, as Senator George Aiken so wisely said we should.

For requiring such unequal sacrifices of its citizens through a system that permitted nine out of every ten men to legally avoid service or ride out the war safely in the very Reserve or Guard units we pay to protect us. If our cause was so righteous and just, how did it happen that no member of Congress lost a son or a grandson there?

For not putting a stop to the huge profits made by American here and in Vietnam at the expense of our soldiers.

For its callous neglect of the returning veterans—other parents' sons—who had been sent off to fight and die in an alien land, in alien ways.

Most of all, we remember our disillusionment:

In the bleak fear that the lives of our beloved sons, husbands, brothers, and some sisters, may have been wasted by the nation we love—for no visible gain to its people.

In the perception that the war brought out the worst in us: our racism, our egotism, our intolerance and our unquestioning chauvinism.

In the knowledge that a whole generation has become cynical and lost faith in their government and in the American dream of freedom for all, for which our fore-fathers fought and died.

But we have not come here today only to remember the painful past. What of the future?

The MacLeish poem goes on to say:

"We leave you our deaths. Give them their meaning."

In our search for meaning, one of the things we do is erect monuments. It is symbolic, I think, of the difference between the Vietnam War and other wars, that this monument was built in memory of their fallen comrades by the veterans themselves, as was the one in Washington, and not in their honor by a grateful nation. The veterans have erected these monuments in their rightful effort to find value and thereby pride in their service.

To me, they have always been deserving of pride and honor, but not because it was a good war. I know that my son and all these others were brave and strong, devoted to their fellow Americans, and to their duty as they saw it. No controversy among us over the war itself can minimize that. If a monument helps veterans to find that pride in themselves, let there be many monuments.

However, the true meaning of these deaths can only be determined by how we, the survivors, regard the monuments and the value we find for ourselves in what they stand for.

If we use them to glorify the Vietnam War, rather than as a tribute to its warriors, righteously feeling that now we have done our bit, (remembering that it is the veterans and not we that put up the monuments) and then wash our hands of the whole tragic business with no concern for its victims at home and abroad, we shall have failed.

But if we can strive mightily to seek creative and not military solutions to overwhelming world problems, if we can acknowledge in humility the possibility of error in ourselves, and above all if we can learn to love one another as we love them, their sacrifice for us will not have been in vain.

A crucial line of the poem reads:

"Whether our lives and our deaths were for peace and a new Hope or for nothing, we cannot say; it is you who must say this."

Future generations will not judge us by our monuments, but rather by our actions. We are proud of our soldiers, all of them. Let us by our actions make them proud of us, that they may rest in peace.●

PIONEERS OF SERVICE

● Mr. HELMS. Mr. President, I am a strong believer in what the people of this great country are capable of doing. They do not need compulsion from Government to stir them into action, but simply the conviction and commitment that come from conscience.

As we all know, the President is also a believer in the American spirit of voluntarism. Addressing a recent conference of volunteers, the President noted that—

These volunteer efforts can do it so much more efficiently . . . so much more effectively than Government can, that it isn't a case of waiting for Government to do it. But take a look at the neighborhood, the community, the thing that needs doing, and then find out how you can enlist people to do this.

I can think of no better example of what the President was talking about, of what America needs more of, than the service project involving the American Children's Home in Lexington, N.C., recently completed by Chapter 79 Telephone Pioneers of America. I salute one and all connected with this project as pioneers in service. Like the pioneers of old they have blazed a path that we would all do well to follow.

Mr. President, I ask that their own account of this commendable achievement be printed in the RECORD at the conclusion of these remarks as evidence that the American spirit is alive and well.

The material follows:

A PLACE TO CALL HOME

Mayday, Mayday—The distress signal was heard in late winter, January 1980, from the American children's Home, Lexington, N.C. The boys' dormitory, Pennsylvania House, was under threat of closure due to deterioration, a natural non-phenomenon of 52 years of constant occupancy.

Chapter 79 Pioneers responded. The home's boys had no other refuge. They are social orphans—abused and/or abandoned by parents. The dormitory must remain open to provide them a home. A task force investigated the worth and permanency of the home and recommended we accept the challenge. The Executive Committee voted for the project, and we were underway.

A Steering Committee was formed to organize, plan, and direct the work, Henry Wesley, Project Manager; Len Schaffer, Assistant Manager; Ted Getchell, JOb Superintendent; Gene Lankford, Purchasing Agent; and John Barnette, Engineer are Life Members. Two dozen other Pioneers were on the Committee.

The Orphanage was founded in 1925 by Junior Order of United American Mechanics (JOUAM). It has been home to almost 3,000 boys and girls from ages four to twenty years. The campus is a beautiful complex of brick buildings of superior basic construction situated in a tranquil semi-rural setting of over 300 acres. The home is still owned by JOUAM fraternity which today is about one-third the 1920-30 membership. This orphanage is non-sectarian. It is controlled by a Board of Directors. Financial support comes from JOUAM members, home alumni, civic groups, area businesses and government social service agencies. There is never an excess of funds; therefore, major costly repairs have often been delayed. Several buildings were renovated in recent years by community civic groups, but the 12,900 square feet Pennsylvania Building had only received multiple coats of paint and some crude partitioning during its fifty years.

Renovation of this building was a monumental undertaking. Everything had to be done. The electrical wiring was inadequate and unsafe, plumbing likewise. Both required extensive rework. Rotted woodwork was removed and replaced. "Tons of paint" were removed from doors, mantels, windows, and casements. New ceilings and lighting were installed. Walls were repaired. Partitions were ripped out and new floor layouts were made. New partitions and closets were built. The kitchens were entirely redone with new exhaust systems, stoves, sinks, commercial refrigerators, cabinets, etc. Old floor coverings were removed, floors were repaired and retiled or carpeted. Bathroom fixtures and damaged tile were replaced. Much broken glass was replaced in doors, windows, and storm windows. The exterior woodwork was stripped, repaired, and repainted. The interior was refinished. Over 1200 square yards of carpet and 300 square yards of vinyl were installed. We applied more than 250 gallons of paint, made and hung 100 sets of window curtains, and installed shades.

All tasks were undertaken with zeal and dedication. Each Saturday—(spring, summer, fall, and winter) for over 18 months buses, vans, and cars filled with enthusiastic Pioneers arrived on-site early and stayed late. Life Members even worked weekdays. Everyone worked hard and cheerfully. Fellowship among workers was great. Many new friendships developed among Pioneers united in a spirit of love and joy to fulfill a great need.

Word of this project was spread across the State and the Pioneer association via area newspapers, Company and Pioneer publications. Responses and donations were received from as far away as Arizona.

Members of the Children's Home Board of Directors were contacted and persuaded to provide new furniture for living rooms, dayrooms, houseparents' apartments and bedrooms via area manufacturers.

Today, the campus boasts a newly conditioned dormitory officially renamed "Pioneer Cottage." It will provide excellent housing for hundreds of homeless and, for some, it will be the only home they remember.

Culminating the Pioneers' effort, the Home's Board of Directors decided to establish a maintenance trust fund to insure that the building will be kept in good condition hereafter. Several Pioneers pledged continuing gifts to the trust. More pledges are expected as people capture the children's spirit and the atmosphere of loving care shown by the staff of the Home.

This miracle happened because 3,050 Pioneers and partners, including 400 Life Members and 500 Future Pioneers, cared enough

to raise $103,000 in funds to buy materials and gave more than 30,000 hours labor to accomplish the beautiful restoration. Estimated value of the project is $323,000 including $40,000 in new furnishings.

Chapter 79 Telephone Pioneers entered this project in Regional and National competition for the 1982 "People Who Care" award given each year at the Telephone Pioneer of America General Assembly. The project was awarded first place in both contests. This is the first time a North Carolina Chapter has won first place. It is also the first time a wholly Western Electric Company Chapter has received the award.

On November 6, 1982, a final Pioneer Appreciation Day was held by the staff and Board of Directors of American Children's Home. About 600 people attended the half-day event. They toured the refurbished building, had dinner, and were entertained by the children's chorus and by a pioneer band. The Home's Executive Director, Ray Mims, gave out several plaques to pioneers who spearheaded the restoration project. Former Senator, Robert Morgan spoke briefly of the value and lasting quality of the project and of the impact it will have on today's and tomorrow's children at the Home.●

SENATORIAL NEWSLETTERS

● Mr. MATHIAS. Mr. President, on September 13, 1982, I brought to the attention of the Senate the high cost of the newsletters that Senators send to their constituents. To recap the central fact, it is estimated that Senators' mass mailings, most of which are newsletters, will cost the American taxpayers $37 million this year. Most of that amount, $31 million, is for postage. I do not intend to repeat today what I said then. Anyone who would like to read my remarks will find them beginning on page S11332 in the September 13 CONGRESSIONAL RECORD.

My purpose today is to advise my colleagues that the Committee on Rules and Administration will hold hearings on this subject on February 2, early in the 1st session of the 98th Congress. I would also like to share some additional information on this subject, and some ideas for reform, which I hope Senators will ponder so that the Committee on Rules and Administration can have the full benefit of their reflections on this difficult problem at the hearings.

I. SUMMARY OF POSTAL PATRON MAIL ISSUE

Public Law 97-67 authorized Senate use of postal patron mail, under regulations to be issued by the Committee on Rules and Administration. In Rules Committee hearings on implementation on February 2, 1982, it became obvious that a number of Senators wanted to send more newsletters, and that they saw postal patron mail as a way to do so more easily. The desire to retain mailing lists for directed mass mailings, while using postal patron for other mass mail, was also apparent.

Our hearing brought out both positive and negative aspects to postal patron mail. One positive aspect is that the postage rate is slightly lower than the third-class, bulk-sort rate now used—7.9 cents versus 9.3 cents. The much larger savings, which were predicted in the legislation authorizing postal patron, assumed the Senate would be going from first-class addressed to postal patron rates. Those savings have been largely realized already in the shifting to third-class addressed. A second benefit predicted in the legislation was that use of postal patron would allow the Senate to discontinue the mailing lists which run in the millions of names. Maintenance of mailing lists is a labor-intensive activity that pervades the Senate. The third benefit of postal patron mail is that it would relieve the Postal Service from returning the thousands of newsletters which are not deliverable because the addressee has moved. The Senate would save return postage, which now runs between $2 and $3 million a year.

The most important negative aspect of postal patron mail is its potential for increasing the volume of mass mail substantially. The very inefficiencies of the present system which would be eliminated by postal patron mail may be the only dam holding back a flood. It is not possible to predict how high volumes would become if sending newsletters became so much easier. It is conceivable that the current volume of mass mailings, and, therefore, the cost, would increase by several times if postal patron mail were implemented in the Senate.

II. BACKGROUND

A. SUMMARY OF RECENT GROWTH IN NEWSLETTER VOLUME

With the assistance of the Sergeant at Arms and the Senate service department, the Committee on Rules and Administration has studied the trends in mass-mail. Volume has steadily increased since 1979, and has continued to increase throughout this year. No effective limit seems to exist to prevent mass-mailing, either by postal patron or by direct addressing, from increasing to several times its present level.

Senate mass-mail volume has increased rapidly for several years. In 1982, 2½ times as many pieces of mass-mail were sent as in 1979, just 3 years earlier. The increase is primarily attributable to newsletters. In 1981 and 1982 mass-mail constituted about 92 percent of all Senate mail, with newsletters accounting for 69 percent. By contrast, letters sent in response to incoming mail were only 4 percent of the total. I have two tables which depict this growth. I will not read these tables, but I ask that they be included at this point in my remarks. Table 1 illustrates the increase in the volume of mass-mail from 1979 through 1982. Table 2 shows how Senators' newsletters dominate all other categories of Senate mail.

The tables follow:

TABLE 1.—SENATE MASS-MAIL VOLUME

Year	Millions of pieces of mass-mail	Percentage of increase over prior year
1979	93	
1980	118	27
1981	142	20
1982	[1] 245	73

[1] The 1982 estimate is based on first 6 months of 1982.

TABLE 2.—*Senators' Newsletters as a percentage of all Senate mail (1981–82)*

	Percent
1. Mass mailings:	
A. Newsletters	69
B. Information notices, press releases and town meeting notices	23
2. Other than mass mail:	
A. Correspondence prepared with the Senate correspondence management system (CMS)	4
B. All other mail	4
Total	100

Mr. MATHIAS. In my remarks in September, I pointed out that although total volume has increased nearly threefold, most Senators still send fewer than one piece of mass-mail per mailbox per year, and that if all Senators were to become high-volume mass-mailers, like some of our colleagues, volumes and costs would really skyrocket. For example, in 1981, only 13 Senators accounted for over 50 percent of the mass mail volume. That group of 13 included Senators from large States who sent as little as one piece of mass-mail for every three mailboxes, Senators from large States who sent as many as three or four pieces per mailbox, and Senators from smaller States who sent almost eight pieces per mailbox.

B. THE PAPER ALLOTMENT

Theoretically, Senate mailing is limited by several allotments. For newsletters, Senators are alloted a number of sheets of paper based on State population, In practice, no Senator is ever known to have been unable to mail a newsletter because he or she could not find enough paper. The limitation is ineffective because of carryover and transfer of unused balances. Senators can transfer their allotments to each other, so that those who send few or no newsletters can give paper to others whose allotments would not be enough for high-volume newsletter operations. Unused paper allotments can carry over for 2 years; then they pass to the appropriate party secretary. Over the years the party secretaries have amassed supplies of paper which they can allocate to Senators who have exhausted their own supplies. In drawing on their inventories, Senators must exhaust the current year's allotment before drawing on the remaining

balance of the prior year, and must exhaust the prior year before drawing on the year before that. Whatever unused allotment a Senator has when he leaves the Senate is customarily given to other Senators.

C. ELEMENTS OF COST

The service department incurs costs for printing, folding, labeling bundling, and a modest cost for composing. The Computer Center incurs costs for printing and sorting labels and for adding computer tape files acquired by Senators from outside sources to their file of addresses. The Secretary of the Senate incurs costs for paper allotment accounting. The Government Printing Office incurs costs for the paper itself.

However, the major element of cost is postage, which is paid from a House and Senate joint account, "Official Mail." Payments are made on vouchers submitted quarterly by the Postal Service. This is the $31 million I mentioned earlier.

D. POSTAGE RATES

Most Senate newsletters are sorted by ZIP code and sent third-class at 9.3 cents each. A few mailings too small to be sorted efficiently are sent first class, at 20 cents each. Postcard town-meeting notices are sent at 13 cents each. The third-class newsletters and postcard, town-meeting announcements are recent cost-saving innovations, without which Senate postage costs might have risen another $20 million this year. Those are the rates for outgoing mail. Unfortunately, a lot of that mail is undeliverable. Undelivered first-class newsletters are returned at no additional cost, but undelivered third-class newsletters cost an additional 20 cents each. Address corrections on first-class and third-class newsletters cost 25 cents each. Compare these costs to newsletters sent "postal patron," which would cost 7.9 cents each, with no returns.

At comparable volumes, postal patron is less expensive than the current mailing system. If the Senate can agree to effective ways to limit volume, postal patron mailings would free the Senate and the Postal Service from the inefficiencies associated with the maintenance of huge mailing lists and the processing of mail with incorrect addresses. It would also eliminate the embarrassing eyesore of 35 or 40 mail tubs lined up outside a Senator's office, each full to the brim with thousands of undeliverable newsletters.

III. POSSIBILITIES FOR REFORM.

Because of its high potential for multiplying newsletters volume and costs, postal patron mail for newsletters should not be adopted unless action has been taken to prevent that increase from occurring. Let me briefly summarize a few things that could be done. I hope that my colleagues will comment on these suggestions in the committee hearings on February 2, and make some suggestions of their own.

A. COST AWARENESS

Simply increasing Senators' awareness of the costs incurred on their behalf is one possibility. Periodically, statements could be sent to Senators informing them of the costs incurred on their behalf in printing and mailing their newsletters and other mass mailings. Notification to each Senator might be the "word to the wise" that is sufficient.

B. PAPER ALLOTMENT

The paper allotment has all the appearances of a bottomless well. Things that could be done to improve its usefulness as a control device are:

First, prohibit the carryover of unused paper allotment from year to year. Paper allowances would be treated in a manner similar to that of appropriated funds, where unobligated funds lapse on the last day of the fiscal year.

Second, prohibit the transfer of paper allowances among Senators. As long as there is no rule against it, only the most curmudgeonly of us would be so unaccommodating as to refuse such a request. A rule prohibiting transfers would be fair to all and would relieve all of the burden of having to respond to such requests.

Third, prohibit transfer of unused paper to the party secretaries.

Fouth, recast the paper allotment, so that two one-page newsletters no longer count the same as one two-page newsletter, which costs half the postage.

C. LIMIT THE SIZE OF NEWSLETTER ADDRESS FILES

Improvements that could be made to reduce the volume of mail sent out that cannot be delivered are:

First, require processing of all returned newsletters through the optical character recognition (OCR) machine for deletion, and hand deletion of all those which fail OCR deletion.

Second, establish two classes of mailing lists. One would be a list of names and addresses obtained as tape files from outside sources. Such files could be limited to a single use or to use for a limited period of time, such as 6 months. All other names could be retained indefinitely.

Third, limit the number of addresses which a Senator can have in his address file to the number of addresses in his State, plus out-of State students and military personnel.

D. ENVELOPES

Prohibit mailing newsletters in envelopes.

CONCLUSION

This issue is not going to go away. It is of considerable interest to the press and to our constituents. I would like to submit for the RECORD copies of articles and editorials voicing concern about mass mailings which appeared in the Baltimore Sun; the New York Times; the Scranton Times; the Santa Barbara News-Press; U.S. News and World Report; Congressional Quarterly; the Washington Post; and the Arizona Republic. I ask that the articles and editorials be printed in the RECORD following my remarks.

You will listen in vain for even a quartet of voices crying out "Don't take away our newsletters." Not even a duet will pipe up to defend them as valuable sources of information. Instead, you will hear a swelling chorus of voices advocating a bipartisan effort to establish restraints. They are waiting for us to take some remedial action before the situation spirals completely out of control.

Finally, Mr. President, I would like to share with my colleagues a packet of material a concerned, public-spirited, cost-conscious citizen sent me. She is not a resident of the State of Maryland, but she had heard of the effort to curb mailing costs and eliminate waste. And she sent me proof that we are on the right track. She enclosed nine newsletters, or rather, nine copies of the same newsletter, which had been delivered to the same mailboxhers. The newsletters were addressed to different members of the same family; some were sent more than one copy; and some of the addressees had moved some time before. Indeed, one person, who was sent two copies, had married and moved out 10 years earlier. This public-spirited citizen was kind enough to take the time to write a brief note on each newsletter, commenting on the names and addresses. Let me just read the address labels to you and her comments. In order to protect the privacy of the addressees, I will change the surname to "Smith" and I will not reveal the city, State, or ZIP code.

Address labels:	Mrs. "Smith's" Notes:
Mrs. Lura A. Smith, Rt. 3, City, St. 12345.	Where does Senator —— —— get his addresses? Mrs. Lura A. Smith, Wife of County Commissioner, L. A. Smith, Rt. 6, Box 34, City, State 12345.
Mrs. Lura A. Smith, Rt. 3, City, St. 12345.	Old address.
Mrs. Maxine J. Smith, Rt. 3, City, St. 12345.	Old address and same person as Mrs. Lura A. Smith.
L. A. Smith, Rt. 3 B 26, City, St. 12345.	Old address.
Samuel L. Smith, Rt. 6 Box 34, City, St. 12345.	Married and moved out 10 years ago. The only correct address for the box of Mr. and Mrs. Lura A. Smith.
Mrs. Samuel L. Smith, Rt. 3, City, St. 12345.	Old address for son who moved out 10 years ago.
Mrs. Donald C. Smith, Rt. 6, City, St. 12345.	Donald is not married.
Mrs. Rebecca A. Smith, Rt. 6, City, St. 12345.	Rebecca is not married and moved out 3 years ago.
Mr. Stephen L. Smith, Rt. 3, City, St. 12345.	Old address.

If Senators will take a look at their own newsletter operations, they may be startled to find that this is not such an unusual occurrence. Perhaps we should ask ourselves if we might not be making an impression on our constituents quite opposite to what we intend. To illustrate, the particular newsletter that Mrs. "Smith" sent me contained an article on the need to restrain Federal spending. The last line on the first page contained the words, all in capitals, "the spending spree must end." Not inappropriately, Mrs. "Smith" marked those words with yellow highlighter.

I urge my colleagues to give this subject serious consideration so that the Committee on Rules and Administration may have the full benefit of their wisdom in the hearings on February 2.

I submit for the RECORD various articles with reference to this subject matter.

The articles follow:

[From the Baltimore Evening Sun, Sept. 13, 1982]

SENATORS' POSTAGE BILL SPURS HEARINGS

(By Michael J. Himowitz)

WASHINGTON.—The nation's 100 senators may be the most prolific correspondents in the country. So prolific, in fact, that during this election year they will send out 245 million pieces of mail—all paid for by the people who find the stuff in their mailboxes.

That's the equivalent of more than one letter for every man, woman and child in the country, and Sen. Charles McC. Mathias Jr., R-Md., who presides over the torrent of what he candidly refers to as "junk mail," thinks it may be getting out of hand.

Alarmed by a 70 percent increase in the number of Senate "newsletters" sent out this year, Mathias is expected to announce today that the Rules Committee he chairs will hold hearings on that most cherished of congressional perquisites—franked mail, which uses the congressman's imprinted signature in place of a stamp.

"Newsletters have been growing at an alarming rate," Mathias said. Although comparable figures are not available for the House, records indicate that the House spent almost $60 million on postage alone in the first half of fiscal 1982.

This means that Congress may far exceed the $75 million alloted for postage in its fiscal 1982 budget—despite the passage of a law last October that put some restrictions on the type of mail a congressman or senator may send.

The hearings are likely to open some sores as old as Congress itself. Congress established the franking privilege in 1789, the first year it met, to make it easier for senators and representatives to communicate with their constituents on matters of official business.

But almost from the beginning, use of the frank has led to charges that it has been used mainly as a tool for re-election

Until recently, for example, legislators often used their franking privilege to send constituents congratulatory letters for births, marriages, high school graduations and anniversaries. The lawmakers themselves agreed that this was a public purpose only by a great leap of the imagination, and new rules have put somewhat of a crimp in that kind of mailing.

The volume of franked mail increases markedly in election years. Postal Service reports show that in 1977, an off year, Congress sent out an estimated 307,030,000 pieces of mail.

In 1978, an election year, the number jumped to almost 448 million and dipped to 374 million the following year. In 1980, Congress sent out 512 million pieces of mail, but last year the number dipped to about 400 million pieces. It will be up again this year.

The $75 million postal budget for 1982 represented a 42 percent increase over 1981. There are a number of reasons for the huge leap in mail. Besides being an election year, this is the first year after reapportionment, so members of the House are spending money to introduce themselves to constituents in their newly-drawn districts.

Just as important, the nature of politics has changed drastically in the last few years, thanks to the growth of special interest groups with sophisticated, computer-directed mass-mailing drives which can generate thousands of letters and postcards to Congress on specific issues in a matter of days.

In 1970, Congress received only 15 million pieces of mail. But by last year, with special interest groups all over the political spectrum bombarding legislators every day, the incoming volume had grown to 300 million letters.

As a result, many Congressmen have installed sophisticated mass-mailing systems of their own, and the public is treated to the electronic spectacle of Congressional computers churning out thousands of computerized replies to letters generated by special interest computers.

In fact, a study by the Senate Rules Committee staff showed that only 12 percent of the upper chamber's outgoing mail represented responses to individual letters.

The bulk of the mailings in both houses were in two categories. One is the so-called targeted response, with congressmen using their own computers to take the political offensive. Both Mathias and Sen. Paul S. Sarbanes, D-Md., as well as many members of House, keep track of everyone who sends a letter on any subject.

With the computer, they can send out "Dear Friend" letters to a targeted group on any subject, whether it be to accountants interested in depreciation schedules, old house buffs interested in historic district laws, or environmentalists worried about polluted air.

But a much larger volume is generated by so-called "newsletters," which legislators send out to all of their constituents. Since 1973, House members have been allowed to send out the equivalent of six district-wide mailings a year, using the "Postal patron" designation.

This means that congressmen provide the Postal Service with enough newsletters to reach every home in the district (usually 200,000 to 250,000).

[From the New York Times, Sept. 24, 1982]

MATHIAS'S COMPLAINT ON MAIL COSTS

(By Marjorie Hunter)

WASHINGTON.—If United States senators had to buy and lick all those stamps, says Senator Charles McC. Mathias Jr., they might forfeit some of their mass mailings now costing the Federal Government about $31 million a year.

Senators, of course, don't have to do their own licking. Members of Congress have, free of charge, what is called the franking privilege for all except strictly personal mail. "But because we are not aware of our postage costs," said Senator Mathias, a Maryland Republican, "that does not mean that there are none. In fact, the Postal Service recently estimated that the postage costs for Congress as a whole will be $102 million this year."

As chairman of the Senate Rules and Administration Committee, Senator Mathias is so disturbed about this postal problem that he intends to hold hearings, perhaps early next year, if the Republicans retain control of the Senate in the upcoming elections.

The Senate does have some hardnosed restrictions on newsletters, but they concern content, not how many copies may be dropped into the mail slot. No page may contain more than eight references to any senator. No more than four pictures of a senator may be used in an issue. And senators are restricted from asking constituents for their votes.

Senator Mathias is not concerned about ordinary mailings in which Members of Congress respond to letters from constituents. This category of Senate mail totals only about 11 million pieces a year and Mr. Mathias considers it a necessary service.

What bothers him are mass mailings, the unsolicited newsletters and the like, which will add up to some 245 million pieces this year.

In addition to the estimated $31 million spent on Senators' mass mailings, Mr. Mathias says there are about $6 million in other costs, such as paper and printing. Furthermore, he reports, some Senate offices are inundated with mass mailings that have been returned because addresses were incorrect or addressees had moved.

Compared with some costs of Government, Senator Mathias said in a recent floor speech, $31 million might not seem like a great deal of money. But, paraphrasing Senator Everett McKinley Dirksen, Republican of Illinois, Mr. Mathias added. "A million here. A million there. And pretty soon you're talking about real money."

[From the Scranton Times, Sept. 30, 1982]

CONGRESS COULD EASILY SAVE $31 MILLION

If members of Congress stopped sending out mass mailings, chances are not a single complaint would be filed. Some of the lawmakers aren't content to confine their mailings to people in their home state. Those with national ambitions frequently direct their newsletters to newspaper, television and radio editorial offices, as well.

These are all self-serving messages, of course. Members of Congress are not in the habit of reporting their failures to their constituents. Every newsletter is designed to show the work of the legislator in the best possible light.

This practice might be tolerable if it weren't for the cost. Sen. Charles McC. Mathias Jr., R-Md., estimates the mass mailings are costing the taxpayers $31 million a year. This is on top of conventional use of the mail to correspond with constituents and others. The Postal Service has said that the entire postage cost for Congress this year is likely to be $102 million, not counting paper, envelopes and the time and equipment that go into putting newsletters together.

The Senator, who is chairman of the Senate Rules and Administration Committee, intends to hold hearings on the subject early next year provided he still holds the championship at that point. Irrespective of whether the Republicans or Democrats

have control of the Senate in 1983, spotlighting this waste of public money at a public hearing is an excellent idea. Members from both sides of the aisle engage in the mass mailings. Restricting the practice should be a bipartisan endeavor.

[From the Santa Barbara News Press, Oct. 1, 1982]

FREE IS EXPENSIVE

The late Sen. Everett Dirksen of Illinois once made a remark about government spending that has been borrowed by many others since his time: "A million here, a million there, and pretty soon you're talking about real money."

Sen. Charles Mathias Jr., R-Md., chairman of the Senate Rules and Administration Committee, borrowed it the other day. He is disturbed about $31 million, a mere drop in the federal bucket. That's the amount of the public's money that senators are spending each year to promote themselves in their constituents' eyes.

It's done with newsletters; it's a rare senator who doesn't have them compiled and mailed to the voters back home. These newsletters' purpose, at least originally, was to bring citizens up to date on some of the activity on Capitol Hill. But senators, naturally, tend to put their own actions in the best light.

The Senate has a few rules about these newsletters. No page may contain more than eight references to a particular senator. No issue may contain more than four pictures of the senator. No senator may use free postage to come right out and plead for votes. But the Senate has no restrictions on the number of copies of newsletters.

Whatever the total number, it keeps growing, and that free postage is now costing us $31 million.

Mathias is determined to find a lid. We're with him. A million here, a million there, and pretty soon. . . .

[From U.S. News & World Report, Nov. 1, 1982]

WHY IT'S SO HARD FOR OUTS TO BEAT INS

FREE MAIL, PHONES, TRAVEL STAFF—AN ENDLESS LIST OF PUBLICLY FINANCED ADVANTAGES GIVES INCUMBENT LAWMAKERS A BIG EDGE FOR RE-ELECTION

(By Joseph P. Shapiro)

With a vast array of taxpayer-financed advantages at their disposal, members of Congress this year are proving harder than ever to unseat.

Only 10 of the 423 lawmakers seeking reelection were defeated in the 1982 primaries, and, despite widespread voter dissatisfaction with Congress' overall performance, the overwhelming majority of incumbents can be sure of victory November 2.

While incumbency does not assure re-election—senators particularly have had to struggle in recent years—more and more members of both houses are becoming experts at using their positions and millions of taxpayers' dollars to bolster their chances.

Few challengers, for instance, can hope to win the name recognition of a lawmaker who uses free mail privileges and official expense accounts to blitz an area endlessly with newsletters, government publications or computer-generated "personal" mail.

No outsider can match an incumbent's easy access to a broad range of other campaign tools, such as free telephone service, subsidized broadcast studios, low-cost printing and mailing, free travel, and public-provided research and speech writing.

Larry Bates, unsuccessful in a Tennessee House primary, may not be far wrong when he complains: "An incumbent has a half-million-dollar advantage over a challenger."

What riles challengers most is the frank—a privilege that permits members to send mail under their signatures in lieu of stamps.

In the first half of 1982, Senator Jim Sasser (D-Tenn.) mailed 8 million letters, including thousands commending voters for registering.

One congressional aide's strategy for success: "Use the franking privilege. Keep your name in a household, and you can't be defeated."

Most members send out newsletters that extol the lawmaker's skill, power and influence in Washington.

Newsletters typically are written by the member's staff, financed by official funds and printed in a subsidized plant on Capitol Hill.

To be mailed free, newsletters must meet certain tests. References to a lawmaker, for instance, can average only eight per page. Still, some newsletters resemble campaign brochures; Representative Vin Weber (R-Minn.) emblazoned his with a campaign slogan until an opponent objected.

Costly perk. One sign of the frank's election-year value: Its use is up 73 percent in the Senate and 29 percent in the House this year, compared with 1981. For the full year, the cost to taxpayers will be an estimated record 102 million dollars, up from 49 million as recently as 1978.

House members faced with redistricting this year were allowed to send mail across district lines to homes in the new territory they will represent if re-elected. The Senate also planned to extend its mailing powers but delayed the step after critics publicized the extra cost: 89.1 million dollars a year.

When the frank is combined with office computers and computerized address lists, all acquired with public funds, lawmakers can turn mass mailings into highly effective promotional operations. Knowing that someone is a doctor, boat owner or union member, legislators tailor letters to each group.

Members also use their office funds unabashedly to impress constituents—from buying meals for visitors to sending out thousands of expensively printed calendars at year-end.

Multimillion-dollar House and Senate recording studios allow members, at cut rates, to tape television and radio shows for free distribution to stations back home. The result: Many get free air time in their areas, while rivals scramble to buy such exposure.

Another advantage is staff, which has doubled in a decade. Most staff work is noncontroversial—aiding people with everything from finding lost Social Security checks to arranging White House tours. Lately, however, the line between traditional casework and political promotion has blurred.

Some members, realizing a pampered constituent is a likely backer, now seek casework by setting up storefront or mobile offices. Representative Thomas A. Daschle (D-S.D.) has a toll-free hot line. Representative Jerry Huckaby (D-La.) gives the elderly free blood-pressure checks.

Challengers seldom can match an incumbent's ability to make news. One tactic is the district hearing—an expensive roadshow staged by a House or Senate panel. A week before his difficult September 11 primary, Representative Gillis Long (D-La.) led a House subcommittee to his district to hear constituents testify against proposed budget cutbacks at a federal health facility there.

Fund-raising edge. Incumbents have a far easier time filling campaign treasuries. So far in the 1982 races, they have netted 27.5 million dollars from interest groups' political-action committees, compared with challengers' 3.6 million dollars.

Officeholders defend their perquisites, noting that reforms have eliminated many abuses. Both houses, for instance, bar free mass mailings within 60 days of an election.

Still, reforms are easily skirted. Mail that does not meet the franking standard, for example, can be sent with stamps from office accounts.

The real test is the election record. It shows that since 1960, 92 percent of House members and 77 percent of senators seeking new terms have won.

What worries critics is that incumbents in their quest for security may be thwarting the electoral system. Says Fred Wertheimer of the citizens' lobby, Common Cause: "If the system tilts too much toward incumbents, it's no longer a competitive process."

[From the Congressional Quarterly, Sept. 11, 1982]

PROXY MAIL REPLACES COLD SWEAT LETTERS: COMPUTERS AND LASER PRINTERS HAVE RECAST THE INJUNCTION: "WRITE YOUR CONGRESSMAN"

Earlier this year, the motion picture industry was at work on a lobbying epic called the Home Recording Act of 1982 when a casting problem arose.

The moviemakers' trade group, the Motion Picture Association of America, had signed up a stellar company of lobbyists to push the bill (HR 5705), which would force makers of home video recorders to pay copyright royalties to the movie studios. But the industry lacked the all-important cast of thousands—the constitutents back Home—to make their production big box office on Captiol Hill.

The problem was, where to find large numbers of people willing to write Congress in support of an esoteric, highly complex copyright bill aimed at helping the not-so-impoverished motion picture industry.

The industry turned to Robert M. Smith of Targeted Communications Corp., a practitioner of what he calls "ad hoc constituency mobilization." And within a few weeks, by Smith's estimate, 20,000 letters and telegrams arrived in congressional offices. The letters appeared, at first glance anyway, to have been individually composed on the constituents' own letterheads.

"Using conventional notions of direct mail, this campaign should have been impossible," Smith said later. "It shows there are a lot of different issues people will respond to that, before, they hadn't even heard of."

What influence that mailing had is impossible to tell. The movie copyright bill is still a long way from being in the can, as the Hollywood folks say. *(Weekly Report p. 629)*

But the mass mail techniques used in the campaign gave a preview of politics' evolution from a mysterious art of "blue smoke and mirrors" into a science of computers, lasers and "geo-demographic targeting."

The use of mass mail to sell products, raise money and tout political candidates, as well as to lobby Congress, is familiar to anyone with a mailbox. What is less well-known is the state of the art—refinements that some political operatives claim are

making direct mail increasingly subtle, personal and effective:

Demographic targeting that enables interest groups to write only to people most likely to respond, with a message aimed at their special concerns. This is especially valuable for political candidates and for lobby groups that do not already have a built-in membership list.

Printing technology that allows messages to be customized while they are being printed at high speed, so that a computer-generated letter more or less resembles a personal message.

Proxy mailings, purportedly signed by individual constituents but actually sent in bulk by interest groups, sometimes without the constituent seeing the actual message.

BIRDS OF A FEATHER

The first step for a practitioner of modern postal politics is to identify people likely to respond to his pitch.

Following the lead of commercial advertisers, political marketers have sliced up the nation into ZIP code areas, voting precincts, census tracts and other fragments, and, using public data and polls, have tried to classify the tastes and behavior of each unit.

Perhaps the most sophisticated dissection of America was done by Claritas Corp. of Arlington, Va.

The company started 10 years ago with the 215,000 "block groups" and "enumeration districts" used by government census-takers. Each is a unit of a few city blocks, about 280 households. Using census data, polling and other information, Claritas classified each little chunk of America into one of 40 "lifestyle clusters," based on affluence, education, ethnic group, age, type of housing and other variables.

Cluster 28 (called "Blue Blood Estates" in the company's fanciful lexicon) includes neighborhoods of super-rich, white, college-educated suburban families. The clusters range on down through "Money and Brains," "Old Melting Pot," "Shotguns and Pickups" and "Urban Renewal" to the poor, grade school-educated, racially mixed rural neighborhoods of Cluster 6: "Hard Scrabble."

Those who use the system say people in a similar cluster tend to buy, vote and behave the same way, whether their neighborhood is in New Jersey or North Dakota.

"We like to say, birds of a feather flock together," explains Claritas founder Jonathan E. Robbin.

Over the years, the company's system has been used to peddle everything from chain saws to sex toys. More recently, it has begun to gain popularity for political fund raising and voter appeals and for "grassroots" lobbying.

"You can 'read' the attitudes of people," or at least the prevailing attitude in the cluster, said Matt Reese, a political consultant who uses the system for Democratic candidates. "Then you can send a dozen different versions of a message, all telling the truth, but talking about what the people are interested in."

Or as Robbin puts it: "You don't talk about food stamps to cluster 28."

Sponsors of a liberal cause, looking for someone likely to write or call a congressman, would probably aim for the "Bohemian Mix" cluster (often found in university communities) or "Young Influentials" (swank town houses on tree-lined streets)—two groups found to be predominantly liberal and quick to write.

Conversely, a lobbyist is unlikely to spend much postage on "Share Croppers" and "Hard Scrabble," clusters that "you couldn't move with dynamite," according to political consultant. Eddie Mahe Jr., who sells targeting advice to Republicans.

A GOP candidate seeking campaign donations will probably start out mailing to like-minded "Young Suburbia," then move to "Young Homesteaders," a cluster known for its persuadable swing voters.

By polling a sample of cluster households, politicians can estimate the views and likely votes of similar clusters across the country, and thus determine where to invest their advertising and get-out-the-vote dollars.

Reese gave the Claritas system its first political tryout in a successful 1978 campaign against a right-to-work law proposed in Missouri. In 1980, he used it in the re-election campaign of West Virginia Gov. John D. "Jay" Rockefeller IV; Reese claims a study showed the mailing gave Rockefeller a "lift" of 7 percentage points.

This year, the system is being employed in about a dozen political campaigns, Robbin said. So far, cluster targeting has been used in only a handful of lobbying efforts, mostly at the state level, but Mahe and Reese predict its use for that purpose will mushroom.

ATTENTION: CHARLTON HESTON

Smith, who broke off last year from the liberal fund-raising firm of Craver and Matthews to start his own company, used similar techniques to build mailing lists for corporate lobbying and campaign appeals. (His most prominent political client is presidential hopeful Walter F. Mondale.)

In the movie copyright campaign, Smith started with the congressional districts of several key committee members, then narrowed his focus to the "swing" voter precincts of gravest concern to the incumbents. Within those precincts, he identified neighborhoods with large numbers of cable television hookups, reasoning that residents were likely to be motion picture devotees. He concentrated on older and affluent families, who are believed to be most responsive to mail.

Smith sent each household a letter "signed" by actor Charlton Heston warning that a horde of "wealthy, powerful Japanese electronics firms" was flooding America with home video recorders that copy movies form TV. Unless the video companies are forced to pay copyright fees, movie producers might withhold movies from television, the letter threatened.

The package included another letter for the recipients to sign and sent on to their congressmen in their own envelopes. It also contained a form to be returned to the lobby group ("Attention: Charlton Heston") so the response could be measured.

Apparently not all of the recipients absorbed the finer points of the issue. One woman contacted about her letter to Congress told Congressional Quarterly: "I got something in the mail and just sent it in. Anything the Japanese are doing to us, I'm against."

Whatever their motives, however, they wrote. Smith said that 10 percent of the targeted households did as they were asked, about 10 times the normal response to a direct-mail appeal.

PACKAGING

To promote a big response, mass mailers like to "personalize" messages—addressing them to householders by name, adding paragraphs that cater to any known interests, and inserting useful, specific information such as the name of the person's congressman.

"The challenge is how to get a letter to look like a personalized letter when you're mailing a million of them," Smith said.

In the copyright effort, Smith used the Cadillac of the direct-mail business, a high-speed laser printer linked to a computer, to customize each piece of the package. Laser printers can snap out two pages a second while varying the text in many ways.

The letters that constituents were asked to forward to Congress on the copyright bill were printed on different colors of paper imprinted with the constituents' names and addresses to resemble personal stationery. The wording was varied slightly in hopes congressional offices would not immediately spot them as form letters.

Rep. Harold S. Sawyer, R-Mich., a swing vote on the House Judiciary Committee, received more than 650 of the letters and 100 telegrams.

"When it first started coming in, my reaction was, 'Gee, a lot of our constituents have really nice stationery,'" said Charlene L. Vanlier, Sawyer's legislative assistant. Then her father back in Michigan received his letter from Charlton Heston, and everything became clear.

"The congressman has been very amused by it," Vanlier said. She added that while the letters "did not influence him," he was impressed that the movie industry cared enough to buy such a slick campaign.

The mailing, incidentally, gave Sawyer a golden opportunity. Members of Congress who are nearing an election are strictly limited in the mailings they can send constituents at government expense; but there is not limit on answering mail they receive.

Sawyer suddenly found himself with a list of more than 700 constituents interested in his views. Cranking up his own computerized printer, he sent each one a "personalized" reply discussing the copyright bill (he wants several amendments) and adding a plug for another bill he recently supported to promote American exports.

Roberta Haeberle, legislative assistant to Rep. Don Edwards, D-Calif., who sponsored the copyright bill, pointed out that opponents also organized a mail campaign. Letters opposing the bill were displayed on counters in video stores for customers to sign.

Nonetheless, she added, the mailings from both sides "helped to get people focusing on the issue. Otherwise, I think no one would have paid the bill much attention at all."

To Smith, that is no small achievement: "On these esoteric corporate issues, that may be 75 percent of the battle—to get their attention."

Smith used the same strategy to generate some 70,000 pieces of mail for a coalition of telecommunications firms pressing legislation governing the breakup of American Telephone & Telegraph Co. (AT&T).

That campaign generated some controversy because Smith stamped each envelope with an imitation of the Bell System logo and the eye-catching warning: "Notice of Telephone Rate Increase Enclosed." The message inside said that unless the constituent helped lobby for the breakup of AT&T, phone rates could "double."

AT&T protested that the mailing was deceptive. But Robert Beckel, lobbyist for the AT&T competitors, said it was "pivotal" in getting the bill through a House subcommittee. He said it helped offset the pressure put on lawmakers by AT&T, which generated its own mail storm from shareholders and customers.

Despite Smith's effort, the bill (HR 5158) later succumbed to AT&T opposition. *(Weekly report p. 1773)*

Beckel said his group paid about $200,000 for Smith's help, which points up one reason such packaging is still in limited use. The cost—from 50 cents to 70 cents per piece of mail—is extremely high, and Smith concedes it is best suited to well-heeled corporate clients.

Less expensive methods of personalizing mail are now widely available through various marriages of the computer and the printing press.

Webcraft, a leading direct-mail printer, uses "ink-jet" presses that can vary the text of a message in midprinting. Webcraft executive Robert W. Ruddero said the technique is nearly 10 times as fast as laser printing, and cheaper. While the result is not so slick—the typeface would not be mistaken for something produced on a constituent's typewriter—it still enables mailers to address messages to recipients by name and to include customized information such as names of their representatives in Congress.

Bruce Eberle, a prominent conservative mailer, said he personalizes smaller batches of mail using a computerized impact printer—a slower, cheaper process technology buffs consider old-fashioned. Laser and ink-jet, he contends, "are really enhancements. I don't consider them great technological leaps forward."

Stephen Hayes, a printer who uses a laser press, also cautions that no matter how sophisticated, mail has its limits. "The best technology in the world cannot make a dead issue look like it's alive, or a badly written letter look like it's well written," he said.

Even with the speediest presses, producing a mass mailing and getting the returns back to Congress can take weeks. The mail may hit Capitol Hill too early or too late to help.

Some interest groups solve that problem by collecting the proxies of their supporters in advance.

The National Education Association (NEA), for example, has a well-regarded lobbying apparatus of 1.7 million members, many of whom respond to the association's calls for mail and phone calls. But much of the activity in Congress occurs in the summer, when teachers are on vacation.

So NEA has collected permission from 100,000 teachers to sign their names to telegrams on issues ranging from tuition tax credits to Social Security. The telegrams pour in when they are needed, whether the teachers "signing" them know it or not.

Smith's mailing on the copyright bill employed a similar option. A post-script in the Charlton Heston letter noted, "Because time is short, you might choose to call us toll free . . . and authorize us to send, at no cost to you, a public service message on your behalf to your Congressman."

Mailing letters on behalf of someone else, however, is not without risk.

During deliberations on the recent tax bill, for example, Maine's senators began getting a stream of telegrams from grocers back home opposing an increase in the cigarette tax. When GOP Sen. William S. Cohen replied, some constituents complained that they had never written. Several of Cohen's letters come back marked that the constituents had died.

The telegrams were sent by the Tobacco Institute, using a list supplied by the Maine Retail Grocers Association. According to an official of the grocer group, the association directors voted to oppose the cigarette tax, then sent its 350 members letters saying their names would be used unless they objected. Only two did, and the rest of the names were turned over to the Tobacco Institute.

"When you get a batch of post cards, you usually assume they were not wholly spontaneous," said Cohen's press secretary, Robert Tyrer. "But telegrams—you generally assume somebody woke up in a cold sweat and called Western Union."

Tyrer said henceforth Cohen's office will view telegrams with greater skepticism. That does not mean they will be ignored, however.

"Generated mail counts maybe half as much as a personal letter, but it still gives you an idea of how many people a group can mobilize," he said.

[From the Washington Post, Sept. 23, 1982]

THE "INS" HAVE IT—PERQUISITE POWERS HELP TO KEEP INCUMBENTS IN OFFICE

(By Saundra Saperstein)

In the heat of this summer's political wars, Rep. Stanford E. Parris (R-Va.), fighting to retain his congressional seat, sent out a constituent newsletter to the 240,000 households in his district. Printed and mailed at government expense, it listed several "misstatements" about his record and next to them "the truth" according to Parris.

Parris' rival in the race, Herbert Harris, says the newsletter was a direct response to charges he has made against the congressman—in effect, a piece of campaign literature mailed at taxpayers' expense.

Parris says the letter talked about "the issues of the day. What else would we talk about? We don't send newsletters just to chitchat."

Whoever is right, one thing is certain—only an incumbent could send a letter to 240,000 voters for free. It's one of the perquisites of office, the powers that make it hard to knock a congressman off the Hill. Indeed, political scientist Normal Ornstein of the American Enterprise Institute has found that 90 percent of incumbent congressmen who ran for office since 1960 have been reelected.

"If you can't get elected as an incumbent," said one longtime congressional aide, "you're either crooked or you're in the middle of a Depression with your party in power. You've got to be in trouble to lose with all the advantages they build in for you."

Though that's an exaggeration, the powers of incumbency are potent, and it's hard to find a Washington-area member who doesn't indulge in their use.

When Social Security was American's hottest topic, Rep. Roy Dyson, a freshman Democrat from Maryland's Eastern Shore, used his office expense fund to produce a low-cost television show on the problems of the elderly for the voters back home. When some folks in Prince George's County were lobbying for a new stamp to commemorate the nation's "first balloon flight," which took place in Bladensburg, their representative, Steny Hoyer, commended them in the CONGRESSIONAL RECORD and made sure they got copies of his remarks.

In theory it's all done in the name of public service. But members of Congress, like the president, have an ability to command attention that their challengers can only dream of matching, and no one argues that it hurts your reelection chances to get your face on television or your constituents' names in the official record of congressional affairs.

Rep. Michael Barnes (D-Md.), for example, just happened to schedule a press conference to accept a citizen group's nuclear freeze petition on Sept. 15—the day after the Maryland primary. The fact that he had just acquired a Republican opponent, Elizabeth Spencer, was probably more than a coincidence.

The most practical advantage of incumbency, observers say, is the congressional privilege to send an almost unlimited amount of official mail by using the congressional "frank" instead of a postage stamp. In the final three months of 1981, the House of Representatives spent more than $1 million to send out franked mail.

Earlier this month, as the preelection cutoff for mass mailings approached, the Longworth and Rayburn office buildings began to look like warehouses. Shoulder-high stacks of newsletters lined the cavernous halls, in a boggling assortment of "Reports to the People" and questionnaires asserting that your congressman "wants to know your views."

Upstairs in the Cannon Building, the staff of the commission on mailing standards was poring over a deluge of last-minute letters, scrutinizing them for any violation of guidelines like the one forbidding a member's name, or the words "I," "me" or "the congressman" from appearing on the average more than eight times per page.

Acknowledging the power of the mails, the House has passed a regulation cutting off mass mailings 60 days before the general election. But the rule has a loophole big enough to drive a mail truck through.

Mass mailings are "deemed to be in compliance" if they arrive at the House Folding Room at least 62 days before the election, with instructions for "immediate dispatch." But with the mountains of mail to be processed, congressional aides say it is anybody's guess just when it all gets out.

A printer delivering one congressman's letters with only hours to spare before the midnight Sept. 1 deadline speculated that many members try to get in as late as they can, so the mail will hit their districts closer to Nov. 2.

Parris, whose final mass mailing went to the folding room on Aug. 31, said it would "be less than candid if I said there wasn't some truth to that."

Indeed, the seesaw battle between Parris and Harris, each of whom has turned the other out of Congress once, illustrates the most ingenious uses of the mails.

During the 1980 campaign, according to a Parris aide, then-congressman Harris "dropped a newsletter on us in October. He must have sent it down the last day." To that, Harris responded demurely, "Any letter we sent out went to the folding room on time. After that we lost control. I don't remember it being an issue."

Another potent power of office is instant access to the people in Washington who get things done, from the bureaucrat who can answer a constituent's question to the president who can grant a congressman's fondest wish.

As a top White House aide from the Carter administration explains, "The most prestigious thing is to let the congressman come in and make a presentation to the president, and then let the press know that the president has agreed to do whatever inane thing the congressman wants for his homestate."

Better yet is to have the president respond to an important constituent concern. Last December, for example, when Presi-

dent Reagan was set to end the Carter administration's policy of charging federal workers fees for previously free parking spaces, he called three local Republicans in for a chat.

When Marjorie Holt of Maryland and Frank Wolf and Parris of Virginia left the Oval Office 15 minutes later, they walked out with the announcement that Reagan was abolishing a program that had infuriated a huge number of their constituents.

Soon, the three members were announcing the decision to the White House press, their names now indelibly linked to the good news.

"Certainly it's helpful to be able to go down to the White House and make your case," said Wolf, who has good reason to know.

Last April, on the morning after Wolf Trap burned, Wolf happened to be having breakfast at the White House. He started lobbying Deputy Chief of Staff Michael Deaver for federal funds to rebuild the performing arts center.

Wolf was named to the committee to rebuild the park, and when the federal grant was announced, the congressman was there at the press conference.

Of course, even the best-laid plans do not always work out completely. When Wolf held a community hearing this month to discuss opening up the Dulles Access Road to area residents, his Democratic opponent, Ira Lechner, had someone in place to sign him up as the first witness. Lechner had his say, and not incidentally, managed to grab some valuable air time on the evening news.

Despite the occasional one-up-manship by a challenger, incumbents generally have the upper hand. Their annual staff allowances of $352,000 and "official expense" allowances of $110,000 on the average can buy an awful lot of constituent service.

Dyson was able to use about $300 from his official expense account to tape his Social Security forum in the fully equipped recording studio available to members. Then he bought $325 worth of air time on the CBS affiliate in Salisbury, the largest city in his district.

The half-hour show aired twice, most recently on Aug. 15 sandwiched between Sunday sports and CBS network news, according to a station official. "This is basically a public affairs show," said Carol Oldach, sales coordinator for WBOC-TV. "But let's face it, it does him good to be in the public eye."

Oldach said the station did not have to give Dyson's possible Republican opponents equal time because the show was a public affairs presentation and Dyson made no mention of running for office.

Members can also use their official expenses to put together lists of constituents interested in specific subjects. "Just call it the power of the mailing list," said the man running one challenger's campaign.

Each time there's an important development in that area, the congressional computers spew forth "Dear Friend" letters that open with the line, "Knowing of your interest in" the environment, education or whatever is appropriate.

Congressional action on federal retirees triggers about 1,200 "Dear Friend" letters to Barnes' Maryland constituents. A new twist on Dulles Airport, and Wolf's computers start churning our missives to about 1,000 Northern Virginians. Comes a development on federal workers, and Parris' system whips off as many as 6,000 blue-and-white "Federal Papers."

And if members want to augment their own staffs, the federal agencies are just down the street. When Parris wanted to send a Social Security pamphlet to the 40,000 senior citizens in his district, he borrowed someone from the Social Security Administration to help put it together, an aide explained. It cost about $2,000 to print copies of the handsome blue booklet that recently appeared in doctor's offices and senior citizens' mailboxes emblazoned with the message, "Compliments of Your Congressman Stan Parris."

If consumer brochures are popular back home, then a congressman may draw on the 10,000 offered free each year to each of the members by the Department of Agriculture.

In fiscal 1981, the department spent a little over $1 million to print the publications that cover everything from "Beekeeping for Beginners" to "How to Buy Poultry." Last year, like many of his colleagues, Hoyer made the list available to his constituents and funneled more than 1,100 requests for the books back to the department.

Despite these built-in powers, Congress members are quick to point out that incumbents are not invulnerable. Sometimes they lose, particularly in the politically volatile Washington area.

That, congressional observers say, gives members even more impetus to exercise the powers of office. "All a congressman needs is one example of the incumbent who loses," said political scientist Ornstein, "and they say, 'There but for the grace of God go I.' "

[From the Arizona Republic, Oct. 28, 1982]

"FRANKING"—SENATORS' MAILING COSTS GO UP—AND UP—AND UP

WASHINGTON.—Sen. Jesse Helms remembers touring the Senate printshop shortly after he came to Washington and seeing the high-speed presses "going lickety-split" on one prominent senator's newsletter.

As the newsletters rolled off the presses, the North Carolina conservative was told that nearly one million copies would be printed and mailed on this one job alone.

Later, inquiries to the General Accounting Office revealed that the newsletter cost around 26 or 27 cents per issue. This spurred Helms to offer legislation to restrict the Senate's publishing binge. It was never approved.

More recently, one of Helms' colleagues, Maryland Sen. Charles Mathias, also has expressed anger over excessive newsletter costs that, he suggests, are getting out of control.

In the megabucks world our lawmakers live in, the Senate's direct-mail bill is relatively small potatoes.

Nonetheless, says Mathias, senators "will send out 245 million pieces of mass mailings" this year, 75 percent of which are newsletters.

The Senate's mass mailings, not including letters responding to individual constituents, will cost taxpayers about $31 million in postage—nearly one-third of Congress' total annual postage bill of $102 million.

But the postage bill is only a part of the Senate's promotional-mailing costs, a study by Mathias' Rules Committee now reveals.

Add another $6 million for paper, printing and mailing lists, for a total of $37 million yearly.

Then include the payroll costs for about 70 Senate employees who help get the newsletters printed and bagged for mailing.

Add, too, the senatorial staff employees who write the newsletters for their bosses and maintain the mailing lists. It mounts up.

This is why Mathias says that there is "an alarming rate of growth" in the use of mass mailings by senators.

In fact, he says, "This year's total is 73 percent higher than last year's," and last year's was 20 percent higher than the previous year's.

There are about 83 million mailboxes in America, and the figures Mathias has compiled show that the Senate alone is mailing out nearly three pieces per mail box.

In one case last year, Mathias says, "the combined mailings of both senators from one state amounted to more than 12 pieces per mailbox."

In another state, a senator sent out more than 6 million mass-mail pieces, even though his state has only 1.7 million mailboxes.

But this is an election year, and senators begin to run early, using the incumbent's privilege of unlimited postage to saturate the voters with promotional mailings.

One senator sent out a staggering 13 million pieces of mass mail last year, while another mailed 8 million pieces in just the first six months of this year, Mathias reported.

So, the next time you get a batch of mass mailings from your senators or representative, don't forget that you are paying for them—and paying plenty.

"Remember," says Mathias, "every mailing of 1 million newsletters costs taxpayers $150,000."

In the meantime, the Maryland lawmaker is making plans to hold hearings on the Senate's direct-mail abuses sometime early next year.●

THE PEOPLE OF VERMONT

● Mr. LEAHY. Mr. President, on Tuesday evening, December 7, 1982, on network television, the entire country had the unique opportunity to visually visit Vermont through the Andy Williams "Early New England Christmas Show." The program which was filmed last March at the Shelburne Museum in Shelburne, Vt., was an exciting combination of early Americana and good deal of hard work and participation by the people of Vermont.

Andy Williams marshaled an impressive cast with Aileen Quinn of the movie, "Annie," Dorothy Hamill, Dick Van Patten, and James Galway. Vermont talent was added with the Beaudoin family, the Green Mountain Volunteers, Erik Johannson, the University Choral Union, Austin Hand Bell Choir, and the many extras, the people of Vermont.

Vermonter Dee Pomerleau as location coordinator and production assistant located the talent and local support, working along with Ben Mason, director of the Shelburne Museum, and Bob Banner Production of Los Angeles, Calif.

The product was a joyous view of what Vermont was and what it continues to be. The landscape, the people working together, the museum, which so impressively speaks of our past, all were put together with great care.

What a joy it was to see the credits include: "The People of Vermont."

It was a most enjoyable hour and reinforces how proud I am to represent this unique State, Vermont.●

HOW TO FIX SOCIAL SECURITY

● Mr. HOLLINGS. Mr. President, one of the greatest difficulties facing this country today is the impending crisis with the social security system. The program's three trust funds threaten to run dry by late next year unless we do something about it now.

The problem is a difficult and complex one, but not impossible if we in Congress show a willingness to set aside partisan considerations and deal with it responsibly. Thirty-six million Americans currently receive benefit payments from social security. Since its inception in 1935, it has been one of the most successful and morally well-founded of the New Deal, and perhaps all Federal, programs.

But unless some action is taken, the system will soon be bankrupt, facing a deficit of up to $200 billion by 1989. Its importance to millions of elderly and other Americans is too great to treat it as a mere political football, or simplistically suggest massive cuts in benfits as an easy cure. Intelligent discourse on the subject has been sadly lacking on both sides of the aisle.

Andrew Tobias, a noted financial writer, has provided one of the few exceptions with the commonsense and clearhead solutions he proposed in the October 31 issue of Parade magazine. While I do not necessarily agree with everything he has to say, he depicts the problem succinctly and accurately, suggesting alternatives we in Congess should look at closely as we begin to take up the vital issue of social security funding again. This is a problem that can be solved, if only we have the will and bipartisan spirit to do so.

I ask that Mr. Tobias' article be printed in the RECORD.

The article follows:

How To Fix Social Security

(By Andrew Tobias)

There's a dirty little secret about Social Security, and it isn't that the system's going broke. Everybody knows that. The secret is that there are some simple, fair and relatively painless ways to solve the problem. Almost nobody knows *that*, because our elected representatives—who do know it—would rather make political hay than lead the nation. "Everything has been geared to the first Tuesday of November," House Speaker Tip O'Neill candidly told a reporter this summer.

THE PROBLEM

In 1949, there were 16.5 workers paying into Social Security for every retiree or surviving spouse drawing money out. The maximum tax on wages was $30 a year.

Today, there are just 3.2 workers supporting each retiree, and the maximum annual tax—$174 as recently as 1965—has risen to $2171. Employers pay an equal sum, which they then add to the price of their products. So we wind up paying that $2171, too.

And it gets worse: In 30 years, there may be barely two workers to support each retiree.

In large part, the problem—if you can call it a problem—is that people live longer than they used to. In 1940, a 20-year-old woman was expected to live to be 71; now she can expect to live to 80. That's wonderful, but look what it means: Instead of collecting Social Security for six years, say, she may now collect it for 15.

Longevity was expected to increase a mere six months during the 1970s. Instead, due largely to a decline in fatal disease and strokes, it increased 2.8 years! This is surely no one's "fault"—but it does require adjustments to the Social Security system.

The money we pay in Social Security tax is not invested for retirement, even if some people were gently misled into thinking so. It is paid right back out to the elderly—our parents and grandparents. The young assist the old on the assumption that their young will do likewise. It is a contract between the generations.

The idea was never that this program would provide a full and comfortable retirement—that was the responsibility of the individual. Social Security was designed to assure the bare essentials. Yet, in the last dozen years, the benefits a worker gets upon retirement have jumped from 34 percent to 55 percent of his prior year's wages.

So not only are there far fewer workers to support each retiree—each retiree costs more to support!

People say they could do better saving for retirement themselves than paying into Social Security. Quite true. But who, then, would pay benefits to today's senior citizens? Should they be allowed to starve? Like it or not, we are paying into the system not for our own retirement (our children will do that) but for our elders'. And at the rate things are going, the system is going to fall tens of billions of dollars short over the next few years and more than a trillion dollars short early in the next century.

THE SOLUTION

Conceptually, the situation couldn't be simpler. The Social Security system is paying out more than it's taking in. That's all. To fix it, we must either take in more (raise taxes) or pay out less (cut the growth or benefits).

Those who favor raising taxes will be delighted to know that increases are already on the way. The 13.4 percent bite we and our employers pay on wages up to $32,400 is slated to keep rising. But even with those hikes, mammoth deficits are projected. To raise taxes still further seems almost too much to bear. Instead, what most people agree must be done is to slow the growth in benefits. Not cut them, just slow their growth. These three changes would more than suffice:

(1) Raise the retirement age from 65 to 68—gradually, over the next 36 years. One month would be added to the retirement age each year. it would rise to 65-and-one-month in 1983, to 65-and-two-months in 1984, and so forth. Twelve years from now, it would reach 66. (Early retirement, likewise, would have risen by a full year from 62 to 63.) In 36 years, the retirement age would have climbed to 68.

Current recipients would not be affected one whit.

Naturally, it would be nice if we didn't have to do something like this. It would be nice, indeed, if we could lower the retirement age. And double benefits! But we can't afford to.

Indeed, as sacrifices go, perhaps this one—raising the retirement age for today's 30-year-olds from 65 to 68—is not so great. But its impact on the system would be enormous. People would eventually be paying into the fund for three years longer and withdrawing from it three years less. This one change would go about two-thirds of the way toward solving the problem all by itself.

Yet when House Ways and Means Subcommittee Chairman J. J. Pickle was drafting such a bill, to begin phasing in about 1990, Tip O'Neill told him to stop. According to Time, O'Neill didn't want voters to think the Democrats were tinkering with Social Security.

(2) Subject benefits to federal (but not state or local) income tax. People say, "Now, wait just a damn minute. I paid into that system for 30 years (or my spouse did)—how dare you tamper with what's rightfully mine?!"

Nonsense. In the first place, that money is gone. It went, with at least the tacit consent of us voters, to support prior generations.

But even putting that aside, today's average retiree can expect to collect something like five times what he or she paid into the system (even taking into account the interest that money would have earned). The most anyone retiring in 1982 could possibly have paid into the system since 1937 is $16,937. On average, that will be paid back in just a year or two. The next 20 or 30 years are gravy.

If benefits were taxed, many recipients would have no tax due. Only those with outside income would pay any tax. And why not? Today's 20- and 30-year-olds can be expected to help the elderly who need help. But why should they be taxed to support the elderly who don't need help? If Social Security benefits were taxable, then those with less need would simply "return" some of the money by paying taxes on it. Crediting that money to Social Security would reduce the projected shortfalls dramatically.

Consider a widow whose husband contributed a total of $2086 to the system over his lifetime. She has been receiving benefits—currently, $5520 a year—for 25 years. She also has a trust fund and investments that pay her $16,000 a year. She is in no sense rich; but given the nation's economic condition, would it be cruel or unfair to tax her Social Security check? I hope not. She's my grandmother.

Still, to ease its impact, any such change could be applied only to future recipients and to current recipients with incomes in excess of, say, $30,000 a year.

(3) Suspend the automatic cost-of-living adjustment for one year (and one year only). Social Security recipients saw their untaxed benefits rise 40 percent over the last three years, while the wages of workers taxed to pay those benefits rose just 30 percent. A one-year moratorium on the cost-of-living adjustment would have only a small effect on current recipients but would do wonders for the financial health of the system.

Other steps could be taken as well. One would be to return to the fold those who have been exempted from participating in Social Security (government employees, for the most part—funny how well they manage to take care of themselves). But the three proposals above would solve the problem. Indeed, they would more than do the trick.

confirms Robert J. Myers, 70, executive director of the National Commission on Social Security Reform (due to make its report to the President by the end of the year).

Yet, so vocal have our representatives been in politicizing the problem rather than dealing with it that two-thirds of Americans under 45 don't believe Social Security will exist when they retire. There's no reason why it shouldn't; benefits might just start a little later. (In the meantime, believers and nonbelievers alike would be smart to join the tens of millions who already have set up Individual Retirement Accounts.)

Putting Social Security on firm ground would do something even more important. It would signal the financial markets that ours is a country that can cope with its future. Right now, there is considerable uncertainty among investors here and abroad of our ability to do so. (Or else why would long-term bonds that promise 12 or 14 percent interest go begging?) Uncertainty over the future, together with gargantuan projected deficits, translate into murderously high interest rates. And murderously high interest rates are killing the country.

Editorialized The Wall Street Journal: "The elderly are no different from anyone else in this democracy. They are willing to be fair if the issues are explained honestly. The longer the necessary Social Security decisions are postponed, the worse the problems will become and the more unpalatable the remedies. Everyone, young and old, understands this, except, of course, members of Congress."

If you want to have a real impact, rip out this article and send it to one of your elected representatives. Quick.●

PAY VERSUS FREE TV

● Mr. HATFIELD. Mr. President, the entire issue of pay TV versus free network programing has been controversial throughout the 97th Congress. We have heard the hue and cry from the national networks, and from the cable industry, that each is trying to put the other out of business. Only last week, the battle was fought again in the Appropriations Committee markup of the continuing resolution, despite my unhappiness with legislating on appropriations bills. It would be my hope that in the 98th Congress the differing sides will be able to compromise and work out an agreement that will benefit both groups, and the television watching public.

Part of the upcoming controversy will be the effect the FCC will have on the competitive climate for both groups. TV regulations are complex, archane, and controversial. I have no illusions of understanding them completely. Hopefully, the FCC will be able to accommodate both free and pay TV in their future deliberations.

At the request of a prominent broadcaster from the State of Oregon, Mr. Dean H. Woodring of KGW-TV in Portland, I submit for the RECORD his perspective of FCC involvement in one part of this controversy.

The material follows:

THE UNSETTLED FUTURE OF FREE TELEVISION

HISTORY

The blurry images flickering on the screen in the early 1920's were far from promising. The kinescope, the first primitive television system seemed, at best, an improbable technological fantasy of its American inventor, Dr. Vladimir Zworykin.

But in the intervening half century, the enormous popularity of television has transformed it into a vital entertainment and information medium. In the process, free television has grown and expanded and has dramatically changed the American experience.

Today, there are competing forms of pay television media available to those who can afford them. These new pay services are rapidly entering the market, competing with free television for audiences and programs. Fair competition, of course, is a healthy part of our free enterprise system and the public can benefit from it.

But the competition between free and pay TV is not fair. Discriminatory government regulations are moving popular programming away from free TV—where they have been available to all Americans. Increasingly, these important programs are going to pay TV, where only a fraction of the public can afford to watch.

This backgrounder will show that an increasingly dark shadow looms over the future of services and programs Americans have come to expect from free television. It will advocate repeal of two government regulations, the financial interest and syndication rules, which prevent free television from competing fully for programming and give preferential treatment to pay television. Repeal of these rules will help ensure a healthy future for the free television service enjoyed by the American viewer, a service now hampered by these outdated federal rules.

Free Entertainment and Sports

To a great extent, the forty years of growth in television viewing have been dependent on two important factors. The first is the wide variety of programming which has been offered over the years to the American public. The second is the instantaneous access to entertainment and information that television has provided free of charge to the public. Taken together, these two factors led to the unprecedented success of Dr. Zworykin's improbable invention.

The array of entertainment available free to the American public has been, by any standard, impressive. In comedy, it has ranged from Milton Berle's unpredictable antics on the live "Texaco Star Theatre," to the decade-long adventures of the team of misfit surgeons in M*A*S*H. Through these and countless other programs, principally from the television networks, the American public has been treated to a feast of American comic genius. The availability of dramatic entertainment provided by free nework television has been equally impressive. Programs have ranged from the critically acclaimed "Playhouse 90" to the unprecedented undertaking of the series "Roots." The American viewing public has come to take for granted these free programs as well as major sporting events such as the Olympic Games, the World Series, the Super Bowl, the NBA playoffs and many others.

Free News and Information

Television has also come to provide much of the nation with near-instantaneous access to major local, national and international news and information events. A recent poll indicated that 64 percent of the American population gets most of its current news from television broadcasts, local and network. As a result, in the modern age television has become the critical method of transmitting vital public information to the American people.

Again, this information, important to our democratic society, has been provided free of charge to the public.

The tradition of public service began with the 1932 Roosevelt-Hoover election, and has dramatically expanded over the years. It has included in-depth coverage of national political conventions and campaigns, presidential debates, local public service programs, the McCarthy and the Watergate hearings, debate on the House floor, morning and nightly news telecasts, space exploration, and countless others. This unprecedented availability of free news and information has transformed the American citizenry into the best and most immediately informed society in human history.

Free television can be improved. Access for varying points of view should be expanded. Broadcasters must continue to be increasingly responsive to their public service obligations—obligations not shared by their pay competitors. But there can be no doubt that today free televison is basic to the democratic process and the exchange of ideas.

REPEALING UNFAIR REGULATIONS

The extent of entertainment and information available from free television is being threatened. A recent study shows that pay television revenues will exceed that of the three television networks by some $3 billion by the end of this decade. But even now, significant programming is being purchased by pay TV.

Sports

Major sporting events, such as important boxing championships and some major league baseball games, have already been lost to pay television. Free television was outbid by cable TV for the headliner collegiate basketball game of the 1982-83 season, Virginia versus Georgetown. In the most recent negotiations, pay TV outbid the networks for the Wimbledon Tennis Championship in England. (Wimbledon chose to stay with free TV for the present.) At $190 million, a company bidding largely for cable rights submitted the second highest bid—more than NBC or CBS—for the 1984 Olympic Games in Los Angeles. In addition, this year's NFL players' strike reflected in part a desire to share in the future profits from pay television buying rights to professional football games.

These are only a few of many examples, and they add up to a disturbing trend. According to a recent edition of the U.S. News and World Report, "Fewer games will appear on free television as pay and cable TV gradually take over."

This movement of programs to pay TV has been accelerated by the Federal Communications Commission's (FCC) financial interest and syndication rules. Under these regulations, adopted over a decade ago, the three networks are prohibited from receiving any profits from later broadcasts of their programs after the intitial network viewing. As a result, free television is restricted in the amount it can spend to buy quality programs. Free television also cannot participate fully in the development of television programs from new suppliers. Pay television has no such restrictions.

The FCC in the past decade has made revolutionary decisions in a dramatic effort to deregulate the communications marketplace. Cable television is already in 35 percent of U.S. television homes. Beyond basic cable, there also are pay cable networks which are available only to those who can afford the additional payments. These pay cable networks have the resources and the leverage to compete successfully for high cost, high quality programs.

Movies and Series

The fact is that these companies can outbid free TV for much more than just sports events. Increasingly the first telecasts of new motion pictures will no longer be on free television, but on pay TV. Pay cable, for example, spent $80 million for the rights to first run movies in 1980 compared with $30 million paid by free networks.

The box office hit, "Star Wars," was telecast in September, but only those pay-per-view subscribers who paid an $8 viewing charge were able to see it. Pay networks are bidding to take primetime series, such as "Taxi", and production has already begun on other television series.

The FCC rules have placed only free TV at an unfair disadvantage. It is unrealistic to believe that the recent, enormous success experienced by pay television will not limit the economic resources traditionally available to free television.

This limitation of buying power will certainly affect the extent and quality of programming available free to the American public. And while individual estimates may vary, all agree that pay television will increasingly draw popular programs away from the free television market. This could have the effect, even if unintended, of forcing the cutback of existing free entertainment and sports program services. It may also limit the development of new and innovative programs and may force reductions in the news and information services now available free to the general public.

The free television networks spent some $486 million on news and public affairs in 1980. This was more than twice the amount spent in the previous Presidential election year. But millions are lost by the free TV networks during coverage of special news and public affairs events such as the Presidential primaries, the war over the Falkland Islands, and the recent crisis in Lebanon.

As pay TV's profits increase, at the expense of free TV, the networks may be forced to cut back public affairs programs which lose money. This cutback, combined with the increased costs of pay TV, would have a serious effect particularly for lower income Americans.

FREE TELEVISION AND THE POOR

How will this occur? Costs for those receiving pay television generally range from $10-$40 per month depending on the services provided. These costs can be expected to increase in the years ahead. Middle and upper income American families may be able to afford the additional costs of special sports, movies, and entertainment events, the rights to which are increasingly being purchased by the pay television companies. But lower income Americans, and in the future even middle income Americans, may have difficulty affording a substantial monthly entertainment and news bill, in addition to fuel, food, clothing and other essential expenses which continue to increase. A significant percentage of senior citizen and minority groups, for example, may well not be able to afford the additional cost of pay television.

Worse yet, there is evidence that pay television technologies have, in some instances, been reluctant to provide delivery of their services to lower income areas. New York City has been engaged in a running battle with cable companies over service to the Bronx, a lower income borough. Pay television interests are now lobbying hard in Congress for legislation aimed at vastly restricting local government control over their actions.

The result? Even lower income Americans who want to direct their limited incomes to pay TV may not have the option at all in the future. Or, the amount they may be able to spend could be too little for the many different movies, sports, or other pay services, each of which may require a separate payment. It may not be economically viable to provide poor areas with pay technologies. This could cause a splintering of society, with the poor unable to participate in a shared communications base. This could occur even as free TV is being forced to cutback on costly public affairs programming.

The American public as a whole will be disserved if some elements of society don't have access to a common thread of information and entertainment programming. As our broad-based communications system becomes splintered, a loss of understanding among social groups also may occur. The danger is that these outdated federal regulations will increasingly, and unfairly, serve to isolate lower income Americans from information vital to our free society.

The movement of first-rank programming from free, advertiser-supported television to the pay services has a broad impact on society. Even those who can afford exclusive pay television will ask themselves: why should I have to pay for what I once got for free? They might also ask why the federal government, through its financial interest and syndication rules, is helping to bring about that result. Why should the government favor pay over free and the unfair loss of television network programming to the public?

NEW COMMUNICATIONS GIANTS

The rules have had a special irony. They were imposed despite the fact that all three networks combined had less than 10 percent of the United States syndication market in the period before the rules were adopted.

The rules were imposed in the name of increasing diversity in the television industry. But quite the opposite has occurred. Since the rules were imposed against the networks, there has been an ominous and steady increase in the concentration of power in pay television and in the industry that produces programs for network viewing.

Concentration of wealth and power among companies involved with pay television is substantial. For example, according to a recent report in Business Week, a single cable TV company, Home Box Office and its sister-service, Cinemax, both subsidiaries of Time, Inc., control nearly 57 percent of the total pay television market. In the entire history of free television there has never been a company which so dominated an audience.

In 1970, according to one network's study, 54 percent of that network's primetime entertainment series programming was supplied by eight Hollywood-based production companies. A decade later, that figure had risen to 97 percent.

Proponents of free TV believe that, by repealing the rules, the three networks will be able to finance smaller independent production companies which can then provide a degree of competition for the concentrated groups of major companies now providing most of primetime network programming. This will add to diversity, and creativity, in the television industry.

CONCLUSION

Free television is facing the greatest challenge in its many years of contributions to America's culture and society. The challenge of this competition may be healthy, but only if free and pay TV are placed on a fair footing in their ability to invest in programs. If not, the federal government bias for pay television will increasingly diminish the service now available to all Americans.

The financial interest and syndication rules are an unfair, unnecessary, and damaging burden to free television. These rules are regulatory relics of a vastly more simple era in communications.

The trend toward concentation of power in the television production industry is continuing. Unless the rules are repealed, they can have long-term repercussions on the extent and quality of entertainment and news provided to all Americans. This poses serious problems for lower income Americans, particularly the elderly and minority groups.

It also places an undue burden on those who will increasingly have to pay for what they now receive from free television. And it jeopardizes the ability of all Americans to have access to the common communications base that free television now provides.

This issue is one of fairness and common sense. The FCC should not have rules which work to deprive the general public of the wide range of programming it has come to expect from free television. Repealing the financial interest and syndication rules is fair, long overdue, and in the best interest of the American people.●

RETIREMENT OF LUCIEN PAQUETTE

● Mr. LEAHY. Mr. President, I rise to offer my congratulations today to Lucien Paquette who will retire at the end of this month after serving Vermonters in a most distinguished manner for more than 40 years as a county extension agent. For 36 of those years, Mr. President, he has served as the Addison County extension agent, after spending 6 years as the Grand Isle County agent.

Mr. Paquette's long record of service to Vermont dairy farmers and others in our agriculture community began in 1946. Two years later, he founded the Addison County Field Days, an annual celebration of agriculture and crafts work in Vermont that has remained an important date on many a calendar—including my own—every year.

Mr. President, in a recent news article about Mr. Paquette's long tradition of service to our State, he was quoted as saying he wanted to be remembered as an educator. In difficult times past, as well as the hard times facing many Vermont farm families today, Mr. Paquette's advice and teachings have helped many.

Mr. President, I want to again extend my congratulations and thanks to Mr. Lucien Paquette for serving our State and its people for so long and so well.

I ask that the article on Mr. Paquette be printed in the RECORD.

The article follows:

[From the Rutland Daily Herald, Dec. 17, 1982]

VETERAN EXTENSION AGENT LUCIEN PAQUETTE RETIRES

(By Pete Hobton)

MIDDLEBURY.—One of Vermont's best known and most respected dairy farming experts, Addison County Extension Agent Lucien D. Paquette, will retire from the job he's held for 36 years.

Paquette was raised on a Craftsbury dairy farm and was extension agent in Grand Isle County before coming here. In 1948 he founded the Addison County Fair and Field Days.

Paquette said in an interview he would rather be remembered, not as an organizer or spokesman for dairy farmers, but as an educator.

"Our job is to help people help themselves," he said.

"I've had so much help in the county, whatever I've done has been small," Paquette said.

Farmers and friends who disagree with Paquette's assessment of his achievements will honor Paquette at a retirement banquet Dec. 28 at the Knights of Columbus Hall in Middlebury.

Paquette said he remained "pretty optimistic" about the future of dairying, despite the national milk surplus, rising farm operating costs and smaller milk checks.

He said he expects the number of dairy farms will continue to decline, but noted that this trend has slowed. He said he expects to see most of the current agricultural acreage remain in farming.

Northeastern dairy farmers should benefit in time because it is a "milk-deficit area," Paquette said. That is, more milk is being consumed in the Northeast than dairy farmers here are producing.

Dairy farmers throughout the country will be helped by the Midwestern glut of grain, which means lower feed costs, Paquette said.

Some of the current milk surplus is a result of Midwestern and Western grain farmers diversifying into dairying to take advantage of their surplus grain production.

Paquette is open-minded about dairy farmers here diversifying into other livestock or crops. He said many would switch if alternative farming made economic sense.

"Farmers are not glued to the cow's tail," Paquette said. "I get the feeling some would be glad to convert into crops."

"But should we get into the market they (the Midwestern grain farmers) vacated?" Paquette asked with a raised eyebrow and a twinkle in his eyes. "If there's a surplus of grain, why grow grain?"

Most alternative crops appear too risky with uncertain markets and a lack of established quality controls, Paquette said.

He said one Middlebury farm experimented with 60 acres in wheat this year but was unable to find a market for the crop, the wheat is being fed to cows.

He tells about a local cabbage farmer who moved away after failing to find markets for a bountiful crop. He said a local beef producer is now having to feed and maintain steers he had hoped to market before Christmas.

Farmers must establish marketing channels and prove the economic returns of a commodity before planting, Paquette said.

Milk has a proven track record in Vermont, Paquette said. Despite the frequent ups and downs of the markets and natural disasters, dairy farmers receive a milk check every two weeks.

Since Paquette began his job here in 1946, the number of farms has declined 88 percent, from 2,186 to 701. The land in agriculture has declined 32 percent.

But the number of cows in the county has increased 15.5 percent, from 29,700 to 34,300, and the average pounds of milk a cow produces a year has doubled, from 7,800 to 15,400.

There seems to be no shortage of young farmers ready and willing to take over the family farm, Paquette said.

But he cautioned, "Young persons have to have tremendous support and understanding to move into a family farm business."

Paquette said his first advice to young persons interested in farming is, "You need to make a living."

For those interested in raising crops on Addison County clay, his advice is, "Look for lighter soils."

For those interested in dairying without previous experience, Paquette recommends a job on a dairy farm as a way to get started.

Paquette said the extension service in recent years has placed less emphasis on personal farm visits and more emphasis on helping farmers through meetings, farm tours, newsletters and other media.

The meetings and tours may draw a large crowd, Paquette said, but frequently the same group of farmers attend while others who need help the most remain home.

One of the hardest things for an extension agent to bear, Paquette said, is to read about a farm auction involving farmers he does now know and obviously has not helped.

Among the frequent economic and natural disasters to hit dairying, Paquette best remembers the drought years of the mid-1980s, when farmers' springs and wells dried up and pastures turned brown.

By documenting the precise number and location of cows without water, Paquette played an aggressive role in organizing around-the-clock delivery of tankloads of water by National Guardsmen in "Operation Water Wagon."

Help was later supplied by Sen. George Aiken, who sponsored enabling legislation for the Tri-Town Water District 1 serving Addison, Bridport and Shoreham, the nation's first rural water system.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received requests for a determination under rule 35 which would permit Ms. Laura Hudson, of the staff of Senator JOHNSTON, and Mr. George Ramonas, of the staff of Senator DOMENICI, to participate in a program in Jerusalem from January 9–18, 1983, sponsored by the Hebrew University of Jerusalem.

The committee has determined that participation by Ms. Hudson and Mr. Ramonas in the program in Jerusalem, at the expense of the Hebrew University, to participate in discussions on American-Israeli relations, is in the interest of the Senate and the United States.●

CALCULUS WHIZZES

● Mr. DODD. Mr. President, the Sunday edition of the Washington Post featured an article entitled "Dedicated California Teacher Turns Students Into Calculus Whizzes."

This article was written about an outstanding teacher who has proved that the Nation's education problems can be solved by dedication and hard work.

Press accounts treated the work of this teacher, Mr. Jaime Escalante, a Bolivian immigrant as highly unusual. His students, from a disadvantaged Hispanic area in East Los Angeles, scored so high on the national advanced placement calculus test that the students were requested to repeat the exam.

That achievement contrasted sharply with the former reputation of the school as a hotbed of truancy and gang warfare.

Now Garfield enjoys the image of a school well-motivated, hard working, high scoring students, rarely missing a class and staying home at night to study rather than hanging out and looking for trouble.

In fact, the number of students at Garfield excelling in mathematics continues to grow. In 1979, for example, four Garfield students passed the advanced placement calculus test, and as a result, were given a full semester of college credit. Eight students passed the test in 1980 and 14 passed the test in 1981. This year, Mr. Escalante has a total of 42 calculus students and is predicting that at least 35 of them will pass.

I yield to no one in my admiration of Mr. Escalante's success. But I do not think it detracts from his achievement to note that it is hardly unique.

Anyone familiar with the history of American education knows how often a dedicated, tireless teacher has made all the difference in the world to the future of the young lives he or she has touched. In fact, the high caliber of the American educational system over the years can be traced directly to the influence of thousands upon thou-

sands of teachers upon their students. The news media were correct in paying tribute to Jaime Escalante—because what he has done is vital but not because it is exceptional.

Nonetheless, Mr. President, it is clear that the Nation needs more Jaime Escalante's.

A recent survey by the National Science Teachers Association reported a 77-percent decline in the number of mathematics teachers adequately trained to teach in secondary schools. In addition, there is a decline in the number of individuals who are entering the mathematics teaching profession. This has resulted in an 80-percent reduction in the number of qualified newly employed mathematics teachers since 1971.

It is not surprising, Mr. President, that this lack of qualified mathematics teachers has contributed to the decline in SAT scores and mathematical ability of American students.

In addition, it is alarming to note the comparison between the mathematical ability of U.S. students and those of the Soviet Union.

According to a recent article published in U.S. News & World Report:

> A Soviet secondary school graduate, on average, surpasses that of his American counterpart by eight years in geometry, four years in physics and three years in chemistry.

Izaak Wirszup, professor of mathematics at the University of Chicago, has estimated that there are over 5,000,000 Soviet secondary school graduates who have studied calculus for 2 years. By contrast, there are only 105,000 U.S. secondary school graduates who have studied calculus for a single year.

Mr. President, Federal, State, and local educational leaders must work together to prohibit further escalation in the decline of mathematical skills of American students. In addition, support to upgrade the quality of our school systems and our school teachers must be provided at all levels of government.

On September 15, 1982, I introduced in the Senate a bill, S. 2909, to provide funding for continuing education programs for secondary school science and mathematics teachers. Although this is not the whole answer, Mr. President, it is, in my judgment, the base upon which the rest can be built.

I congratulate Mr. Escalante—and the countless American teachers like him—for providing a good mathematics foundation for his students. I urge other teachers to follow the example of this dedicated individual.

Mr. President, I ask that the article, "Dedicated California Teacher Turns Students Into Calculus Whizzes," be printed in the RECORD following my statement.

[From the Washington Post, Dec. 12, 1982]

DEDICATED CALIFORNIA TEACHER TURNS STUDENTS INTO CALCULUS WHIZZES

(By Jay Mathews)

LOS ANGELES.—Garfield High School, a drab block of concrete in the middle of a low-income, Hispanic neighborhood in East Los Angeles, has been known for high absenteeism and youth gangs, but never for higher mathematics. Perhaps that is what fooled the Educational Testing Service of Princeton, N.J.

In the May 19 national advanced placement calculus test, which is so difficult that only 2 percent of graduating high school seniors ever attempt it, a startling total of 18 Garfield students passed. Many had similar correct answers and seven made the top score of five, what one Garfield teacher compared with "walking on water."

Sensitive to the slightest hint of invalid scores, the service, which composes the Scholastic Aptitude Test and other national examinations, demanded a retest for 14 of the students, but the results were the same. It had stumbled across, not a cabal of cheaters, but the students of Jaime Escalante, 51, a Bolivian immigrant who has performed a miracle in a tough, big-city school.

In the process, he also has shown what rigidly organized classroom routine and a deep devotion to teaching might do to solve what is becoming a national crisis.

In the third decade since the Soviets put the first artificial satellite in orbit, science and mathematics in American high schools have fallen on hard times. Qualified teachers are quitting in droves for better-paying jobs in private industry.

In California, according to a recent study by University of California researchers James W. Guthrie and Ami Zusman, 750 science and mathematics high school teachers are retiring each year, but only 250 students in the state university system currently are training for such jobs.

Some school districts are trying to retrain athletic coaches to fill the gap, but students still graduate woefully ill-equipped for the new era of high technology, thus adding to the unemployment rolls at a time when high-tech jobs are going begging.

To motivate his students, Escalante uses a Spanish word, ganas, which loosely translates as "the urge"—the urge to succeed, to achieve, to grow. It is difficult to teach, and impossible to legislate, but a look at one remarkable teacher can show how it grows and the forms it comes in.

Garfield High School sits five miles east of downtown Los Angeles, drawing students from long, flat blocks of small stucco and frame houses, the homes of middle- and lower-income families, almost all of Hispanic descent. The community, said principal Henry Gradillas, "does not have that great love for education. They have large families, they have to go to work, they start families early."

Escalante's routine includes a five-minute test at the beginning of every class. He insists that homework be done; he has taped the assignments for the whole year into each textbook so no one can claim forgetfulness. His tests are long and difficult, and after-school work is usually a must.

Escalante came to the United States in 1964, with 11 years' experience as a teacher in Bolivia. But he could not speak English well and could only find a job as a busboy in a Pasadena restaurant. Within six months he had been promoted to head cook. He studied electronics in his free time at Pasadena City College and soon won a job with the Burroughs Corp. as a technician. The money was good, "but I hoped to go back to school and teach again."

When a friend told him of a possible National Science Foundation scholarship, he applied, and scored first in the qualifying examination in mathematics, physics, chemistry and English. After a year of courses at California State University at Los Angeles, and at Fullerton and the University of Southern California, Escalante had his teaching credentials. Local school officials asked him if he wanted to teach "Anglos, blacks or Chicanos." He picked Garfield.

That was in 1974. The school had not had anyone pass the advanced placement calculus test for several years. As Escalante worked his way to higher responsibilities in the mathematics department, eventually becoming chairman, he treated the 3,000-member student body as if it were a farm club for the Dodgers. He kept asking other teachers: "Do you have any kid who could do calculus? Do you have any stars?" Those with potential he brought into his classes, then loaded them down with special assignments.

Students who reject the system, who refuse to try to learn after repeated chances, usually are ejected from Escalante's class. Earnest but slow learners are moved to desks near Escalante's desk and receive his after-hours attention; personal tutoring before school, at lunch and after school. He withdrew from his desk several cans of fruit juice and soft drinks and a plastic bag full of breakfast cereal—all gifts from students who worried that he might be missing a meal.

By 1979, Escalante's efforts began to bring results. In that year, four Garfield students passed the advanced placement calculus test, giving them a full semester of college credit. Eight passed in 1980, and 14 passed in 1981. As this year's test date approached, Escalante was driving the 18 students who would take the test like a well-disciplined team of show horses. They were doing two hours of work at school and two hours after school, solving at least 30 problems a day.

He worked so hard that three weeks before the test he suffered a heart attack. He was hospitalized for a week, defying his doctor's orders by making up more problems in his hospital bed and sending them over to his class.

"He devoted a lot ot time, so much time, all unpaid," said Josie Richkarday, the one junior in the group. "He asked nothing in return."

After passing the test, Escalante's students graduated, bound for college careers at Columbia, Berkeley, UCLA, and other schools. Most hope to pursue careers in engineering or computers. The news in August that the Educational Testing Service was questioning their scores angered them, but did not appear to sidetrack them.

Escalante, Gradillas and the students said they all felt that the testing service had questioned the scores because they came from a low-income, Latino school.

Joy McIntyre, a spokeswoman for the service, strongly denied this. She said that the tests were scored by people who did not know the names or origins of the pupils who took the test, and the decision to ask for a retest was based on statistical calculation of the likelihood of so many similar answers.

"We're selling a service, which depends on the fact that there are no doubts about the validity of our scores," said McIntyre, and Escalante said he could see the service's point.

Aili Tapio, who turned down Harvard so that she could enter the University of Southern California as a sophomore, said that Escalante told his students: "You know, in the end, you're going to have to take it again."

Tapio said that she and the other students received only a week's notice of the new test in late August. All of them passed a second time except two, one of whom already had joined the Army. The other had already enrolled at Columbia.

This year, Escalante plans an even grander assault on the calculus test. He says that the Educational Testing Service should be warned.

"I've got 42 calculus students this time," he said. "I expect at least 35 of them will pass."●

JOB CREATION

● Mr. NUNN. Mr. President, I take a moment to address the national tragedy of growing unemployment. As you know, after having risen steadily over the past 3 years, the national unemployment rate now stands at a post-World War II high of 10.8 percent. Among males who maintain families, 9½ percent are unemployed, and among female head of households, 12 percent cannot find jobs. Furthermore, unemployment among minority teenagers is at an explosively high level of 45 percent.

In great part, these tragically high rates of unemployment reflect the adverse impact of the prolonged recession, and if a recovery materializes in 1983, we can look forward to modest declines in unemployment from existing levels. However, I feel it is critically important to point out that even if a robust recovery develops over the next few years, there are factors at work that will, unless dealt with, maintain unemployment at painfully high levels. These factors are the acute and growing shortages of skilled labor, the permanent displacement of labor in industries that are increasingly resorting to automation in their production processes, and the artificially high cost of labor created by the spiraling payroll tax burden.

According to the Labor Department's publication, "Occupational Projections and Training Data," throughout this decade we can expect, for example, an annual shortage of 57,500 positions in industrial machinery repair, 28,000 computer operators, 21,300 machinists, 30,000 computer systems analysts and technicians, 5,000 tool and die makers, and 19,000 licensed nurses. By 1990, the Labor Department projects a cumulative skilled labor shortage of 2.5 million workers in just 13 occupations.

It is also important to note that the skilled labor shortage is also impairing our efforts to improve our national defense capabilities. Concern has been expressed at the Pentagon whether the labor market will be able to supply the skilled labor needed for the ongoing defense buildup. To comply with an amendment I offered which was approved by the Congress, the Department of Defense is currently conducting a study to assess where their skilled labor shortages are likely to develop.

At the same time, according to researchers at the Robotics Institute at Carnegie-Mellon University, the generation of robots now being used could by 1990, replace about 1 million of the 9 million manufacturing workers currently employed in production activities involving welding, painting, and operating machine tools. In addition, they found that another 3 million inspectors, packagers, assemblers, grinders, and electroplaters may be displaced by a new generation of robots that will be able to "see" and "feel."

In 1981 alone, the number of industrial robots increased by about 30 percent, and the researchers at Carnegie-Mellon predict at least a tenfold increase in robot purchases by 1990, while increasing its robot force from 1,400 to 14,000 over the same timeframe. Moreover, up to three-fourths of the workers most vulnerable to displacement were less than 45 years old in 1980. In short, we face a labor displacement problem of massive proportions, which will affect thousands of individuals in their working prime.

To make matters worse, the cost of labor has risen dramatically over the last 10 years as a result of a growing payroll tax burden, and unless action is taken, the payroll tax burden will rise even further. Not only are payroll taxes regressive, but they also are a direct cost of labor to employers, and as such, are a disincentive to hiring people. To the extent that payroll taxes are allowed to continue rising, the displacement of labor by capital, that is, automation, will be augmented as the cost effectiveness of machinery relative to labor improves with every rise in payroll taxes.

According to an econometric forecast study conducted by the Wharton Econometric Forecasting Associates, if the social security payroll tax scheduled to take effect in 1990 is moved up to 1984, about 350,000 jobs will be lost in 1984, and a further 450,000 jobs will be lost in 1985. Clearly then, additional payroll tax increases must be viewed with great caution, and policies designed to offset the adverse impact of the current onerous level of payroll taxes deserve serious consideration.

Mr. President, when all of these developments are taken into account, we are left with a sad reality—structural unemployment in this country will rise rapidly throughout this decade unless corrective action is taken, and clearly, corrective action is needed now.

While we have meritoriously devoted a great deal of attention in recent years to promoting increased investment in plant and equipment, it is high time that we recognize the importance of encouraging greater investment in our human capital stock. Our ability to grow and prosper as a Nation, is ultimately determined by the creativity of our people. For too long we have neglected the importance of insuring that our existing and future labor force is adequately equipped to meet the changing needs of our own society and of the world in which we live. If we continue to neglect our human capital needs, we will be fueling unemployment, in addition to impairing our ability to adequately defend our national security.

Consequently, we must address the skilled labor shortage and permanent labor displacement problems, and this will require a renewed sense of national commitment to improved public education and job training, at a scale comparable to the National Defense Education Act that was enacted in the aftermath of Sputnik.

Our public schools and universities, for instance, face critical shortages of mathematics and science teachers, the subject areas most important to our future as a Nation. Incentives must be put in place to encourage our youth to pursue careers in these areas, in addition to making it more profitable for individuals to pursue teaching careers in mathematics and the physical sciences.

Furthermore, the scope of the labor market problems we face can only be handled by the massive job-creating capacities of the private sector, and as such, policy measures intended to address these problems should take the private sector's needs into account. With this in mind, we must implement policies in the 98th Congress that will address: First, remedial and preentry level job training needs; second, entry level training needs; third, upgrading and retraining needs; fourth, critical skills needs; and fifth, displaced worker needs.

Mr. President, I cannot overemphasize the point that even if a strong economic recovery develops over the next few years, unemployment will still remain at disruptively high levels because of the existing deficiencies in the labor market and the structural changes that are taking place in American industry. We cannot afford to let this happen. In addition to the human tragedy it will result in a continued deterioration of our productivity, in addition to harming our ability to harness our technology, and defend our national security interests. The only way we will be able to prevent this structural deterioration in our labor markets is to deal effectively with our job training and education needs. It is my intent to work toward such an end in the 98th Congress, and it is my fervent hope that my colleagues will join me in a bipartisan effort to insure a

brighter future for the American work force.●

RECRUIT QUALITY RATED BEST EVER

● Mr. COHEN. Mr. President, the Defense Department has just released its recruiting results for fiscal year 1982, and the news is very good. The Army Times reported in its December 20 issue, "Recruit Quality Rated Best Ever," summing up well the military's excellent recruiting year.

According to Defense Secretary Caspar Weinberger, fiscal year 1982 was one of the best years since the beginning of the All-Volunteer Force, was better than most years under conscription, and even surpassed the strong results of last year.

Each of the services met or exceeded its overall recruiting objectives, and 86 percent of all new recruits had a high school diploma. This is the highest proportion ever achieved and compares favorably with the 75 percent of the youth population with high school diplomas. In addition, 87 percent of new recruits scored average or above on the enlistment test, with an overall average percentile score higher than the average youth population.

The good news extends beyond recruiting. Reenlistment rates were higher than they have been since 1964, Selected Reserve strength continues to grow, and the services have continued to recruit and retain representative proportions of the population.

The key to continued success, as Secretary Weinberger said, is "stability and continuity in manpower programs." If we in Congress provide that stability, the All-Volunteer Force should be able to meet our Nation's military manpower requirements as successfully and well as it has the past 2 years.

For the benefit of my colleagues, I ask that the Army Times article and the Defense Department's December 9 news release on the year's recruiting results be inserted in the RECORD.

[The articles follows:]

[From the Army Times, Dec. 20, 1982]

RECRUIT QUALITY RATED BEST EVER

(By Tom Philpott)

WASHINGTON.—The armed forces recruited their highest percentage of high school graduates ever in Fiscal Year 1982 as they continued to take advantage of a troubled economy and high unemployment rates.

Final recruiting statistics released this month show 86 percent of non-prior-service recruits in Fiscal Year 1982 were high school graduates compared with 81 percent the year before and 68 percent in Fiscal Year 1980. Only 75 percent of young adults in the U.S. population hold high school diplomas.

The other important measure of "quality" among recruits, average scores on the military entrance exam, also rose during the year. In Fiscal Year 1982, about 87 percent of new recruits scored average or above on the Armed Force Qualifications Test compared with 82 percent in Fiscal Year 1981 and only 69 percent in Fiscal Year 1980. Overall it was the best performance on the tests since 1976, the last year GI Bill education benefits were offered to persons joining the military.

The Air Force led the services in both quality categories. Ninety-four percent of Air Force recruits were high school graduates compared with 86 percent in the Army, 85 percent in the Marine Corps and 79 percent in the Navy. The Air Force also reported that 94 percent of its new recruits scored in Category I through III (average or above) on the AFQT compared with 91 percent for the Marines, 89 percent of the Navy and 81 percent for the Army.

Women recruits had average test scores higher than the men and a higher percentage of them held diplomas in every service. All the women recruited by the Army and Marine Corps were high school graduates. Only four percent of female Air Force recruits and seven percent of female Navy recruits were high school dropouts. Still, the services recruited 7,000 fewer women in Fiscal Year 1982 than the year before and their percentage among new recruits dropped from 13 to 11. Because of higher reenlistment rates, however, the total number of women on active duty increased by 3,000 to 163,300.

Reenlistment rates, both first-term and career, continued to climb in Fiscal Year 1982.

[News Release, Office of Assistant Secretary of Defense (Public Affairs), Dec. 9, 1982]

MILITARY MANPOWER STRENGTH ASSESSMENT, RECRUITING AND REENLISTMENT RESULTS ACTIVE FORCE—FISCAL YEAR 1982 (OCTOBER 1981 THRU SEPTEMBER 1982)

Secretary of Defense Caspar W. Weinberger today announced that in terms of both recruiting and retention fiscal year 1982 was one of the best years since the beginning of the All-Volunteer Force (AVF), was better than most years under conscription, and even surpassed the excellent results of last year.

The Active Force strength as of September 30, 1982 was 2,108,600. This represents an increase of more than one percent over the end strength of a year ago. Each of the Military Services met or exceeded its overall recruiting objectives, enlisting nearly 301,600 men and about 36,600 women. In terms of quality, 86 percent of all new recruits or non-prior service (NPS) accessions had a high school diploma. This is the highest proportion ever achieved and compares favorably with the 75 percent of the youth population with high school diplomas. Additionally, 87 percent of the new recruits scored average or above on one enlistment test (AFQT Categories I thru III) with an overall average percentile score of 56, compared to the youth population average of 50. Thirty-seven percent were in the top two (above average) categories, just as high as the levels achieved under conscription.

Reenlistment rates were higher than they have been since 1964 resulting in improved levels of manpower readiness. The number of people in operating units, the number of career enlisted personnel, and the number of key, mid-level leadership and critical skill jobs that are filled by experienced personnel have increased dramatically.

Secretary Weinberger stated that the Military Services have continued to recruit and retain representative proportions of the population. Nearly 25 percent of the NPS enlisted accessions were Black, Hispanic, Native American, Asian or Pacific Islander, compared to 23 percent of the 18 to 24 year old youth. The geological distribution of the FY 1982 accessions closely paralleled that of the by-state youth population.

Secretary Weinberger also announced that preliminary numbers show the Selected Reserve end strength was 963,700, an increase of almost 65,000 members, and that the National Guard and Reserves recruited 240,900 accessions (104 percent of objective) during the past fiscal year.

While pointing out the FY 1982 successes, Secretary Weinberger noted that the DOD is facing an increased challenge in FY 1983 due to desired strength increases, the declining youth population and expected improvement in the economy. He stated that with continued Congressional and public support, the Department will be able to attract and retain the required numbers of qualified personnel. The Secretary emphasized that stability and continuity in manpower programs will be necessary to ensure continued success. Finally, the Secretary stated that he continues to believe that voluntary military service is the most equitable and desirable way to meet the military manpower requirements of the 1980s.

FACT SHEET—MILITARY MANPOWER STRENGTH, RECRUITING AND REENLISTMENT RESULTS FOR FISCAL YEAR 1982[1]

STRENGTHS

ACTIVE FORCE (TABLE 1)

Total active strength up 26,400 (+1.25 percent) over fiscal year 1981 levels.

DOD met congressionally authorized strength ceilings.

SELECTED RESERVE (TABLE 2)

Overall strength up 64,900 (+7 percent over fiscal year 1981 levels.

Largest increase in Army Reserve (up 31,700 or +14 percent.

TABLE 1.—ACTIVE DUTY MILITARY END STRENGTHS

[In thousands]

Service	Sept. 30, 1982			September 1981, actual[1]
	Objective	Actual strength[1]	Percent of objective	
Army	[2]780.3	780.4	100	781.0
Navy	554.6	553.0	99+	540.2
Marine Corps	192.1	192.4	100	190.6
Air Force	580.8	582.8	100	570.3
DOD total	2,107.8	2,108.6	100	2,082.2

[1] Includes reimbursable active duty military personnel, but excludes active duty military personnel paid from civil functions, Reserve and National Guard appropriations.

[2] Does not include additional Army end strength requested in fiscal year 1982 Program Supplemental which initially was denied and then authorized on Sept. 8, 1982.

TABLE 2.—PRELIMINARY SELECTED RESERVE END STRENGTHS

[In thousands]

Component	Fiscal year—		Change from Sept. 30, 1981
	1981	1982	
Army National Guard (ARNG)	389.0	407.6	+18.6
Army Reserve (USAR)	225.0	256.7	+31.7
Naval Reserve (USNR)	87.9	93.9	+6.0
Marine Corps Reserve (USMCR)	37.0	40.5	+3.4
Air National Guard (ANG)	98.3	100.7	+2.4

[1] Numbers in all tables may not add due to rounding.

TABLE 2.—PRELIMINARY SELECTED RESERVE END STRENGTHS—Continued

[In thousands]

Component	Fiscal year— 1981	1982	Change from Sept. 30, 1981
Air Force Reserve (USAFR)	61.6	64.4	+2.9
DOD total	898.8	963.7	+64.9

RECRUITING RESULTS

ACTIVE FORCE (TABLE 3)

Total accessions were 338,200 (102 percent of objective).

All services met or exceeded their objectives for each category: 305,700 total NPS accessions (102 percent of goal); 271,100 NPS males (102 percent of goal); 34,600 NPS females (101 percent of goal); and 32,500 prior service accessions (104 percent of goal).

SELECTED RESERVE (TABLE 4)

Overall Selected Reserve components recruited 240,900 individuals in fiscal year 1982 (102 percent of goal).

Air Force and Marine Corps slowed down recruiting since improvements in retention allowed them to meet authorized strengths with lower accession levels.

ACTIVE DUTY ENLISTED RECRUIT QUALITY (TABLES 5 AND 6)

Fiscal year 1982 was excellent for both quality indicators—educational attainment and scores on the Armed Forces Qualification Test (AFQT).

Well above the Congressional quality constraints.

Eighty-six percent of all NPS accessions had a high school diploma. Highest level ever achieved by DOD (up from 81 percent in fiscal year 1981). Compares to 75 percent of the general youth population. Largest improvement in the Army (86 percent in fiscal year 1982 versus 80 percent in fiscal year 1981).

Eighty-seven percent of all NPS accessions scored average or above on AFQT (Categories I–III). Up from 82 percent in fiscal year 1981. Compares to 67 percent of the general youth population. Largest improvement in Army (81 percent in fiscal year 1982 versus 69 percent in fiscal year 1981).

ACTIVE DUTY REENLISTMENTS (TABLE 7)

Total reenlistments in fiscal year 1982 were 224,500. Increase of 17,600 reenlistments over fiscal year 1981 number. Increase occurred despite lower number of individuals eligible to reenlist (12,000 fewer eligibles in fiscal year 1982 that in fiscal year 1981).

Total reenlistment rate was 68 percent of eligibles.

First-term reenlistment rate was 52 percent of eligibles. Compares to 43 percent in fiscal year 1981.

Career reenlistment rate was 82 percent of eligibles. Compares to 76 percent in fiscal year 1981.

ACTIVE FORCE REPRESENTATION

Racial/ethnic (table 8)

Twenty-eight percent of Active Force were minority (Black, Hispanic, Native American, Asian and Pacific Islander). Ten percent of officers. Thirty percent of enlisted. Compares to 21 percent of the general population.

Twenty five percent of active enlisted NPS accessions were minority. Compares to 23 percent of the 18- to 24-year-old youth population.

Blacks (black race—includes black Hispanics) (table 9)

Twenty percent of Active Force were black. Six percent of officers. Twenty-two percent of enlisted. Compares to 12 percent of the general population.

Nineteen percent of active enlisted NPS accessions were black. No change in DOD percent from fiscal year 1981. Compares to 14 percent of the 18- to 24-year-old youth population.

TABLE 8.—MINORITY PARTICIPATION IN THE ACTIVE FORCE

NEED FOR A PHYSICIANS' ADVISORY COMMISSION ON CLINICAL PRACTICE

● Mr. BAUCUS. Mr. President, it would seem that hospital cost containment is an idea whose time has finally come.

Traditionally, health benefit plans have based their payments on each individual hospital's own unique costs or charges. Thus, expensive hospitals have been paid more to treat a given patient than an inexpensive hospital. Since hospitals have not had to compete for patients, both expensive hospitals and inexpensive hospitals have flourished.

This method of buying hospital care is now beginning to change. Employers and public agencies that finance health benefit plans increasingly will set their payments at levels which they—rather than the hospitals—believe to be adequate reimbursement for the condition being treated.

The impetus for these measures comes not only from the concern over hospital costs but because of the development of innovative techniques for pricing hospital care. One of these new payment techniques bases payments on the patient's diagnosis, so that both high-cost hospitals and low-cost hospitals receive essentially the same payment for, say, a cataract patient. This approach is already being followed by the New Jersey hospital rate-setting program and is being proposed by HHS as the method medicare should use in paying hospitals. Another approach now being developed would match a hospital's reimbursement to the severity of the patient's condition.

Some health benefit plans will limit their health benefit costs by choosing to do business with only the less expensive hospitals. The State of California is presently negotiating such "preferred provider" arrangements for its medicaid program and the State's laws permit private plans to follow suit.

I do not doubt that hospital management will respond to these various initiatives by increasing, where necessary, the efficiency of their purchasing practices, staffing, and other aspects of their operations. It will be far more difficult, however, to deal with high costs that are a result of the utilization practices of their medical staff. For today there is a good deal of disagreement among physicians on such important matters as when to admit and discharge a given patient, and there is no authority to which one can go to resolve these differences.

For example, virtually nothing has been done to explain and evaluate the substantial differences in utilization patterns that have long been known to exist both locally and regionally. It has been shown that in 1979, medicare patient stays ranged from an average of 13.1 days in one New Jersey area to 6 days in an area of California. Taking

a broader perspective, average stays of patients of all ages in the four main census regions ranged from a low of 6.1 days in the West to 8.5 days in the Northeast. It seems almost certain, based on the analysis that has been performed to date, that these variations are the result of the different styles of medical practice rather than on differences in the patients' being treated.

Studies of efficacy in the health care area rarely have dealt with existing practices despite their importance from a fiscal standpoint. Instead these studies focus on new or emerging technology—for example, basic biomedical research, discovery and testing of new drugs, tests and procedures, and other areas of strong medical interest.

Mr. President, I am concerned that without rational benchmarks that both the payors and the medical community can agree on, hospital payment rates in this country soon will bear no rational relationship to the cost of caring for hospital patients. Initially, the tendency will be to be cautious and set rates at relatively high levels. As time passes, and as hospitals learn to live with the new rates, there will be a growing temptation to reduce payments, but without that objective information on the level of spending needed to support an acceptable level of care.

In light of the sizable potential of hospital cost containment activities to affect the cost and quality of medical care, and the lack of objective information for setting payment levels, I plan to propose legislation early in the next Congress that would establish a Physicians' Advisory Commission on Clinical Practices. The Commission would not duplicate existing research efforts. It would, for example, review variations in the care of hospitalized patients together with their health implications and, where agreement can be reached, make recommendations on appropriate admission policies and lengths of stay criteria.

Such a Commission would be composed of physicians who would be representative of the different regions of the country and of the various medical specialties. Their conclusions would be purely advisory.

It is my intention to draft and introduce the proposed legislation only after consultation with interested parties.●

THE CASE FOR A BUDGET FREEZE

● Mr. GRASSLEY. Mr. President, there seems to be a popular misconception that if Federal funds to State and local governments are curtailed, then State and local governments must raise their taxes to compensate for the shortfall.

Well, Mr. President, this is only the case if State and local governments have not the will to make creative and innovative spending decisions.

A reduction of Federal funds can be more than made up on the spending side of the budget alone. Taxes should not even enter the discussion. An indication of how this can and is happening at the State level is the subject of a recent Reader's Digest article by Eugene Methvin.

The importance of this article is that it shows what can be done when money stops flowing freely to Government. As long as money is flowing freely, no administrative adjustments are made. It is only when the flow of funds is cut off that creative budget solutions surface.

It is simply a matter of survival. Virtually every business and family household in the world lives by this commonsense rule. Slowly, State and local governments are learning to do this. My greatest hope is that one day soon the Federal Government will learn as well.

Mr. President, this is the idea behind my call for a freeze on Federal spending. By limiting the amount of money that the Government can spend, Congress and Federal agencies would be forced to be more responsible and innovative. We would not be able to continue spending the way we are presently. Adjustments would have to be made. Disinflation would demand it. The size of projected budget deficits and the size of the national debt are too imposing.

Mr. President, I ask that the article by Mr. Methvin be printed in the RECORD.

The article follows:

COPING WITH BUDGET CUTS: HOW TWO STATES DO IT

(By Eugene H. Methvin)

(When the Reagan Administration began cutting federal spending, many state governments made loud protests—and said that they would be forced to raise taxes. In the first few months of this year 26 states proposed to do exactly that, by a total of $6.4 billion. Last year some 30 increased taxes by $4 billion.

Two states (one governed by Democrats and the other by Republicans) are, however, successfully bucking this trend. In fact, state capitals seeking to live with Reagan budget cuts could learn much by examining how Kentucky and Pennsylvania are approaching spending and taxation—and making *their* governments work.)

KENTUCKY

John Y. Brown, Jr., a Democrat, was elected governor in 1979 on the pledge that he would run the state like a business. Many thought it was about time. Faced with a recession and the withdrawal of federal funds, Kentuckians were suddenly up against a projected two-year deficit of over $1 billion, a revenue shortfall amounting to $600 per taxpayer.

The 46-year-old Brown brought to state government the same management qualities that had enabled him to build Kentucky Fried Chicken into a billion-dollar-a-year worldwide enterprise. Equally important, he recruited ten self-made millionaires, most of whom, like Brown, were relatively young, semi-retired and attracted by the challenge of Kentucky's appalling management mess. He dubbed his administration Kentucky & Company.

At the Kentucky Department of Transportation (DOT), Frank Metts, an eight-grade dropout from the Louisville slums who had made millions as a developer by the time he was 30, was amazed at the often bizarre waste he encountered. His department, for example, included an aerial-photography division whose 27 staffers produced millions of pictures a year—no more than one percent of which were ever used. So he abolished the division, which had cost $1 million a year, and by contracting each job got all the aerial photographs the department required at a savings of $900,000 annually.

DOT's planning division had grown from zero to 219 employees in six years, with 200 file drawers of plans the state had no money to implement. Metts abolished the unit. He found fire-insurance premiums on concrete bridges, and even a DOT employee whose check was routinely mailed home because he never showed up for work. He got rid of both.

Each of Kentucky's 120 counties, regardless of size or highway mileage, had a garage. Metts closed and combined dozens of them, selling off land, bulldozers and dump trucks. The $10-million proceeds were used to rebuild roads.

Once he came upon ten men sitting down near a highway project; when they saw him, they fought to get their hands on the four shovels they had with them. Metts cut DOT's 9300 employees to 6545. Accused by a DOT engineer of being "an evil man with no compassion for human beings," Metts replied, "I've got plenty of compassion, but it's for the taxpayers."

His reforms produced results. He more than doubled the miles of roads resurfaced last year. The year before he took charge, DOT received 1169 complaints about state roads. Last year motorists registered only 157.

So it went, throughout Kentucky & Company. In 30 months Brown has cut the state's employees from 37,241 to 30,783, a savings of $150 million in salaries, fringe benefits and overhead. But those employees who remained fared better than before. The state raised their salaries an average 28 percent and installed a "pay for performance" merit system. From the top down, Kentucky & Company found ways to cut spending and better use state resources:

Brown abolished his public-information division, which had been cranking out useless press releases, and slashed his own office staff from 97 to 30. He also sold seven of the state's nine aircraft, netting $2.6 million.

Agents cracked down on food stamp fraud. The state's error rate in granting aid to families with dependent children has been cut nearly in half since 1978 and now ranks well below the national average. All this occurred with 300 fewer employees.

Another millionaire financial wizard produced an extra $50 million in revenues by such money-management reforms as compelling banks to bid for state deposits. Incredibly, some $240 million in state cash balances had been drawing no interest, and another $400 million was earning far below market rates.

Kentucky & Company's worst pinch was in the Department of Human Resources, which comprises a third of the state's employees and budget. The responsibility fell to 37-year-old Grady Stumbo, a dynamic physician who had built successful private clinics in eastern Kentucky that had become a model for low-cost health-delivery programs in at least half a dozen states. Stumbo faced a 25-percent cut in state money, but managed to squeeze out enough administrative fat so that the state had to reduce money going to county offices by only eight percent. Additional savings at the local level resulted in no cut in service to the public.

Meanwhile, running Kentucky government like a business has been good for business. So far 153 companies announced new plants in Kentucky—far more than in the entire previous decade. Another 1000 expanded existing operations. It all has meant 20,000 new jobs for Kentuckians.

The state ended fiscal 1982 with a slight surplus. The billion-dollar revenue shortfall was handled without a tax increase, while spending for human services and education increased 20 percent.

The federal "balance sheet" for Kentuckians is equally promising. By decreasing the rate of growth of federal spending, President Reagan proposes in his 1983 budget to reduce federal payments to Kentucky bureaucracies and individuals by $344 million. Yet, as a result of reduced inflation, Kentuckians gained more than four times that much in increased purchasing power in the past year alone.

PENNSYLVANIA

Four years ago this state's government was mired in debt and scandal. Financial planning consisted of annual budget brawls, including one fist fight on the floor at the general assembly. Legislators had passed the budget on time in only 6 of 16 years, and during the interim the government could not pay creditors, contractors or employees.

In eight years 238 Pennsylvania public officials—including members of the governor's cabinet, the chairman of the senate appropriation committee and the speaker of the house—had been convicted of crimes in office. The state had run deficits for two years, and projected some $80 million more in the year ahead.

Then voters issued a mandate to clean up and shrink state government to 46-year-old Richard Thornburgh, a Republican and a former racket-busting Assistant U.S. Attorney General. And two years ago voters gave Republicans control of the legislature. Now Thornburgh has become the first Pennsylvania governor in 36 years to complete a term without a sales- or income-tax hike. For the last four years Pennsylvania kept the budget's growth below inflation—and paid off nearly $300 million of state debt. Thornburgh's administration reduced the state work force so that today Pennsylvania has the lowest number of employees per capita in the nation. (Kentucky runs a close second.)

How did all this happen? To clean house, Thornburgh empaneled the first statewide investigating grand jury in Pennsylvania's history. He imported career Justice Department and FBI lawmen and sent them forth armed with crucial legal crowbars—witness immunity and wiretapping—to smash organized crime and corruption. In the state's scandal-ridden Department of Transportation, for example, he installed the first inspector general, whose probes have resulted in 39 firings, 25 suspensions and 12 convictions. The inspector general also filed suit to recover over $2 million in contract abuses.

A cost-cutting team was established to review the work of everybody from department heads to flagmen on highway work crews. It slashed the state's fleet of cars by 1300, and last year state employees drove 38-million fewer miles. Sick leave and overtime were reduced. The error rate on granting aid to families with dependent children was cut nearly in half. These hundreds of recommendations produced savings of nearly $200 million a year.

No challenge loomed larger than Pennsylvania's runaway welfare costs. A 1980 survey showed 94,000 cases of the able-bodied receiving state assistance, 11,000 of them having moved into the state within the preceding 12 months. Pennsylvania, with 5.2 percent of the nation's population, had nearly 20 percent of the general-welfare recipients. The welfare program was the most expensive in the nation, costing $25.92 for every man, woman and child in Pennsylvania—four to five times as much as in neighboring New Jersey and Ohio.

Earlier this year legislation was passed aimed at severely limiting cash assistance to the able-bodied who refuse to work, and targeting the savings of those who cannot. An estimated 80,000 of the state's 800,000 welfare recipients will have to sign up for community-service jobs, and 64,000 others will be limited to three months of cash assistance. The state will save an estimated $30 million, and businesses will receive $25 million in tax credits to hire welfare recipients. Meanwhile, benefits for families of three or more have been increased.

Thornburgh found 70 percent of vocational-rehabilitation money going into counseling services, so his administration laid off 70 staffers and increased direct aid to Pennsylvania's handicapped. The state Department of Public Welfare threw open for competitive bids contracts for Pennsylvania's day-care centers. Result: with 22-percent fewer dollars, the state actually will decrease services by only seven percent.

Meanwhile, Pennsylvanians at all levels are scratching to make do with less government and fewer federal dollars from Washington. In the affluent Pittsburgh suburb of Bethel Park, for example, school officials had to cope with a drop of $400,000 in state aid. They cut the staff by 40 and put one school up for sale. Instead of cutting programs or raising taxes, they asked parents to accept a fee system for frills: $1 dues for drama clubs, $5 for cheerleading, $35 for football. Fees of $10 to $20 are charged for luxury course such as photography. They got almost no complaints from parents.

Relieved by Reagan Administration block grants from playing paper Ping-Pong with Washington bureaucrats, officials at all levels are saving dollars and devoting increased resources to their original mission. Caseworkers in a Pittsburgh social-service agency who had been spending 65 percent of their workday on paper work can now spend far more time helping people. Warren County commissioners save enough on the printing costs of a single report to keep an additional child in foster care. "Multiply these little bits over the state, and you get a huge savings," says Public Welfare Secretary Helen O'Bannon.

The American people, by tax-slashing votes from California to Massachusetts, have demonstrated they want an end to Congress's addiction to "printing-press money" and deceitful taxation by inflation. While the process may be painful, polls show they are determined to stay the course.

As Kentucky's Human Resources Secretary Grady Stumbo puts it: "Nobody got really serious about waste and inefficiency until the money quit flowing so freely from Washington."●

HEALTH CARE—THE PRICE OF SUCCESS

● Mr. DURENBERGER. Mr. President, on October 23, 1982, Irving Shapiro delivered an address marking the 100th anniversary of Abbott Northwestern Hospital in Minneapolis, Minn. Mr. Shapiro recently retired as chief executive of E. I. du Pont de Nemours & Co., and he now practices law and serves as chairman of Du Pont's finance committee.

In his speech, Mr. Shapiro demonstrates remarkable insight into the workings and problems of our country's health system. He paints a painfully clear picture of the choices that face us. Without greater involvement by the private sector, without a realining of financial incentives and, without leadership from within the health professions we will be left with an overregulated, inefficient, two-tiered system of health care which is expensive and serves no one well.

Mr. Shapiro's speech has already attracted national attention. It deserves to be read and reread, for it is clearly one of the most thoughtful discourses on health to appear in a long time. I urge my colleagues and my fellow Americans to read it carefully.

HEALTH CARE—THE PRICE OF SUCCESS

(Irving S. Shapiro, Du Pont Company)

Health care has become a right in our society. There is no longer a question that an individual who is seriously ill or badly injured is entitled to reasonable medical care, whether able to pay for it or not. The questions are all of degree: How sick? How badly hurt? How much care?

We ought to be proud of the fact that we do look upon this as a right and not a privilege that could be withheld. It fits our sense of community and our constellation of values. It goes well with the notion that a society can fairly be judged by the way it treats its neediest and most vulnerable citizens.

It is also a compliment of a high order to the professionals dispensing health care and to the enormous supporting cast working with them. Included are people in research, medical education, and health management; the people who produce pharmaceuticals, diagnostic tools and other goods or services for health care; and the unsung people who caused the hospitals and nursing homes to be built.

The occasion of the centennial of a hospital as renowned as Abbott Northwestern is an appropriate time to remind ourselves that the nation has a high quality health care system, a work of many decades and countless sacrifices. It is only because so many people have done their work well that society has the luxury of regarding health care as a right. Not incidentally, this is also

a tribute to an economic system that pays the bills and gives us the ability to deliver on this kind of social contract.

Success has a price, though, and the price is going up. As we are continually reminded, health care costs have been rising more rapidly than the rate of inflation, and more rapidly than the average individual's disposable income. The national health care bill is about $300 billion and represents close to 10 percent of the gross national product. It was about 5 percent a quarter century ago.

To put this in perspective, there has been a great deal of public attention to national defense and to the Federal budget increases this year, but the nation spends tens of billions more for health care than for defense. Consider the money going to some other programs where the Federal Government is an important factor though not the only one: pollution control, education, housing, community development, transportation, energy programs, and international affairs. The Federal spending on health care alone is nearly as great as the Federal support for all those areas put together. By any measure, health care is a gigantic societal commitment.

Unless the trend line is changed, health care costs will continue to rise faster than the nation's economy. One driving factor is the increasing number of people age 65 and over. Understandably, older people have a disproportionately large call on medical help. The elderly now account for about 11 percent of the population but demand almost 30 percent of all health care resources. Partly for that reason, Medicare and Medicaid expenses, which more than doubled in the past five years (to $73 billion in 1981), will double again by 1986, absent major changes in programs.

Given those numbers and their implications, I would argue for two points:

First, we must rearrange the incentives within the system. The way it is set up now is topsy turvy. All the logic is to spend more without sufficient concern for how much good it does. The payment system was designed to favor cure but not prevention. It rewards professionals for providing more services, but provides no rewards for exercising constraint. If we do nothing else to change health care services in the next decade, we should reverse the incentives to give the individual a direct stake in cost containment.

We have passed the time when it makes sense to have rules which permit an individual to be compensated if his problem is attended to in a hospital, but deny payment if the problem is solved, probably at lower cost, through home care. It is also time to challenge payment schemes which make the elderly more dependent on nursing homes then some of them need to be, and give no incentive for sheltered living arrangements that fall short of full nursing.

We have to be clear about our objectives. What counts is the outcome as measured by the health of people, not the amount of medical or nursing service provided. The two are not the same, or always correlated.

Second, we must recognize that problems associated with health care are societal in nature and cannot be solved within the health care industry alone. All major groups in society should help to set the priorities and manage this national resource better. Unless all of us do participate, the reform efforts are likely to center on details instead of the larger issues.

There is concern now about the Federal role, as well there should be. Medicare, like the Social Security system, is going to run out of money. Something must be done, and the Federal Government has recently taken action to constrain its future spending. Unless the economy moves to get at the heart of the problem though, the burdens will fall unfairly on the poor and the elderly, or simply be dumped on other segments of society. The question of equity for the needy must be addressed with compassion and wisdom, or we will have broken faith with ourselves. Should that happen, there probably will be renewed pressure for a national health insurance scheme. That would be the worst of all possible solutions but it is not beyond imagining politically.

In a longer time frame, it is not the Federal Government but the private sector that is in the best position to provide the lead in improving the health care system. The most underused tool of all is the private corporations which pay for all or most of the medical expenses of their employees. It is time for more of those companies to become active, to demand more for what they are buying, and to change some of their own habits that keep the system running in its old ruts. On their own and in cooperation with others, corporations should be promoting alternative systems for delivery and payment, encouraging conservative health care practices, educating their employees to the need for changes (they have a large stake in this, too) and developing other programs that relate to cost containment and utilization of services.

Recently, through the Business Round Table, more than 160 large corporations have agreed to try some additional steps along this line. Throughout the country, local and regional health care coalitions have sprung up in recent years, usually with business' help. Minnesota's example is a good one. Those are steps forward, but many companies are still at the handwringing stage. What is needed from them is informed action. What is needed as well is support throughout the private sector for changes in laws and regulations to take physicians and nurses off the defensive when they do call for less than maximum intervention.

In terms of health care costs, there is not much doubt about the villain of the piece. It is not the medical technology in the hospitals that is responsible for the cost runups. Properly applied, technology can reduce costs. It can make diagnosis more efficient and the management of treatment more effective. Nor is it the poor on public assistance who are responsible for most of the increase in the overall health bill. Medicaid, the program for the needy, is unquestionably expensive—well over $30 billion in this fiscal year—but even so, it is only 11 percent of all health care costs. Large savings in costs in the future cannot be achieved by squeezing the neediest 10 percent of the population.

The unit to be dealt with is the middle-income majority covered by private or governmental health insurance programs, mostly through arrangements which reimburse doctors, hospitals, and nursing homes for whatever services they perform, and usually covering the patient from the first dollar onward. That is where the money goes—two-thirds of that $300 billion.

There is nothing to gain by blaming the doctors. To be sure, they are the people who order the services that can be costly, but as one physician said in a recent issue of a Massachusetts medical journal, blaming them for the high cost of medical care is like blaming the pilot for the cost of the airplane fuel. It is a loose analogy but not a bad one. People want to go coast to coast in a hurry, and the price of that is a 747 plus 60 tons of jet fuel. Many people want the equivalent of 747 health care. Doctors and nurses try to oblige them, and for that they deserve no blame.

The difference is with us, the passengers. When we fly we pay; but when most of us call on medical service, the system makes it appear that somebody else is paying for the tickets. It is this that has helped to double the intensity of use of health care facilities in the past dozen years or so, and increased the number of physicians and (more dramatically) the number of other people working in hospitals and nursing homes (the two institutions together account for nearly one-half of all health care spending). The question is not whether all this medical attention is a social good. It does help people. The question is whether the present system encourages the wisest and most prudent use of resources; and the answer has to be, "No."

There is also an element of business responsibility here. After all, there are still many private health care plans that will reimburse patients only if they are admitted to hospitals, and not if they are treated in doctors' offices. Where would you want to go for treatment in that situation?

Enough of finger pointing. To drag out the old line from Pogo, we have met the enemy and he is us. Nothing much else will happen that is good unless this is acknowledged, and the incentives are turned in favor of more careful, personal stewardship by each of us.

There is no magic number for health care that is right and proper. Is 10 percent of GNP too much or too little? Who knows? It all depends on one's sense of the scale of unfilled needs at a point in time, and on a judgment about the competing claims for the same dollars. Suppose we did cut back on health care spending. Where would we put the billions of dollars we saved, and would the outcome be better or worse for the country?

Like any numbers game that has to be played in the real world, this one is loaded with subjectivity, not to say politics. One man's expense in the health care world is another man's income—and this is a people-intensive field. What strikes an observer as wasteful might seem no more than necessary care if he or she were the patient. Perhaps the only way to deal with this is to accept 10 percent of GNP as a given—no one is able to change it much in the short range anyway—and let the burden of finding a better target fall on others: If someone wants to argue for a substantially lower or higher health care spending rate, let him show how and why that would help society.

What deserves more attention than a specific figure is the general question of limits. The success of medical science presents us with policy decisions not encountered before, now unavoidable. On one side stands an ethic that says that the ideal health care system delivers everything that will be helpful to everyone who can be helped by it. That has been the target if not always the accomplishment, and the present entitlement system was set up accordingly. Opposite that is the fact that medicine can do things today it could not do in the past, and the list of those things grows constantly. Looking at future possibilities, many people would rate it a bargain if the health care

bill could be kept from growing larger than the 10 percent figure.

The old ideal and modern reality cannot coexist. An endless supply of money cannot be assumed, and a displacement of resources from other worthwhile social objectives cannot be ignored.

We are driven toward uncomfortable options. Do we impose a lid on services through some public mechanism—kidney dialysis and open-heart surgery only to age 65 but not beyond? Do we withhold life-support measures for the terminally ill or the seriously handicapped? What about infant care? Medicine can now save many babies born very prematurely, but those babies may well need much more than average amounts of medical care throughout their lives. Are we to deny them life because they were born much too soon?

Consider some less emotional questions. Should we put a cap on the fees hospitals and nursing homes may charge—and thus in effect impose wage and salary controls on the segment of the population working therein? Do we put new constraints on the time doctors may spend on their patients, and thus interpose more strangers into relationships we like to think of as personal? Is not medicine too impersonal already? Do we toss out the whole system as it stands, with its mixture of private and public funding, and replace it with a nationalized health structure?

I exaggerate for emphasis. Some of the proposals sound mean-spirited. There are other, less harsh options. Surely society does not intend to send to the scrap heap people who are helpless or inconveniently expensive. Nonetheless, we are forced to make choices, because there is no believable scenario for providing everybody with literally every kind of health care that might do some good.

One way out of that box is to search for an amended charter, one that deals with the attainable and is still deserving of public support. What I believe we are striving for is not a system that tries to promise everything for everybody, but one that assures access to necessary health care for all who are in genuine need (the operative word is "necessary"). It also should be a system that retains options for special attention (above and beyond medical necessity) to those who are willing to pay their own money for the luxury of Cadillac medical services.

An amended charter need not and should not mean that the indigent should have to suffer catastrophe before they become eligible for help. Nor does it mean that the 90 percent of the population protected by health plans can line up for every service imaginable. It implies some screens based on the demonstrated values of various procedures, and it assumes sound advice based on agreement among professionals as to what ought to be done, and when. It implies, unavoidably, some risks—which is why we need some changes in the law and medical governance, to constrain what could be an endless amount of second-guessing.

"Take two aspirin and call me in the morning."

"Surgery now, without delay."

"One more day in the hospital and two weeks in bed."

Only those with appropriate training can pretend to know whether those are responsible prescriptions in given situations. Physicians confess that they are not always of one mind on such matters. They admit they may do more than needed, simply to cover their flanks. That is one of the problems. However, their disagreements cannot be allowed to stand as permanent impediments to change in the system. If the professionals cannot arrive at consensus standards at least in a great majority of cases, and if we cannot arrive at ground rules that protect them from unwarranted disciplinary action or lawsuits, then society is left with a system lacking internal restraint. "Do it all" becomes the fallback position.

Part of the solution has been suggested by medical professionals themselves, in their findings that for most people most of the time, the benefits of medical care taper off rapidly after the amount of care passes a certain level. The curve goes flat, or nearly so. We have it on their own testimony that in some instances additional medication or service cannot be shown either to speed a patient's recovery or to make a measurable difference in his or her eventual health. It may even be counterproductive. Such a finding can only be taken as good news by all concerned with health care problems, for it lends support to the notion that limits can be set without doing harm to people. In other words, it is possible to seek cost containment with a clear conscience.

To a layman, the decisions at the margins look easy. More medication, more tests, more surgery, more nursing care—these are sure to cost more money. If there is no good evidence that they promote better health, don't do them.

It is appreciated that to the professional the decisions may not seem so simple. A variety of other factors intrude—institutional, financial, and ethical, not to mention the psychological makeup of patients. It is hardly a surprise that doctors and nurses are inclined to err on the side of caution. They have some tough calls to make.

It is not too much to hope, though that we can define the mission such that those calls are based on medical judgment and not on factors that ought to be extraneous. It is hard to defend a system that encourages hospitalization, or increases the prices that hospitals charge for certain services—for example, the prescriptions dispensed by the hospital pharmacy—because that is the only way doctors and patients can get a third party to pay the bill, or because that is a way to cover a deficit caused by an underpayment in some other account.

As a society we are at one of those turning points where we know what the problem is, we feel some urgency about it, but all the simpler solutions can be seen, in H. L. Mencken's phrase, to be "neat, plausible, and wrong."

The first among these, national health insurance, qualifies as the leading idea whose time has come and gone, or should have. A decade or more ago it commanded a large following, but on the merits there is little to say for it. Other nations have now accumulated considerable experience with it, and left us with no reason to believe that a comprehensive, government-managed health service in the U.S. would do otherwise than reduce quality and increase costs. Judging from some governmental welfare, health, and public housing projects, it is to be doubted that a national health plan would even be equitable or responsive to its clients.

Whatever the theoretical ideal in some other social setting, in the American environment health care is best addressed by the private and public sectors working in tandem. The task is to achieve a good mix of responsibilities among the various participants, and find mechanisms for getting different actors to resolve differences and work toward common goals.

There is no great difficulty in identifying tasks for particular groups. It is mostly a matter of assembling the laundry list of challenges that have already been placed before these groups, frequently by their own members. For the medical profession, for instance, such a list includes, among other items, more utilization of people with less training than physicians and registered nurses, to provide selected services that do not require the more advanced (read more expensive) skills; the development of more data to pinpoint areas where less medical intervention is acceptable, and to clarify the risks and advantages; better peer review of practitioners, not merely to police the ranks for malpractice but also to discourage excesses; and changes in medical education to encourage more conservative health care, as versus training biased toward more elaborate treatment. There is nothing new in those thoughts. Some in the profession have been urging these steps for years, with varying success. It goes without saying that more is possible. It always is.

For people in health care administration, either running facilities or programs, there is a need to recognize that they are managing a changing, complex business. Health care is not a cottage industry anymore. It has to be run professionally in terms of purchasing economies, reduction of waste, personnel management, and the training of the senior administrators themselves. The amount of room for improvement is demonstrated by the spread to be found in different facilities in operating costs, and even in the cost of delivering a specific service to patients.

The wise health care providers are those who see that improvement would work to their own benefit long range, and who therefore are willing to team up with others to review the utilization of services. Such review projects are under way in Minneapolis, Phoenix, the state of Iowa, and elsewhere. There is probably lots more mileage in such collaborative, community based efforts.

Interestingly, most such projects stem from the initiative of people outside the medical profession, but the onus is put on the physicians to correct overutilization. Cooperation, not coercion, is the approach to try first, with the understanding that if the doctors fail to put pressure on their peers when needed, someone else will.

There are complicating factors in every efficiency formula. Some hospitals are more burdened than others by losses from patients who cannot pay at all, or who come to them under programs such as Medicare and Medicaid which fail to reimburse them for the full costs. Some facilities have the benefit of newer, better physical plants and equipment. When all the caveats are covered, though, it remains that some hospitals and nursing homes are more effective and efficient in providing care than others, and there is good evidence that the discipline of market forces can make useful contributions to efficiency.

For each of us as an individual there is a role. We should accept more responsibility for our own health. That point has been made countless times before, to some good effect but far less than is needed. Whether the result has been adequate or not, however, it is impossible to discuss health care as a national problem without directly addressing this side of it. There are all sorts of numbers, all big, on the savings that could be realized if people only tried harder to stay well. It is said that health bills might

drop 30 to 50 percent. Maybe that is high, but fully one-third of medical expenses can be traced to three problems—circulatory conditions, respiratory ailments, and accidents—and all to some extent are preventable by individuals themselves.

There are no miracles out there. Young, thin, superbly conditioned athletes can have heart attacks. It happened to Arthur Ashe when he was still near his prime as a tennis player. Yet the literature is bulging with proof that a large payback in health care would be ours if we cleaned up our lifestyles through better diet and exercise, wore seat belts, and avoided habitual, heavy use of alcohol and tobacco. That would defer or eliminate tens of billions of dollars in costs, and who can say how much suffering?

Instead of restating more of what everybody knows, or offering advice to health care professionals already saturated with it, it is worth commenting at more length on the two groups that cover most of the health care costs, private businesses and the state and Federal Governments.

Consider first the private sector companies. No part of society has a better reason for wanting to see the present system changed. Private businesses have seen their health-related benefit costs quadruple, per employee, in the past 12 years. In 1981 and 1982 those costs have climbed at rates of 15-25 percent per year. It is not unusual for a company today to put more than $1,000 a year into health benefits for each of its employees.

The experience of the Du Pont Company may be instructive here. Medical and hospital benefits cost the company $32 million in 1970; this year, with only a slightly larger work force (the numbers do not include Du Pont's recent merger partner, Conoco), the bill will be nearly five times as much.

Du Pont is a supplier as well as buyer in the health care field. The company sells many medically related products, and sponsors extensive research programs in the life sciences. Du Pont manufacturers pharmaceuticals, X-ray film and processing systems, clinical instruments, diagnostic test systems and associated services and supplies. In the past decade this has been one of the company's most successful lines of business. Last year it brought in $1 billion in sales. Not that the company keeps the books this way, but simply as a matter of interest it is notable that the company's growing success in the health care business barely compensates for the escalation in the parent company's health benefit costs. The profits on Du Pont's health-related businesses totaled $141 million last year, while the cost of health benefits is now running above $150 million per year. The "supply" side is having trouble keeping up.

When a business cost is running out of control, a sensible management team will move to get it in hand. Health care costs quality as much as any other kind, and the managers of many companies have begun to look at them in a businesslike way. From the perspective developed in one such company, the recommended strategy is to emphasize more strongly the preventive route, to build more choice into delivery systems, and to redirect the payments structure away from overdependence on post-event, entitlement contracts which give neither the patient nor the provider a personal stake in restraining spending. Pre-event payment plans, and contracts which reward doctors and patients (or at least do not penalize them) for avoiding expenses, are ideas whose time has come.

Internally, many companies are moving toward cafeteria-style benefits plans. We can call this, to create a label, the Beneflex trend. It offers not one package that applies to all employees, take it or leave it, but a number of options from which people may choose according to personal and family wishes. Typically, companies include health care as one of the variables.

There may be a voucher system: In one example, $500 for medical expenses is given to the employee, and he or she pays the initial bills. If there is money left over at the end of the year, the employee keeps it. If the bills go beyond $500, a health insurance plan takes over at the employer's expense. There are endless such variations, but at the end of the line for all of them stands a cash register showing a "not-to-exceed" figure, to maintain equity as well as cost control.

Externally, businesses have gone shopping. They are negotiating with health care providers to reduce costs, and encouraging development of alternative health care delivery systems. They are buying into health maintenance plans, referring employees to preferred physicians and treatment centers, contracting for primary care services to cover the routine and simpler needs, requiring second opinions before approving nonemergency surgery, and self-insuring while contracting with outside firms for administrative services.

Again, there is little about this on the surface that is new. HMO's have been around for decades. Growth, variety and scale are the notables now. The most recent figures I have seen put the number of HMO's at 250, with enrollment of 10-11 million people. In many metropolitan areas, companies are able to offer not one alternative but several. In the Twin Cities area, there are seven HMO's. The Control Data Company offers its employees a choice of five plans; Honeywell, six.

Companies have rarely found it possible to abandon the rudimentary system adopted in the 1960's and early 1970's, under which the employer agreed to provide coverage from the first dollar onward, with little or no contribution from the employee's pocket. That arrangement has become entrenched by time and, in many companies, by collective bargaining agreements. Employee "givebacks" on benefits are even more difficult to obtain than voluntary reductions in wages and salaries. The better course (at any rate, the one most are taking) is to seek reasonable top limits on what the "first-dollar," "fee-for-services" plans can cost, and to place alongside them additional plans that require employees to share in the costs, but give them a financial incentive to do so. If the incentives are there, both laymen and medical professionals can be counted on to find ways of capping the costs.

What more can private businesses do? For business leaders as for the medical professionals, there is much to be said for closer involvement in community and regional health care coalitions. These have been created to bring better management to health care, to broaden public understanding of the problems, and to help break down the rules that now distort the system to greater expense.

Coalitions exist in 60 or 70 communities, and while they get mixed reviews they do provide a mechanism that neither the private sector not the government can deliver on its own. Bringing together people from all quarters—medicine, business, government, education, labor, and so forth—coalitions can move into parts of the health care problem that are divisive and politically hot to handle. When coalitions do their work well, they achieve an objectivity and develop a public credibility that the separate members have trouble matching. Business has talents and viewpoints to bring to the table, and it has more to gain by joining in coalitions than by trying to go it alone.

One further area deserves the strongest possible emphasis within business, and that is preventive care in the broadest sense of the word. Nothing business might do in the health care area would help people more than to improve its front-end, in-house health education and safety programs. There are too many calls on the system by people who need not have become sick or hurt in the first place, and too many such problems originate on the job. The number of occupationally-related injuries is far too high. Apart from the pain and suffering, the workdays lost to the economy are the equivalent of the full-time work of 170,000 people. That is the same as taking out of the nation's productive system all of the employees of the Du Pont Company including Conoco.

Nowhere is it given that people must be hurt or made sick because of irreducible hazards or fictions about "human nature." Some of the best health and safety records are found in industries which, by their nature, deal with potentially dangerous processes and products. One example is the chemical industry. For every lost-time injury of a chemical company employee (the data include occupational illnesses), there are 26 lost-time incidents in the trucking business, and 12 in the meat products industry. The all-industry average would be four. It is hard to believe that is has to be 26 times more dangerous to drive a truck than to work in a chemical company. Within specific industries there is a similar spread. The average chemical company's safety record is 17 times worse than the best chemical company's record.

There is no mystery as to why some private firms do better than average on health and safety: They work at it. They treat health and safety not just as the employees' responsibility but management's as well, and supervision is held accountable for results.

The companies that do best in this area obviously care about people, and defend their programs without trying to prove that they save money. The chances are that they do, though. By a rough calculation in Du Pont, which has one of the best safety records in all of industry, if company safety performance in 1981 had been no better than the industry's average, Du Pont's direct and indirect costs for injuries would have been $365 million more than they were.

If on-the-job health and safety programs have value, it is natural to ask whether there is a similar rationale for the "wellness" programs now springing up around the country. These involve health monitoring and physical fitness programs plus action on diet, mental health and alcoholism. Companies involved include IBM, Johnson & Johnson, Control Data, Kimberly-Clark, and the New York Telephone Company. Though good numbers are hard to come by, the efforts of such companies are well worth imitating. The risks and costs are relatively low and the health benefits could be high. Consider heart problems as an example. Currently, the largest single cause of claims for permanent disability for people

below age 65 is heart disease. Some 2.5 million people still at work are restricted in their activities by heart conditions. If wellness programs produced even a modest reduction in the rate of heart disease, they would be justified.

(That justification, though, does not rest in an argument that wellness programs will bring a net decline in the national health bill long range. They save lives and money now, but that means they will keep more people alive to advanced ages, where they would be expected to command medical service for one condition or another. Cost-benefit calculations obviously have to be cut off before they become ludicrous. Were cost savings society's only goal, the way to proceed would be to have the largest number of people die at the earliest possible age.)

The problem of changing the government's role in health care has been saved for last. It is crucial but frustrating. Like the ancient task of the mice trying to hang a bell on the cat, it is far easier to see what needs to be done than to figure out a way to do it.

It is not especially difficult to gain agreement, even within government, on some general propositions. The indigent and elderly need help and are entitled to something more than bare minimum, life-sustaining services. Government must be the health care provider of last resort. There are research and educational needs which will not be filled unless government helps. Coordination and oversight in some areas properly fall to government.

On the specifics it becomes harder to translate principles into action, and action is what is needed. Legislation and regulation should be amended to encourage cost efficiency, broaden choice, and make the payment incentives neutral as to type and place of care.

There also should be more and better means of resolving conflicts and compensating people for harms that may be done in the name of health. That too calls for government action. There is too much reliance today on courts and juries of laymen to adjudicate malpractice claims. Justice sometimes is done but at a high price to society. Plaintiffs wait for years to have their cases decided, and in many instances the principal beneficiaries are lawyers who are members of the malpractice bar, some of whom delight in seeking six-figure fees. One consequence is the high cost of malpractice insurance for physicians, which ultimately is reflected in their fees. Less measurable but equally unwelcome is the cost of defensive medicine: physicians calling up more tests than they or most others think are needed, in case someone takes them to court for doing too little and a sympathetic jury agrees. Better safe than sorry.

There are ways to reduce that problem. Fee limits to lawyers might be set for certain classes of injury, to discourage the fortune hunters. Arbitration is an alternative to litigation. It is quicker and less costly than trials. (Some surgeons reportedly require patients to agree to binding arbitration, should there be a claim, as a condition of taking the case.) We should also consider a no-fault system for compensating those who are harmed. As with the workers' compensation system, the objective would not be to extract large sums from those inflicting harm, but to "make whole" the injured party; i.e., to cover his costs. There would be top limits on the amounts collected, but the offset is that the injured party would not have to prove negligence on the part of the health care provider. For such ideas to be pursued more aggressively, though, would require changes in law, regulation, or both.

In any of these areas it is foolish to expect too much of government, especially in the short time frame. In fairness, the government has special problems for which the rest of us share some of the blame.

Government became wedded long ago to a command-and-control philosophy of regulation, which has not been an overwhelming success, and was trapped by its own entitlement system of benefits. There was broad public and political support for this at the outset, but there was not enough attention to the escalation of costs, and there have been perverse side effects. As the best illustration, the reimbursement schedules for Medicare and Medicaid fail to pay most hospitals as much as it costs to provide a bed for a patient. To balance the books, hospital administrators have been forced to mark up the prices paid by private individuals and health plans. On the average, a patient with a private insurance plan pays $41 more for a day of hospital care than a Medicare or Medicaid patient. The cost to business: $5 billion per year. Such price shifting only distorts the system. By any other name, it is an unlegislated redistribution of economic resources from one group to another. It does not solve a problem; it only moves it.

Government often tries to do the right thing, but it does not always succeed at the right price. For example, in the hope of providing better oversight the Federal Government in 1972 set up Professional Standards Review Organizations. These were mostly concerned with payments under the Medicare and Medicaid programs. Now their funding is being withdrawn, at least partly because the Congressional Budget Office has found that the cost of the reviews—$174 million in 1981—was greater than the amount they saved.

This is not to say that all public sector regulation is misdirected or negative—hospital rate regulations that apply in some states; limits on new construction where the need cannot be shown for more hospital beds, equipment, and programs; licensing of facilities; setting of standards for practitioners; and all the rest. However, whether regulation works reasonably well or not, the command-and-control model has serious, inherent limits.

It can be argued that, by agreeing to an approach that contained few cutoff provisions, government in effect gave away the store. (Its representatives will quickly respond that private corporations did the same in their health plans, and there is some truth in that.) Now, the call is for a move in the opposite direction, but it takes exceptional political courage to lead such a charge, and it is tempting to take refuge in stopgaps and cost-shifting. For example, the tax bill passed this summer anticipates slower growth for Federal spending on Medicare and Medicaid (by $13 billion over three fiscal years), but simply leaves it to the states and private sector to make up the difference as best they can. Again, a problem was only being moved, not solved.

More recently, the Administration has proposed a prospective payment plan for Medicare. While the Department of Health and Human Services is to be commended for wanting to turn in this direction, there are enormous complications in its proposal. It takes several hundred pages of the Federal Register just to set forth the rules and regulations—and within a matter of days after these were published, health care experts had raised serious questions about the plans, challenging both feasibility and fairness. One good possibility the experts foresee is that there will be even more cost shifting to private individuals and employers.

Whatever happens in Medicare, the larger point is this: Considering how difficult it is to direct the Federal portion of national health care via command-and-control, there is no reason to believe that the whole system could be run that way. The problem is unmanageable in that fashion, and it is unrealistic to suppose that in some magic way, a Federal initiative is going to provide a formula for solving this national problem.

Individuals in government are as aware of their limits as anyone else, and recognize full well that the nation needs to do more than come at the problem at the margins. They as much as anyone might welcome more private sector support and, where appropriate, political help. This is as good a time as any for those outside government to stop criticizing and provide some leadership pointed toward a better managed system.

As one specific, I would encourage the creation of a national commission on health care, to be formed by the President and to include outstanding individuals from government, the health care industry, education, private business, and labor. The commission's job would be to back away from the detail that is consuming the attention of government agencies and officials today, analyze the system overall, and recommend structural changes that address in a single package the interlocking problems of quality, access, equity, and cost. The commission would have to have strong leadership and be staffed with first-rate people if its proposals are to have a chance of legislative passage.

Several of the state governors have established commissions. One in Iowa has just completed its work and issued its report. Utah has had one, and in Minnesota the health care coalition has acted as a governor's commission. There is nothing analogous on the national scene, although two groups have this as a partial mission, the one examining private sector initiatives and the one dealing with reform and management in government. However, the health care problem deserves concentrated national attention on its own.

I would not propose such a commission with any notion that it should replace local groups. Many parts of the problem require local attention, and this cannot successfully be contralized in Washington. Nor would I expect a national commission to deliver major gains of any by itself. Some commission reports only gather dust, and even when that does not happen, the recommendations can be neutralized by political inertia. Exactly that happened in the 1970's with national commissions on water and air quality, the first headed by Nelson Rockefeller, then Vice President, and the other by Senator Gary Hart. The only trouble with either report was that Congress did not adopt enough of the recommendations.

There is no guaranteeing that this will not also happen in the health care area. Still, such a commission is worth a try. It could provide a needed forum if not an easy answer. It could raise the level of public debate, separate what is known from what is merely supposed, and clarify the issues of greatest moment.

Perhaps it will have a decent chance if it is given specific questions for a charter:

What should the role of the Federal Government be in health care over the next 20

years, and what does this imply for the state governments and the private sector?

Is there a better way to manage the Federal role? Should Medicare remain in the Social Security system, or be handled separately? Do we have too many Federal agencies in the health business?

What impediments to needed change are embedded in law and regulation, and what would the commission recommend be done about them? Is government regulating too much, or the wrong things?

What are the capital needs going to be?

What shifts will or should occur in health care needs and practices, or in health care education, based on changes in the population and health care technology?

With questions such as these on the agenda, and with a suitably strong, able national leader in the chair, such a commission could provide a better basis than we now have for hammering out political and social consensus.

Surely, it is not enough to put band-aids on the system, or to treat different parts of the problem in isolation. Such topics as payment reforms, efficiency in management of health care, depreciation and obsolescence of facilities, choice and competition among providers, limitations on services—these are not separate, distinct issues, but parts of the whole. The way to approach this, in my judgment, is not to compartmentalize the issues but instead to accept them for what they are—an integrated national problem—and to identify the contributions that different groups in society can make to solve that problem.

In sum, we are the victims of our own success. We have been able to expand access to health care, and turn this into a right, because we have had the technology, human resources and wealth to do so. That can only be regarded as a triumph of our society; but like any other right in a free society this one has limits, and we need a common approach that respects those limits. Otherwise, the costs will continue to climb and the nation will be driven to a two-tier system in which the indigent may receive less than the necessary quality of care, and people who need the largest amounts of help will be driven to the wall financially.

The way to cope with this is not through fiat but through more participation and leadership from the private sector, more collaborative efforts among health care professionals and other people in the community, more choice among programs, and more use of the technologies and management skills that can reduce costs while preserving the quality of care. Above all, we need different incentives. Changes in law and regulation to favor prospective payment, plus stronger preventive programs, would be major steps in the right direction.

Time is a factor. Health care is an issue that is sure to heat up, socially and politically, as more people discover there is no such thing as a free lunch.

There is no one model to follow, and no way to induce swift change in a $300 billion industry employing more than five million people. Those ought not be crippling factors, though. We have at hand a variety of alternatives already tried in one setting or another, and often found helpful. We have the advantage of experience, and the knowledge that experiments with change, launched voluntarily, are not irreversible. If some steps do not work as well as we hope, we can try others. Above all, we have strong reasons to believe that a "do nothing" strategy is likely to be the most costly and painful to all. That ought to give us enough to get the job done.●

THE 175TH ANNIVERSARY OF JOHN WILEY & SONS, INC.

● Mr. BRADLEY. Mr. President, I am pleased to recognize the distinguished publishing firm of John Wiley & Sons, Inc. on their 175th anniversary. An outstanding publisher of scientific, technical, and educational books and journals, the firm began in 1807 as a small printing shop at 6 Reade Street in New York City. The founder, Charles Wiley, and his son John were committed to the emerging Nation's authors, publishing the early works of Poe, Melville, and Hawthorne. They helped establish the reputation of James Fenimore Cooper with the publication of "The Spy" in 1821.

After the death of Charles Wiley in 1826, John took over the family business, which he ran for the next 65 years. From 1836 to 1848, the firm was in partnership with George Putnam, continuing to publish works of general literary interest. After the relationship with Putnam ended, John Wiley, along with his son William, perceived that the Industrial Revolution would create a greater need for scientific and technical books. The company began to publish pioneering works in areas such as engineering, aeronautics, and chemistry and started on the course which has earned it a worldwide reputation today.

In fact, Wiley's publishing programs have paralleled the Nation's intellectual and technological growth over the past 150 years. Its authors, who include 10 Nobel Prize winners, have often generated that growth. The company is now an international concern, publishing works in over 40 languages around the world. Consistent with its historic mission to meet accelerating information needs, Wiley has recently launched a database publishing unit, and introduced professional and educational computer software. After 175 years of continuous business, John Wiley & Sons remains an independent publisher dedicated to its profession.

At a recent anniversary dinner, Townsend Hoopes, president of the Association of American Publishers, made the following remarks, which I would like to insert into the RECORD.

The remarks follow:

REMARKS BY TOWNSEND HOOPES, PRESIDENT OF THE ASSOCIATION OF AMERICAN PUBLISHERS, AT WILEY DINNER, NOVEMBER 18, 1982

How is John Wiley perceived in the realms of American and international publishing?

One can answer without hesitation—as a distinguished leader. And as a company whose claim to leadership is solidly based on the relevance and quality of its books and on the integrity of its management in all of their dealings. Wiley managers, editors and sales representatives have earned standing as informed associates in the academic and scientific worlds, and they are engaged in a genuine dialogue with these communities on trends in education and science, on the books needed to extend knowledge in these areas, and on the selection of the best authors to write such books.

Wiley is especially noted for the closeness of its editor-author relations, which appear to be of such mutual benefit and long duration as to be almost familial. More broadly, there is a sense in which the whole body of Wiley employees seems to be a single close-knit family. The company is seen to treat its people with a special consideration, and this is seen to produce that extra measure of cohesion, loyalty and continuity of service which is reflected on the final result.

In brief, John Wiley & Sons is perceived throughout the world publishing community as a company which has built its enviable reputation, its steady growth and its financial success on the solid foundations of integrity, quality, and humaneness. I doubt if there can be higher praise.●

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have a number of things in the folder that appear to be cleared for action by unanimous consent. For the sake of time, I say to the minority leader, I shall simply put the request. If the minority leader objects, he will simply pose the objection.

Mr. ROBERT C. BYRD. I have no objection to that. If the distinguished majority leader is like-minded, at the end of the actions, perhaps he will then get an order to reconsider.

Mr. BAKER. Very good, I shall do that.

ACREAGE LIMITATION AND RESIDENCY PROVISIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 533, S. 1867.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1867) to amend and supplement the acreage limitation and residency provisions of the Federal reclamation law, as amended and supplemented, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike out all after the enacting clause and insert the following:

That this Act shall amend and supplement the Act of June 17, 1902, and Acts supplementary thereto and amendatory thereof (43 U.S.C 371), hereinafter referred to as the "Federal reclamation law".

DEFINITIONS

SEC. 2. As used in this Act—

(a) The term "district" means any individual or any legal entity established under State law which has entered into a contract or is eligible to contract with the Secretary for irrigation water.

(b) The term "full cost" means an annual rate as determined by the Secretary that shall amortize the construction costs properly allocable to irrigation facilities in service, plus all operation and maintenance deficits funded, less payments, over such periods as may be required under reclamation law or applicable contract provisions, with interest on both accruing from the date of enactment on costs outstanding at that date, or from the date incurred in the case of costs arising subsequent to the date of enactment. The interest rate used pursuant to this Act shall be determined by the Secretary of the Treasury on the basis of the computed average interest rate payable by the Treasury upon its marketable public obligations which are neither due nor callable for redemption for fifteen years from the date of issuance: Provided, That normal operation, maintenance, and replacement charges will be collected in addition to the full cost charge.

(c) The term "individual" means any natural person, including his or her spouse, and including other dependents thereof within the meaning of the Internal Revenue Code (26 U.S.C. 152).

(d) The term "irrigation water" means water made available for agricultural purposes from the operation of reclamation project facilities pursuant to a contract with the Secretary.

(e) The term "landholding" means total irrigable acreage of one or more tracts of land owned or operated under a lease which is served with irrigation water pursuant to a contract with the Secretary.

(f) The term "qualified recipient" means an individual who is a citizen of the United States or a resident alien thereof or any legal entity established under State or Federal law which benefits twenty-five such individuals or less.

(g) The term "limited recipient" means any legal entity established under State or Federal law benefiting more than twenty-five individuals.

(h) The term "Secretary" means the Secretary of the Interior.

SEC. 3. (a) The provisions of the Federal reclamation laws shall remain in full force and effect, except to the extent such laws are amended by, or are inconsistent with, this Act.

(b) Nothing in this Act shall repeal or amend any existing statutory exemptions from the acreage limitation of the Federal reclamation law.

ACREAGE LIMITATION

SEC. 4. (a)(1) Notwithstanding any other provisions of law to the contrary, irrigation water may be delivered to a qualified or limited recipient for use in the irrigation of a landholding of not more than two thousand and eighty acres of class I lands, or the equivalent thereof: Provided, That not more than one thousand two hundred and eighty acres of such landholding may be owned by a qualified recipient and that not more than six hundred and forty acres of such landholding may be owned by a limited recipient.

(2) Lands leased for a term of one year or less for the purpose of water management and conservation in years of inadequate project water supply shall not be considered as part of a landholding solely because of having been so leased.

(b) Irrigation water may be delivered to lands leased in excess of a landholding of two thousand and eighty acres or the equivalent thereof as described in subsection (a), only if full cost as defined in subsection 2(b) of this Act is paid for such water as is assignable to those lands leased in excess of a landholding of one thousand two hundred and eighty acres in the case of a qualified recipient or lands leased in excess of a landholding of six hundred and forty acres in the case of a limited recipient: Provided, That "full cost" shall not be applied to excess lands under recordable contract.

(c) In determining the extent of a landholding the Secretary shall add to any landholding held directly by a qualified or limited recipient that portion of any landholding held indirectly by such qualified or limited recipient which benefits that owner in proportion to that ownership.

EQUIVALENCY

SEC. 5. Wherever an acreage limitation is imposed by the Federal reclamation law, including this Act, the Secretary, upon the request of a contracting entity, shall designate lands under the applicable acreage limitation within a district classified as having class I productive potential or the equivalent thereof in other lands of lesser productive potential. Standards and criteria for determination of land classes pursuant to this authority shall take into account all factors which significantly affect the economic feasibility of irrigated agriculture, including but not limited to, soil characteristics, crop adaptability, costs of crop production, and length of growing season.

RESIDENCY NOT REQUIRED

SEC. 6. Notwithstanding any other provision of law, irrigation water made available from the operation of reclamation project facilities shall not be withheld from delivery to any project lands for the reason that the owners, lessees, or operators do not live on or near them.

RECORDABLE CONTRACTS

SEC. 7. (a)(1) Irrigation water made available in the operation of reclamation project facilities constructed after the enactment of this Act may not be delivered for use in the irrigation of lands held in excess of the acreage limitations imposed by the Federal reclamation law, including this Act, unless and until the owners thereof shall have executed a recordable contract with the Secretary.

(2) Lands held in excess of the acreage limitations imposed by the Federal reclamation law, including this Act, which on the date of enactment of this Act are or are capable of receiving delivery of irrigation water made available by the operation of existing reclamation project facilities may receive such deliveries only: (i) if the disposal of the owner's interest in such lands is required by an existing recordable contract with the Secretary, or (ii) if the owners of such lands have requested that a recordable contract be executed by the Secretary.

(b) The recordable contracts referred to in subsection (a) shall require the disposal of interests in excess lands within a reasonable time to be established by the Secretary, but shall not exceed ten years after the recordable contract is executed by the Secretary in accordance with terms and conditions required by the Federal reclamation law generally.

(c) Recordable contracts existing on the date of enactment shall be amended at the request of the landowner to conform with the acreage limitations contained in this Act: Provided, That the time period for disposal of excess lands specified in the existing recordable contract shall not be extended except as provided in subsection (e).

(d) All recordable contracts covering excess lands sales shall provide that a power of attorney shall vest in the Secretary to sell any excess lands not disposed of by the owners thereof within the period of time specified in the contracts. In the exercise of that power, the Secretary shall sell such lands through an impartial selection process only to qualified purchasers according to such reasonable rules and regulations as he may establish: Provided, That the Secretary shall recover for the owner the fair market value of the land and improvements thereon unrelated to irrigation water deliveries.

(e) The period of time for which the disposal of excess lands may have been required under recordable contracts executed under the Federal reclamation law, including this Act, are hereby, and in the future shall be, extended for the period of time in which the Secretary shall have withheld the processing or approval of the disposition of such lands, whether he may have been compelled to do so by court order or whether he may have declined to do so for other reasons.

(f) Excess lands which have been or may be disposed of in compliance with the Federal reclamation law, including this Act, shall not be considered eligible to receive irrigation water unless—

(1) they are held by nonexcess owners; and

(2) in the case of disposals made after the date of enactment of this Act, their title is burdened by a covenant prohibiting their sale, for a period of ten years after their original disposal to comply with the Federal reclamation law, including this Act, for values exceeding the sum of the value of newly added improvements and the value of the land as increased by market appreciation unrelated to the delivery of irrigation water. Upon expiration of the terms of such covenant, the title to such lands shall be freed of the burden of any limitations on subsequent sale values which might otherwise be imposed by the operation of section 432e of title 43, United States Code.

CORPS OF ENGINEERS PROJECTS

SEC. 8. (a) Notwithstanding any other provision of law to the contrary, neither the acreage limitation provisions nor the other provisions of the Federal reclamation laws, including this Act, shall be applicable to lands receiving benefits from Federal water resources projects constructed by the United States Army Corps of Engineers, unless—

(1) the project has, by Federal statute, explicitly been designated, made a part of, or integrated with a Federal reclamation project; or

(2) the Secretary, pursuant to his authority under the Federal reclamation law, has provided project works for the control or conveyance of an agricultural water supply for the lands involved.

(b) Notwithstanding any other provisions of this section to the contrary, obligations that require water users, pursuant to contracts with the Secretary, to repay the share of construction costs and to pay the share of the operation and maintenance and contract administrative costs of a Corps of Engineers project which are allocated to conservation storage or irrigation storage shall remain in effect.

REPAYMENT OF CONSTRUCTION CHARGES

SEC. 9. (a) The acreage limitation provisions of the Federal reclamation law shall cease to apply to any part of a landholding upon completion of the repayment by any contracting entity of the amount of any construction costs required to be repaid by such contracting entity (or by a person within the district pursuant to a contract existing

on the date of enactment of this Act) by the terms of any contracts with the Secretary relating to the delivery of water supplies to such part of a landholding for agricultural use: Provided, That where any such contract may be entered into pursuant to the authority of the Rehabilitation and Betterment Act (Act of October 7, 1949, 63 Stat. 724, as amended), the contracting entity shall have the additional option of adopting a form of repayment consistent with section 5(c)(2) of the Small Reclamation Projects Act of 1956 (Act of August 6, 1956, 70 Stat. 1044, as amended) and if such form of repayment is adopted, the acreage limitation provisions of the Federal reclamation law shall not apply solely as a result of the indebtedness under such contract.

(b) The Secretary shall provide, upon request of any owner of a landholding for which repayment has occurred, a certificate acknowledging that the landholding is free of the acreage limitation of the Federal reclamation law. Such certificate shall be in a form suitable for entry in the land records of the county in which such landholding is located. Any certificate issued prior to the date of enactment of this Act is hereby ratified.

(c) Nothing in this Act shall be construed as authorizing or permitting lump sum or accelerated repayment of construction costs, except in the case of a repayment contract which is in effect upon the date of enactment of this Act and which provides for such lump sum or accelerated repayment by an individual or district or except as provided in subsection (d) of this section.

(d) The Secretary is authorized to negotiate with such contracting entity to conform the terms of any such contract to permit lump sum or accelerated repayment if the Secretary finds that the amount of outstanding indebtedness is less than 5 per centum of the total repayment obligation associated with such contract and that a pattern of family farming has been established in the project service area.

RELIGIOUS OR CHARITABLE ORGANIZATIONS

SEC. 10. An individual religious or charitable entity or organization (including but not limited to a congregation, parish, school, ward, or chapter) which is exempt from taxation under section 501 of the Internal Revenue Code of 1954, as amended, and which owns, operates, or leases any lands within a district shall be treated as a person under the provisions of this Act regardless of such entity or organization's affiliation with a central organization or its subjugation to a hierarchical authority of the same faith and regardless of whether or not the individual entity is the owner of record if—

(a) the agricultural produce and the proceeds of sales of such produce are directly used only for charitable purposes;

(b) said land is operated by said individual religious or charitable entity or organization (or subdivisions thereof); and

(c) no part of the net earnings of such religious or charitable entity or organization (or subdivision thereof) shall inure to the benefit of any private shareholder or individual.

EXEMPTIONS

SEC. 11. Neither the limitations and restrictions imposed by this Act nor any other provision of the Federal reclamation law shall prohibit the delivery of irrigation water—

(a) so long as the lands are held by an individual or corporate trustee in a fiduciary capacity for a beneficiary or beneficiaries whose interests in the lands served do not exceed the limits imposed by the Federal reclamation law, including this Act;

(b) when the lands served receive only a temporary, not to exceed one year, supply made possible as a result of—

(1) an unusually large water supply not otherwise storable for project purposes; or

(2) infrequent and otherwise unmanaged flood flows of short duration;

(c) when the lands are acquired by involuntary foreclosure, or similar involuntary process of law, by bona fide conveyance in satisfaction of a mortgage, by inheritance, by devise: Provided, That if after acquisition, such lands are not qualified under the Federal reclamation law, including this Act, they shall be furnished temporarily with a water supply for a period not exceeding ten years from the effective date of such acquisition;

(d) to isolated tracts found by the Secretary to be economically farmable only if they are included in a larger farming operation but which may, as a result of their inclusion in that operation, cause it to exceed the acreage limitations of the Federal reclamation law, including this Act;

(e) to lands which will receive a substitute water supply and will be required by the Secretary in his contract with the district to reduce ground water pumping in equal quantity from aquifers in the project area as a condition of receiving substitute water from a Federal reclamation project.

CONTRACT REQUIRED

SEC. 12. Irrigation water temporarily made available from reclamation facilities in excess of ordinary quantities not otherwise storable for project purposes or at times when such water would not have been available without the operations of those facilities, may be used for water quality, irrigation, municipal, or industrial purposes only to the extent covered by a contract requiring payment for the use of such water, executed in accordance with the Reclamation Project Act of 1939, or other applicable provisions of the Federal reclamation laws.

VALIDATION

SEC. 13. Any non-Federal party to a repayment contract with the Secretary relating to a reclamation project may obtain validation of any provisions of such contract relating to the acreage limitation available to such party pursuant to such contract or under the Federal reclamation law by making application therefor to the Secretary in writing within three years from the date of enactment of this Act. The Secretary shall review each such application and within ninety days from the date on which he receives such application shall transmit it to the Congress together with his comments and recommendations. Unless the Congress by joint resolution disapproves the application within ninety days from the date on which it receives the Secretary's transmittal, the application shall be approved and the provisions shall be considered to be validated.

CONSENT TO SUE

SEC. 14. In addition to any other remedy available in law or equity, any party to a contract with the Secretary providing for water service or for the repayment of the construction costs of Federal reclamation project facilities used to store and deliver irrigation water may bring an action in the United States district court for the district in which the project facilities are located, and only in such district, for mandatory injunctive or other appropriate relief to adjudicate, confirm, validate, or decree the contractual right of any person or entity, including but not limited to any contracting entity, who is the beneficiary of any such contract and to reform such contract in accordance with the terms of any written representation concerning the application or interpretation of the Federal reclamation law, including this Act, or contracts made by the Secretary or his representative to such party or his predecessor in interest. Exclusive jurisdiction for such suit is hereby vested in the United States district court. In the case of a written representation, if the court finds, on the basis of the evidence submitted, that the party would not have entered into the contract but for the written representations made by the Secretary or his representative, which were relied on by those using such irrigation water, then the court shall order the Secretary to reform the contract to conform with the representations, and the contract, as reformed, shall be considered valid as of the date of the written representation.

ADMINISTRATIVE PROVISIONS

SEC. 15. (a) The Secretary may prescribe regulations and shall collect all data necessary to carry out the provisions of this Act and other provisions of the Federal reclamation law.

(b) Section 3 of the Act of July 7, 1970 (43 U.S.C. 425b) is amended by striking the phrase "for a period not to exceed twenty-five years" following the term "project water".

(c) Any nonexcess land which is acquired into excess status pursuant to involuntary foreclosure or similar involuntary process of law, conveyance in satisfaction of mortgage, inheritance, or devise, may be sold at its fair market value without regard to any other provision of this Act or to section 46 of the Act entitled "An Act to adjust water rights charges, to grant certain relief on the Federal irrigation projects, and for other purposes," approved May 25, 1926 (43 U.S.C. 423e): Provided, That if the status of mortgaged land changes from nonexcess into excess after the mortgage is recorded and is subsequently acquired by the lender by involuntary foreclosure or similar involuntary process of law, by bona fide conveyance in satisfaction of the mortgage, such land may be sold at its fair market value.

(d) Beginning October 1, 1982, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

(e) The Secretary is hereby authorized and directed to amend any provision of any contract between the Secretary and another party existing upon the date of enactment of this Act which is inconsistent with the provisions of this Act but only at the request of said other party.

(f) The Act of May 26, 1926, Appointment of Commissioner of Reclamation (44 Stat. 657) is amended by adding the words "by and with the advice and consent of the Senate" after the word "President".

LEASING REQUIREMENTS

SEC. 16. (a) Notwithstanding any other provision of the Federal reclamation law, including this Act, lands which receive irrigation water may be leased only if the lease instrument is—

(1) written; and

(2) for a term not to exceed ten years, including any exercisable options: Provided, however, That with the prior approval of the Secretary, leases of lands for the production of perennial crops having an average life of

more than ten years may be for periods of time equal to the average life of the perennial crop but in any event not to exceed twenty-five years. In addition, the Secretary shall be provided with a certificate signed by the lessee which contains a legal description of the leased land, including a statement of the number of acres leased, the term of the lease, and a certification that the rent paid reflects the reasonable value of the irrigation water to the productivity of the land.

(b) Any lease in effect as of January 1, 1982, shall be required to comply with the provisions of this Act within ten years of enactment of this Act.

(c) Lessees holding lands in excess of the acreage limitation of this Act or of any other provisions of the Federal reclamation law under the provisions of a valid written lease effective as of January 1, 1982, shall be required to comply with the appropriate acreage limitation within ten years of enactment of this Act.

REPORTING

SEC. 17. Any contracting entity subject to the acreage limitation of the Federal reclamation law shall compile and maintain such records and information as the Secretary deems reasonably necessary to implement this Act and the Federal reclamation law. On a date set by the Secretary following the date of enactment of this Act, and annually thereafter, every such contracting entity shall provide in a form suitable to the Secretary such reports on the above matters as the Secretary may require.

UP AMENDMENT NO. 1583

(Purpose: To provide for the non-Federal development of the Bradley Lake Hydroelectric Project, Alaska)

Mr. BAKER. Mr. President, I send to the desk an amendment in the nature of a substitute by the Senator from Alaska (Mr. MURKOWSKI).

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. MURKOWSKI, proposes an unprinted amendment numbered 1583.

1. Strike all after the enacting clause and insert in lieu

SEC. . Notwithstanding any prior authorizations or appropriations with respect to the Bradley Lake Project, Alaska, the Federal Energy Regulatory Commission shall have jurisdiction to license, in accordance with the procedures established under the Federal Power Act (16 USC Sections 791a-825r) and other applicable provisions of law, the non-Federal construction, operation, and maintenance of the Bradley Lake Project, Alaska.

2. Strike the title.

Mr. MURKOWSKI. Mr. President, the amendment that I offer today is intended to encourage and facilitate the development of the Bradley Lake hydroelectric project in Alaska.

Bradley Lake, near Cook Inlet, Alaska, was originally authorized as an hydroelectric project by the Flood Control Act of 1962. The effect of this authorization was to preclude the consideration by the Federal Energy Regulatory Commission of any application by a non-Federal entity for construction of the project. My amendment would authorize the FERC to consider and act upon such an application.

As currently proposed, the project would provide 135 megawatts to the Kenai Peninsula, a rapidly developing area in southwest Alaska. Because of the rapidly increasing demand for power in that area, the proposed project has received wide support from the State legislature, the municipality of Anchorage, the Kenai Peninsula Borough, Homer Electric Association, and other neighboring utilities.

In addition, the project enjoys support from the Alaska Center for the Environment, and has been determined to be consistent with the Alaska coastal management program, with certain conditions.

The Alaska Power Authority, a State agency, desires to undertake the development of this project pursuant to a license to be issued under the Federal Power Act. This amendment would provide the FERC with the needed authority to consider such an application.

Studies undertaken by the U.S. Army Corps of Engineers clearly indicate the technical and economic feasibility of the development of this site for the production of hydroelectric power. A comprehensive environmental impact statement for the proposed project has been completed by the corps and is available for use by the non-Federal entity in planning for the appropriate development of the site.

Mr. President, I am a strong advocate of our Nation's hydroelectric resources as a source of clean energy. Their fuel is both free, and free from foreign embargo. Hydro development is the only renewable energy source which is capable of having a significant impact on our need for generating capacity while at the same time having the most benign environmental impact of any central generating source.

In addition to encouraging the development of this particular site, I would also like to point out that this amendment suits very well both the administration's and this Congress' intent to encourage, where appropriate, non-Federal development, with non-Federal dollars, of water resource projects.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 1583) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee substitute as amended.

The committee amendment in the nature of a substitute was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

WOLF TRAP FARM PARK ACT OF 1982

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 782, S. 1999.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1999) to amend the Act to provide for the establishment of the Wolf Trap Farm Park in Fairfax County, Virginia, and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, on matters that do require consent, I ask the Chair to yield to the minority an opportunity to object.

The PRESIDING OFFICER. The Chair will recognize the minority.

Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause, and insert the following:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Wolf Trap Farm Park Act of 1982."

SEC. 2. The purposes of this Act are to—

(a) allow the Secretary of the Interior to cooperate with the Wolf Trap Foundation for the Performing Arts (Foundation) in the operation of Wolf Trap Farm Park (Park); and

(b) provide financial assistance to the Foundation for reconstruction of the Filene Center in the Park.

SEC. 3. (a) The Secretary of the Interior is authorized to provide to the Foundation, or its designee, on such terms and conditions as he deems appropriate, for reconstruction of the Filene Center in the Park: (1) a grant not to exeed $9,000,000; and (2) a loan not to exceed $9,000,000 to be repaid in full, with interest on any unpaid obligation at a rate determined by the Secretary of the Treasury, taking into consideration current market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturity of the loan, plus an allowance adequate, in the judgment of the Secretary of the Interior, to cover the administrative expenses of servicing the loan. In his determination of terms and conditions governing the loan, the Secretary shall fix a term of not more than five years from the date the loan agreement is executed.

(b) For purposes of carrying out the grant and loan under subsection (a) of this section, there are authorized to be appropriated such sums as may be necessary, but not to exceed $18,000,000, and such sums shall remain available until expended.

(c) All right, title and interest in any reconstructed Filene Center in the Park shall vest in the United States. The Secretary of the Interior is authorized to provide support services in the reconstruction of the Filene Center, as requested by the Foundation, on a reimbursable basis, for the purposes of this Act.

(d) The plans and design for any reconstruction of the Filene Center shall be sub-

ject to the approval of the Secretary of the Interior.

(e) The Foundation shall be deemed to have an insurable interest in the physical facilities of the Filene Center in addition to any other insurable interest it may be entitled to in the Filene Center, subject to the terms and conditions of any cooperative agreement pursuant to the Act of October 15, 1966, as amended: Provided, That if the Foundation procures insurance, it shall do so at its own expense, and that any proceeds from any insurance recovery shall be applied to the repair or replacement of the Filene Center.

SEC. 3. The Secretary of the Interior shall cooperate with the Wolf Trap Foundation for the Performing Arts, organized pursuant to the District of Columbia Nonprofit Corporation Act and, as a charitable organization, exempted from taxation under section 501(c)(3) of the Internal Revenue Service Code of 1954, in the operation of the Park, under such terms and conditions as the Secretary deems appropriate.".

SEC. 4. Section 3 of the Act of October 15, 1966 (80 Stat. 950) is redesignated as section 4 and the following new section is inserted after section 2:

UP AMENDMENT 1584

Mr. BAKER. Mr. President, I send an amendment to the desk in the nature of a substitute to the committee substitute.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) proposes an unprinted amendment numbered 1584.

Mr. BAKER. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert the following:

That the Secretary of the Interior is authorized to procure, and provide for the installation of, twelve new stainless steel casings and minor appurtenant parts to replace twelve existing cast steel pump casings in pumping plants 1A and 2A of the southern Nevada water project, first stage.

SEC. 2. The Secretary is hereby authorized to negotiate with the original manufacturer for the procurement of the new stainless steel replacement casings.

SEC. 3. Costs incurred in the procurement of the twelve pump casings and minor appurtenant parts shall be borne by the United States and shall be nonreimbursable and nonreturnable. The State of Nevada shall install the twelve stainless steel casings and minor appurtenant parts at its cost in a manner satisfactory to the Secretary.

SEC. 4. There is hereby authorized to be appropriated beginning October 1, 1983, for procurement of twelve stainless steel pump casings and minor appurtenant parts for southern Nevada water project pumping plants 1A and 2A the sum of $1,500,000 (July 1980 price levels), plus or minus such amounts, if any, as may be justified by reason of changes in procurement costs as indicated by engineering cost indexes applicable to the type of procurement involved: Provided, That, except as otherwise may be required by existing contracts, the United States shall incur no further liability with respect to the twelve pumps in pumping plants 1A and 2A of southern Nevada water project, first stage and no further expenditures or actions by the United States with respect to those pumps are either expressly or impliedly authorized by this Act.

2. Strike the title and insert in lieu thereof "A bill to authorize the Secretary of Interior to install pump casings in the Southern Nevada water project."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP 1584) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

EMIGRATION OF IDA NUDEL

Mr. BAKER. I ask that the Chair lay before the Senate House Concurrent Resolution 330, Calendar Order No. 950.

Mr. ROBERT C. BYRD. Mr. President, again, I say on matters on which there could be an objection filed, the Chair should give the minority the chance to object before he asks the clerk to state the matter. I do not expect to object.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Without objection, it is so ordered.

The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 330) expressing the sense of the Congress with respect to the Soviet Union's obligations under international law to allow Ida Nudel to emigrate to Israel, and for other purposes,

Mr. PERCY. Mr. President, I am heartened to see the Senate concur in adoption of House Concurrent Resolution 330 calling for the emigration from the Soviet Union of Ida Nudel. I know that all of my colleagues share my interest and my concern for her fate.

Ida Nudel has been seeking to leave the Soviet Union to rejoin her sister in Israel for 11 years now. Frustrated in her quest, she became a mainstay of support, assistance, and hope for other Soviet Jewish "refuseniks." For her humanitarian courage, she was arrested in 1978, convicted of alleged hooliganism, and sentenced to 4 years of internal exile. Upon completion of her term last spring, she was released, but has not been permitted to resume residence in Moscow, and has not been permitted to join her sister in Israel.

Mr. President, Ida Nudel has been the heart and soul of the Jewish emigration movement. She means a great deal to all of us. I have been seeking her emigration for 6 years. Adoption of this resolution is a pledge that her friends in the U.S. Senate and around the world will not cease our efforts until she has realized her wish of rejoining her sister in Israel.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

The preamble was agreed to.

BUDGET ACT WAIVER—S. 2863

Mr. BAKER. Mr. President, there is a Budget Act waiver to accompany Calendar Order No. 978, S. 2863. I ask unanimous consent that the Senate proceed to consider the waiver, Senate Resolution 504.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 504) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2863,

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 504) was agreed to, as follows:

S. RES. 504

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 2863. Such waiver is necessary because S. 2863, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This budget waiver will allow Senate consideration of S. 2863 which extends to all Federal jurors eligibility for Federal workers' compensation, provides for the taxing of attorneys' fees in certain actions brought by jurors, and authorizes the service of jury summonses by ordinary mail. After hearings in the Agency Administration Subcommittee, S. 2863 was reported favorably by all members of the subcommittee October 1, 1982.

S. 2863 indirectly authorizes the appropriation of an estimated $100,000 to compensate jurors suffering duty-related injuries. However, enactment of the regular mail option for the service of jury summonses is anticipated to save $300,000 to $500,000 a year resulting in an estimated net gain of between $200,000 and $400,000.

S. 2863 was not reported on or before May 15, 1982, because it was not introduced until August 19, 1982.

JURY PROCEDURE

Mr. BAKER. Mr. President, I ask unanimous consent that the Chair lay before the Senate the underlying measure, S. 2863, Calendar Order No. 978.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2863) to amend title 28 to provide protection to all jurors in Federal cases, to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summonses by ordinary mail.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

That section 1875(d) of title 28, United States Code, is amended—

(1) by inserting "(1)" immediately after "(d)"; and

(2) by amending paragraph (2) to read as follows:

"(2) In any action or proceeding under this section, the court may award a prevailing employee who brings such action by retained counsel a reasonable attorney's fee as part of the costs. The court may tax a defendant employer, as costs payable to the court, the attorney fees and expenses incurred on behalf of a prevailing employee, where such costs were expended by the court pursuant to paragraph (1) of this subsection. The court may award a prevailing employer a reasonable attorney's fee as part of the costs only if the court finds that the action is frivolous, vexatious, or brought in bad faith.".

SEC. 2. (a) The second paragraph of section 1866(b) of title 28, United States Code, is amended to read as follows:

"Each person drawn for jury service may be served personally, or by registered, certified, or first-class mail addressed to such person at his usual residence or business address.".

(b) The fourth paragraph of section 1866(b) of title 28, United States Code, is amended to read as follows:

"If such service is made by mail, the summons may be served by the marshal or by the clerk, the jury commission or their duly designated deputies, who shall make affidavit of service and shall attach thereto any receipt from the addressee for a registered or certified summons.".

SEC. 3. Chapter 121 of title 28, United States Code, is amended—

(1) by adding at the end thereof the following:

"§ 1877. Protection of jurors

"(a) Subject to the provisions of this section and title 5 of the United States Code, subchapter 1 of chapter 81, title 5, United States Code, applies to a Federal grand or petit juror, except that entitlement to disability compensation payments does not commence until the day after the date of termination of service as a juror.

"(b) In administering this section with respect to a juror covered by this section—

"(1) a juror is deemed to receive monthly pay at the minimum rate for grade GS-2 of the General Schedule unless his actual pay as a Government employee while serving on court leave is higher, in which case monthly pay is determined in accordance with section 8114 of title 5, United States Code, and

"(2) performance of duty as a juror includes that time when a juror is (A) in attendance at court pursuant to a summons, (B) in deliberation, (C) sequestered by order of a judge, or (D) at a site, by order of the court, for the taking of a view."; and

(2) by amending the table of sections for such chapter by adding after the item relating to section 1876, the following:

"1877. Protection of jurors.".

SEC. 4. Section 8101 of title 5, United States Code, is amended in paragraph (F) of subsection (1) by striking out "juror" through the end of such paragraph and inserting in lieu thereof "juror;".

AUTHORIZATION OF A BUST OR STATUE OF DR. MARTIN LUTHER KING, JR.

Mr. BAKER. Mr. President, I ask unanimous consent that the Chair lay before the Senate House Concurrent Resolution 153, Calendar Order No. 989.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 153) authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol.

There being no objection, the concurrent resolution was considered and agreed to.

EXTENSION OF CERTAIN PROGRAMS UNDER THE FOREIGN ASSISTANCE ACT

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 7143, Calendar Order No. 997.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7143) to amend the Foreign Assistance Act of 1961 to extend for an additional year the agricultural and productive credit and self-help community development programs.

There being no objection, the Senate proceeded to consider the bill.

The bill was ordered to a third reading, read the third time, and passed.

SENATE CONCURRENT RESOLUTION 46—MUTUAL SECURITY EFFORTS OF THE UNITED STATES AND JAPAN

Mr. BAKER. Mr. President, I next ask the Chair lay before the Senate, Senate Concurrent Resolution 46, Calendar Order 1013.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The clerk will state the concurrent resolution.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 46) expressing the sense of the Congress with regard to the mutual security efforts of the United States and Japan.

The PRESIDING OFFICER. The question is on the substitute amendment.

The amendment was agreed to.

Mr. PERCY. Mr. President, the Senate has before it for consideration Senate Concurrent Resolution 46 expressing the sense of the Congress with regard to the mutual security effects of the United States and Japan. Senator LEVIN introduced the original resolution and more than 60 Senators cosponsored it. On December 14 the Senate Foreign Relations Committee adopted a substitute resolution which has just been adopted.

The substitute is the product of a truly bipartisan, consensus approach. Senators HAYAKAWA, GLENN, LEVIN, and I all participated in the drafting of the substitute language and the resolution is now stronger and, I believe, will have a positive effect in Tokyo.

There is no question that there is a widespread view here in the Senate that Japan should do more to contribute its fair share to Western defense. Japan benefits both directly and indirectly from the effort we are making to strengthen U.S. defense capabilities during a time of fiscal austerity and high budget deficits.

Japan has the second largest economy in the free world. Estimates are that per capita GNP in Japan will surpass that of the United States by the century's end. It is unconscionable that Japan, which has so much to gain from a peaceful and stable world, should stand aside while others are making significant sacrifices to carry their share of the burden.

This resolution calls on Japan to make greater efforts to improve its self-defense capabilities. It urges Japan to increase its foreign assistance to developing nations as an additional means to contribute to Western security. It calls on Japan to carry out its announced policy of defending its sealanes and indicates a desire for Japan to assume a larger share of the operating costs of U.S. Forces in Japan.

The resolution shows a special sensitivity to some of the concerns expressed by Japan's Asian neighbors. It states that the upgrading of Japan's self-defense capability can and should be achieved through the deployment of weapons and forces of a strictly defensive nature.

The resolution also expresses an interest in an assessment by our colleagues in the Japanese Diet of security challenges in the Pacific and of appropriate U.S. and allied responses.

We hope and intend that this resolution be received constructively in Tokyo. If adopted, it will be the Senate's first formal message to the new Japanese Government and should be seen as an important, first priority item in the U.S. congressional view of overall United States-Japan relations.

The committee has had a longstanding interest in the issue of Japanese defense spending. A letter I sent in April 1980 to Prime Minister Ohira calling for greater defense efforts on the part of Japan attracted 36 signatures, many from both the Foreign Relations and Armed Services Committees.

The committee does feel special gratitude to Senator LEVIN because he provided the impetus for this important statement and we thank him for his invaluable insight and contribution to the issue.

Mr. HAYAKAWA. Mr. President, I chaired the Senate Foreign Relations Committee hearing on June 16 in which we discussed Senate Congressional Resolution 46 in detail with Senators LEVIN and ROTH, as well as with three outside witnesses, Adm. James L. Holloway III, Dr. Evelyn Colbert, and Prof. James Morley. I would like to report to my colleagues and for the record some of my impressions from that hearing.

All of our witnesses agreed that U.S. security interests in the Pacific are well served by the United States-Japan alliance. A strong United States-Japan relationship is the keystone to U.S. defense strategy in the region. By providing the United States access to facilities and pursuing a friendly, supportive partnership, Japan is already making a significant contribution to both United States and Western defense. By calling on Japan to improve its self-defense capabilities, we are not overlooking what Japan is already doing. Nor are we trying to reduce our own commitments to the security of the region. We see Japan's role as a complement to, not a substitute for, our own increased efforts.

Another issue discussed extensively during the hearing was the call in the original resolution for Japan to spend at least 1 percent of its GNP on defense. The substitute language passed by committee and now being considered does not contain that request. Professor Morley argued, persuasively in my opinion, that the figure is illusory. He said that if military retirement benefits are included in Japanese calculations, as they are in NATO, the figure has already been surpassed. My own view is that such numerical limits are arbitrary and do not reflect what is necessary for adequate self-defense. Just as we have decided to avoid the use of the artificial measure, we hope that the Japanese will rise above their fixation on that figure.

An issue which I raised during the hearing and which we must continue to be sensitive to is the reaction of Japan's neighbors as they see the United States pushing Japan to improve its military capabilities. There is a serious concern about a strongly rearmed Japan in the Philippines, Malaysia, Indonesia, Singapore, and in other nations where the Japanese occupation during World War II was an embittering and tragic experience. The Japanese are aware of these sensitivities, but sometimes I believe we Americans forget them. Improved Japanese defense capabilities must take place within the context of the United States-Japanese alliance, they must be seen as defensive, and they must not substitute for a strong U.S. military presence in the region.

I support and am a cosponsor of the resolution as we have rewritten it. I thank my colleagues for their interest in the issue and their assistance and advice on appropriate language and urge the Senate to vote favorably on the resolution.

Mr. LEVIN. Mr. President, during consideration of the fiscal 1983 continuing funding resolution, the Senate has debated the largest defense appropriations bill in real dollars since the height of the Korean war.

That bill is the financial foundation for our own national security, but it also is important to point out that our NATO allies and Japan are major beneficiaries of this measure.

The Armed Forces funded by this bill protect our allies as much as they do every American.

Unfortunately, the burden borne by the American taxpayers to pay for these forces is not fairly matched by the burdens placed on our allies' citizens to contribute to our mutual security.

Despite solemn commitments to bear their fair share of the common defense burden, many of our allies have failed to do so.

Nowhere is this more obvious and well documented than in the case of our Pacific ally, Japan, which has one of the worst burden sharing records of all our allies.

Japan's meager contributions to the common defense are particularly disappointing because of its position as a virtual economic superpower.

The Japanese are now in the final phases of deciding their defense budget for 1983.

As we finish consideration of our own defense budget, Congress should send Japan a "loud and clear" message that it must live by its sovereign commitments and bear a much larger share of the mutual security burden.

The Senate can do that, Mr. President, by unanimously passing the Levin-Percy-Hayakawa-Glenn resolution, which urges Japan to increase significantly its annual defense spending.

The Foreign Relations Committee unanimously approved this resolution just a few days ago, because it recognized Japan has repeatedly failed to keep its defense spending promises.

This endorsement that the full Senate pass this resolution is doubly significant. It is the Foreign Relations Committee's first official statement to the new Government in Japan about the United States-Japan relationship, according to Chairman PERCY.

I am honored that Chairman PERCY, Chairman HAYAKAWA and Senator GLENN have joined as original cosponsors of this resolution. Their long association with United States–Japan affairs reinforces this message to the people and Government of Japan.

I want to thank them for their cooperation in revising this resolution, which is based on my original resolution, known as Senate Concurrent Resolution 46. That measure now has 60 Senate cosponsors, reflecting the strong feelings Americans have on this subject.

The key operative language of the revised resolution is that Japan should immediately increase its annual defense spending to the levels required for its forces to deploy fully, by 1990, an effective conventional self-defense capability, including the promised capability to protect its sea lanes of communication out to 1,000 miles from the home islands.

The only way that Japan can achieve these capabilities is to begin immediately to spend an average of between 1.4 percent to 2 percent of its gross national product for defense each year until at least the end of this decade, compared to its current annual defense spending of less than 1 percent of GNP.

That is the bottom line meaning of this resolution, Senate Concurrent Resolution 46.

For the first time, we are establishing a public standard against which the American people can judge the adequacy of the efforts by their Pacific ally to keep its promises, made in May 1981, to make greater defense contributions and to defend those sea lanes out to 1,000 miles.

Knowledgeable observers calculate that, to keep these commitments,

Japan must increase its defense budgets annually by 10–12 percent after accounting for inflation, and that increases must begin as soon as early 1983. Those required yearly increases are a far cry from the totally inadequate 4.6-percent raise, after inflation—7.75 percent including inflation—adopted last year, and from the paltry 4-percent increase after inflation—7.34 percent including inflation—contemplated by the previous Japanese Government for this year.

This resolution further outlines how Japan can help offset indirectly the increased U.S. burden imposed by the additional need to defend American, Japanese, and other allies' vital interestes in the Persian Gulf.

This is reflected in its call for Japan to help pay operations, maintenance, repair, and overhaul costs of U.S. ships and aircraft protecting the home islands by patrolling in other areas of the Pacific region. Much larger Japanese contributions toward paying the costs to operate U.S. forces in Japan itself are urged, also.

To those who might question whether we are asking Japan to do too much, let me say this resolution simply urges the Japanese to keep the commitments their Government already has made for our mutual security: The Reagan-Suzuki communique and the pledge to defend the sea lands of communication out to 1,000 miles.

This resolution respects the historical sensitivities of those in Asia who fear a resurgence of Japanese militarism. Our own memories of World War II remain strong. It is for these reasons that the resolution emphasizes that we are calling on Japan to significantly improve its capabilities only for self-defense and only by deploying weapons and forces which are clearly defensive in nature.

Many of the improvements needed in Japan's forces clearly fall into this category: Enhanced antisubmarine and mine warfare capabilities, upgraded air defenses, strengthened logistics systems and sufficient spare parts and ammunition stockpiles to permit Japan's forces to fight for more than a minimum amount of time before running out of bullets and beans.

Such improvements do not threaten the resurrection of the Greater East Asia Co-Prosperity Sphere, nor can the Japanese argue convincingly that they are impermissible within the accepted definition of their self-defense forces.

As the Senate considers this resolution, some special words to the people of Japan and their elected representatives in the Diet are appropriate.

An America gripped by 10.8 percent unemployment and staggering Federal deficits will remain unconvinced when the Japanese Government pleads that its own debt-financing problems prevent increased defense investments.

Economic growth, while slower than before, remains substantially better in Japan than in the United States, and Japanese "poor mouthing" about deficits is more than rebutted by a recent statement by the last Finance Minister that their economy remains strong.

The Japanese cannot cry poverty and prospertiy simultaneously and expect to be believed by our own citizens, who know full well about Japan's tremendous and continuing economic resources.

Furthermore, the Japanese should recognize that the dissatisfaction and disappointment with their meager defense efforts extend across the United States and are not restricted to those States suffering economic hardships due to the present trade frictions between our two nations.

The 60 cosponsors of the original Levin resolution represent all regions of the United States, both parties and all positions on the philosophical spectrum.

And even if our trade and economic differences are resolved, the need for Japan to increase its contributions to our mutual security will remain, and the U.S. Congress will continue to press for it to do so.

The Levin-Percy-Hayakawa-Glenn resolution now before us demonstrates that, while the executive branch engages in "quiet diplomacy" to urge these increases, the Congress will speak out more and more loudly. It shows that, unless Japan begins substituting action for words and more yen for mere promises, then the relationship between our two nations will be further strained.

There is some chance that this harmful consequence can be avoided. A new government in Tokyo presents opportunities for real progress in this area of contention. However, only events in the next few weeks, when Japan decides its 1983 defense budget, will provide indications of that.

Neither nation wants the deterioration in our relationship that could occur. This resolution is an attempt to avoid that unhappy event by encouraging positive Japanese actions before even more drastic American reactions are demanded by our own citizens, whose patience with Japan is exhausted with low allied contributions to our mutual security while we are spending record amounts for defense in the midst of a recession.

I urge the Senate to unanimously approve this resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution, as amended, was agreed to.

The amendment to the preamble was agreed to.

The preamble was agreed to.

The concurrent resolution, as amended, and the preamble, as amended, are as follows:

S. CON. RES. 46

Whereas the Committee on Foreign Relations has recently assessed security challenges in the Pacific and United States and allied responses;

Whereas the current situation in the region requires greater mutual efforts on the part of the United States and its friends and allies in defending democratic values and ideals;

Whereas Japan has demonstrable economic strength but contributes a far smaller percentage of its gross national product and its national budget for defense expenditures than any industrialized country;

Whereas, in the joint communique signed by Japan's Prime Minister and the President of the United States in Washington on May 8, 1981, the Prime Minister stated that Japan will seek to make greater efforts to improve its defense capabilities;

Whereas the Senate has welcomed increases in Japan's foreign assistance and increases in support for United States facilities in Japan and would welcome further efforts in these areas to complement the greater efforts to improve Japanese defense capabilities; and

Whereas the Senate would highly value increased Japanese contributions to Western security at a time when the United States is assuming additional responsibilities in the Indian Ocean and Persian Gulf, a region from which the United States receives only 6 per centum of its energy needs and Japan receives 54 per centum of its total energy requirements: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That—

(1) the United States and Japan should exert maximum efforts to resist challenges to security and democracy in Asia;

(2) the defense efforts of the United States and Japan should be governed by an assessment of the mutual threat confronting them;

(3) Japan should accelerate its current efforts to make a greater contribution to its own defense so that a full partnership and closer cooperation in sharing the burden of common defense can be achieved thereby enhancing the combined effectiveness of Japanese and United States defense forces in preserving peace and security in the Far East;

(4) as a tangible sign of commitment to these aims, Japan should immediately increase its annual defense expenditures to the levels required for its forces to deploy fully by 1990 an effective conventional self-defense capability, including the capability to carry out its policy, announced by the Prime Minister in May 1981, of defending its sealanes of communication;

(5) this significant upgrading of Japan's self-defense capability can and should be achieved through the deployment of weapons and forces which, by their strictly defensive characteristics, would not raise concerns among other Asian nations;

(6) Japan should assume a significantly larger share of the total annual overall operating costs of the United States forces in Japan and should contribute to meeting the United States costs currently incurred in Japan for operations, maintenance, repair, and overhaul of United States ships and aircraft operating in Japan's security interests in the Pacific Ocean region; and

(7) in a spirit of friendship, partnership and cooperation, the Senate would welcome an assessment by its colleagues in the Japanese Diet of security challenges in the Pacific and of appropriate United States and allied responses.

ESTABLISHMENT OF THE U.S. SENATE PRODUCTIVITY AWARD

Mr. BAKER. Mr. President, I ask the Chair lay before the Senate, Senate Resolution 503, Calendar Order 1014.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 503) to establish the U.S. Senate Productivity Award.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. STEVENS. Mr. President, I thank the Senate leadership and all the other cosponsors of this measure for their support and assistance, especially Senators MATHIAS, FORD, PACKWOOD, and CANNON whose committee staff members provided the help necessary to report the measure in a timely fashion.

Some questions have been raised about technical matters regarding Senate Resolution 503, which will create a U.S. Senate Productivity Award. This statement should clarify these questions.

The funds authorized in this resolution are to come from the "miscellaneous items" account of the Senate contingency fund. These funds are not intended to supplement the office account of each Senator to cover items such as travel.

These funds are intended to pay an outside organization (contracted with by the Senate Commerce, Science, and Transportation Committee) to provide each participating Senator with the medallion necessary for implementation of the U.S. Senate Productivity Award. The committee, in its discretion, may also contract for other materials that would assist in the implementation of the award such as reference lists of media in a Senator's State who are willing to help communicate the productivity message to the public; productivity information appropriate for use in the announcement of the productivity award process; the names of businessmen, labor leaders, academicians, and others appropriate for the Senator's consideration in the selection of a Senator's State productivity board if authorized pursuant to the Commerce Committee criteria; certificates of membership for those appointed to such productivity boards; appropriate biographical background on such productivity board members and the productivity information which can be used in the announcement of the establishment of such boards; briefing materials for a board's better understanding of the productivity issue; recommendations of people and organizations in each State which warrant a particular letter of invitation to apply for a productivity award; outlines suggesting details for the productivity award presentation ceremony; pertinent productivity information recommended for use in a Senator's remarks on productivity and recipients; information about the award winner and other productivity matters for the press release announcing and explaining the award ceremony; press materials and other materials that the committee may deem necessary for the implementation of the program.

If only one contractor is selected by the committee to provide any or all of the necessary services mentioned, that contractor will also monitor and assist the various stages of the award presentation process and assist each Senator's office. The contractor will also prepare a descriptive compilation of the 100 award winning productivity projects. If more than one contractor is selected by the committee to provide services, then the committee would designate the contractor responsible for monitoring the award process and preparing award compilations. It is anticipated that any contracted services will be obtained on an appropriate competitive basis.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 503) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 503

Whereas the economic productivity of the United States has drastically fallen from its traditional rate;

Whereas the economic productivity rates of other nations in economic competition with the United States are higher than the traditional productivity rate of the United States;

Whereas the American people suffer from the national decline in productivity which contributes to high unemployment as foreign industries with greater productivity capture many markets which were once served by American industries;

Whereas the average household of the American worker would have received over $5,000 more in 1982 if the traditional productivity rate of the Nation had been maintained;

Whereas economic preeminence of the United States will continue to fall, industry by industry, unless the productivity rate is increased;

Whereas an essential first step to the restoration of the productivity rate is an understanding by the public of the seriousness of the problem and the specific practices needed for a solution; and

Whereas a cost effective way to facilitate such an understanding is for each United States Senator to present an annual United States Senate Productivity Award in his State and for the news media to utilize the event to communicate information to the public regarding productivity improvement: Now, therefore, be it

Resolved, That (a) the United States Senate Productivity Award is established.

(b) Beginning with calendar year 1983 and each year thereafter, each Senator may by participation in the award program select a recipient of the award pursuant to the guidelines established by the Committee on Commerce, Science, and Transportation of the Senate.

SEC. 2. The Committee on Commerce, Science, and Transportation of the Senate shall—

(a) establish guidelines for the selection of recipients and the awarding of medallions to such recipients; and

(b) enter into a contract for the design and striking of suitable medallions for the purposes of this resolution.

SEC. 3. Expenses necessary and not in excess of $100,000 per year to carry out the provisions of this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the Committee on Commerce, Science, and Transportation of the Senate.

VIOLENT CRIME AND DRUG ENFORCEMENT IMPROVEMENT ACT

Mr. BAKER. Mr. President, I ask unanimous consent that the Chair lay before the Senate a message from the House on H.R. 3963.

The Presiding Officer laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 3963) entitled "An Act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated", with the following amendment:

In lieu of the matter inserted by said amendment, insert:

HOUSE AMENDMENT TO THE SENATE AMENDMENT TO H.R. 3963

In lieu of the matter inserted by the Senate amendment to the text of the bill, insert the following:

SEC. 3. Titles I through III may be cited as the "Violent Crime and Drug Enforcement Improvements Act of 1982".

TITLE I—CONTROLLED SUBSTANCES PENALTIES AND CRIMINAL FORFEITURE

PART A

SEC. 101. This part may be cited as the "Comprehensive Drug Penalty Act of 1982".

SEC. 102. (a) Section 511(a) of the Controlled Substances Act (21 U.S.C. 881(a)) is amended by adding at the end the following new paragraph:

"(7) All land and buildings used, or intended for use, for holding or storage of property described in paragraph (1) or (2), if the offense involved is a felony, except that no property shall be forfeited under this paragraph, to the extent of the interest of an owner, by reason of any act or omission established by that owner to have been com-

mitted or omitted without the knowledge or consent of that owner.".

(b) Section 511(d) of the Controlled Substances Act (21 U.S.C. 881(d)) is amended—

(1) by inserting "(1)" before "The provisions of law"; and

(2) by adding at the end the following new paragraph:

"(2) In addition to the venue provided for in section 1395 of title 28, United States Code, or any other provision of law, in the case of property of a defendant charged with a violation that is the basis for forfeiture of the property under this section, a proceeding for forfeiture under this section may be brought in the judicial district in which the defendant owning such property is found or in the judicial district in which the criminal prosecution is brought.".

(c) Subsection (e) of section 511 of the Controlled Substances Act (21 U.S.C. 881(e)) is amended by striking out "used to pay" in the sentence beginning "The proceeds from" and all that follows through the end of the subsection and inserting in lieu thereof the following: "deposited in accordance with subsection (h) of this section.".

SEC. 103. (a) Section 511 of the controlled Substances Act (21 U.S.C. 811) is amended by adding at the end the following new subsections:

"(h)(1) There is established in the United States Treasury a fund to be known as the Drug Enforcement Fund (hereinafter in this subsection referred to as the 'fund') which shall be available to the Attorney General, with respect to this title, title III, and section 1963(c) of title 18, United States Code, without fiscal year limitation in such amounts as may be specified in appropriation Acts for—

"(A) payment of expenses of forfeiture and sale, including expenses of seizure and detention;

"(B) payment of rewards for information resulting in a conviction or forfeiture;

"(C) payment of liens against forfeited property; and

"(D) payment of amounts with respect to remission and mitigation.

"(2) Any reward paid from the fund shall be paid at the discretion of the Attorney General or his delegate, except that the authority to pay a reward of $10,000 or more shall not be delegated to any person other than the Director of the Federal Bureau of Investigation or the Administrator of the Drug Enforcement Administration. Any reward for such information shall not exceed $250,000, except that a reward paid for information resulting in a forfeiture, shall not exceed the lesser of $250,000 or one quarter of the amount realized by the United States from the property forfeited.

"(3) There shall be deposited in the fund—

"(A) during the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture—

"(i) under this title and title III; and

"(ii) under section 1963(c) of title 18, United States Code, in any case in which the racketeering activity consists of a narcotic or other dangerous drug offense referred to in section 1961(1)(A) of such title;

that, under this title and title III and such sections of title 18, United States Code, as in effect on the day before the effective date of this section, would have been deposited in the general fund of the Treasury; and

"(B) during the period beginning on October 1, 1983, and ending on September 30, 1985, all proceeds from forfeiture under this title and title III and such sections of title 18, United States Code, as a reimbursement to the appropriation for the fund.

"(4) During the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture under the provisions referred to in subparagraph (A) of paragraph (3) of this subsection (other than proceeds deposited in the fund under such subparagraph) shall be treated as provided under such provisions as in effect on the day before the effective date of this section.

"(5) Amounts in the fund which are not currently needed for the purpose of this section shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

"(6) Not later than four months after the end of each fiscal year, the Attorney General shall transmit to the Congress a detailed report on receipts and disbursements with respect to the fund for such year.

"(7) There are authorized to be appropriated from the fund for fiscal year 1984 and fiscal year 1985 such sums as may be necessary for expenses of payments under paragraph (1) of this subsection, of which not more than $10,000,000 may be appropriated for each such fiscal year for unreimbursed expenses. At the end of the last fiscal year for which appropriations from the fund are authorized by this Act, the fund shall cease to exist and any amount then remaining in the fund shall be deposited in the general fund.

"(i) The filing of an indictment or information alleging a violation of this title or title III that is related to a civil forfeiture proceeding under this section shall, upon motion of the United States or a claimant in that proceeding, and for good cause shown, stay the civil forfeiture proceeding.".

SEC. 104. (a) A reference in this section to a section or other provision is a reference to a section or other provision of the Controlled Substances Act (21 U.S.C. 801 et seq.).

(b) Section 401(b)(1)(A) (21 U.S.C. 841(b)(1)(A)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$25,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$50,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $2,000,000 if such person is other than an individual".

(c) Section 401(b)(1)(B) (21 U.S.C. 841(b)(1)(B)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$15,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$30,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(d) Section 401(b)(2) (21 U.S.C. 841(b)(2)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$10,000, or both" and inserting in lieu thereof "$100,000, or both if such person is an individual, or to a fine of not more than $250,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$20,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $500,000 if such person is other than an individual".

(e) Section 401(b)(3) (21 U.S.C. 841(b)(3)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$5,000, or both" and inserting in lieu thereof "$10,000, or both if such person is an individual, or to a fine of not more than $25,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$10,000, or both" and inserting in lieu thereof "$25,000, or both if such person is an individual, or to a fine of not more than $50,000 if such person is other than an individual".

(f) Section 401(b)(5) (21 U.S.C. 841(b)(5)) is amended—

(1) in the sentence beginning "Notwithstanding paragraph (1)(B)", by striking out "$25,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$50,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $2,000,000 if such person is other than an individual".

(g) Section 401(b)(6) (21 U.S.C. 841(b)(6)) is amended—

(1) in the sentence beginning "In the case of", by striking out "and in addition, may be fined not more than $125,000," and inserting in lieu thereof "a fine of not more than $250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "and in addition, may be fined not more than $250,000" and inserting in lieu thereof "a fine of not more than $500,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(h) Section 401(d) (21 U.S.C. 841(d)) is amended by striking out "$15,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(i) Section 402(c)(2)(A) (21 U.S.C. 842(C)(2)(A)) is amended by striking out "$25,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(j) Section 402(c)(2)(B) (21 U.S.C. 842(c)(2)(B)) is amended by striking out "$50,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(k) Section 403(c) (21 U.S.C. 843(c)) is amended—

(1) by striking out "$30,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) by striking out "$60,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine

of not more than $1,000,000 if such person is other than an individual."

(l) Section 408(a)(1) (21 U.S.C. 848(a)(1)) is amended—

(1) by striking out "100,000 and inserting in lieu thereof "$500,000 if such person is an individual, or a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) by striking out "$200,000" and inserting in lieu thereof "$1,000,000 if such person is an individual, or a fine of not more than $2,000,000 if such person is other than an individual".

(m) Part D is amended by adding at the end the following new sections:

"ALTERNATIVE FINE

"SEC. 413. In lieu of a fine authorized by this part, a defendant who derives profits or other proceeds directly from the offense may be fined not more than twice the gross profits or other proceeds so derived, if such amount is greater than the fine so authorized.

"GENERAL PROVISIONS RELATING TO FINES

"SEC. 414. (a) In determining whether to impose a fine under this part, and the amount, time for payment, and method of payment of a fine, the court shall—

"(1) consider the defendant's income (regardless of source), earning capacity, and financial resources, including the nature of the burden that the fine will impose on the defendant and on any person who is legally or financially dependent upon the defendant;

"(2) consider the proof received at trial or as a result of a plea of guilty or nolo contendere concerning any profits or other proceeds derived by the defendant;

"(3) consider any other pertinent equitable consideration; and

"(4) give primary consideration to the need to deprive the defendant of illegally obtained profits or other proceeds from the offense.

"(b) As a condition of a fine, the court may require that payment be made in specified installments or within a specified period of time, but such period shall not be greater than the maximum applicable term of probation or imprisonment, whichever is greater. If not otherwise required by such a condition, payment of a fine shall be due immediately.

"(c) If a fine under this part is imposed on an organization, it is the duty of each individual authorized to make disbursement of the assets of the organization to pay the fine from assets of the organization.

"(d)(1) A defendant who has been sentenced to pay a fine, and who has paid part but not all of such fine, may petition the court for extension of the time for payment, modification of the method of payment, or remission of all or part of the unpaid portion.

"(2) The court may enter an appropriate order under this subsection, if it finds that—

"(A) the circumstances that warranted imposition of the fine in the amount imposed, or payment by the time or method specified, no longer exist; or

"(B) it is otherwise unjust to require payment of the fine in the amount imposed or by the time or method specified.

"CRIMINAL FORFEITURE

"SEC. 415. (a) Any person who is convicted of a violation of this title or title III that is punishable by imprisonment for more than one year shall forfeit to the United States—

"(1) any property constituting or derived from gross profits or other proceeds obtained as a result of such violation;

"(2) any property used, or intended to be used, to commit such violation; and

"(3) in the case of a person convicted under section 408 of this title, in addition to the property described in paragraphs (1) and (2), any interest in, claim against, or property or contractual right of any kind affording a source of control over, the continuing criminal enterprises.

"(b) In any action brought by the United States under this section, the district courts of the United States shall have jurisdiction to enter such restraining orders or prohibitions, or to take such other actions, including, but not limited to, the acceptance of satisfactory performance bonds, in connection with any property or other interest subject to forfeiture under this section, as it shall deem proper.

"(c)(1) Upon filing of an indictment or information alleging that any property is subject to forfeiture under this section, the United States may request an order for seizure of such property in the same manner as provided for a search warrant. The court shall enter an order for seizure upon determining that—

"(A) there is probable cause to believe that the property to be seized is subject to forfeiture; and

"(B) an order restraining transfer of the property is not sufficient to ensure availability of the property for a forfeiture proceeding under this section.

"(2) The court shall enter an order of forfeiture of any property referred to in subsection (a)(1), (2), or (3) if the trier of fact determines that the United States has established beyond a reasonable doubt that such property is subject to forfeiture under this section.

"(3) The United States shall, to the maximum extent practicable, identify all persons with an alleged interest in property that is subject of an order under paragraph (2) and shall provide to such persons notice of the order and the relief available under paragraph (4).

"(4)(A) Not later than sixty days (or such longer period as the court may order for good cause shown) after the date of an order under paragraph (2), any person with an alleged interest in the property may petition the Attorney General for remission or mitigation of the forfeiture—

"(i) on the ground that when acquiring the interest for value, such person did not know or have reason to know of the violation of law on which the order of forfeiture is based or of any existing order restraining transfer for the property; or

"(ii) on other equitable grounds that justify remission or mitigation.

A petition under this paragraph shall be verified and shall set forth the nature and extent of the petitioner's interest in the property, the time and circumstances of the petitioner's acquisition of interest in the property, any additional facts and circumstances supporting remission or mitigation, and the relief sought.

"(B) In the case of a petition under subparagraph (A)(ii), not later than ninety days (or such longer period as the court may order for good cause shown) after the end of the period specified in subparagraph (A), the Attorney General shall issue a decision with respect to the petition. The property shall be disposed of pursuant to such decision, which shall not be subject to review of any kind.

"(C) In the case of a petition under subparagraph (A)(i), not later than ninety days (or such longer period as the court may order for good cause shown) after the end of the period specified in subparagraph (A), the Attorney General shall provide the relief sought or submit to the court a written recommendation for other disposition of the property. Except as provided in subparagraph (D), the court shall order disposition of the property in accordance with a recommendation made under the preceding sentence.

"(D) The court shall provide notice of the recommendation and opportunity for a hearing to any petitioner under subparagraph (A)(i). If, at such hearing, a petitioner establishes, by a preponderance of the evidence, that such petitioner's interest was acquired for value without actual or constructive knowledge of the violation of law on which the order of forfeiture is based, or of any order restraining transfer of the property, the court shall grant appropriate relief that does equity to that interest.

"(5)(A) Except as provided in subparagraph (B), the provisions of the customs laws relating to disposition of forfeited property shall apply to dispositions of property forfeited under this chapter, to the extent that such provisions are not inconsistent with this chapter.

"(B) The duties of the Secretary of the Treasury with respect to dispositions of forfeited property under the customs laws shall be performed under subparagraph (A) by the Attorney General, except to the extent that such duties arise from forfeitures effected under the customs laws.

"(d) The United States shall promptly dispose of all property forfeited under this section through commercial means or as otherwise permitted by law, making due provision for the rights of innocent persons, but the United States shall take such action as may be required to prevent any convicted person from purchasing or otherwise acquiring property forfeited as a result of such conviction. Upon entry of an order of forfeiture under this section, the court shall authorize the Attorney General to seize forfeited property under such reasonable conditions as the court may impose. If a forfeited property right is not exercisable or transferable for value by the United States, it shall expire and shall not revert to the convicted person.

"(e)(1) In addition to any order authorized by subsection (b), the court may, before the filing of an indictment or information, enter an order restraining the transfer of property that is or may be subject to forfeiture under subsection (a) of this section.

"(2) An order shall be entered under this subsection if the court determines that—

"(A) there is a substantial probability that the United States will prevail on the issue of forfeiture;

"(B) there is a substantial probability that failure to enter the order will result in unavailability of the property for forfeiture; and

"(C) the need to assure availability of the property outweighs the hardship on any party against whom the order is to be entered.

"(3)(A) Except as provided in subparagraph (B), an order under this subsection shall be entered only after notice to persons appearing to have an interest in the property and opportunity for a hearing.

"(B) A temporary order under this subsection may be entered upon application of the United States, without notice or opportunity for a hearing, if an information or indictment has not been filed with respect to the property and the United States demon-

strates that provision of notice will jeopardize the availability of the property for forfeiture. Such a temporary order shall expire not more than ten days after the date on which it is entered, except that the effective period of the order may be extended by the court for not more than ten days for good cause shown and for a longer period with the consent of all parties affected by the order.

"(f) There may be a rebuttal presumption at trial that any property of a person convicted of a felony under this title or title III is subject to forfeiture under this section if the United States establishes by a preponderance of the evidence that—

"(1) such property was acquired by such person during the period of the violation of this title or title III or within a reasonable time after such period; and

"(2) there was no likely source for such property other than the violation of this title or title III.

"(g) The findings of the trier of fact with respect to property subject to forfeiture shall be set forth in a special verdict.".

SEC. 105. (a) Section 1010(b)(1) of the Controlled Substances Import and Export Act (21 U.S.C. 960(b)(1)) is amended in the sentence beginning "In the case of" by striking out "$25,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or shall be fined not more than $1,000,000 if such person is other than an individual".

(b) Section 1010(b)(2) of such Act (21 U.S.C. 960(b)(2)) is amended in the sentence beginning "In the case of" by striking out "$15,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or shall be fined not more than $1,000,000 if such person is other than an individual".

(c) Section 1010(b) of such Act (21 U.S.C. 960(b)) is amended by adding at the end the following new paragraph:

"(3) In the case of a violation under subsection (a) involving more than 1,000 pounds of marihuana, the person committing such violation shall be imprisoned not more than fifteen years, or fined not more than $250,000, or both if such person is an individual, or shall be fined not more than $1,000,000 if such person is other than an individual.".

(d) Section 1011(2) of such Act (21 U.S.C. 961(2)) is amended by striking out "$25,000" and inserting in lieu thereof "$50,000".

(e) Part A of such Act is amended by adding at the end the following new section:

"APPLICABILITY OF SECTION 413 AND SECTION 414

"SEC. 1017. Sections 413 and 414 shall apply with respect to fines under this part to the same extent that such sections apply with respect to fines under part D of title II. For purposes of such application, any reference in such section 413 or 414 to 'this part' shall be deemed to be a reference to part A of title III.".

SEC. 106. Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by section 4(1) of this Act, is further amended—

(1) in subsection (a)—

(A) by striking out "SEC. 408. (a)(1)" and inserting in lieu thereof "SEC. 408. (a)";

(B) by striking out "paragraph (2)" each place it appears and inserting in lieu thereof "section 415"; and

(C) by striking out paragraph (2); and

(2) by striking out subsection (d).

SEC. 107. (a) The table of contents for part D of title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by inserting after the item relating to section 412 the following new items:

"Sec. 413. Alternative fine.
"Sec. 414. General provisions relating to fines.
"Sec. 415. Criminal forfeiture."

(b) The table of contents for part A of title III of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by inserting after the item relating to section 1016 the following new item:

"Sec. 1017. Applicability of section 413 and section 414.".

PART B

SEC. 201. Section 607 of the Tariff Act of 1930 (19 U.S.C. 1607) is amended to read as follows:

"SEC. 607. SEIZURE; VALUE $100,000 OR LESS, PROHIBITED MERCHANDISE, TRANSPORTING CONVEYANCES.

"(a) If—

"(1) the value of such seized vessel, vehicle, aircraft, merchandise, or baggage does not exceed $100,000;

"(2) such seized merchandise is merchandise the importation of which is prohibited; or

"(3) such seized vessel, vehicle, or aircraft was used to import, export, transport, or store any controlled substance;

the appropriate customs officer shall cause a notice of the seizure of such articles and the intention to forfeit and sell or otherwise dispose of the same according to law to be published for at least three successive weeks in such manner as the Secretary of the Treasury may direct. Written notice of seizure together with information on the applicable procedures shall be sent to each party who appears to have an interest in the seized article.

"(b) As used in this section, the term 'controlled substance' has the meaning given that term in section 102 of the Controlled Substances Act (21 U.S.C. 802).".

SEC. 202. Section 608 of the Tariff Act of 1930 (19 U.S.C. 1608) is amended in the second sentence by inserting after "penal sum of" the following: "$2,500 or 10 percent of the value of the claimed property, whichever is lower, but not less than".

SEC. 203. Section 609 of the Tariff Act of 1930 (19 U.S.C. 1609) is amended by striking out ", after deducting the actual expenses of seizure, publication and sale, in the Treasury of the United States." and inserting in lieu thereof "in the Customs Forfeiture Fund.".

SEC. 204. Section 610 of the Tariff Act of 1930 (19 U.S.C. 1610) is amended by striking out "If the value of any vessel, vehicle, merchandise, or baggage so seized is greater than $10,000," and inserting in lieu thereof "If any vessel, vehicle, aircraft, merchandise, or baggage is not subject to section 607 of this Act,".

SEC. 205. Section 612 of the Tariff Act of 1930 (19 U.S.C. 1612) is amended—

(1) by inserting "aircraft," after "vehicle," each place it appears;

(2) by striking out "and the value of such vessel, vehicle, merchandise, or baggage as determined under section 606 of this Act, does not exceed $10,000," in the first sentence and inserting in lieu thereof "and the article is subject to section 607 of this Act,"; and

(3) by striking out "If such value of such vessel, vehicle, merchandise, or baggage exceeds $10,000" in the second sentence and inserting in lieu thereof "If the article is not subject to section 607 of this Act,".

SEC. 206. (a) The last sentence of section 613(a) of the Tariff Act of 1930 (19 U.S.C. 1613(a)) is amended—

(1) by inserting after "proceeds of sale" the following: "shall be deposited in the Customs Forfeiture Fund, except that in the case of an application of this subsection to a law other than a customs law, the proceeds of sale"; and

(2) in paragraph (3), by striking out "with the Treasurer of the United States as a customs or navigation fine" and inserting in lieu thereof the following: "in the general fund of the Treasury of the United States".

(b) Section 613(b) of the Tariff Act of 1930 (19 U.S.C. 1613(b)) is amended by striking out "(a) (1) and (2) of this section" and inserting in lieu thereof "(a)(3) of section 613A of this Act".

SEC. 207. Part V of title IV of the Tariff Act of 1930 (19 U.S.C. 1581 et seq.) is amended by adding after section 613 the following new section:

"SEC. 613A. CUSTOMS FORFEITURE FUND.

"(a) There is established in the Treasury of the United States a fund to be known as the Customs Forfeiture Fund (hereinafter in this section referred to as the 'fund') which shall be available to the United States Customs Service without fiscal year limitation in such amounts as may be specified in appropriation Acts for—

"(1) payment of expenses of forfeiture and sale, including expenses of seizure and detention;

"(2) payment of awards of compensation to informers under section 619 of this Act;

"(3) payment for satisfaction of—

"(A) liens for freight, charges, and contributions in general average, notice of which has been filed with the appropriate customs officer according to law; and

"(B) other liens against forfeited property;

"(4) payment of amounts authorized by law with respect to remission and mitigation.

"(b) Payment under paragraphs (3) and (4) of subsection (a) of this section shall not exceed the net proceeds of the sale or, if the property is retained or transferred for official use, the appraised value less all applicable expenses.

"(c)(1) There shall be deposited in the fund—

"(A) during the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture under the customs laws that, under such laws as in effect on the day before the effective date of this section would have been deposited in the general fund of the Treasury; and

"(B) during the period beginning on October 1, 1983, and ending on September 30, 1985, all proceeds from forfeiture under such laws as a reimbursement to the appropriation for the fund.

"(2) During the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture under the customs laws (other than proceeds deposited in the fund under paragraph (1)(A) of this subsection) shall be treated as provided under such laws as in effect on the day before the effective date of this section.

"(d) Amounts in the fund which are not currently needed for the purposes of this section shall be kept on deposit or invested in obligations of, or guaranteed by, the United States,

"(e) Not later than four months after the end of each fiscal year, the Commissioner of Customs shall transmit to the Congress a report on receipts and disbursements with respect to the fund for such year.

"(f) There are authorized to be appropriated from the fund for fiscal year 1984 and fiscal year 1985 such sums as may be necessary for expenses of payments under subsection (a) of this section, of which not more than $10,000,000 may be appropriated for each such fiscal year for unreimbursed expenses. At the end of the last fiscal year for which appropriations from the fund are authorized by this Act, the fund shall cease to exist and any amount then remaining in the fund shall be deposited in the general fund of the Treasury of the United States.".

SEC. 208. Part V of title IV of the Tariff Act of 1930 (19 U.S.C. 1581) is further amended by adding after section 615 the following new section:

"SEC. 616. TRANSFER OF FORFEITED PROPERTY.

"(a) The Secretary of the Treasury may order the discontinuance of forfeiture proceedings under this Act in favor of forfeiture under State law. After the filing of a complaint for forfeiture under this Act, the Attorney General may seek dismissal of the complaint in favor of forfeiture under State law.

"(b) If forfeiture proceedings are discontinued or dismissed under this section—

"(1) the United States may transfer the seized property to the appropriate State or local official; and

"(2) notice of the discontinuance or dismissal shall be provided to all known interested parties.

"(c) The United States shall not be liable in any action arising out of seizure, detention, or transfer of property transferred under this section.".

SEC. 209. Section 619 of the Tariff Act of 1930 (19 U.S.C. 1619) is amended by striking out "$50,000" each place it appears and inserting in lieu thereof "$250,000".

SEC. 210. (a) Part V of title IV of the Tariff Act of 1930 (19 U.S.C. 1581 et seq.) is further amended by adding after section 588 the following new section:

"SEC. 589. ENFORCEMENT AUTHORITY OF CUSTOMS OFFICERS.

"Subject to the direction of the Secretary of the Treasury, an officer of the customs may—

"(1) carry a firearm;

"(2) execute and serve any order, warrant, subpena, summons, or other process issued under the authority of the United States;

"(3) make an arrest without a warrant for any offense against the United States committed in the officer's presence or for a felony, cognizable under the laws of the United States committed outside the officer's presence if the officer has reasonable grounds to believe that the person to be arrested has committed or is committing a felony; and

"(4) perform any other law enforcement duty that the Secretary of the Treasury may designate.".

(b)(1) Section 7607 of the Internal Revenue Code of 1954 (26 U.S.C. 7607) is repealed.

(2) The table of sections for subchapter A of chapter 78 of the Internal Revenue Code of 1954 is amended by striking out the item relating to section 7607.

SEC. 211. Sections 602, 605, 606, 608, 609, 611, 613, 614, 615, 618, and 619 (19 U.S.C. 1602, 1605, 1606, 1608, 1609, 1611, 1613, 1614, 1615, 1618, and 1619) of the Tariff Act of 1930 are each amended—

(1) by inserting "aircraft," after "vehicle," each place it appears; and

(2) by inserting "aircraft" after "vehicles," each place it appears.

PART C

SEC. 301. This title and the amendments made by this title shall take effect on March 1, 1983.

TITLE II—AMENDMENTS TO OMNIBUS CRIME CONTROL AND SAFE STREETS ACT OF 1968

PART A

SHORT TITLE

SEC. 201. This part may be cited as the "Justice Assistance Act of 1982".

DECLARATION AND PURPOSE

SEC. 202. The declaration and purpose contained in title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701) is amended to read as follows:

"DECLARATION AND PURPOSE

"The Congress finds and declares that the high incidence of crime in the United States is detrimental to the general welfare of the Nation and its citizens, and that criminal justice efforts must be better coordinated and intensified, and made more effective and equitable at all levels.

"Congress further finds that there is an urgent need to encourage basic and applied research, to gather and disseminate accurate and comprehensive justice statistics, and to evaluate methods of preventing and reducing crime.

"Congress further finds that although crime is essentially a local problem that must be dealt with by State and local government, the financial and technical resources of the Federal Government should be made available to assist in the development of innovative and effective National, State, and local efforts.

"Congress further finds that the future welfare of the Nation and the well-being of its citizens depend on the establishment and maintenance of viable and effective justice systems which require systematic and sustained action by Federal, State, and local governments; and continuing efforts at all levels to streamline programs and upgrade the functioning of agencies responsible for planning, implementing, and evaluating efforts to improve justice systems.

"It is, therefore, the declared policy of the Congress to aid in strengthening and improving justice systems by providing assistance with maximum certainty and effectiveness and minimum delay and waste. It is the purpose of this title to authorize funds and technical assistance (1) to be used to strengthen justice systems; (2) to develop and fund new methods and programs to enhance the effectiveness of justice systems; (3) to support the development of National, State, and local priorities and programs to meet the problems confronting justice systems; (4) to reduce court congestion and trial delay; (5) to support community and neighborhood anti-crime efforts; (6) to improve and modernize correctional systems and encourage rehabilitation; (7) to encourage the undertaking of promising, innovative projects and programs to combat crime; (8) to encourage research directed toward the improvement of justice systems and new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; (9) to encourage the collection and analysis of statistical information concerning justice systems and the development and operation of justice information systems; (10) to develop and implement programs assisting victims, jurors, and witnesses; and (11) to support law enforcement-related personnel development and training efforts.

"It is further the policy of the Congress that the Federal assistance made available under this title not be utilized to reduce the amount of State and local financial support for justice activities below the level of such support prior to the availability of such assistance.".

OFFICE OF JUSTICE ASSISTANCE

SEC. 203. (a) Part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711-3713) is amended in the heading to such part by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(b) Section 101 of part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711) is amended to read as follows:

"ESTABLISHMENT OF OFFICE OF JUSTICE ASSISTANCE

"SEC. 101. (a) There is established within the Department of Justice under the general authority of the Attorney General an Office of Justice Assistance (hereinafter referred to in this part as the 'Office').

"(b) The Office shall be headed by a Director who shall be appointed by the Attorney General. The Director may appoint Deputy Directors to assist in the direction of the Office. The Director shall have primary authority over all grants, cooperative agreements, and contracts awarded by the Office. The Director shall have primary authority over administrative functions as may be necessary to carry out the provisions of this title. The Director shall not engage in any employment other than that of serving as Director, nor shall the Director hold any office, or in any capacity for, any organization, agency, or institution with which the Office makes any contract or other arrangement under this title.".

(c) Section 102 of part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3712) is amended—

(1) by striking out "Administrator" each place it appears and inserting in lieu thereof "Director",

(2) in paragraph (1) by striking out "and units of local government",

(3) by amending paragraph (2) to read as follows:

"(2) establish priorities for programs in accordance with part E, inform States, units of local government, and private nonprofit organizations of such priorities, and award and allocate funds and technical assistance in accordance with the criteria of part E and on terms and conditions determined by the Director to be consistent with part E;".

(4) in paragraph (4) by striking out "Administration" and inserting in lieu thereof "office", and

(5) in the heading for such section by striking out "administrator" and inserting in lieu thereof "director".

(d) Part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711-3713) is amended by striking out section 103.

NATIONAL INSTITUTE OF JUSTICE

SEC. 204. (a) Section 202 of part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3722) is amended—

(1) by striking subsection (b) and inserting in lieu thereof the following:

"(b)(1) The Institute shall be headed by a Director who shall be appointed by the Attorney General. The Director shall have had experience in justice research.

"(2) The Director may appoint Deputy Directors to assist in the direction of the Institute. The Director shall have primary authority over all grants, cooperative agreements, and contracts awarded by the Institute. The Director shall have primary authority over administrative functions as may be necessary to carry out out the provisions of this title. The Director shall not engage in any employment other than that of serving as Director; nor shall the Director hold any office in, or act in any capacity for any organization, agency, or institution with which the Institute makes any contract or other arrangement under this title.".

(2) in subsection (c)—

(A) in paragraph (2)(A) by striking out ", including programs authorized by section 103 of this title", and

(B) in paragraph (10)—

(i) by striking out "national priority grants under part E and", and

(ii) by striking out "part F" and inserting in lieu thereof "part E", and

(C) by striking out the period at the end of paragraph (11) and inserting in lieu thereof "; and", and

(D) by adding at the end of such subsection the following new paragraph:

"(12) provide financial assistance to encourage replication, coordination, and sharing among State and local justice agencies and public and private nonprofit organizations regarding successful programs or projects and useful information resulting from multiyear and short-term research and development activities authorized under this part.", and

(3) in subsection (d)(5) by striking out "part H" and inserting in lieu thereof "part G".

(b) Part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3724) is amended by striking out section 204.

BUREAU OF JUSTICE STATISTICS

SEC. 205. (a) Section 302 of part C of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3732) is amended—

(1) in subsection (a) by inserting before "Bureau" the word "the", and

(2) by striking subsection (b) and inserting in lieu thereof the following:

"(b) The Bureau shall be headed by a Director who shall be appointed by the Attorney General. The Director shall be experienced in statistical programs. The Director may appoint Deputy Directors to assist in the direction of the Bureau. The Director shall have primary authority over all grants, cooperative agreements, and contracts awarded by the Bureau. The Director shall have primary authority over administrative functions as may be necessary to carry out the provisions of this title. The Director shall not engage in any employment other than that of serving as Director; nor shall the Director hold any office in, or in any capacity for, any organization, agency, or institution with which the Bureau makes any contract or other arrangement under this title.".

and

(C) by adding after paragraph (16) the following new paragraph:

"(17) provide assistance to encourage replication, coordination, and sharing among justice agencies regarding information systems, information policy and statistics; and".

(b) Part C of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3731-3735) is amended—

(1) by striking out section 304, and

(2) by redesignating section 305 as section 304.

FORMULA GRANTS

SEC. 206. (a) Section 401 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3741) is amended—

(1) in subsection (a)—

(A) by striking out "innovative programs" and all that follows through "success, or" and insert in lieu thereof "programs",

(B) by striking out "and units of local government" the second place it appears,

(C) by striking out "Administration" and inserting in lieu thereof "Office",

(D) by inserting "funding programs and projects that" after "purpose of",

(E) by amending paragraphs (1) through (23) to read as follows:

"(1) identify and process within justice systems persons with a history of serious criminal conduct;

"(2) provide programs that address the problems of serious and violent offenses committed by juveniles;

"(3) combat arson;

"(4) disrupt illicit commerce in stolen goods and property;

"(5) effectively investigate and bring to trial white-collar crime, organized crime, public corruption crimes and fraud against the Government;

"(6) provide community and neighborhood programs that enable citizens and police to undertake initiatives to prevent and control neighborhood crime;

"(7) provide programs to speed the trial of criminal cases, reform sentencing practices and procedures, improve the efficiency of the jury system, and improve the processing of cases involving the mentally incompetent and pleas of mental incapacity;

"(8) provide training, management, and technical assistance to justice personnel;

"(9) provide assistance for the development and operation of justice information systems, including management information systems;

"(10) Coordinate the activities of components of the criminal justice system;

"(11) develop and implement programs which provide assistance (other than compensation) to jurors, witnesses, and victims of crime;

"(12) provide programs which address offenses committed against the elderly;

"(13) provide programs which identify and meet the needs of drug-dependent offenders;

"(14) provide alternatives to pretrial detention, jail, and prison for persons who pose no danger to the community;

"(15) provide programs which alleviate prison and jail overcrowding;

"(16) provide programs that address critical problems of crime, such as drug trafficking, and have been certified by the Director of the Office, after consultation with the Director of the Institute, as having proven successful, based on available objective, empirical or statistical data, information, or evaluation; and

"(17) provide programs that are innovative and that are likely to prove successful after testing, demonstration, evaluation, and refinement.",

(2) in subsection (b)—

(A) by amending paragraph (1) to read as follows:

"(1) For any fiscal year ending after September 30, 1982, the Federal portion of any grant made under this part shall be 50 per centum of the cost of programs and projects specified in the application for such grant, except that—

"(A) in the case of funds distributed for a program or project described in subsection (a)(17), the Federal portion shall be 75 per centum of such cost; and

"(B) in the case of funds distributed to an Indian tribe which performs law enforcement functions (as determined by the Secretary of the Interior) for any program or project described in subsection (a), the Federal portion shall be 100 per centum of such cost.",

(B) in paragraph (2)—

(i) by striking out "(2)(A)" and inserting in lieu thereof "(2)", and

(ii) by striking out subparagraph (B),

(3) by striking out subsection (c), and

(4) by amending subsection (b)(3) to read as follows:

"(c) A grant recipient shall assume the cost of a current program or project funded under this part after a four-year period (including any period occurring before the effective date of this subsection) of Federal assistance.".

(b) Section 402 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3742) is amended to read as follows:

"ELIGIBILITY

"SEC. 402. The Office is authorized to make financial assistance under this part available to a State to enable it to carry out all or a substantial part of a program or project submitted and approved in accordance with the provisions of this part.".

(c) Section 403 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3743) is amended—

(1) in subsection (a)—

(A) by striking out "Administration" each place it appears and inserting in lieu thereof "Office",

(B) by striking out "three-year" and inserting in lieu thereof "two-year",

(C) in the first sentence by inserting ", designates which objective specified in section 401(a) each such program is intended to achieve, and identifies the State agency or unit or local government which will implement each such program" before the period,

(D) in paragraph (3) by striking out ", and to the council where the applicant is a State agency, the judicial coordinating committees, a nongovernmental grantee, or a unit or combination of units of local government",

(E) in paragraph (6)—

(1) by striking out "a provision for" and inserting in lieu thereof "an assurance that", and

(ii) by inserting "will be provided" after "prescribe",

(F) in paragraph (7)—

(i) by striking out "a provision for the maintenance of" and inserting in lieu thereof "an assurance that the State will maintain", and

(ii) by striking out "for the submission of" and inserting in lieu thereof "submit", (G) in paragraph (8)—

(i) by striking out "officer" the first place it appears, and

(ii) by striking out "and" at the end thereof,

(H) in paragraph (9) by striking out the period and inserting in lieu thereof a semicolon,

(I) by striking out paragraphs (1), (2), and (5),

(J) by redesignations paragraphs (3), (4), (6), (7), (8), and (9) as paragraphs (1), (2), (3), (4), (5), and (6), respectively, and

(K) by adding at the end thereof the following new paragraphs:

"(7) an assurance that not more than 10 per centum of the aggregate amount of funds received by a State under this part for a fiscal year will be distributed for programs and projects designated as intended to achieve the objective specified in section 401(a)(17); and

"(8) an assurance that not more than 5 per centum of the Federal assistance expended by any unit of government under this part for a fiscal year will be spent for purposes of section 401(a)(10)."; and

(2) by amending subsection (b) to read as follows:

"(b) The chief executive officer of a State shall submit the application described in subsection (a), and any amendment to such application, to the State legislature while in session, or to a body designated to act in behalf of the State legislature if the State legislature is not then in session, for review. For purposes of section 404, such application or amendment shall be deemed to be reviewed if the State legislature or such body does not review such application or amendment within the ninety-day period beginning on the day it is so submitted.".

(d) Section 404 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3744) is amended—

(1) in subsection (a)—

(A) in paragraph (2) by striking out "and" at the end thereof,

(B) in paragraph (3) by striking out the period and inserting in lieu thereof "; and",

(C) by inserting after paragraph (3) the following new paragraph:

"(4) prior to the approval of the application or amendment thereof the Office has made an affirmative finding in writing that the program or project has been reviewed in accordance with section 403(b).", and

(D) by inserting before the period at the end thereof "or the application or amendment has not been reviewed in accordance with section 403(b)",

(2) in subsection (b) by striking out "section 802(b)" each place it appears and inserting in lieu thereof "section 701(b)",

(3) in subsection (c)—

(A) by amending paragraph (1) to read as follows:

"(1) the purchase of equipment or hardware, or the payment of personnel costs, unless the cost of such purchases and payments is incurred as an incidental and necessary part of a program under section 401(e);", and

(B) in paragraph (4) by striking out "Law Enforcement Assistance Administration," and inserting in lieu thereof "Office of Justice Assistance,",

(4) in subsection (d)—

(A) by striking out "Administrator" and inserting in lieu thereof "Director", and

(B) by striking out "section 803" and inserting in lieu thereof "section 702", and

(5) by striking out "Administration" each place it appears and inserting in lieu therof "Office".

(e) Section 405 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3745) is amended to read as follows:

"ALLOCATION AND DISTRIBUTION OF FUNDS

"SEC. 405. (a) Of the total amount appropriated for this part and part E in any fiscal year, 80 per centum shall be set aside for this part and allocated to States as follows:

"(1) One-fourth of 1 per centum of the amount set aside for this part, but not to exceed $250,000, shall be allocated to each of the participating States.

"(2) Of any funds remaining after the allocation under paragraph (1) is made, there shall be allocated to each State an amount which bears the same ratio to the amount of remaining funds described in this subparagraph as the population of such State bears to the population of all the States.

"(b)(1) Each State which receives funds under subsection (a) in a fiscal year shall distribute among units of local government, or combinations of units of local government, in such State for the purposes specified in section 401(a) that portion of such funds which bears the same ratio to the aggregate amount of such funds as the same ratio to the aggregate amount of such funds the amount of funds expended by all units of local government for law enforcement in the preceding fiscal year bears to the aggregate amount of funds expended by the State and all units of local government in such State for law enforcement in such preceding fiscal year.

"(2) Any funds not distributed to units of local government under paragraph (1) shall be available for expenditure by the State involved.

"(3) For purposes of determining the distribution of funds under paragraph (1), the most accurate and complete data available for the fiscal year involved shall be used. If data for such fiscal year are not available, then the most accurate and complete data available for the most recent year preceding such fiscal year shall be used.

"(c) No funds allocated to a State under subsection (a) or received by a State for distribution under subsection (b) may be distributed by the Director or by the State involved for any program other than a program contained in an approved application.

"(d) If the Office determines, on the basis of information available to it during any fiscal year, that a portion of the funds allocated to a State for that fiscal year will not be required or that a State will be unable to qualify or receive funds under this part, then such portion shall be reallocated to the other participating States.".

(f) Part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3741-3745) is amended by adding at the end thereof the following new section:

"STATE OFFICE

"SEC. 406. (a) Each participating State shall establish or designate by statute a State office for purposes of—

"(1) preparing an application to obtain funds under this part; and

"(2) administering funds received from the Office of Justice Assistance and its predecessor agency, including receipt, review, processing, monitoring, progress and financial report review, technical assistance, grant adjustments, accounting, auditing, and fund disbursements.

"(b) An office or agency performing other functions within the executive branch of a State may be designated to carry out the functions specified in subsection (a).".

NATIONAL PRIORITY GRANTS

SEC. 207. Titles I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701 et seq.) is amended by striking out part E.

DISCRETIONARY GRANTS

SEC. 208. (a) Sections 601 and 602 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3761-3762) are amended to read as follows:

"PURPOSE

"SEC. 501. The purpose of this part is to provide additional Federal financial assistance to States, units of local government, combinations of such units, and private nonprofit organizations for purposes of—

"(1) undertaking educational and training programs for criminal justice personnel;

"(2) providing technical assistance to States and local units of governments;

"(3) undertaking projects which are national or multi-State in scope, which address the purposes specified in section 401, and which have not received sufficient funds under part D; and

"(4) providing financial assistance for demonstration programs which, in view of previous research or experience, are likely to be a success in more than one jurisdiction and are not likely to be funded with moneys from other sources.

"PERCENTAGE OF APPROPRIATION FOR DISCRETIONARY GRANT PROGRAM

SEC. 502. Of the total amount appropriated for part D and this part in any fiscal year—

"(1) 10 per centum shall be reserved and set aside for this part in a special discretionary fund for use by the Office in making grants to carry out the purposes specified in paragraphs (1), (2), and (3) of section 501; and

"(2) 10 per centum shall be reserved and set aside for this part in a special discretionary fund for use by the Office in making grants to carry out the purpose specified in paragraph (4) of section 501.

The Director shall ensure that recipients of grants to carry out the purposes specified in paragraphs (1), (2), and (3) of section 501 include private nonprofit organizations. Grants under this part may be made for amounts up to 100 per centum of the costs of the programs or projects contained in the approved application. The National Institute of Justice shall review the types of programs described in section 501 of part E of this title for the purpose of identifying programs of proven success, and the Director of the National Institute of Justice shall consult with the Director of the

(d) Section 605 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3765) is amended—

(1) by striking out "Administration" each place it appears and inserting in lieu thereof "Office",

(2) by striking out "section 603" and inserting in lieu thereof "section 503",

(3) by striking out the third sentence, and

(4) by striking out "type of section 402 eligible jurisdiction" and inserting in lieu thereof "State".

(e) Section 606 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3766) is amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(f) The headling for part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3761-3766) is amended by striking out "Part F" and inserting in lieu thereof "Part E".

(g) Part E of title I, as so redesignated, is amended by redesignating sections 603, 604, 605, and 606 as sections 503, 504, 505, and 506, respectively.

TRAINING AND MANPOWER DEVELOPMENT

SEC. 209. (a) Part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701-3775) is amended—

(1) by striking out sections 701, 702, and 703,

(2) in section 705 by striking out "Administration" each place it appears and inserting in lieu thereof "Office", and

(3) by redesignating sections 704 and 705 as sections 601 and 602, respectively.

(b) The heading for part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3771-3775) is amended by striking out "Part G" and inserting in lieu thereof "Part F".

ADMINISTRATIVE PROVISIONS

SEC. 210. (a) Part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781 et seq.) is amended by striking out section 801 and inserting in lieu thereof the following:

"ASSISTANT ATTORNEY GENERAL

"SEC. 801. (a) There is hereby authorized to be appointed within the Department of Justice an Assistant Attorney General for Justice Assistance who shall be appointed by the President by and with the advice and consent of the Senate.

"(b) The Assistant Attorney General for Justice Assistance shall have final authority over the activities of the Office of Justice Assistance, the National Institute of Justice, and the Bureau of Justice Statistics.".

(b) Section 802 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3782) is amended—

(1) in subsection (a) by striking out "The Office of Justice Assistance, Research, and Statistics, the Law Enforcement Assistance Administration," and inserting in lieu thereof "The Office of Justice Assistance, the Office of Juvenile Justice and Delinquency Prevention,", and

(2) in subsection (b)—

(A) by striking out "Law Enforcement Assistance Administration" and "law Enforcement Assistance Administration" each place they appear and inserting in lieu thereof "Office of Justice Assistance",

(B) by inserting "the Office of Juvenile Justice and Delinquency Prevention," after "Bureau of Justice Statistics,",

(C) by striking out "parts D, E, and F" and inserting in lieu thereof "parts D and E",

(D) by striking out the second sentence,

(E) by amending the third sentence to read as follows: "In conducting evaluations described in this subsection, the Office of Justice Assistance, with the assistance and expertise of the National Institute of Justice, shall, when practical, compare the effectiveness of programs conducted by similar applicants and different applicants.", and

(F) by striking out "administration" and inserting in lieu thereof "Office".

(c) Section 803 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3783) is amended—

(1) by striking out "Law Enforcement Assistance Administration" each place it appears and inserting in lieu thereof "Office of Justice Assistance",

(2) by inserting "the Office of Juvenile Justice and Delinquency Prevention," after "Bureau of Justice Statistics," each place it appears, and

(3) in subsection (c) by striking out "Administration," and inserting in lieu thereof "Office,".

(d) Section 804 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3784) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(e) Section 805 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3785) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics, the Law Enforcement Assistance Administration," each place it appears and inserting in lieu thereof "Office of Justice Assistance,",

(2) by inserting "the Office of Juvenile Justice and Delinquency Prevention," before "or the National Institute of Justice" each place it appears,

(3) in subsection (a) by striking out "section 803, 804, or 815(c)(2)(G)" and inserting in lieu thereof "section 702, 703, or 712(c)(2)(G)", and

(4) in subsection (b) by inserting "the Office of Juvenile Justice and Delinquency Prevention" before "or the Bureau of Justice Statistics".

(f) Sections 806 and 807 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3786-3787) are each amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics,", and

(2) by striking out ", and the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, and the Office of Justice Assistance".

(g) Sections 810 and 811 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3788-3789) are amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics," each place it appears,

(2) by striking out ", and the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, and the Office of Justice Assistance".

(h) Section 812 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789a) is amended by striking out "Director of the Office of Justice Assistance, Research, and Statistics, the Administrator of the Law Enforcement Assistance Administration," and inserting in lieu thereof "Director of the Office of Justice Assistance, the Administrator of the Office of Juvenile Justice and Delinquency Prevention,".

(i) Section 813 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789b) is amended in subsections (a) and (b)—

(1) by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention", and

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(j) Section 814 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789c) is amended—

(1) in subsections (a) and (b)—

(A) by striking out "Office of Justice Assistance, Research, and Statistics," and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention,", and

(B) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance", and

(2) in subsection (c) by striking out "Administration" and inserting in lieu thereof "Office".

(k) Section 815 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789d) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance", and

(2) in subsection (b) by striking out "or the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office or Juvenile Justice and Delinquency Prevention, or the Office of Justice Assistance".

(l) Section 816 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789e) is amended to read as follows:

"REPORT TO PRESIDENT AND CONGRESS

"SEC. 816. Not later than April 1 of each year, the Director of the Office of Justice Assistance, the Director of the National Institute of Justice, and the Director of the Bureau of Justice Statistics shall each submit a report to the President and to the Congress on their activities under this title during the preceding fiscal year.".

(m) Section 817 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789f) is amended—

(1) by striking out "Office of Justice, Research and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance",

(2) in subsection (d) by striking out "section 815(c)" each place it appears and inserting in lieu thereof "section 712(c)", and

(3) in subsection (f)—

(A) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance", and

(B) by striking out "Administrator" each place it appears and inserting in lieu thereof "Director".

(n) Section 818 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789c) is amended by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance".

(o) Section 819 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789h) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics," and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention,", and

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(p) Section 820(a) of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789i(a)) is amended by striking out "Administration" and inserting in lieu thereof "Office".

(q) Section 823 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789l) is amended by striking out "Administration" and inserting in lieu thereof "Office".

(r) Section 826 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789o) is amended—

(1) by striking out "council" each place it appears,

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance", and

(3) by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(s) The heading for part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by striking out "Part H" and inserting in lieu thereof "Part G".

(t) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by redesignating sections 801, 802, 803, 804, 805, 806, 807, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, and 827 as sections 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, and 725 respectively.

(u) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by striking out sections 808 and 809.

(v) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by adding at the end thereof the following new sections:

"REPAYMENT

"SEC. 726. (a) If Federal financial assistance provided under this part is used by the recipient of such assistance for any purpose other than the purpose for which it is provided, then such recipient shall promptly repay to the United States an amount equal to the value of such assistance.

"(b) The Director shall bring a civil action in an appropriate United States district court to recover any amount required to be repaid under subsection (a).

"ESTABLISHMENT OF JUSTICE ASSISTANCE BOARD

"SEC. 727. (a) There is established a Justice Assistance Board (hereafter referred to as the 'Board'). The Board shall consist of—

"(1) fifteen voting members who shall be appointed by the President; and

"(2) the Director of the Office of Justice Assistance, the Director of the National Institute of Justice, the Director of the National Institute of Justice, the Director of the National Institute of Justice, the Director of the Bureau of Justice Statistics, and the Administrator of the Office of Juvenile Justice and Delinquency Prevention, who shall be nonvoting, ex officio members; and

"(3) two nonvoting, coordinating members from the National Advisory Committee for Juvenile Justice and Delinquency Prevention.

"(b) Members shall represent the public interest and shall be knowledgeable and experienced in the justice systems; such as law enforcement personnel, prosecutors, public and defense attorneys, judges, court administrators, probation and correctional personnel, researchers and scholars, representatives of public and private nonprofit and voluntary organizations, including those which offer programs of assistance to victims of crime, representatives of neighborhood and community-based groups and representatives of local and State governments. Five members shall be experienced in the types of programs and services provided by the Office of Justice Assistance; five members shall be experienced in the types of programs and services provided by the National Institute of Justice; and five members shall be experienced in the types of programs and services provided by the Bureau of Justice Statistics.

"(c)(1) Voting members of the Board shall be appointed for 3-year terms, except that in order to provide for continuity in its operations and to establish staggered groups of vacancies, five members of the initial Board shall be appointed for 4-year terms, five members of the initial Board shall be appointed for 3-year terms, and five members of the initial Board shall be appointed for 2-year terms.

"(2) The initial appointment of members shall be made not later than ninety days after the effective date of the Justice Assistance Act of 1982. Vacancies among Board members shall be filled within ninety days of the vacancy. Any member appointed to fill a vacancy occurring before the scheduled expiration of a term shall be appointed for the remainder of such term. Members shall be eligible for reappointment, but shall serve consecutively no more than two terms or six years, whichever is less. Members once appointed, may not be removed prior to the expiration of their term except for cause.

"(d) The Board shall elect from among its voting members a Chair and Vice Chair. The Board shall select from among its voting members two representatives to serve as nonvoting coordinating members on the National Advisory Committee of Juvenile Justice and Delinquency Prevention.

"(e) The Board shall meet at the call of the Chair, but not less frequently than quarterly. Notice of all Board meetings shall be published. Eight voting members of the Board shall constitute a quorum.

"(f) The Board shall—

"(1) recommend to the Assistant Attorney General for Justice Assistance and the Directors funding priorities and selection criteria to be used in determining the award and allocation of funds through the Office of Justice Assistance, the National Institute of Justice, and the Bureau of Justice Statistics;

"(2) recommend to the Assistant Attorney General for Justice Assistance and the Directors such policies and program priorities as it deems advisable;

"(3) review and evaluate the activities of the Office of Justice Assistance, the National Institute of Justice, and the Bureau of Justice Statistics and make such recommendations to the Assistant Attorney General for Justice Assistance and the Directors as it considers necessary or appropriate;

"(4) in the event of a vacancy, recommend to the President at least three condidates for the position of Assistant Attorney General for Justice Assistance;

"(5) review and evaluate Federal policies and priorities in justice assistance, research, and statistics; and

"(6) coordinate its activities with the National Advisory Committee for Juvenile Justice and Delinquency Prevention and the Coordinating Council on Juvenile Justice and Delinquency Prevention.

"(g) Beginning January 1, 1983, the Board shall submit an annual report to the President and to the Congress not later than April 1 of each year and may submit such interim reports as it considers advisable to the President and to the Congress. Each annual report shall describe the activities of the Board during the preceding fiscal year and shall contain such findings and recommendations as the Board considers necessary or appropriate.

"(h) The head of each Federal agency shall make available to the Board such information and other assistance as it may require to carry out its responsibilities. The Board shall not have any authority to procure any temporary or intermittent services of any personnel under section 3109 of title 5, United States Code, or under any other provision of law.

"(i)(1) Members of the Board shall, while engaged in the actual performance of the duties vested in the Board, be entitled to receive compensation at a rate not to exceed the daily rate specified for grade GS-18 of the General Schedule in section 5332 of title 5, United States Code, including traveltime.

"(2) Members of the Board shall be entitled to reimbursement for travel expenses, including per diem in lieu of subsistence, while serving away from their place of residence or regular place of business, in the same manner as the expenses are authorized by section 5703 of title 5, United States Code, for persons in the Federal Government service employed intermittently.".

DEFINITIONS

SEC. 111. (a) Section 901 of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(b) Section 901(a)(4) of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791(a)(4)) is amended—

(1) by inserting "renovation, repairs, remodeling," after "acquisition,", and

(2) by striking out ", but does not include renovation, repairs, or remodeling".

(c) The heading for part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by striking out "Part I" and inserting in lieu thereof "Part H".

(d) Part H, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by redesignating section 901 as section 801.

FUNDING

SEC. 212. (a) Section 1001 of part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1001. (a) There is authorized to be appropriated to carry out the functions of the Office of Justice Assistance $170,000,000 for each of the fiscal years 1983 and 1984.

"(b) There is authorized to be appropriated to carry out the functions of the National Institute of Justice $25,000,000 for each of the fiscal years 1983 and 1984.

"(c) There is authorized to be appropriated to carry out the functions of the Bureau of Justice Statistics $25,000,000 for each of the fiscal years 1983 and 1984.

"(d) There are authorized to be appropriated for each of the fiscal years 1983 and 1984, such sums as may be necessary to carry out the purposes of part K of this title.".

(b) Part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by striking out sections 1002 and 1003 and inserting in lieu thereof the following new section:

"PROHIBITION ON USE OF FUNDS

"SEC. 1002. Notwithstanding any other provision of law, no funds appropriated under this section for parts D and F of this title may be expended for programs or projects involving the resolution of civil dis-

putes or may be transferred or reprogramed for carrying out any activity which is not authorized under such parts.".

(c) The heading for part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by striking out "Part J" and inserting in lieu thereof "Part I".

(d) Part I, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by redesignating sections 1001 and 1002 as sections 901 and 902, respectively.

CRIMINAL PENALTIES

SEC. 213. (a) Section 1101 of part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(b) Section 1103 of part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(c) The heading for part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by striking out "Part K" and inserting in lieu thereof "Part H".

(d) Part H, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by redesignating sections 1101, 1102, and 1103 as sections 1001, 1002, and 1003, respectively.

PUBLIC SAFETY OFFICERS' DEATH BENEFITS

SEC. 214. (a) Sections 1201 and 1204 of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3797-3797c) are amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(b) The heading for part L of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3797-3797c) is amended by striking out "Part L" and inserting in lieu thereof "Part K".

(c) Part K, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3797-3797c) is amended by redesignating sections 1201, 1202, 1203, and 1204 as sections 1101, 1102, 1103, and 1104, respectively.

TRANSITION

SEC. 215. (a) Section 1301 of part M of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799 (a)) is amended—

(1) by adding "(1)" after "(a)",

(2) by adding at the end of subsection (a) the following new paragraph:

"(2) All orders, determinations, rules, regulations, and instructions issued under this title which are in effect on the date of the enactment of the Justice Assistance Act of 1982 shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked by the President, the Attorney General, the Director of the Bureau of Justice Statistics, the Director of the National Institute of Justice, the Administrator of the Office of Juvenile Justice and Delinquency Prevention, or the Director of the Office of Justice Assistance with respect to their functions under this title or by operation of law.",

(3) by striking out subsection (j), and

(4) by redesignating subsection (k) as subsection (j).

(b) The heading for part M of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799) is amended by striking out "Part M" and inserting in lieu thereof "Part L".

(c) Part L, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799) is amended by redesignating section 1301 as section 1201.

TABLE OF CONTENTS

SEC. 216. The table of contents of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701-3799) is amended—

(1) by amending the item relating to part A to read as follows:

"PART A—OFFICE OF JUSTICE ASSISTANCE"

(2) by striking out the item relating to section 103,

(3) by adding at the end of the items relating to part D the following new item:

"Sec. 406. State office.".

and

(4) by amending the items relating to parts E, F, G, H, I, J, K, L, and M, to read as follows:

"PART E—DISCRETIONARY GRANTS

"Sec. 501. Purpose.

REFERENCES IN THE OTHER LAWS

SEC. 217. (a) Any reference to the Law Enforcement Assistance Administration, or to the Administrator of the Law Enforcement Assistance Administration, in any law other than this Act and the Omnibus Crime Control and Safe Streets Act of 1968, applicable to activities, functions, powers, and duties that after the date of the enactment of this Act are carried out by the Office of Justice Assistance shall be deemed to be a reference to the Office of Justice Assistance, or to the Director of the Office of Justice Assistance, as the case may be.

(b) Any reference to the Office of Justice Assistance, Research, and Statistics, or to the Director of the Office of Justice Assistance, Research, and Statistics, in any law other than this Act and the Omnibus Crime Control and Safe Streets Act of 1968, applicable to activities, functions, powers, and duties that after the date of the enactment of this Act are carried out by the Office of Justice of Assistance, Bureau of Justice Statistics, the National Institute of Justice, or the Office of Juvenile Justice Delinquency Prevention shall be deemed to be a reference to the Office of Justice Assistance, Bureau of Justice Statistics, National Institute of Justice, or Office of Juvenile Justice Delinquency Prevention, Director of the Office of Justice Assistance or to the Director of the Bureau of Justice Statistics, the Director of the National Institute of Justice, or the Administrator of the Office of Juvenile Justice and Delinquency Prevention, as the case may be.

TECHNICAL AMENDMENTS TO OTHER LAWS

SEC. 218. (a) Section 5314 of title 5, United States Code is amended by striking out "Director, Office of Justice Assistance, Research, and Statistics.".

(b) Section 5315 of title 5, United States Code, is amended—

(1) by striking out "Administrator of Law Enforcement Assistance.", and

(2) by adding at the end thereof the following new item:

"DIRECTOR, OFFICE OF JUSTICE ASSISTANCE.".

(c) Section 1761(c) of title 18, United States Code, is amended by striking out "Administrator of the Law Enforcement Assistance Administration" and inserting in lieu thereof "Director of the Office of Justice Assistance".

EFFECTIVE DATES

SEC. 219. (a) Except as provided in subsection (b), this part, title and the amendments made by this Part shall take effect on the date of the enactment of this Act.

(b) Section 202(b)(1) of part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968, as added by section 204(a)(1) of this Act, shall take effect on the date of the first occurrence, after the date of the enactment of this Act, of a vacancy in the office of Director of the National Institute of Justice.

PART B—EMERGENCY FEDERAL LAW ENFORCEMENT ASSISTANCE

APPLICATION

SEC. 221. (a) In the event that a crime problem of serious and epidemic proportions exists throughout a State or a part of a State, a State (on behalf of itself or another appropriate unit of government) may submit an application under this section for Federal law enforcement assistance.

(b) An application for assistance under this section shall be submitted in writing by the chief executive officer of a State to the Attorney General, in a form prescribed by rules issued by the Attorney General. The Attorney General shall, after consultation with appropriate members of the Federal law enforcement community, approve or disapprove such application not later than ten days after receiving such application.

(c) Federal law enforcement assistance may be provided if such assistance is necessary to provide an adequate response to a crime problem described in subsection (a). In determining whether to approve or disapprove an application for assistance under this section, the Attorney General shall consider—

(1) the nature and extent of the crime problem throughout a State or in any part of a State,

(2) the emergency or extraordinary circumstances which produced the problem,

(3) the availability of State and local criminal justice resources to resolve the problem,

(4) the cost associated with the increased Federal presence,

(5) the need to avoid unnecessary Federal involvement and intervention in matters primarily of State and local concern, and

(6) any assistance which the State or other appropriate unit of government has received, or could receive, under any provision of title I of the Omnibus Crime Control and Safe Streets Act of 1968.

DEFINITIONS

SEC. 222. For purposes of this part—

(1) the term "Federal law enforcement assistance" means funds, equipment, training, intelligence information, and personnel,

(2) the term "Federal law enforcement community" means the heads of the following departments or agencies:

(A) the Federal Bureau of Investigation,

(B) the Drug Enforcement Administration,

(C) the Criminal Division of the Department of Justice,

(D) the Internal Revenue Service,

(E) the Customs Service,

(F) the Immigration and Naturalization Service,

(G) the United States Marshals Service,

(H) the National Park Service,

(I) the United States Postal Service,

(J) the Secret Service,

(K) the Coast Guard,

(L) the Bureau of Alcohol, Tobacco, and Firearms, and

(M) other Federal agencies with specific statutory authority to investigate violations of Federal criminal laws, and

(3) the term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, or the Commonwealth of the Northern Mariana Islands.

LIMITATION ON AUTHORITY

SEC. 223. (a) Nothing in this part authorizes the use of Federal law enforcement personnel to investigate violations of criminal law other than violations with respect to which investigation is authorized by other provisions of law.

(b) Nothing in this part shall be construed to authorize the Attorney General or the Federal law enforcement community to exercise any direction, supervision, or control over any police force or other criminal justice agency of an applicant for Federal law enforcement assistance.

(c) No funds provided under this part may be used to supplant State or local funds that would otherwise be made available for such purposes.

(d) Nothing in this part shall be construed to limit any authority to provide emergency assistance otherwise provided by law.

PROHIBITION OF DISCRIMINATION

SEC. 224. (a) No person in any State shall, on the ground of race, color, religion, national origin, or sex, be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in connection with any acitivity for which Federal law enforcement assistance is provided under this title.

(b) Paragraph (3) and paragraph (4) of section 712(c) of part G of title I of the Omnibus Control and Safe Streets Act of 1968 (as so redesignated by section 209 of this Act) shall apply with respect to a violation of subsection (a), except that the terms "this section" and "paragraph (1)", as such terms appear in such paragraphs, shall be deemed to be references to subsection (a) of this section, and a reference to the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance in such paragraphs shall be deemed to be a reference to the Attorney General.

CONFIDENTIALITY OF INFORMATION

SEC. 225. Section 715 of part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (as so redesignated by section 209 of this Act) shall apply with respect to—

(1) information furnished under this part,

(2) criminal history information collected, stored, or disseminated with the support of Federal law enforcement assistance provided under this part, and

(3) criminal intelligence systems operating with the support of Federal law enforcement assistance provided under this part,

except that the terms "this title" and "this section", as such terms appear in such section 715, shall be deemed to be references to this part and this section, respectively, of this Act, and a reference to the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance in such section 715 shall be deemed to be a reference to the Attorney General.

PROHIBITION OF LAND ACQUISITION

SEC. 226. No funds provided under this part shall be used for land acquisition.

REPAYMENT

SEC. 227. (a) If Federal law enforcement assistance provided under this title is used by the recipient of such assistance in violation of section 224 or for any purpose other than the purpose for which it is provided, then such recipient shall promptly repay to the Attorney General an amount equal to the value of such assistance.

(b) The Attorney General may bring a civil action in an appropriate United States district court to recover any amount required to be repaid under subsection (a).

RECORDKEEPING REQUIREMENT

SEC. 228. (a) Each recipient of Federal law enforcement assistance provided under this part shall keep such records as the Attorney General may prescribe to facilitate an effective audit.

(b) The Attorney General and the Comptroller General of the United States shall have access, for the purpose of audit and examination, to any books, documents, and records of recipients of Federal law enforcement assistance provided under this part which, in the opinion of the Attorney General or the Comptroller General, are related to the receipt or use of such assistance.

REPORT TO CONGRESS

SEC. 229. Not later than April 1 of each year, the Attorney General shall submit to the President, and to the Congress a report describing Federal law enforcement assistance provided under this part during the preceding fiscal year.

LIMITATION ON CIVIL JUSTICE MATTERS

SEC. 230. Federal law enforcement assistance provided under this part may not be used with respect to civil justice matters except to the extent that such civil justice matters bear directly and substantially upon criminal justice matters or are inextricably intertwined with criminal justice matters.

ISSUANCE OF RULES

SEC. 231. The Attorney General, after consultation with appropriate members of the law enforcement community and with State and local officials, shall issue rules to carry out this part.

AUTHORIZATION OF APPROPRIATIONS

SEC. 232. (a) There is authorized to be appropriated $20,000,000 for each fiscal year ending after September 30, 1982, to provide under this part Federal law enforcement assistance other than funds.

(b) There are authorized to be appropriated for each fiscal year ending after September 30, 1982, such sums as may be necessary to provide under this part Federal law enforcement assistance in the form of funds.

EFFECTIVE DATE

SEC. 233. This part shall take effect on the date of the enactment of this Act.

JUSTICE III—MISCELLANEOUS CRIMINAL JUSTICE IMPROVEMENTS

PART A

SEC. 301. That this part may be cited as the "Federal Anti-Tampering Act".

SEC. 302. Chapter 65 of title 18 of the United States Code is amended by adding at the end the following new section:

"§ 1365. Tampering with consumer products with intent to cause injury or death

"(a) Whoever, with intent to cause the death of or bodily injury to any individual,

knowingly tampers with any food, drug, device, or cosmetic which—

"(1) at any time affects interstate commerce or foreign commerce; and

"(2) is produced or distributed for consumption or use by individuals;

and thereby causes the death of or bodily injury to any individual, or attempts to do so, shall be punished as is provided in subsection (b) of this section.

"(b) The punishment for an offense under subsection (a) of this section is—

"(1) in the case of an attempt, a fine of not more than $20,000 or imprisonment of not more than 5 years, or both;

"(2) in the case that serious bodily injury to or the death of any individual is caused, a fine of not more than $100,000 or imprisonment for any term of years or for life, or both; and

"(3) in any other case, a fine of not more than $100,000, or imprisonment for not more than 20 years, or both.

"(c) As used in this section—

"(1) the term 'food' has the definition given such term in section 201(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(f)) and also includes 'meat food product' as such term is defined in section 2(j) of the Federal Meat Inspection Act (21 U.S.C. 601(j)), 'poultry' as such term is defined in section 4(d) of the Poultry Products Inspection Act (21 U.S.C. 453(e)), 'poultry product' as such term is defined in section 4(e) of the Poultry Products Inspection Act (21 U.S.C. 453(f)), 'egg product' as such term is defined in section 4(f) of the Egg Products Inspection Act (21 U.S.C. 1033(f)), and 'egg' as such term is defined in section 4(g) of the Egg Products Inspection Act (21 U.S.C. 1033(g));

"(2) the term 'drug' has the definition given such term in section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1));

"(3) the term 'device' has the definition given such term in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h));

"(4) the term 'cosmetic' has the definition given such term in section 201(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(i));

"(5) the term 'serious bodily injury' means bodily injury which involves—

"(A) a substantial risk of death;

"(B) extreme physical pain;

"(C) protracted and obvious disfigurement; or

"(D) protracted loss or impairment of the function of a bodily member, organ, or mental faculty; and

"(6) the term 'bodily injury' means—

"(A) a cut, abrasion, bruise, burn, or disfigurement;

"(B) physical pain;

"(C) illness;

"(D) impairment of a function of a bodily member, organ, or mental faculty; or

"(E) any other injury to the body, no matter how temporary.".

SEC. 303. The table of sections at the beginning of chapter 65 of title 18 of the United States Code is amended by adding at the end the following new item:

"1365. Tampering with consumer products with intent to cause injury or death.".

PART B

SEC. 304. That this Part may be cited as the "Federal Intelligence Personnel Protection Act."

SEC. 305. Chapter 51 of title 18 of the United States Code, section 1114, is amended—

(a) by inserting "or attempts to kill" after "kills";

(b) by striking out "while engaged in the performance of his official duties or on account of the performance of his official duties" and inserting in lieu thereof "or any officer or employee of any department or agency within the Intelligence Community (as defined in section 3.4(F) of Executive Order 12333, December 8, 1981, or successor orders) not already covered under the terms of this section"; and

(c) by inserting before the period at the end thereof a comma and the following: "except that any such person who is found guilty of attempted murder shall be imprisoned for not more than twenty years".

PART C

SEC. 306. Chapter 103 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 2118. Armed Career Criminals

"(a) Any person who while he or any other participant in the offense is in possession of or has readily available any firearm or imitation thereof, commits, or conspires or attempts to commit robbery or burglary in violation of the felony statutes of the State in which such offense occurs or of the United States—

"(1) may be prosecuted for such offense in the courts of the United States if such person has previously been twice convicted of robbery or burglary, or an attempt or conspiracy to commit such an offense, in violation of the felony statutes of any State or of the United States; and

"(2) shall, if found guilty pursuant to this section, and upon proof of the requisite prior convictions to the court at or before sentencing, be sentenced to a term of imprisonment of not less than fifteen years nor more than life and may be fined not more than $10,000.

"(b) Notwithstanding any other provision of law: (1) any person charged pursuant to this section shall be admitted to bail pending trial or appeal as provided in section 3148 of title 18, United States Code; (2) the prior convictions of any person charged hereunder need not be alleged in the indictment nor shall proof thereof be required at trial to establish the jurisdiction of the court or the elements of the offense; (3) any person convicted under this section shall not be granted probation nor shall the term of imprisonment imposed under paragraph (a), or any portion thereof, be suspended; and (4) any person convicted under this section shall not be released on parole prior to the expiration of the full term of imprisonment imposed under paragraph (a).

"(c) For purposes of this section—

"(1) 'United States' includes the District of Columbia, the Commonwealth of Puerto Rico, and any other territory or possession of the United States;

"(2) 'felony' means any offense punishable by a term of imprisonment exceeding one year; and

"(3) 'firearm' has the meaning set forth in section 921 of title 18, United States Code.

"(d) Except as expressly provided herein, no provision of this section shall operate to the exclusion of any other Federal, State, or local law, nor shall any provision be construed to invalidate any other provision of Federal, State, or local law.

"(e) Ordinarily the United States should defer to State and local prosecutions of armed robbery and armed burglary offenses. However, if after full consultation between the local prosecuting authority and the appropriate Federal prosecuting authority, the local prosecuting authority requests or concurs in Federal prosecution and the Attorney General or his designee approves such prosecution to be appropriate, then Federal prosecution may be initiated under this Act.".

SEC. 3. The table of sections for chapter 103 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"2118. Armed Career Criminals.".

SEC. 4. (a) It is the intent of Congress that any person prosecuted pursuant to this Act be tried expeditiously and that any appeal arising from a prosecution under this Act be treated as an expedited appeal.

(b) This section shall not create any right enforceable at law or in equity in any person, nor shall the court have jurisdiction to determine whether or not any of the procedures or standards set forth in this section have been followed.

PART D

SEC. 307. (a) This section may be cited as the "National Narcotics Act of 1982".

(b)(1) The Congress hereby makes the following findings:

(A) The flow of illegal narcotics into the United States is a major and growing problem.

(B) The problem of illegal drug activity falls across the entire spectrum of Federal activities both nationally and internationally.

(C) Illegal drug trafficking is estimated by the General Accounting Office to be a $79,000,000,000 a year industry in the United States.

(D) The annual consumption of heroin in the United States is in the range of four metric tons, and annual domestic consumption of cocaine is estimated to be forty to forty-eight metric tons.

(E) Despite the efforts of the United States Government and other nations, the mechanisms for smuggling opium and other hard drugs into the United States remain virtually intact and United States agencies estimate that they are able to interdict no more than 5 to 15 per centum of all hard drugs flowing into the country.

(F) Such significant indicators of the drug problem as drug-related deaths, emergency room visits, hospital admissions due to drug-related incidents, and addiction rates are soaring.

(G) Increased drug trafficking is strongly linked to violent, addiction-related crime and recent studies have shown that over 90 per centum of heroin users rely upon criminal activity as a means of income.

(H) Much of the drug trafficking is handled by syndicates which results in increased violence and criminal activity because of the competitive struggle for control of the domestic drug market.

(I) Controlling the supply of illicit drugs is a key to reducing the crime epidemic confronting every region of the country.

(J) The magnitude and scope of the problem requres a director of National International Drug Operations and Policy with the responsibility for the coordination and direction of all Federal efforts by the numerous agencies.

(K) Such a director must have broad authority and responsibility for making management, policy, and budgetary decisions with respect to all Federal agencies involved in attacking this problem so that a unified and efficient effort can be made to eliminate the illegal drug problem.

(2) It is the purpose of this section to insure—

(A) the development of a national policy with respect to illegal drugs;

(B) the direction and coordination of all Federal agencies involved in the effort to implement such a policy; and

(C) that a single, competent, and responsible high-level official of the United States Government, who is appointed by the President, by and with the advice and consent of the Senate, and who is accountable to the Congress and the American people, will be charged with the responsibility of coordinating the overall direction of United States policy, resources, and operations with respect to the illegal drug problem.

(c) There is established in the executive branch of the Government an office to be known as the "Office of the Director of National and International Drug Operations and Policy" (hereinafter in this section referred to as the "Office of the Director"). There shall be at the head of the Office of the Director a Director of National and International Drug Operations and Policy (hereinafter in this section referred to as the "Director"). There shall be a Deputy Director of National and International Drug Operations and Policy (hereinafter in this section referred to as the "Deputy Director") to assist the Director in carrying out the Director's functions under this section.

(d)(1) The Director and the Deputy Director shall be appointed by the President, by and with the advice and consent of the Senate. The Director and the Deputy Director shall each serve at the pleasure of the President. No person may serve as Director or Deputy Director for a period of more than four years unless such person is reappointed to that same office by the President, by and with the advice and consent of the Senate. The Director shall be entitled to the compensation provided for in section 5313, title 5, United States Code. The Deputy Director shall be entitled to the compensation provided for in section 5314, title 5, United States Code.

(2) The Director shall serve as the principal director and coordinator of United States operations and policy on illegal drugs.

(3) The Director shall have the responsibility, and is authorized to—

(A) develop, review, implement, and enforce United States Government policy with respect to illegal drugs;

(B) direct and coordinate all United States Government efforts to halt the flow into, and sale and use of illegal drugs within the United States;

(C) develop in concert with governmental entities budgetary priorities and budgetary allocations of entities of the United States Government with respect to illegal drugs; and

(D) coordinate the collection and dissemination of information necessary to implement United States policy with respect to illegal drugs.

(4) In carrying out his responsibilities under paragraph (3) the Director is authorized to—

(A) direct, with the concurrence of the head of the agency employing such personnel, the temporary reassignment of government personnel within the United States Government in order to implement United States policy with respect to illegal drugs;

(B) procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code, but at rates for individuals, not to exceed the daily equivalent of the maximum annual rate of basic pay payable for the grade of GS-18 of the General Schedule;

(C) accept and use donations of property from all government agencies; and

(D) use the mails in the same manner as any other department or agency of the executive branch.

(5) Notwithstanding any other provision of law, rule, or regulation to the contrary, the Director shall have the authority to direct each department or agency with responsibility for drug control to carry out the policies established by the Director consistent with the general authority of each agency or department.

(6) The Administrator of the General Service Administration shall provide to the Director on a reimbursable basis such administrative support services as the Director may request.

(e) The Director shall submit to the Congress, within nine months after enactment of this section, and annually thereafter, a full and complete report reflecting United States policy with respect to illegal drugs, plans proposed for the implementation of such policy, and, commencing with the submission of the second report, a full and complete report reflecting accomplishments with respect to the United States policy and plans theretofore submitted to the Congress.

(f) For the purpose of carrying out this section, there are authorized to be appropriated $500,000 for fiscal year 1983, and such sums as may be necessary for each of the four succeeding fiscal years, to be available until expended.

(g) This section shall be effective January 1, 1983.

The Senate proceeded to consider the amendment of the House to the amendment of the Senate.

Mr. BIDEN. Mr. President, the completion of congressional action on this measure, H.R. 3963, represents a major breakthrough in the longstanding effort to move meaningful anti-crime legislation through the Congress.

This legislation is important not only because it contains major elements of the Senate Democrats 1981 crime package and the bipartisan Senate crime package which Senator THURMOND and I sponsored earlier this year. It is also important because we have, through its consideration, won commitments from the House leadership that other major elements of those two Senate packages—specifically, bail and sentencing reforms—will be taken up by the House early next year.

H.R. 3963 contains three major elements of the earlier Senate crime packages: Establishment of a new Cabinet-level post to coordinate Federal drug enforcement policy and operations; a new, closely targeted program of law enforcement assistance for States and localities; and a strengthening of Federal criminal forfeiture statutes.

Each of these steps is significant in itself, and together they will make a meaningful contribution toward strengthening the overall Federal anti-crime effort.

Their primary thrust, however, is programmatic in nature. In the case of the drug enforcement coordinator in particular, they deal primarily with structural changes needed to overcome programmatic and bureaucratic problems which have been hampering current efforts.

What we have not undertaken in H.R. 3963 is the substantive law reforms contained in the earlier Senate packages—reforms of bail and sentencing provisions. These reforms are, in my opinion and in the opinion of many of my colleagues, essential, and they must now be our priority for next year.

With the new assurances we have from the House leadership that these reforms will be considered in that body, I am hopeful that we can move expeditiously and successfully upon them as well.

Mr. President, I have prepared a detailed summary of the provisions of H.R. 3963, and ask unanimous consent that they be entered into the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COORDINATING THE DRUG EFFORT

No general would send an army into battle without a commander, but that, unfortunately, is what President Reagan has done earlier this fall in launching his new program for stepping up Federal efforts to control illegal drugs.

The Administration program is modeled on the South Florida Drug Task Force that has produced some success over the past year, but it omits the key element of those successes. To be effective, such a program must have someone—in the case of Florida, it has been the Vice President—with enough authority to assure a coordinated strategy among the ten or more Federal agencies involved. The President's new program, which relies on two, ad hoc Inter-Agency Committees for Coordination, does not provide for a strong, central figure of this kind.

With no single commander giving orders, the President's initiative is likely to join the long list of casualties of the bureaucratic turf—wars that have wrecked more than one anti-crime program. The agencies involved will almost certainly, as they have traditionally, subordinate their drug interdiction tasks to what they perceive as their primary duties. Recent history is studded with examples of how such conflicts can divert attention from the primary goal of controlling drugs:

The Drug Enforcement Administration has failed at times to follow up on drug smuggling information provided by the Customs Service.

The Agriculture Department has refused to give Customs Service information about foreign ownership of American land, hampering investigations of money-laundering schemes.

In Government forfeitures of narcotics profits, seizures have been inflated by duplication among the DEA, IRS and Customs, all of which have, on occasion, taken credit for seizing the same illicit proceeds.

Our congressional investigations have disclosed chronic, but not ill-founded, reluc-

tance in national intelligence agencies to collect intelligence on drug trafficking for fear of getting enmeshed in court proceedings that will compromise operations.

In 1979, when the CIA unilaterally decided to reduce its commitment to covert collection of narcotics intelligence abroad, there was no commander of the drug war who had the authority and the responsibility to protest this desertion of one of the critical partners in narcotics control.

The State Department was not even consulted before the President unveiled his new drug enforcement program, and for that reason crop-substitution programs have been frozen at $36 million—despite the Attorney General's admission that a dollar spent on those programs abroad is worth $10 spent on domestic law enforcement.

Reports in the New York Times and elsewhere suggest that such agency infighting has already taken its toll of the President's new program while it is still in the planning stage.

It has been reported that the Justice Department and other agencies have been squabbling over who is going to control the budget for the program. There have even been reports of arguments within Justice itself over who will conduct the prosecutions and how the program will relate to existing programs.

No one seems to know, for example, how the new task forces will mesh with existing organized crime strike forces, or how a dozen U.S. attorneys, each responsbile for a task-force region, will pursue independent investigations that may overlap into other regions.

There is little likelihood that the ad hoc committees designated to coordinate the new progam will be able to provide effective solutions to these kinds of problems. Committee members and their staffs will necessarily be preoccupied with their other, primary responsibilities and commitee participation may only serve to heighten, not lessen, the opportunities for beureaucratic conflict.

There is a better alternative and it is contained in H.R. 3963.

The catastrophic illustration of problems in coordination of U.S. intelligence activities by the 1941 surprise attack of Pearl Harbor led Congress to create the Office of Director of Central Intelligence, with authority to coordinate the activities of the intelligence community. A similar arrangement is the key to coordinating Federal anti-drug programs.

Last year, on behalf of the Senate Democratic Task Force on Crime, I introduced legislation which would establish a Cabinet-level Office of Director of Narcotics Control. In September the Senate passed and sent to the House a bipartisan anti-crime bill incorporating the same proposal. Today that very same language was sent back to us by the House.

An office of this kind is needed because the coordination of Federal drug enforcement efforts is a job of such complexity and size that it requires undivided attention and responsibility. And the office should have Cabinet-level status to ensure that it has the requisite clout to do what needs to be done: Impose a truce on interagency quarreling, task each agency for its appropriate participation and allocate budget resources for maximum efficiency and economy. As a Cabinet-level appointee, the individual holding the office would be subject to Senate confirmation, and thus accountable to both the President and Congress.

Although the President has said he generally supports the Senate's anti-crime legislation, his administration has shown no enthusiasm for the new Cabinet-level office described above. This, no doubt, is a function of this administration's appropriate reluctance to create new bureaucracies.

But is should be recognized that what we are talking about here is not more government—the office in question need not be large. Indeed, its responsibilities could be performed by personnel borrowed from existing agencies. We are talking about making the government we have work right, and do the job it is supposed to do.

And it should be recognized that we will not be able to significantly strengthen Federal drug-enforcement efforts until we put someone in charge with the authority and responsibility to command all the troops.

JUSTICE ASSISTANCE ACT

I would simply like to echo the words of the chairman, and join him and Senator Spector in moving forward with this badly needed justice assistance bill.

My colleagues will recall that when the justice assistance bill was debated on the Senate floor I raised objection to an amendment that I felt would have completely eliminated the independence of the research and statistics components of the program.

Through discussions, compromise and general agreement I believe we have developed a program that is streamlined but yet still recognizes the need for separation of functions like research, statistics and monitoring justice assistance grants.

The recognition of three separate agencies—Office of Justice Assistance, National Institution of Justice and Bureau of Justice Statistics—with Directors appointed by the Attorney General who will have primary authority over the administrative functions of their agencies, should insure sufficient autonomy to carry out the agencies' activities. The purpose for giving these Directors primary authority is to make sure that outside the ultimate veto of their decisions by an Assistant Attorney General, each Director runs his/her agency.

Another concern I raised was the involvement of the National Institute of Justice in more practical and applied forms of research and evaluation. This is important in linking the research and then development of new effective crime fighting programs.

This bill now calls for the National Institute of Justice to be more involved with the evaluation and review of the types of programs being funded by the grant-making agency, the Office of Justice Assistance. This should insure that the types of research and evaluation carried out by NIJ will be geared to the realities of the day to day operations and political constraints that make up the "real world" of police officers and prosecutors.

ISSUES DISCUSSED WITH THE HOUSE

There were several issues discussed with the House that related to whether the Bureau of Justice Statistics should be involved in the development of operational information systems, information policy and statistics. There is no doubt in my mind that an important function now and even more so in the future is the improvement and security of information systems used by criminal justice agencies at all levels of government. This is particularly important as States move forward in upgrading their information systems. Encouraging the development of innovative—state of the art—information systems is a function that BJS should carry out.

I don't believe at this stage that State and local criminal justice agencies have the expertise or the resources, on their own, to develop state-of-the-art information systems that are compatible with one another, or with national statistical needs.

The Bureau of Justice Statistics mission should be to effectively provide Federal leadership and support in this area. Furthermore, without a national role in the development of these systems it is doubtful a common approach that addresses sensitive information policy issues posed by the collection and exchange of justice information, such as privacy and due process, will emerge.

If BJS is to continue its function of producing accurate and reliable statistics it must also begin moving forward in the development of operational information systems.

Limiting the authorization of this program through fiscal year 1984 will permit Congress to review the success of this new structure and funding approach that was requested by the administration. As the ranking member of the Judiciary Committee it will be my intent to participate in the oversight of this program to determine how well this new structure works and in what form it should be reauthorized.

At this point let me acknowledge the hard and diligent work of Senators Specter, Thurmond, Kennedy and Heflin in discussions with the House so that we are now able to agree to a bill that will once again provide assistance funds to our State and local criminal justice agencies.

In April 1981, I released a General Accounting Office report entitled "Asset Forfeiture—A Seldom Used Tool in Combatting Drug Trafficking." It was undertaken at my request as chairman of the Subcommittee on Criminal Justice and it describes efforts by the Federal Government to break up illegal drug traffiking networks by using Federal criminal forfeiture statutes to seize the assets of persons involved in those illegal activities. The report makes it clear that the Department of Justice ignored this legislation since its passage 10 years ago. The issue had also been explored in hearings that I held in July 1980 as subcommittee chairman.

The report showed forfeiture of a mere $2 million from narcotics traffickers over a period of 10 years. During the same period of time, about $60 billion is generated by these networks yearly. More forfeiture will not eliminate drug trafficking, but it should be tried. Witnesses during several days of hearings suggested several ways to increase the amount of property forfeited. The General Accounting Office also suggested amendments to the forfeiture statutes to clarify them and eliminate the disparity in Federal court interpretations of the laws.

In May 1981 I introduced S. 1126, which resulted from the suggestions for improvements of the statutes contained in the report. That bill would have allowed prosecutors to get more money from traffickers by broadening the kind of property that can be forfeited; by making it easier to prove that the money came from illegal narcotics activities, and by making sure that when a defendant puts illegally-generated property in someone else's name or transports it out of the United States, the Government can get substitute money from him.

Several hearings on the same subject followed in the House of Representatives. This

bill is thus the culmination of several years of congressional effort and study.

Enactment of this legislation will mark an improvement over current criminal and civil forfeiture law. Criminal forfeitures under the controlled substances statutes will now be able to reach the direct proceeds of drug trafficking enterprises, with no deductions for the trafficker's operating expenses. On the civil side, provisions for administrative forfeiture should facilitate a more expeditious disposition of assets that are used in connection with illegal activity. Penalties for trafficking also are increased substantially.

A significant and innovative provision of this legislation provides for the creation of two revolving funds—one for the DEA and one for the Customs Service. Once forfeited assets are liquidated and converted to cash, the proceeds ordinarily will be deposited to the credit of one of these revolving funds. Among other purposes, the proceeds may be used to pay for the cost of maintaining and restoring unliquidated forfeitures. The revolving funds may be sound in concept, but there are a number of issues that deserve further study. On this point, I am advised that the GAO is currently auditing the major seizing agencies' (FBI, DEA, INS, and Customs) practices concerning the disposal and management of confiscated and forfeited property.

This review, requested by the Chairman, House Committee on Government Operations, is scheduled to be completed by mid-1983. At that time, I believe the Congress will be in a far better position than it is now to comprehensively evaluate the issues involved in the management and disposal of forfeited assets. I am hopeful that the GAO review requested by Chairman Brooks will offer some suggestions on the operation of the revolving funds created by this legislation, such as the congressional controls needed over the funds to properly exercise oversight, the allowable purposes for which the funds can be used, the equitable distribution of proceeds among the revolving funds, and the circumstance in which agencies may keep for their own use assets forfeited under this or other legislation. Since both the DEA and Customs fund contain a 2-year sunset provision, GAO's review may provide a useful basis for considering refinements established by this law. On balance, the legislation will improve the law and is long overdue.

Despite these improvements, however, I fear the legislation does not go far enough in several areas. While the bill does amend and improve the controlled substance statutes, it makes no amendments to the racketeer influenced and corrupt organization statute, commonly known as RICO. Offenses cognizable under RICO are not limited to drug trafficking, but extend to virtually all forms of racketeering and syndicated criminal activity.

Another shortcoming of this legislation is that it does not contain a "substitute" assets provision. Such a provision would allow the courts to forfeit a defendant's "clean" assets if other property subject to forfeiture has been transferred to a third party or otherwise cannot be located. Time after time we hear about the lavish lifestyles of drug traffickers but when the investigators and prosecutors finally do the tedious work necessary to identify a specific property that is no longer owned by the defendant. That is not to say, however, that the defendant no longer has any assets. The infamous Black Tuna Case demonstrates the problems that can occur. This marijuana trafficking organization grossed $300 million in a little more than a year and it purchased luxury automobiles and property and was known for its extravagant lifestyles. Even though investigators and prosecutors attempted forfeiture of numerous assets, by the time the case was fully adjudicated the Government realized a mere $16,000 from the forfeiture.

As experience is acquired with this legislation, I believe the Congress will find it necessary to further strengthen the forfeiture statutes by amending RICO to cover "profits" and incorporating a substitute assets forfeiture provision. I suggest the bill, and I regard it as the first step in a number of improvements in the law of forfeiture.

THE ARMED CAREER CRIMINAL ACT OF 1981

This legislation will provide an important new tool for local prosecutor to use against the most serious criminals—repeat offenders who use a firearm in the commission of a third robbery or burglary. The bill will for the first time establish Federal jurisdiction over those offenders. However, the Federal Government can exercise jurisdiction only if the local prosecutor requests or concurs in the prosecution. The bill provides a punishment of a minimum of 15 years up to life in prison and a maximum of $10,000 fine.

Probation, suspended sentence and parole are specifically prohibited.

Repeat criminals pose the most serious threat to the safety of our citizens. It is, therefore essential that we make the full use of Federal investigative and prosecutorial resources available to ensure that they receive long prison terms.

THE FEDERAL ANTI-TAMPERING ACT

I joined Senator THURMOND in introducing the Federal Anti-Tampering Act, S. 3048, because I strongly believe that we cannot affort to wait any longer to enact necessary legislation.

The recent Tylenol tragedies have clearly demonstrated just how vulnerable we all are to the horror of random violence. These crimes are most reprehensible because the victims were innocent people and because the weapon used was a common household item we have all grown to trust. Fortunately, local authorities—in this instance the Chicago Police Department—have done excellent investigative work.

This bill will enable the Federal law enforcement authorities to do all it can to assist local officials. In sum, it creates a felony punishable by up to life in prison and $100,000 when anyone, with intent to cause death or bodily injury tampers with or attempts to tamper with a food, drug, device or cosmetic.

The bill increases the penalties for similar acts which under current Federal law are misdemeanors. In addition it will allow the full use of Federal investigative resources in most cases, thereby providing local authorities with assistance.

S. 2552—VIOLENT CRIMES DIRECTED AT INTELLIGENCE PERSONNEL

The bill makes two changes in the current federal murder statute (18 U.S.C. 1114). First, it expands the statute to make it a federal offense to attempt to kill the federal officers and officials enumerated in the statute. Currently federal law applies only if an attack results in death. The officials covered by 18 U.S.C. 1114 include U.S. Attorneys, Judges, and various other specific employees if the murder or attempted murder occurs while they are engaged in or on account of their official duties.

Second, the bill adds officers and employees of the department and agencies within the Intelligence community to the federal murder statute.

Mr. THURMOND. Mr. President, I wish to urge my colleagues to accept the House amendment to H.R. 3963 as the best we can do in the waning days of the 97th Congress to enhance the Federal response to violent crime and distribution of illegal drugs. I had hoped that we could accomplish more. There is an acknowledged need to address sentencing and bail reform in the Federal system, as well as other obvious improvements passed by the Senate by a vote of 95 to 1 on September 30, 1982. Because of the press of time, many of these issues could not be worked out and must be addressed next Congress.

These introductory remarks are not intended to down play the progress in providing tools to deal with crime in the amendment under consideration. Much is accomplished. For this progress, a lot of credit must be given to the distinguished ranking minority member of the Judiciary Committee (Mr. BIDEN), the chairman of the Juvenile Justice Subcommittee (Mr. SPECTER), as well as Senator KENNEDY. Nor could we have reached this point without the dedicated work and cooperation of the chairman and ranking minority member of the House Judiciary Subcommittee on Crime, Congressman WILLIAM HUGHES and Congressman HAROLD SAWYER, respectively. I am looking forward to the work of the next Congress to take up the important issues which remain.

Mr. President, the bill and House substitute amendment essentially address seven relatively unrelated matters.

First, major improvements are made with respect to criminal and civil property forfeiture applicable to all drug offenses. Current criminal forfeiture provisions under the Controlled Substances Act and the Controlled Substances Import and Export Act would apply to all felonies under these acts. Improvements are made in criminal forfeiture procedures by strengthening the authority to obtain protective orders to prevent disposal of assets and by providing a rebuttable presumption that assets acquired by a defendant at the same time of the drug offense came from the illegal drug activities.

Moreover, the civil drug forfeiture provisions of current law will be more effective with new provisions to raise the cap on administrative forfeitures, to provide more efficient handling of forfeited assets through streamlined funds in the Department of Justice and the Customs Service. to modify the venue rules to permit consolidation of related cases, and to provide for forfeiture of real property used to

hold or store illegal drugs. In addition, the House amendment substantially increases the fine levels for drug felonies, including an innovative provision to permit a fine of twice the profits from the illegal drug activity.

Second, the amendment addresses the Federal justice assistance program to make it more effective. The administrative framework of this program is streamlined by creating a new Assistant Attorney General position in the Department of Justice with authority over the National Institute of Justice, the Bureau of Justice Statistics, and a new Office of Justice Assistance. Much redtape is eliminated.

The new Office of Justice Assistance would provide technical assistance, training, and grant funds to State and local criminal justice agencies and to nonprofit and neighborhood organizations engaged in crime-fighting activities. Federal assistance is targeted on specific kinds of programs that deal with violent crime and repeat offenders, particularly with respect to proven programs. In my judgment, the changes made by the amendment would substantially improve the Federal justice assistance program.

Mr. President, I would like to make a collateral observation on this legislation and a current program—the Bureau of Justice Statistics. The version of H.R. 3963 which the Congress passed and sent to the President on December 21, 1982, reauthorizes the Bureau of Justice Statistics (BJS) until September 30, 1984, and keeps in place language in existing law setting out BJS' mission and functions. However, this language does not include the language which was contained in the Senate bill, specifically section 5 of S. 2411, which would have clarified BJS' authority to provide support for the development of State and local criminal justice information systems.

The absence of the Senate language should not be interpreted as an indication that the Congress does not want BJS to continue to support the development of State and local justice information systems. That responsibility is established in existing law and is vital because BJS cannot accomplish its statistical mission without providing leadership, coordination, and support for the information systems which supply BJS with the raw data.

BJS' authorization under the new legislation will expire at the end of fiscal year 1984, and thus the Senate Judiciary Committee will have reason in the near future to monitor and review the extent to which BJS is providing support for criminal justice information systems.

Third, the House amendment covers the most important aspects of the product antitampering bill (S. 3048) introduced recently by myself and the ranking minority member of the Judiciary Committee (Mr. BIDEN). This part of the House amendment would provide serious Federal penalties for tampering with any food, drug, device, or cosmetic with the intent to cause death or bodily injury if the result of the tampering or attempted tampering affects interstate or foreign commerce and the food, drug, device, or cosmetic is produced or distributed for consumption or use by individuals. If death or serious bodily injury occurs from the tampering, a life-term imprisonment sentence may be imposed; otherwise, a 20-year term is applicable.

This provides the basic Federal authority for investigating and prosecuting tampering with products to kill or injure. This is the most important part of the original Senate bill.

Mr. President, I personally prefer to include product hoaxes that either terrorize our citizens or damage the marketability of the product involved. The House amendment does not include such coverage, but I understand hearings on and consideration of these issues in the House will be undertaken next year. I certainly urge this inquiry.

Fourth, the House amendment expands current homicide protection of certain Federal officials to cover an "attempt to kill" such officials and extends the list of officials covered by the homicide statute to include officers or employees of a department or agency within the intelligence community not already covered.

Fifth, the House amendment adopted the measure (S. 1688) diligently pressed by the Senator from Pennsylvania (Mr. SPECTER) on new and stringent Federal provisions to deal with armed career robbers and burglars.

Sixth, the House amendment adopts the floor amendment of Senator DECONCINI in the consideration of S. 2572 on September 30, 1982, to create a new Executive Office of the Director of National and International Drug Operations and Policy to be the focal point for the direction and coordination of U.S. operations and policy on illegal drugs. Illegal drugs may be the single most serious criminal problem we have in the United States. It is absolutely necessary that we have the most effective worldwide effort by the United States to control illegal trafficking in drugs. Hopefully, this new office can make a major contribution to this important objective.

Finally, the bill under consideration would reauthorize the important drug aftercare program administered by the probation service.

Mr. President, this is a brief summary of the scope of H.R. 3963, as further amended by the House. It makes major improvements in the law to deal with violent crime and illegal drugs. I am looking forward to continued cooperation between the Senate and the House in the next Congress to deal with significant criminal justice issues.

CAREER CRIMINALS

Mr. SPECTER. The bill includes the Armed Career Criminal Act of 1982, which authorizes Federal prosecution of repeat offenders who use firearms to commit further robberies or burglaries. For the first time, the Federal Government will be able to supplement State efforts to incapacitate these hardened, dangerous offenders.

Studies show that about 6 percent of those persons arrested commit 60 percent of all violent crime. Rapid trials and lenghty sentences for such offenders are the essential first step in reducing violent street crime which has grown fourfold in recent decades. The act requires expedited trials and appeals, permits consideration of the dangerousness of the offender in setting bail, mandates fixed sentences of between 15 years and life, and prohibits probation and parole.

The act does not supersede local prosecutions but provides an auxiliary procedure which can be utilized at the request of local prosecutors who sometimes face severe trial delays, plea-bargaining, judge-shopping, lenient sentencing and other severe problems that plague prosecutions in many State courts, especially in large cities.

Since many career robbers and burglars commit a felony nearly every day, speedier trials and longer sentences will directly prevent hundreds of violent crimes for each prosecution under the act. In addition, the act should encourage State judges with a history of inadequate sentences to impose more realistic sentences on repeat felons using firearms. Finally, the act is expected to deter defendants and their counsel from delaying trials and holding out for probation or short sentences on plea bargains. Thus, the total impact of the act will be far greater than indicated by the number of prosecutions initiated under its provisions.

The act allows significant Federal action to combat armed street crime without requiring significant increases in Federal budget expenditures. It will promote proper priorities in concentrating scarce law enforcement resources on the most prevalent and dangerous violent offenses and encourage closer cooperation among crime fighters of Federal, State, and local government.

JUSTICE ASSISTANCE

Mr. President, I thank the chairman and members of both the House and Senate Judiciary Committees for working together to produce a bipartisan bill which will assist States and local communities in combating crime. The House has submitted an amendment to the Senate amendment that includes a compromise version of the Justice Assistance Act. After having met and conferred over an extended period, representatives from both the

House and Senate have agreed upon this compromise amendment and recommend it be adopted. Through enactment of this amendment, we hope to fulfill the Federal Government's proper role in assisting local law enforcement through justice assistance, research, and statistics.

When I introduced the predecessor bill in the Senate last spring as S. 2411, the bill did not include a State block grant distribution system for allocating Federal assistance provided for establishing programs of proven effectiveness in the battle against crime. At the strong recommendation of the Department of Justice and consistent with understandings worked out with the White House, I have agreed to support the House-passed block grant program.

In examining the failure of the old Law Enforcement Assistance Administration, I came to believe that much of the redtape, unaccountability and unproductiveness that ultimately doomed that program derived from the State block grant method for fund distribution. I remain personally concerned that the new program we are now considering not repeat the mistakes of the past. With our House colleagues we have tried to structure the block grant program of the Office of Justice Assistance so that with a minimum of conditions we achieve appropriate safeguards and direction for the expending of the Federal financial assistance provided.

As an example, I note that we have placed a 5-percent cap on the grant funds that may be expended for the purpose of coordinating components of the criminal justice system. In addition, we have included no express provision to authorize expending the Federal assistance on planning and administrative costs of the States or grant recipients. We have thereby sought to design legislation that will expend the financial assistance appropriated in the form of grants without dissipating its impact on program overhead or administration. It is my understanding that the State block grant allocation will be passed through and awarded to grant recipients and not used to fund administration of the block grant.

We were also careful to include a matching requirement for grant recipients in order to foster the local institutionalization of these programs and to demonstrate the local commitment to continuation.

I believe and strongly endorse the proposition that research, statistics, and grant components of this Federal effort must be coordinated and focused. To maximize the impact of funds, there must be a strategy for research, program development, testing, demonstration, and evaluation.

Another of the difficult issues on which we have developed a legislative consensus is the restructuring of the criminal justice grant, research, and statistics offices of the Department of Justice. We have come as close as legislatively possible to the structure recommended by the Department of Justice. Some of my colleagues were insistent on retaining the basis underlying the Justice System Improvement Act of 1979. They, too, have accommodated. The Justice Assistance Act authorizes an Assistant Attorney General and will eventuate in the elimination of four other presidential appointments, although I am pleased that the recently confirmed Director of the National Institute of Justice will not be downgraded.

Likewise, we have eliminated the research and statistics advisory boards and established a single advisory board for criminal justice assistance, research and statistics in accordance with amendments I offered on the Senate floor on December 9 at the request of the Department of Justice. We expect that working committees of the Board will be established to advise and assist with respect to each of the three offices.

Over the years, the Bureau of Justice Statistics has devoted a portion of its appropriations to the development of information systems. It is through these systems that local and national statistics are gathered and disseminated. I believe that these information systems should continue to be developed and replicated. Accordingly, the Bureau should fulfill its information policy mandate and assist State and local law enforcement agencies to develop and operate criminal justice information systems.

I believe that a substantial portion of the discretionary grant funding should be expended by nonprofit organizations, which have traditionally originated and demonstrated innovative program ideas. Such efforts are to be encouraged. Both the House, Senate, and compromise bills expressly indicate the value of nonprofit organizations to this entire effort. I add my personal endorsement of their importance.

The bill respects the existence of the Office of Juvenile Justice and Delinquency Prevention (OJJDP) and the separate authorization under which it is organized while allowing for appropriate coordination among the offices. I hope that OJA will seek relevant data and evaluation findings from OJJDP and assist in the fostering of successful programs directed at juvenile crime as part of its function.

This compromise Justice Assistance Act, while not conforming to my personal preferences or anyone's in every detail, is a positive legislative development. It satisfies, in my view, the undertaking I assumed as part of our understanding with the administration. In that regard, I continue to look forward to a prompt budget and supplemental appropriation request to fund the programs of the new Office of Justice Assistance and will do all that I can to assure that the approximately $100 million in additional budget authority and supplemental appropriations is realized this year.

In closing, I again reiterate my appreciation to my colleagues in both the House and Senate for their cooperative effort in the enactment of a Justice Assistance Act.

ANTITAMPERING AMENDMENT

This country is only now slowly recovering from a depraved act of terrorism that should never happen again. In Chicago bottles of Tylenol pain medicine were converted into capsules of death containing the poison cyanide. Shortly after the incident in Chicago, copycat crimes were reported in other cities involving other medicines and products. From this point on, all of us are in constant fear from acts of terrorists who indiscriminately cause death and injury through tampering with the food we eat, the drugs we take, and cosmetics we use.

This section will make it a Federal offense to tamper with any food, drug, cosmetic, or device intended for home use. By so doing, the resources of the FBI, U.S. attorney, and other Federal law enforcement can be mobilized to investigate and prosecute persons who would seek to harm innocent strangers through dispensing death over the counter.

We need this bill and we need adequate penalties for those persons.

FORFEITURE AMENDMENT

Among the largest law enforcement problems facing America is drug trafficking. In some parts of the country traffickers employ more people, have more money, and at times seem to exert more control and power than the Government. Certainly, law enforcement's biggest challenge is crippling the drug trafficking network.

It is essential that prosecutors have sufficient tools to achieve the goal of stopping drug trafficking. The forfeiture provision that is a part of this bill is just such a tool.

In order to remove the attraction of entering the illegal drug trade, penalties must include not only traditional means of incarceration but must also include financial hardships. Persons who seek financial gain from illegal activity should not be permitted to profit from that activity. Forfeiting property acquired from drug trafficking removes that profit.

In order that forfeiture be effective, the current system must be modified. Our law books now contain burdensome and inadequate procedures. As a consequence, law enforcement is sometimes reluctant to pursue this avenue of just penalty. Current law also prohibits the Government from reaching much of the property acquired from il-

legal conduct. It is, therefore, too easy for criminals to hide the property or otherwise escape the full impact of our present forfeiture laws.

These new forfeiture provisions will be heralded by agents and attorneys fighting to rid our country from drug traffickers.

DRUG ADMINISTRATION

Violent crime is continuing to increase despite our best efforts over the past 20 years. Many agencies of the Federal Government share responsibility for combating crime. This disjointed effort has not resulted in an effective coordinated attack on crime.

President Reagan has recognized the need for the different agencies to work together and has established a national system of regional task forces, local law enforcement coordinating committees and an operational merger of the FBI and the DEA. While these measures represent a good beginning, they stop short of accomplishing the primary goal of organizing a joint State-Federal attack on crime.

The creation of the Violent Crime Administration provided for in this bill should lead to better utilization and coordination of present State and Federal law enforcement resources.

Managed by one Administrator, the Administration will seek to work in cooperation with State and local law enforcement to grant technical support, decrease bureacuratic gridlocks and simplify grant structures.

Toward this end, the Administration will work with the States to improve juvenile justice programs, statistical reporting and dissemination, violent crime response techniques, firearm control, drug network penetration, and relationships between citizens and police.

The Federal role in addressing and preventing crime must be better integrated with the States' efforts. The Administration is an attempt to satisfy this void.

DRUG DEPENDENT FEDERAL OFFENDER PROGRAM

The drug aftercare program, while small, is an extremely worthwhile and successful endeavor. The program permits the courts to direct that certain Federal offenders receive special treatment in an attempt to divert them from further criminal activity.

The program has been operational since 1966. Addicts receiving treatment for their drug dependency have been shown to reduce their recidivisim rates by 84 percent. This makes the recidivism rate among persons participating in programs such as this far below the rate for persons not afforded treatment.

The program is not expensive. Only $4.5 million for 1983, $5.5 million for 1984 and $6.5 million for 1985. Yet it is money well spent and effectively utilized.

Management of the program rests with the Division of Probation. They are responsible for identifying candidates for treatment, making the contract for treatment with private sector drug rehabilitation centers and for insuring the offender complies with the conditions of his participation which includes that he remain absolutely drug free.

The relationship between drug use and crime is firmly established. Recent studies by Dr. John C. Ball show that 243 addicts in Baltimore committed over half a million crimes over a 11-year period. Other studies performed by the Administrative Office of the U.S. Courts show that 29 percent of all robbers, 22 percent of all burglars, 17 percent of all larcenists and 16 percent of all forgers and counterfeiters are addicted to drugs. This program can help relieve us from future crimes by drug users.

Mr. MATHIAS. Mr. President, I rise to support the motion to agree to the House amendments to the Senate amendment to H.R. 3963. The passage of this motion will bring to a fruitful conclusion the efforts of many Members of both Houses to fashion a concrete and constructive means for translating into action our commitment to fight crime. The fruit of our labors is the Justice Assistance Act of 1982. As a cosponsor of the Senate legislation, I am pleased to support the compromise measure which is now before us.

While the measure which we are now considering differs in several important respects from the bill which the Senate passed on December 9, it retains many features which are essential to the efficient provision of justice assistance to the States.

H.R. 3963, in its present form includes a block grant system for most of the programs administered by the Office of Justice Assistance (OJA). But it retains the Senate bill's emphasis on the setting of priorities in the funding of programs at the State and local levels. It limits to 5 percent the proportion of Federal assistance funds which can be used for criminal justice system coordination. Private nonprofit organizations, including the neighborhood and community groups which have such an important role to play in local crime-fighting efforts, remain eligible to receive assistance. This measure will give the States a more direct role in monitoring federally funded criminal justice activities within their borders. It will make good use of the expertise of the most effective of the State criminal justice coordinating agencies. But it will not interpose a cumbersome bureaucracy between the grantmaking Federal office and the ultimate recipient.

The bill before us also retains the Justice Advisory Board. This 15-member, Presidentially appointed group will advise OJA and its sister agencies, the Bureau of Justice Statistics (BJS), and the National Institute of Justice (NIJ). It will mobilize State, local, and private sector expertise in support of the important responsibilities of these agencies under this legislation. And it will have the crucial role of recommending to the President the names of candidates for the position of Assistant Attorney General for Justice Assistance. The recommendations of this export advisory board ought to be accorded great weight in the selection process for this important post.

All of the Members in both Houses who have been most active in their efforts on behalf of this legislation have shared a desire to build into this program a structure which would safeguard the independence and impartiality of OJA, NIJ, and BJS. The plan included in the Senate legislation remains, in my view, the best protection against political interference in the functions of these agencies. But the measure before us also incorporates some safeguards. The Senate proposed that the Directors of NIJ and BJS remain as Presidential appointees. The compromise version gives the Attorney General responsibility for appointing these officers. This provision eliminates the Senate's role to advise and consent to these appointments; but at least it recognizes their importance by committing this responsibility to the Nation's top law enforcement officer. The measure before us also emphasizes that the Directors of NIJ and BJS have primary grantmaking authority within their respective spheres of responsibility. However, the weakening of the proposed structural protections for the independence of the research and statistics agencies underscores the importance of careful congressional oversight with regard to the activities administered by the Assistant Attorney General for Justice Assistance.

The bill before us authorizes OJA, BJS, and NIJ only through September 30, 1984. While I would have preferred the longer authorization period contained in the Senate bill, the 2-year authorization ought to be sufficient to allow OJA to establish a track record.

In the hectic legislative activity of recent weeks, many of my colleagues seem to have come to view the Justice Assistance Act as a beast of burden which could be loaded up with a heavy cargo of other legislative initiatives. I am gratified that the freight has been lightened somewhat in recent days. That permits us to focus our attention on the underlying bill itself. It remains one of the most important pieces of anticrime legislation which we have considered in the entire Congress which now draws to a close. Once again, I commend the junior Senator from Pennsylvania for his unceasing efforts on its behalf. The labors of Representative HUGHES, the distin-

guished chariman of the Subcommittee on Crime in the other body, have also contributed much to the progress of this legislation. We can all take pride in the passage of this measure, and I am happy to support the motion to agree to the House's amendments to the Senate amendment.

Mr. SASSER. Mr. President, I note with disappointment that the House today has again passed H.R. 3963, the Drug Dependent Federal Offenders Act amendments and returned it to the Senate with an amendment. One of the unfortunate effects of that amendment is to remove the section dealing with the theft of controlled substances from a pharmacy.

Early in this Congress, I introduced legislation, S. 20, which would make the theft of controlled substances from a pharmacy a Federal crime. Several of my colleagues have introduced bills of a similar nature. Hearings were held on the bills and pharmacy crime provisions were incorporated in S. 2572 the comprehensive crime bill passed by the Senate earlier this year as an amendment to H.R. 3963.

In 1980 I held hearings in the Senate Small Business Committee at which the problem of pharmacy crime was discussed. I heard from pharmacists who live in fear. They have been victims, and their friends have been victims. Some of them have been forced to set aside "goody bags" in an attempt to keep the criminal happy and prevent a shooting. They have seen too much violence and intimidation, and the time is now to remedy the situation.

All of us are disturbed by the fact that violent crime has risen by 59 percent since 1970 and robberies in general have risen 33 percent since 1970.

At the same time, between 1976 and 1979, a 3-year period, pharmacy robberies have risen more than 100 percent. In a 6-year period between 1973 and 1979, pharmacy robberies rose 150 percent.

These statistics alone are alarming enough. But the real issue here is that the Federal Government does not have enough enforcement power to control the theft of drugs from pharmacies. When drugstores are robbed the criminal is not looking for cash. He is looking for drugs. Drugs that are controlled by Federal law. Drugs will be sold on our streets and compound an already serious national drug problem.

Mr. President, it really does seem a bit absurd that the Federal Government may investigate and prosecute the trafficking of drugs on the sidewalk outside of a drugstore but it cannot investigate and prosecute the theft of the same drugs from inside the pharmacy.

I had intended to offer a further amendment to H.R. 3963 if it had again been considered by the Senate. It now appears that will not be possible. That is very disappointing because this is an issue that will not go away. I hope that the chairmen of the committees with legislative jurisdiction will address the issue early in the 98th Congress.

Mr. President, I ask unanimous consent that the amendment I had intended to offer be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

Insert in the bill at an appropriate place the following new section: "That (a) Chapter 103 of title 18 of the United States Code is amended by adding at the end thereof a new section as follows:

"§ 2118. Robbery of a pharmacy

"(a) Whoever takes property from a pharmacy or a person registered with the Drug Enforcement Administration under section 302 of the Controlled Substances Act (21 U.S.C. 822) by force or violence, or by intimidation shall be imprisoned for not more than ten years, or fined not more than $5,000, or both.

"(b) For purposes of this section, the term 'property' means a controlled substance, consisting of a narcotic, amphetamine, or barbiturate that is listed in Schedules I through IV established by section 202 of the Controlled Substances Act (21 U.S.C. 812).".

(b) The analysis for chapter 103 of title 18 of the United States Code is amended by adding at the end thereof the following:

"2118. Robbery of a pharmacy.".

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment to the Senate amendment.

The motion was agreed to.

MONONGAHELA NATIONAL FOREST

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 5161, the Monongahela National Forest in West Virginia.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, there is not only no objection, but my distinguished senior colleague and I join in the request.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 5161) entitled "An Act to designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness", with the following amendment:

Page 19, strike out lines 4 through 18, inclusive, of the Senate hand-engrossed amendment, and insert:

SEC. 6. Notwithstanding any other provision of law, effective October 1, 1983, there is hereby authorized to be appropriated up to $2,200,000 to be paid to Pocahontas and Webster Counties, West Virginia; such sum in compensation for property tax revenues and other taxes or payments foregone by the aforementioned counties as a consequence of the acquisition of the nonfederally owned coal deposits and other mineral interests and rights within the boundaries of the Cranberry Wilderness as designated by this Act.

Mr. ROBERT C. BYRD. Mr. President, I move on behalf of my senior colleague and myself that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from West Virginia.

The motion was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR INTERNATIONAL TRADE COMMISSION

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 6094.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the bill (H.R. 6094) entitled "An act to authorize appropriations for the United States International Trade Commission, the United States Customs Service, and the Office of the United States Trade Representative for fiscal year 1983, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. ROSTENKOWSKI, Mr. GIBBONS, and Mr. FRENZEL be the managers of the conference on the part of the House.

Mr. BAKER. Mr. President, I move that the Senate insist on its amendment and agree to a conference with the House of Representatives and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Chair appointed Mr. DOLE, Mr. ROTH, Mr. DANFORTH, Mr. LONG, and Mr. BENTSEN as conferees on the part of the Senate.

SARATOGA NATIONAL HISTORICAL PARK

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1540.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1540) entitled "An Act to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

SECTION 1. In order to preserve certain lands historically associated with the Battle of Saratoga and to facilitate the administration and interpretation of the Saratoga National Historical Park (hereinafter in this

Act referred to as "the park"), the boundary of the park is hereby revised to include the area generally depicted on the map entitled "Saratoga National Historical Park," numbered 80,001, and dated March 23, 1979.

SEC. 2. (a) Except as provided in subsection (b), within the boundary of the park, the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary"), is authorized to acquire lands and interests therein by donation, purchase with donated or appropriated funds, or exchange. Except for the tract identified on the aforesaid map as tract number 01-132, which was authorized to be acquired by section 115 of the Act of March 5, 1980 (94 Stat. 71), the Secretary may not acquire (except by donation) fee simple title to those lands depicted on the map as proposed for less than fee acquisition. The map shall be on file and available for public inspection in the office of the National Park Service, Department of the Interior.

(b)(1) Appropriated funds may not be used to acquire lands or interests therein within the park without the consent of the owner except when—

(A) the Secretary determines that such owner is subjecting, or is about to subject, the property to actions which would significantly degrade its value as a component of the park; or

(B) the owner fails to comply with the provisions of paragraph (2).

The Secretary shall immediately notify the owner in writing of any determination under subparagraph (A). If the owner immediately ceases the activity subject to such notification, the Secretary shall attempt to negotiate a mutually satisfactory solution prior to exercising any authority provided by subsection (a) of this section.

(2) If an owner of lands or interests therein within the park intends to transfer any such lands or interest to persons other than the owner's immediate family, the owner shall notify the Secretary in writing of such intention. Within forty-five days after receipt of such notice, the Secretary shall respond in writing as to his interest in exercising a right of first refusal to purchase fee title or lesser interests. If, within such forty-five days, the Secretary declines to respond in writing or expresses no interest in exercising such right, the owner may proceed to transfer such interests. If the Secretary responds in writing within such forty-five days and expresses an interest and intention to exercise a right of first refusal, the Secretary shall initiate an action to exercise such right within ninety days after the date of the Secretary's response. If the Secretary fails to initiate action to exercise such right within such ninety days, the owner may proceed to otherwise transfer such interests. As used in this subsection with respect to a property owner, the term "immediate family" means the spouse, brother, sister, parent, or child of such property owner. Such term includes a person bearing such relationships through adoption and a stepchild shall be treated as a natural born child for purposes of determining such relationship.

(c) Subsection (b) shall not apply with respect to tract number 01-142.

(d) When an owner of property within the park desires to take an action with respect to his property, he shall request, in writing, a prompt written determination from the Secretary as to the likelihood of such action provoking a determination by the Secretary under the provisions of subsection (b)(1)(A). The Secretary is thereupon directed to promptly issue such owner a certificate of exemption from condemnation for such actions proposed by the owner which the Secretary determines to be compatible with the purposes of the park.

(e)(1) An owner of improved property which is used solely for noncommercial residential purposes, or for commercial agricultural purposes found to be compatible with the General Management Plan, on the date of its acquisition by the Secretary may retain, as a condition of such an acquisition, a right of use and occupancy of the property for such residential or agricultural purposes. The right retained may be for a definite term which shall not exceed twenty-five years, or in lieu thereof, for a term ending at the death of the owner. The Secretary shall pay to the owner the fair market value of the property on the date of such acquisition, less the fair market value, of the term retained by the owner.

(2) Except for tract number 01-142, paragraph (1) shall not apply to property which the Secretary determines to be necessary for the purposes of administration, development, access, or public use.

(f) Any owner of lands or interests therein within the park who desires to have such lands or interests acquired by the Secretary may notify the Secretary in writing of such desire. It is the intention of the Congress that, upon receipt of such notification, and on the condition that such acquisition will transpire at fair market value and in accordance with other conditions acceptable to the Secretary, the Secretary shall endeavor to acquire such lands or interests therein within six months of the date of receipt of such notice from the owner.

SEC. 3. Section 2 of the Act approved June 22, 1948 (62 Stat. 571; 16 U.S.C. 159d), is amended to read as follows:

"SEC. 2. The Secretary of the Interior is authorized to accept all or any portion of the General Philip Schuyler Mansion property, real and personal, situated at Schuylerville, New York, comprising approximately fifty acres.".

SEC. 4. There are hereby authorized to be appropriated after October 1, 1983, such sums as may be necessary, but not to exceed $1,000,000 for the acquisition of lands and interests therein, to carry out the purposes of this Act.

Mr. MOYNIHAN. Mr. President, I rise today to urge my colleagues to pass S. 1540, a bill I introduced to revise and expand the boundaries of the Saratoga National Historical Park in Stillwater, N.Y. Though the Senate passed this bill on June 10, the House passed an amended version of S. 1540 which I strongly support. It is my hope that the Senate will today vote to adopt the amended bill.

Mr. President, it was at Saratoga that the Continental Army soundly defeated the British and thus turned the tide of the American Revolution. To commemorate the Battle of Saratoga and the American patriots who sacrificed their lives there, legislation was enacted in 1938 to create the Saratoga Historical Park. The legislation we are considering today will add over 800 missing acres of historical significance and esthetic beauty to unify the park and incorporate into our national parks system land of paramount historical importance.

S. 1540 will finally make complete this memorial to one of the most stirring and important military battles in our Nation's history.

Mr. BAKER. Mr. President, I move the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

FEDERAL SEED ACT AMENDMENTS OF 1982

Mr. BAKER. Mr. President, I now ask unanimous consent that the Committee on Agriculture be discharged from further consideration of H.R. 7005, the Federal Seed Act Amendments of 1982, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7005) to amend the Federal Seed Act with respect to prohibitions relating to interstate commerce in seed mixtures intended for lawn and turf purposes and prohibitions relating to importation of certain seeds, and for other purposes.

There being no objections, the Senate proceeded to consider the bill.

Mr. HELMS. Mr. President, the matter now pending before the Senate is a bill, H.R. 7005, that would amend the Federal Seed Act to change certain labeling and testing requirements applicable to domestic shipments of seed and to allow USDA to extend the maximum allowable period between the germination test date and the date of shipment when warranted. In addition, H.R. 7005 would delete certain testing requirements for imported seeds. These changes are necessitated as a result of certain requirements in the act being made obsolete by advances in seed technology and marketing practices. Further, the amendments will reduce unnecessary expenses incurred by both the seed industry and the Federal Government while simultaneously maintaining adequate protection for seed users.

Now, let me be a little bit more specific. Title II of the Federal Seed Act requires that any agricultural seed mixtures intended for lawn and turf seed purposes, in containers of 50 pounds or less, be labeled as "Fine-textured Grasses" or "Coarse Kinds." The regulations under the act list the varieties that fall within each of these categories. Because of the development of new improved varieties of grass seed, it has become increasingly difficult to make a distinction between the required categories in order to

meet the requirements of the Federal Seed Act. The differences between the varieties in the lists in the regulations have been blurred to the point that it is now virtually impossible, from a legal standpoint, to classify a new variety of grass into one category.

As a result of this situation, the Association of American Seed Control officials has adopted a change in the recommended uniform State seed laws to eliminate the labeling requirement according to these categories. Although a number of States have already adopted the labeling change, other States are awaiting changes in the Federal Seed Act before following suit. This inconsistency between the laws in various States, and between State and Federal laws, has placed an unnecessary burden on seedsmen who must comply with the different requirements. This has been particularly troublesome and expensive for seedsmen marketing seed on a nationwide basis. H.R. 7005 would amend the Federal Seed Act to delete the requirement that grass seed mixtures be labled as "Fine-textured" or "Coarse" grasses.

A second area where changes in title II of the Federal Seed Act would be made involves the germination labeling requirements for lawn seed mixtures. H.R. 7005 would amend the Federal Seed Act to require that only the month and year of the oldest germination test be specified on the label. Since the germination test must be completed within a 5-month period of the date of shipment, listing only the oldest germination test date would automatically cover those varieties within the mixture which had been tested at a later date. There is a great deal of information required on seed labels currently and since the germination data is a control measure that does not actually afford the consumer additional protection, unnecessary expense and loss of time in drawing up and printing labels can be avoided by this amendment. This change will also simplify the labeling requirements and aid the industry in providing more meaningful labeling information to the prospective seed buyer.

H.R. 7005 also authorized the Secretary of Agriculture to extend the 5-month period between the germination test date and the date of shipment when it is found, under ordinary conditions of handling, that the seed will maintain its germination qualities over a longer period of time.

Seed viability is an important factor to persons purchasing seed for planting purposes. Thus, under the Federal Seed Act, and the laws of many States, restrictions have been established limiting the time period between germination testing and the date of shipment. However, the 5-month limitation in the Federal Seed Act is too short in many instances and is resulting in substantially increased costs to seed users in cases where retesting and relabeling is required of seed that maintains a high viability level beyond that time period but is not shipped soon enough. The amendment would provide flexibility to the Secretary to eliminate wasteful repackaging of seed in such cases, but would not reduce protection to seed users.

Title III of the Federal Seed Act now requires testing of imported seed to determine if it meets the pure-live seed requirements of the act and to determine whether the seed contains more than 2 percent by weight of common weed seeds. There is currently no demonstrated need for continuing to carry out these activities. Additionally, testing requirements for imported seed place a heavy demand on the Department's laboratory resources at a time when budget constraints have resulted in the closing of four regional seed laboratories. Examining seed imports to determine that the level of common weed seed contamination does not exceed 2 percent has not proven to be cost effective. In 1980, for example, only two of over 9,000 imported seed lots were determined to exceed that level. In addition, since common weed species are prevalent throughout this country, continuing to maintain this requirement appears to offer little or no potential for protecting U.S. lands from contamination. Further, it does not serve to protect seed buyers since domestic crop seeds containing various amounts of these same common weed seeds are routinely marketed in this country. It is emphasized, however, that the amendment to delete the requirements for pure-live seed and common weed seed would not in any way affect the Department's responsibility for examining imports for the presence of noxious weed seed under the Noxious Weed Act.

Many seed imports have been produced outside the United States for various reasons, by or under the direct control of United States seed firms, with the balance produced or purchased under specific contract specifications for quality factors. Thus, the purity and germination qualities of imported seed are established prior to shipment. Once the seed enters interstate commerce, it must meet all requirements for the shipment of domestic seed as established under the Federal Seed Act and the State seed laws. Elimination of the requirements for pure-live seed testing and testing for common weed seed contamination will facilitate movement of imported seed, reduce the workload in laboratory testing, and thus result in some cost savings.

Finally, I would like to point out that enactment of this bill is strongly supported by the administration and by the seed trade industry, generally. In addition, the measure was the subject of a hearing before the appropriate subcommittee of the House Committee on Agriculture and is similar to a bill (S. 2855) introduced here in the Senate by the distinguished Senator from California, Mr. HAYAWAKA. I am aware of no opposition to the adoption of this legislation. For these reasons, I urge the Senate to adopt this necessary legislation.

Mr. President, I ask unanimous consent that a more detailed section-by-section explanation of H.R. 7005 be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION EXPLANATION

SHORT TITLE

The first section provides that H.R. 7005 may be cited as the "Federal Seed Act Amendments of 1982".

LAWN AND TURF SEED

Section 2(a) amends section 201(a) of the Federal Seed Act by deleting the provision that subjects seed mixtures intended for lawn and turf purposes to the labeling requirements set forth in section 201(j). This is a conforming change necessitated by the deletion of section 201(j) elsewhere in the bill.

Section 2(b) amends section 201(a)(1) to provide that a seed mixture intended for lawn and turf purposes shall be designated as a mixture on the label and each seed component shall be listed on the label in the order of predominance.

In addition, this section amends section 201(a)(1) to exempt seed mixtures intended for lawn and turf purposes from the requirement that if any component of a seed mixture is one which the Secretary has determined is generally labeled as to variety, the label shall bear, in addition to the name of the kind, either the name of the variety or the statement "Variety Not Stated."

Section 2(c) repeals section 201(j) of the Federal Seed Act which requires, among other things, that seed mixtures intended for lawn and turf seed purposes in containers of 50 pounds or less must be labeled as "Fine-textured Grasses" and "Coarse Kinds" for each lawn and turf seed component in excess of 5 percent of the whole, as well as providing other ingredient information.

SEED MIXTURE TEST DATES

Section 3 amends section 201(a)(8) of the Federal Seed Act to provide that in the case of a seed mixture, it is only necessary to state the calendar month and year of the germination and hard seed test for the kind or variety or type of agricultural seed contained in the mixture which has the oldest calendar month and year test date. This provision would be an exception to the current requirement in paragraph (8) that the calendar month and year of the test date be provided for each agricultural seed in excess of 5 percent of the whole that is contained in the seed mixture.

PERIOD BETWEEN GERMINATION TESTS AND TRANSPORTATION

Section 4 amends section 201(c) of the Federal Seed Act to provide that for any agricultural or vegetable seed the Secretary may by rule or regulation extend the maxi-

mum period of time within which germination testing must have been completed to more than 5-months immediately prior to transportation or delivery for transportation in interstate commerce. To make such an extension, the Secretary must find that the seed will maintain a percentage of germination within the limits of tolerance established under the Federal Seed Act under ordinary conditions of handling. Under the requirements currently in effect, the sale of any agricultural or vegetable seed is unlawful unless germination testing of the seed was completed within a 5-month period, exclusive of the month in which the testing was completed, immediately prior to transportation or delivery for transportation in interstate commerce.

PROHIBITIONS RELATING TO IMPORTATION

Section 5(a) amends section 101(a) of the Federal Seed Act by deleting in paragraph (8) the definition of the term "weed seeds" applicable to title III, by deleting paragraph (17), which defines the term "pure-live seed" for purposes of title III, and by appropriately redesignating paragraphs (18) through (25).

Section 5(b)(1) amends section 301(a)(1) of the Federal Seed Act to prohibit the importation of any agricultural or vegetable seed if the seed contains noxious weed seeds. This new prohibition is substituted for the current prohibition on the importation of any seed containing 10 percent or more of any agricultural or vegetable seed if the seed is adulterated or unfit for seeding purposes.

Section 5(b)(2) amends section 302(a) of the Federal Seed Act by deleting the second sentence. That sentence currently authorizes the Secretary to apply statistical sampling and inspection techniques to seed samples and screenings to determine whether the pure-live seed requirement of any kind of seed is being met, in which case the Secretary is required to advise the importer of each lot of such seed not examined for pure-live seed percentage. This amendment is conforming in nature as a result of the deletion, elsewhere in the bill, of the requirements to test for pure-live seed with respect to imported seed.

Section 5(b)(3) amends section 302(d) of the Federal Seed Act, which exempts certain seed from the prohibition against the importation of seed that is adulterated or unfit for seeding purposes, by deleting the reference to seed that is adulterated or unfit for seeding purposes. The effect of this change is to broaden the exemption to make all import restrictions under title III inapplicable to: (1) any seed grown in the United States that is returned from a foreign country without being admitted into commerce in any foreign country, or (2) any seed imported for use for experimental or breeding purposes and not for sale. This amendment also deletes section 302(d)(30), which relates to the pure-live seed requirements of the Act that are deleted elsewhere in the bill.

Section 5(b)(4) repeals sections 303 and 304 of the Federal Seed Act. Section 303 currently establishes the criteria for determining whether imported seed has been adulterated with another kind of seed. Section 304 currently sets standards for determining when imported seed is unfit for seeding purposes, including, among others, requirements for testing the seed to determine if it meets the standards for pure-live seed and whether the seed contains more than 2 percent common weed seeds.

Mr. HUDDLESTON. Mr. President, I am pleased to support H.R. 7005, the Federal Seed Act Amendments of 1982.

The original Federal Seed Act was enacted in 1939. Since that time, a number of advancements in seed technology and marketing have been made, making certain provisions of the act obsolete. The legislation before us will update and improve the Federal Seed Act.

The legislation will—

First. Delete the requirement that any agricultural seed mixtures intended for lawn and turf seed purposes, in containers of 50 pounds or less, be packed in containers labeled as "fine-textured grasses" or "coarse kinds" for each component of the mixture;

Second. Provide that, in the case of a seed mixture, it is only necessary to state the calendar month and year of the oldest germination test for any variety of agricultural seed contained in the mixture;

Third. Authorize the Secretary of Agriculture by rule or regulation to designate a longer period for completion of the germination test than a maximum of 5 months immediately prior to the transportation or delivery of an agricultural or vegetable seed if the Secretary finds the seed will maintain a percentage of germination within the limits of tolerance established by the act under ordinary conditions of handling;

Fourth. Prohibit the importation of any agricultural or vegetable seed that contains noxious weed seeds; and

Fifth. Eliminate the requirement for testing to determine if imported seeds meet the pure-live seed requirements of the act or contains more than 2 percent by weight of common weed seeds.

H.R. 7005 is similar to S. 2855, a bill that Senator HAYAKAWA introduced. I understand that both bills have the support of the Department of Agriculture and the American Seed Trade Association.

I urge my colleagues to join me in supporting H.R. 7005.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 7005) was ordered to a third reading, was read the third time, and passed.

FEDERAL PLANT TEST ACT

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture be discharged from further consideration on H.R. 6679, the Feed Plant Test Act, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. There is none.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6679) to authorize the Secretary of Agriculture to assess civil penalties with respect to violations of certain Acts relating to the prevention of the introduction and dissemination into the United States of plant pests, plant diseases, and livestock and poultry diseases, to increase the amount of criminal fines which may be imposed with respect to violations of such Acts, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. HELMS. Mr. President, H.R. 6679 expands the scope of sanctions for violation of certain animal and plant quarantine laws established to prevent the introduction into and the dissemination within the United States of livestock and poultry diseases, plant diseases, and plant pests by conforming the criminal penalties to a greater degree and providing for the imposition of civil penalties for violations of these laws and the rules or regulations promulgated thereunder. In order to insure that the public is protected against arbitrary or capricious action by the Secretary, the bill provides that a civil penalty may be assessed only after notice and opportunity for an agency hearing on the record, and any order of the Secretary imposing a civil penalty is subject to court review.

Violations of the laws designed to protect the United States against the introduction and dissemination of animal and plant diseases and pests generally subjects the violators to criminal penalties. No civil money penalties are authorized under these acts. In some instances, violation of the acts does not subject the violator to any penalty. Furthermore, these statutes were adopted at numerous times over the last century and as a result the criminal sanctions lack consistency.

While criminal sanctions are vital in assuring enforcement of our laws, criminal prosecution is a lengthy and cumbersome process. Therefore, even while the system is moving, violators are often free to continue the practices they have been following which threaten the livestock and plant industries of this country. Civil penalties, on the other hand, can be imposed administratively, insuring that the violator will be dealt with in a timely and effective manner. Moreover, a monetary penalty is more real to most than a distant and lengthy legal process that may or may not be instituted and that can sometimes be overcome. Civil penalties can thus become not only an effective enforcement tool but a potential deterrent as well.

Violations of the laws that are designed to prevent the introduction or

dissemination of destructive animal and plant diseases and pests in the United States present a real and constant threat to the agricultural industry in this country—an industry of significant importance to our national economy. In 1982, the total value of the U.S. animal population was estimated to be $75.8 billion. Cash receipts from the marketing of farm crops were $69 billion in 1980. Enforcement of the animal and plant protection laws is crucial in protecting this industry.

H.R. 6679 will substantially aid in the protection of the livestock and poultry populations, plants and other agricultural interests of this country. It will enable the Department of Agriculture to handle violations more expeditiously, provide greater flexibility in sanctions for more effective enforcement, and insure a greater degree of consistency in sanctions imposed.

Since some violators might consider the payment of a civil money penalty as merely a cost of doing business, the bill retains the current criminal sanctions in order to deter potential violators and discourage repeat violations. The bill also provides criminal penalties where none exist now and adds violations of the rules and regulations promulgated under these laws as a punishable offense. It also increases the monetary penalties where they already exist and adjusts the imprisonment penalties to make them as consistent as possible considering the nature of the offense.

The House Committee on Agriculture held hearings on H.R. 6679 on September 21, 1982. Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service of the Department of Agriculture, testified in support of the bill. I introduced a comparable bill (S. 2427) here in the Senate at the request of the Secretary of Agriculture. I know of no opposition to the bill and urge its adoption.

Mr. HUDDLESTON. Mr. President, I am pleased to support H.R. 6679, a bill to expand the scope of sanctions for violations of certain Animal and Plant Quarantine Acts intended to prevent the introduction into, and the dissemination within, the United States of livestock and poultry diseases and plant diseases and pests.

H.R. 6679 will permit the Secretary of Agriculture to impose, administratively, civil money penalities for violations of these laws whenever he believes that civil penalties are appropriate to effectuate the purposes of the act involved. Under these laws now, the Secretary does not have the authority to assess civil penalties: They authorize only criminal prosecution of violations.

While H.R. 6679 retains the criminal sanctions now provided for in the acts, it also adds violations to rules and regulations promulgated under the acts as a punishable offense, increases the monetary criminal fines where they already exist, and makes the criminal provisions of the acts more uniform.

This legislation will enable the Department of Agriculture to handle many violations more expeditiously, provide greater flexibility in sanctions for more effective enforcement, and insure a greater degree of consistency in the sanctions.

H.R. 6679 is similar to S. 2427, which was introduced in the Senate on April 22, 1982. I urge my colleagues to join me in supporting this legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6679) was ordered to a third reading, was read the third time, and passed.

PLANT QUARANTINE ACT AMENDMENT

Mr. BAKER. Mr. President, I now ask unanimous consent that the Committee on Agriculture also be discharged from further consideration of H.R. 5456, to eliminate certain unnecessary regulatory requirements, and I ask for immediate consideration of that measure.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5456) to amend the Plant Quarantine Act of August 20, 1912, as amended, to eliminate certain unnecessary regulatory requirements.

There being no objection, the Senate proceeded to consider the bill.

Mr. HELMS. Mr. President, H.R. 5456 would amend the Plant Quarantine Act of August 20, 1912, to delete requirements for public hearings before the Secretary of Agriculture may promulgate certain regulations under that act.

The Plant Quarantine Act, which is administered by the Animal and Plant Health Inspection Service of the Department of Agriculture, was enacted by Congress to regulate the importation of nursery stock and other plants and plant products in order to prevent the introduction of injurious plant diseases or insect pests and avoid the spread of certain dangerous plant diseases or insect infestations.

To accomplish these objectives, the Plant Quarantine Act authorizes the Secretary of Agriculture; one, to restrict the importation into the United States of any of its territories or districts of certain articles in order to prevent the introduction of injurious plant diseases or insect pests; two, to prohibit the entry into the United States of certain articles in order to prevent the introduction of certain tree, plant, or fruit diseases or of injurious insects; and three, to quarantine States, territories, or districts of the United States, or portions thereof, with respect to certain movements of specified articles in order to prevent the spread of dangerous plant diseases or insect infestations.

The Plant Quarantine Act requires that a public hearing be held before a regulation may be promulgated for any of these purposes. This requirement was incorporated into the act to provide for public participation in the rulemaking process. In 1912, public hearings were a practical way to provide for public particpation. Since the passage of the administrative procedure Act in 1946, and its subsequent revision in 1966, other, more practical means of public participation in the rulemaking process have been established.

The Administrative Procedure Act requires generally that notice of proposed rulemaking be published in the Federal Register and that the agency give interested persons an opportunity to participate in the rulemaking through submission of written data, views, or arguments, with an opportunity for oral presenation if the agency should consider it advisable.

The Department believes that the public participation process under the Administrative Procedure Act provides interested parties ample opportunity to have their views considered and included as part of the official record. Moreover, if a strong need is perceived for a public hearing, such an activity is authorized under the Administrative Procedure Act.

Specifically, the bill deletes the following public hearing requirements in the Plant Quarantine Act:

One. The provision in section 5 of the act requiring a public hearing before the Secretary of Agriculture may promulgate a determination that the unrestricted importation of any plants, fruits, vegetables, roots, bulbs, seeds, or other plant products not included by the term "nursery stock" may result in the entry into the United States or any of its territories or districts of injurious plant diseases or insect pests.

Two. The provision in section 7 of the act requiring a public hearing before the Secretary may promulgate a determination that it is necessary to forbid the importation into the United States of any class of nursery stock or of any injurious insect, new to or not widely prevalent or distributed in the United States.

Three. The provision in section 8 of the act requiring a public hearing before the Secretary may promulgate a determination that it is necessary to quarantine any State, territory, or district of the United States, or portion thereof, to prevent the spread of a dangerous plant disease or insect infestation, new to or not widely prevalent or distributed in the United States.

Elimination of the mandatory requirements for public hearings under the Plant Quarantine Act will remove several unnecessary regulatory requirements and allow the department greater flexibility in obtaining public input. The public interest will continue to be protected through the provisions of the Administrative Procedure Act requiring public input in the decisionmaking process.

Hearings were held on H.R. 5456 by the House Committee on Agriculture on September 21, 1982. Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service of the Department of Agriculture, testified in support of the bill. I introduced an identical measure (S. 2122) here in the Senate at the request of the Secretary of Agriculture. I know of no opposition to this legislation, and I urge its adoption.

Mr. HUDDLESTON. Mr. President, H.R. 5456 would eliminate the requirement for public hearings prior to the promulgation of regulations under the Plant Quarantine Act of 1912. These changes in the law, requested by the Department of Agriculture, are appropriate in view of the provisions of the Administrative Procedure Act, enacted after the Plant Quarantine Act, that protects the public interest by requiring publication of proposed regulations in the Federal Register, solicitation of views, and a public hearing if advisable.

The Plant Quarantine Act was enacted on August 20, 1912, to regulate the importation of nursery stock and other plants and plant products in order to prevent the introduction of injurious plant diseases or insect pests and to avoid the spread of certain dangerous plant diseases or insect infestations.

Among other things, the act requires that a public hearing be held before a regulation under the act can be promulgated. However, over the years, more practical means of public participation in the rulemaking process have evolved under the Administrative Procedure Act.

The Department of Agriculture believes that the public participation process under the Administrative Procedure Act provides interested parties ample opportunity to have their views considered and included as part of the official record. In addition, if a strong need is perceived for a public hearing, such a hearing is authorized under the Administrative Procedure Act.

H.R. 5456 is similar to S. 2122, which was introduced in the Senate earlier in the year. I urge my colleagues to join me in supporting this legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5456) was ordered to a third reading, was read the third time, and passed.

PUBLIC HEALTH SERVICE ACT AMENDMENT

Mr. BAKER. Mr. President, I now ask unanimous consent that the Labor Committee be discharged from consideration of S. 1939, the arthritis bill, and I ask that that measure be immediately considered by the Senate.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1939) to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal Diseases.

There being no objection, the Senate proceeded to the consideration of the bill.

UP AMENDMENT NO. 1585

(Purpose: To amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal and Skin Diseases)

Mr. BAKER. Mr. President, I send an amendment to the desk in the nature of a substitute on behalf of the Senator from Utah (Mr. HATCH) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. HATCH, proposes an unprinted amendment numbered 1585.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That (a) title IV of the Public Health Service Act is amended by adding at the end thereof the following new part:

"PART J—NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL AND SKIN DISEASES

"ESTABLISHMENT OF INSTITUTE

"SEC. 481. There is established in the Public Health Service a National Institute of Arthritis and Musculoskeletal and Skin Diseases (hereafter in this part referred to as the "Institute").

"PURPOSE OF THE INSTITUTE

"SEC. 482. (a) The purpose of the National Institute of Arthritis and Musculoskeletal and Skin Diseases is the conduct and support of research and training, the dissemination of health information, and related programs with respect to arthritis and musculoskeletal and skin diseases, including sports-related disorders.

"(b) The Director of the Institute, with the advice of the National Arthritis Advisory Board, shall develop a plan for a national arthritis and musculoskeletal diseases program to expand, intensify, and coordinate the activities of the Institute respecting such diseases, and shall carry out the program in accordance with such plan. The program shall be coordinated with the other national research institutes of the National Institutes of Health to the extent that they have responsibilities respecting such diseases and shall, at least, provide for—

"(1) investigation into the epidemiology, etiology, and prevention of all forms of arthritis and musculoskeletal diseases, including sports-related disorders, primarily through support of basic research in such areas as immunology, genetics, biochemistry, microbiology, physiology, bioengineering, and any other scientific discipline which can contribute important knowledge to the treatment and understanding of these diseases;

"(2) research into the development, trial, and evaluation of techniques, drugs, and devices used in the diagnosis, treatment, and prevention of arthritis and musculoskeletal diseases;

"(3) research on the refinement, development, and evaluation of technological devices that will replace or be a substitute for damaged bone, muscle, and joints and other supporting structures; and

"(4) the establishment of mechanisms to monitor the causes of athletic injuries and identify ways of preventing such injuries on scholastic athletic fields.

The Director of the Institute shall transmit to the Director of the National Institutes of Health the plan required by this subsection, together with such comments and recommendations as the Director of the Institute determines appropriate.

"(c) The Director of the Institute shall—

"(1) Carry out programs of support for research and training (other than training for which National Research Service Awards may be made under section 472) in the diagnosis, prevention, and treatment of arthritis and musculoskeletal and skin diseases, including support for training in medical schools, graduate clinical training, graduate training in epidemiology, epidemiology studies, clinical trials, and interdisciplinary research programs; and

"(2) establish programs of evaluation, planning, and dissemination of knowledge related to such research and training.

"INFORMATION CLEARINGHOUSE AND DATA SYSTEM

"SEC. 483. The Director shall—

"(1) establish the National Arthritis and Musculoskeletal and Skin Diseases Data System for the collection, storage, analysis, retrieval, and dissemination of data derived from patient populations with arthritis and musculoskeletal and skin diseases, including where possible, data involving general populations for the purpose of detection of indi-

viduals with a risk of developing such diseases, and

"(2) establish the National Arthritis and Musculoskeletal and Skin Diseases Information Clearinghouse to facilitate and enhance knowledge and understanding of arthritis and musculoskeletal and skin diseases on the part of health professionals, patients, and the public through the effective dissemination of information.

"INTERAGENCY COORDINATING COMMITTEES

"SEC. 484. (a) For the purpose of—

"(1) better coordination of the research activities of all the national research institutes relating to arthritis, musculoskeletal diseases, and skin diseases, including sports-related disorders; and

"(2) coordinating the aspects of all Federal health programs and activities relating to such diseases in order to assure the adequacy and technical soundness of such programs and activities and in order to provide for the full communication and exchange of information necessary to maintain adequate coordination of such programs and activities.

the Secretary shall establish an Arthritis and Musculoskeletal Disease Interagency Coordinating Committee and a Skin Diseases Interagency Coordinating Committee (hereafter in this section individually referred to as a "Committee").

"(b) Each Committee shall be composed of the director (or his designee) of the Institute and its divisions involved in research involving arthritis, musculoskeletal diseases, or skin diseases, as may be appropriate, the chief medical director (or the director's) designee of the Veterans' Administration, and a medical officer designated by the Department of Defense, and shall include representation from all other Federal departments and agencies whose programs involve health functions or responsibilities relevant to arthritis, musculoskeletal diseases, and skin diseases, as determined by the Secretary. Each Committee shall be chaired by the Director of the National Institutes of Health (or his designee). Each Committee shall meet the call of the chairman, but not less often than four times a year.

"(c) Each Committee shall prepare an annual report for—

"(1) the Secretary, and

"(2) the Director of the National Institutes of Health,

detailing the work of the Committee in the fiscal year for which the report was prepared in carrying out the coordinating activities described in paragraph (1) and (2) of subsection (a). Such report shall be submitted not later than the one hundred and twentieth day after the end of each fiscal year.

"ARTHRITIS AND MUSCULOSKELETAL DISEASES DEMONSTRATION PROJECTS

"SEC. 485. (a) The Secretary may make grants to public and other nonprofit entities to establish and support projects for the development and demonstration of methods for arthritis and musculoskeletal diseases screening and detection and for referral for treatment, and for dissemination of information on these methods to the health and allied health professions. Activities under such projects shall be coordinated with (1) Federal, State, local, and regional health agencies, (2) centers assisted under section 486, and (3) the data system established under subsection (c).

"(b) Projects under this section shall include—

"(1) programs which emphasize the development and demonstration of new and improved methods of screening and early detection, referral for treatment, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases;

"(2) programs which emphasize the development and demonstration of new and improved methods for patient referral from local hospitals and physicians to appropriate centers for early diagnosis and treatment;

"(3) programs which emphasize the development and demonstration of new and improved means of standardizing patient data and recordkeeping;

"(4) programs which emphasize the development and demonstration of new and improved methods of dissemination of knowledge about the projects and methods referred to in the preceding paragraphs of this subsection to health and allied health professionals;

"(5) programs which emphasize the development and demonstration of new and improved methods for the dissemination to the general public of information—

"(A) on the importance of early detection of arthritis and musculoskeletal diseases, of seeking prompt treatment, and of following an appropriate regimen; and

"(B) to discourage the promotion and use of unapproved and ineffective diagnostic, preventive treatment, and control methods for arthritis and unapproved and ineffective drugs and devices for arthritis and musculoskeletal diseases; and

"(6) projects for the investigation into the epidemiology of all forms and aspects of arthritis and musculoskeletal diseases, including investigations into the social, environmntal, behavioral, nutritional, and genetic determinants and influences involved in the epidemiology of such diseases.

"(c) The Director shall provide for the standardization of patient data and recordkeeping for the collection, storage, analysis, retrieval, and dissemination of such data in cooperation with projects under this section and centers assisted under section 486, and other persons engaged in arthritis and musculoskeletal disease programs.

"MULTIPURPOSE ARTHRITIS AND MUSCULOSKELETAL DISEASES CENTERS

"SEC. 486. (a) The Director of the Institute shall, after consultation with the National Arthritis Advisory Board, provide for the development, modernization, and operation (including staffing and other operating costs such as the costs of patient care required for research) of new and existing centers for arthritis and musculoskeletal diseases. For purposes of this section, the term 'modernization' means the alteration, remodeling, improvement, expansion, and repair of existing buildings and the provision of equipment for such buildings to the extent necessary to make them suitable for use as centers described in the preceding sentence.

"(b) Each center assisted under this section shall—

"(1)(A) use the facilities of a single institution or a consortium of cooperating institutions, and (B) meet such qualifications as may be prescribed by the Secretary; and

"(2) conduct—

"(A) basic and clinical research into the cause, diagnosis, early detection, prevention, control, and treatment of arthritis and musculoskeletal diseases and complications resulting from such diseases, including research into implantable biomaterials and biomechanical and other orthopaedic procedures;

"(B) training programs for physicians, scientists, and other health and allied health professionals;

"(C) information and continuing education programs for physicians and other health and allied health professionals who provide care for patients with arthritis and musculoskeletal diseases; and

"(D) programs for the dissemination to the general public of information—

"(i) on the importance of early detection of arthritis and musculoskeletal diseases, of seeking prompt treatment, and of following an appropriate regimen; and

"(ii) to discourage the promotion and use of unapproved and ineffective diagnostic, preventive, treatment, and control methods and unapproved and in effective drugs and devices.

A center may use funds provided under subsection (a) to provide stipends for health professionals enrolled in training programs described in paragraph (2)(B).

"(c) Each center assisted under this section may conduct programs to—

"(1) establish the effectiveness of new and improved methods of detection, referral, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases,

"(2) disseminate the results of research, screening, and other activities, and develop means of standardizing patient data and recordkeeping, and

"(3) develop community consultative services to facilitate the referral of patients to centers for treatment.

"(d) The Director shall, insofar as practicable, provide for an equitable geographical distribution of centers assisted under this section. The Director shall give appropriate consideration to the need for centers especially suited to meeting the needs of children affected by arthritis.

"(e) Support of a center under this section may be for a period of not to exceed five years and such period may be extended by the Director for additional periods of not more than five years each after review of the operations of such center by an appropriate scientific review group established by the Director.

"BIENNIAL REPORT

"SEC. 487. (a) The Director of the Institute shall prepare and transmit to the Secretary, for transmission by the Secretary to the President, a biennial report containing a description of the Institute's activities under the current Arthritis Plan under the National Arthritis Act of 1974 and an evaluation of the activities of the centers supported under section 486.

"(b) The first report under subsection (a) shall be submitted not later than the first November 30 which occurs at least eighteen months after the date of the enactment of this section and shall relate to the two-fiscal-year period ending on the preceding September 30.".

(b)(1) Section 431(a) of the Public Health Service Act (42 U.S.C. 289a(a)) is amended by striking out "arthritis, rheumatism, and".

(2)(A) Subsection (a) of section 434 of such Act (42 U.S.C. 298c-1) is amended—

(i) by striking out "Arthritis, Rheumatism, and"; and

(ii) by striking out "Arthritis, Diabetes," each place it appears and inserting in lieu thereof "Diabetes".

(B) Subsection (b) of such section is amended—

(i) by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes"; and

(ii) by striking out "an Associate Director for Arthritis and Musculoskeletal and Skin Diseases,".

(C) Subsection (c) of such section is amended—

(i) by striking out "a subcommittee on arthritis and musculoskeletal and skin diseases," in the first sentence; and

(ii) by striking out "arthritis, musculoskeletal and skin diseases" in the last sentence.

(D) Subsection (d) of such section is amended—

(i) by striking out "the Associate Director for Arthritis and Musculoskeletal and Skin Diseases," in the matter preceding paragraph (1); and

(ii) by striking out "arthritis, musculoskeletal and skin diseases," in paragraph (1).

(E) Subsection (e) of such section is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(F) The heading for such section is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

(3)(A) Subsection (a) of section 436 of such Act (42 U.S.C. 289c-3) is amended—

(i) by striking out "arthritis, diabetes mellitus," in paragraph (1) and inserting in lieu thereof "diabetes mellitus"; and

(ii) by striking out "an Arthritis Interagency Coordinating Committee," in the matter following paragraph (2).

(B) Subsection (b) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(4)(A) Paragraph (2) of subsection (b) of section 437 of such Act (42 U.S.C. 289c-4) is amended—

(i) by striking out "each Advisory Board" and inserting in lieu thereof "the National Diabetes Advisory Board and the National Digestive Diseases Advisory Board"; and

(ii) by striking out the last sentence.

(B) Subsection (b) of such section is amended by adding at the end thereof the following new paragraph:

"(3) The following shall be ex officio members of the National Arthritis Advisory Board: The Assistant Secretary for Health, the Director of the National Institutes of Health, the Director of the National Institute of Arthritis and Musculoskeletal and Skin Diseases, the Director of the Center for Disease Control, the chief medical director of the Veterans' Administration, a medical officer designated by the Department of Defense, the Director of the National Heart, Lung, and Blood Institute, the Director of the National Eye Institute, the Director of the National Institute of Child Health and Human Development, the Administrator of the Health Resources Administration, and the Administrator of the Health Services Administration (or their designees of such ex officio members), and such other officers and employees of the United States as the Secretary deems necessary for the Advisory Board to carry out its functions.".

(C) Subsection (g) of such section is amended to read as follows:

"(g) Each Advisory Board shall meet at the call of the chairman or upon request of the Director of the National Institute for Diabetes and Digestive and Kidney Diseases (in the case of the National Diabetes Advisory Board or the National Digestive Diseases Advisory Board), or on the request of the Director of the National Institute for Arthritis and Musculoskeletal and Skin Diseases (in the case of the National Arthritis Advisory Board), but not less often than four times a year.".

(D) Paragraph (3) of subsection (h) of such section is amended to read as follows:

"(3) for the purpose of assuring the most effective use and organization of resources respecting such diseases, advise and make recommendations to Congress, the Secretary, the Director of the National Institutes of Health, the Director of the National Institute for Diabetes and Digestive and Kidney Diseases (in the case of the National Diabetes Advisory Board and the National Digestive Diseases Advisory Board), the Director of the National Institute for Arthritis and Musculoskeletal and Skin Diseases (in the case of the National Arthritis Advisory Board), and the heads of other appropriate Federal agencies for the implementation of such plan; and".

(5) Sections 438 and 439 of such Act (42 U.S.C. 289c-5, 289c-6) are repealed.

(6) The heading for part D of title IV of such Act is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

(c)(1)(A) The Secretary of Health and Human Services, through the Director of the National Institutes of Health, shall in accordance with paragraph (2) arrange for the conduct of a study of the effectiveness of the existing combinations of disease research programs within the individual national research institutes and of the standards which should be followed in establishing new or realigning existing national research institutes.

(B) The Secretary shall submit to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the results of the study. The report shall be submitted not later than 18 months after the date of the enactment of this Act.

(2)(A) The Secretary of Health and Human Services shall request the National Academy of Sciences to conduct the study required by paragraph (1)(A) under an arrangement under which the actual expenses incurred by the Academy in conducting such study will be paid by the Secretary and the Academy will prepare the report required by paragraph (1)(B). If the National Academy of Sciences is willing to do so, the Secretary shall enter into such an arrangement with the Academy for the conduct of the study.

(B) If the National Academy of Sciences is unwilling to conduct such study under such an arrangement, the Secretary shall enter into a similar arrangement with other appropriate nonprofit private entities.

(3) Notwithstanding section 431(b)(2) of the Public Health Service Act, no national research institute shall be established in addition to the institutes in existence on the date of the enactment of this Act before the expiration of 6 months after the submission of the report referred to in paragraph (1)(A). Until the expiration of such months, disease research programs in existence on the date of the enactment of this Act shall be administered by the entities which administered them on such date and funds authorized to be appropriated for such programs in a new national research institute shall be made available to such entities for such programs.

(d) The Secretary of Health and Human Services shall conduct an administrative review of the disease research programs within the National Institute of Diabetes and Digestive and Kidney Diseases to determine if any of such programs could be more effectively and efficiently managed by other national research institutes. The Secretary shall complete such review within the sixty-day period beginning on the date of enactment of this Act.

Mr. HATCH. Mr. President, I am offering a substitute which is nearly identical to S. 1939 introduced by my distinguished colleagues, Senators GOLDWATER and SYMMS. The substitute, like the original bill, establishes a separate National Institute of Arthritis and Musculoskeletal Diseases and the changes are acceptable to the sponsors of S. 1939. It is a noncontroversial item because of the support it has in the Senate and because a companion bill has passed the House of Representatives.

I held full Labor and Human Resources Committee hearings devoted to this issue in July of this year. At that time, I heard ample arguments, both for and against establishing a new Institute, and I am persuaded that it is in the best interest of our citizens to focus a national research effort on arthritis and musculoskeletal disorders. These diseases collectively affect over 30 million Americans and result in extraordinary costs in disability and health care. The slogan of the National Arthritis Foundation is: "It's time we took arthritis seriously." And I agree. This new Institute holds the promise of providing much-needed answers to prevention, treatment, and cure of these painful and often fatal diseases.

In addition to technical and perfecting changes, I have added two minor provisions to Senators GOLDWATER and SYMMS' proposal, with their concurrence. The first is simply to title the new Institute "the National Institute of Arthritis, Musculoskeletal and Skin Diseases." At present, skin research is conducted primarily in the National Institute of Arthritis, Diabetes, Digestive and Kidney Disorders, but also in most of the other Institutes. Skin diseases are among the most common of all human ailments, and in fact, account for 45 percent of all occupational illness. I understand that officials at NIH have recommended the proposed new Institute would be the proper home for skin-related research, and I propose the importance of this work be recognized in the title.

The second provision I proposed requires a study of the National Institutes of Health to determine the most effective overall administrative structure to enable the agency to fulfill its statutory mission. A similar provision, introduced by Congressman MADIGAN, passed the House.

The need for this amendment was made clear to me over the past year, as we prepared for reauthorization of the NCI and NHLBI. I listened to multiple requests for restructuring of NIH, all

from well-intentioned scientists or representatives of victims of certain diseases. They all believe that research devoted to their specific interest will be highlighted and improved by establishing a new institute, or at least a bureau, or some new unit. I support this argument for establishment of a new arthritis institute. But any changes in administrative structure are costly, and I have strongly encouraged the chairman of the Labor HHS Subcommittee on Appropriations to provide the estimated $5 million needed to establish the new institute. Many critics of the proposed arthritis institute pointed out that the administrative costs could actually diminish, not enhance the research effort, and that Congress would be deluged with requests for multiple new institutes. I share these concerns, and believe strongly that we risk a serious threat to the excellence of NIH research by legislating further administrative restructuring. However, I simply do not know what the optimal structure and administration of our National Institutes of Health should be. Our research effort may be more efficient if we coalesce some of the existing 11 institutes. Or it may be appropriate to have a dozen more separate institutes. For this reason, I believe it imperative we have a thorough, external study of the administrative structure of NIH, and that the recommendations of this study be made available to Congress before further legislation establishing separate institutes can be considered.

Mr. President, the 53 cosponsors of this bill are convinced the establishment of the National Institute of Arthritis, Musculoskeletal and Skin Diseases will result in major advances in the prevention, cure, and treatment of these widespread diseases. I urge immediate passage.

(By request of Mr. HATCH, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, I am extremely grateful to my colleagues, Senator BAKER, the majority leader; Senator HATCH, chairman of the Labor and Human Resources Committee; Senator SYMMS, a leader among the 53 cosponsors of the Arthritis Institute legislation; and Senator CRANSTON, the Democratic coauthor of the measure, for their cooperation and outstanding efforts in bringing this matter to the floor for action this morning.

At long last, Congress is redeeming the promise it made with establishment of the orginial institute in 1950 and passage of the National Arthritis Act of 1974. That law established a National Commission to draw up a comprehensive plan for research attacking the cluster of diseases known as arthritis.

The Commission recommended in 1976 that "A National Institute of Arthritis should be created * * * to lead the national effort against this and allied diseases." The record of the Senate Labor and Human Resources Committee, development during a thorough hearing in July of this year, shows that arthritis has not received the concentrated attention Congress intended when it set up the present Institute in 1950. Arthritis is now grouped with nine other major diseases, including diabetes, digestive disorders, and kidney disease.

A new institute devoted exclusively to arthristis and related diseases is needed in order to restore the original intent of Congress and focus attention on a disease that afflicts so many of our citizens.

Mr. President, arthritis, musculoskeletal, and related skin problems consist of more than 100 forms of joint and connective tissue diseases that afflict young and old alike, men and women, and all ethnic groups. Over 31.5 million Americans have some form of arthritis—one out of every seven citizens. Each year approximately 1 million more Americans fall victim to these painful and debilitating diseases.

The financial costs of arthritis to patients, insurance companies, the gross national product, and taxpayers are staggering. The physical and emotional costs to the victims of these diseases and their families are immeasurable.

It is estimated that in 1978, Americans paid $14.5 billion in costs related to arthritis. In fact, arthritis and related musculoskeletal diseases rank first among all disease groups in costs attributable to lost earnings and are leading causes of:

Confinement to hospitals and nursing homes;

Increasing costs of the medicare and social security disability programs;

Increasing costs of workers' compensation programs; and

Deterioration in the quality of life for our senior citizens.

Mr. President, I wish to spell out my purpose and understanding in authoring the arthritis institute proposal to include related chiropractic care within the scope of the responsibilities of the new institute. The diagnosis and treatment of neuromusculoskeletal ailments are an integral part of a chiropractor's practice.

Mr. President, an accelerated research effort in arthritis could provide the millions of arthritis sufferers with relief from their pain and the potential for a future of full participation in everyday activities, without the constant frustration of immobile joints and limitation of movement. I urge my colleagues to approve the substitute amendment offered for Senator HATCH and myself by Senator BAKER.●

Mr. ROBERT C. BYRD. Mr. President, I am proud to cosponsor the pending legislation to establish a National Institute on Arthritis and Musculoskeletal Diseases. While arthritis is generally thought of as a condition of old age, it is actually a generic term encompassing more than 100 forms of disease afflicting both young and old. More than 31.5 million Americans suffer from some form of arthritis—1 out of every 7 citizens. Moreover, the number grows annually. Almost 1 million more Americans are plagued by these painful and debilitating diseases each year.

Arthritis and musculoskeletal diseases are important factors behind the increasing costs of the medicare and social security disability programs, and the rising costs of other workers' compensation programs.

Eight years ago the Congress enacted the National Arthritis Act to organize a national campaign against arthritis. Implementation of that plan has fallen short; the gap between recommended and actual expenditures has grown annually, and arthritis and musculoskeletal disease research has received neither the priority nor the focus it warrants. This is partially because this research is currently lumped in the National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases (NIADDK) with an inappropriate array of diseases. While 14 percent of the population suffers from arthritis and musculoskeletal diseases, in 1981 only 16.7 percent of the NIADDK budget—or 1.7 percent of the National Institutes of Health research budget—was earmarked to this research. The result is, each year Americans spend many times more money on ineffective "remedies" for arthritis, than the Federal Government spends on research into the causes, treatment, and prevention of all types of musculoskeletal diseases.

The time for an accelerated research effort in arthritis and musculoskeletal conditions is now. As our society grows older, these diseases will take an even greater toll in economic and human terms. A significant scientific breakthrough could bring us closer to affording relief from almost daily pain for millions of Americans, and to greater future participation in everyday activities for millions more. Such medical advances would also help to contain the future costs of Federal entitlement programs, most notably the social security disability and medicare programs.

Given current Federal budget constraints, this bill does not attempt to spend more money on biomedical research endeavors. It does not even provide increased funding to create the Institute. Because research efforts in NIADDK pertaining to arthritis and musculoskeletal diseases are already concentrated in one systematic Division, the overhead and administrative costs connected with separating these

disease groups from NIADDK are not expected to be significant. Hopefully, arthritis-related research efforts would benefit from greater visibility, and more coordinated future research activity.

I commend the distingushed Senator from Arizona, Senator GOLDWATER, for his significant contributions to this legislation.

Mr. CRANSTON. Mr. President, as the coauthor with my distinguished colleague from Arizona (Mr. GOLDWATER), of S. 1939, legislation we introduced on December 11, 1981, to establish a National Institute of Arthritis and Musculoskeletal Diseases, I am pleased to add my support to the amendment in the form of a substitute offered by the chairman of the Labor and Human Resources Committee (Mr. HATCH) to S. 1939. The provisions of this amendment to establish a National Institute of Arthritis and Musculoskeletal Diseases within the National Institutes of Health are derived from S. 1939, with two modifications I support. The first modification would include the study of skin diseases in the mandate of the new Institute. The second would require an NIH-wide study which I will discuss later.

If enacted, this legislation would help to promote our Nation's research efforts for some of the most prevalent and devastating diseases in our society. I would like to note that Senator GOLDWATER and I, in our efforts to establish this new Institute have been joined by 50 of our Senate colleagues who have cosponsored S. 1939 and that H.R. 6457, as passed by the House, included a provision similar to the amendment being offered.

Mr. President, we cannot ignore the costs to the Nation in both human and economic terms resulting from arthritis and related diseases. The consequences of these disorders are staggering. An estimated 37 million Americans suffer from some form of arthritis—1 out of every 6 citizens, and 1 in every 3 families. Arthritis affects more Americans than any other disease. Each year approximately 1 million Americans fall victim to this painful and debilitating disease. The physical and emotional costs to the victims of the disease and their families are enormous. Arthritis attacks the body's moveable joints and connective tissues, sometimes resulting in systemic complications with critical damage to major organs. Over 20 million Americans suffer from arthritis severe enough that they seek a physician's help. In 1978, 549,000 hospitalizations were due to arthritis and arthritis-related disorders.

The financial costs of arthritis to patients, insurance companies, and taxpayers are staggering. The Arthritis Foundation estimated that in 1978 Americans paid $14.5 billion in costs related to arthritis. In 1980, approximately $1 billion was spent on quack remedies. Over 27 million workdays were lost in 1981 due to arthritis and related disabilities. This represents over $5 billion in wages lost to employees. Although many workers with arthritis remain on the job as long as possible, it is estimated that over half a million workers disabled by arthritis and forced by their intense pain and physical limitations to leave their jobs are today collecting social security disability insurance [SSDI] benefits. Arthritis is second only to heart problems as the reason for SSDI payments, and individuals with arthritis account for about 19 percent of those beneficiaries. The cost to the Nation for these SSDI payments in fiscal year 1981 alone is estimated to have been $2.7 billion—$3.25 billion if payments for dependents are included.

THE NEED FOR A SEPARATE INSTITUTE

Mr. President, research is the best investment we can make to help arthritis sufferers. As the author of the National Arthritis Act of 1974—Public Law 93-640—and amendments to it in 1976 and 1980, I have long been acutely aware of the needs of and potential for research into arthritis, musculoskeletal and skin diseases. It is clear to me that we need a stronger approach to arthritis research. Although the National Arthritis Act of 1974 was tremendously successful in organizing and utilizing our national resources to wage a strong attack against arthritis, and progress in biomedical research has substantially increased our knowledge of arthritis, implementation of the act has fallen short of what should have been achieved and far short of what could be gained through an accelerated research effort into this important area of study.

The National Arthritis Act of 1974 provided for the design of a master arthritis research plan—the so-called national arthritis plan—to establish the areas of research to be pursued, the existing resources with which that can be done, and the additional resources that are needed for research progress. The act also authorized the creation of research and demonstration centers to provide an opportunity for intensive interdisciplinary arthritis research and also training in and demonstration of advanced diagnostic, prevention, treatment, and control methods related to arthritis. Unfortunately, the budget levels recommended under the national arthritis plan for arthritis-related research within NIH have not been realized. Indeed, with each passing year the gap between recommended and actual expenditures has grown wider.

The national arthritis plan recommended that funds be doubled in 1977 for arthritis-related research and that thereafter funding be increased annually by about 20 percent through 1980. However, those levels of funding for arthritis, musculoskeletal, and skin disease research within the National Institute of Arthritis, Diabetes, Digestive, and Kidney Diseases (NIADDK) have never been realized. The result has been that, during the period 1977 through 1981, substantially less than half of the arthritis-related research grant applications that were approved for funding have been able to be funded by the NIADDK. Worse yet, under the administration's proposed fiscal year 1983 budget for NIADDK, only 20 percent of the approved research projects could be funded.

Part of the reason that arthritis, musculoskeletal, and skin disease research has not received the focus and priority it warrants is that it is lumped within the current institute, NIADDK, with an incongruous mixture of disease categories. Congressional intent to focus research on arthritis-related diseases under the original National Institute of Arthritis and Metabolic Diseases has been diluted over time by the combination of so many disparate research programs under NIADDK, that Institute now includes in its mission—in addition to musculoskeletal and skin diseases—diabetes, kidney diseases, digestive diseases, nutrition, endocrinology, urology, and hematology.

Within the current Institute, arthritis lacks the focus, direction, and visibility that are essential to a comprehensive and integrated research program addressing one of our country's major health problems. The existing structure has led to funding disparities within NIADDK. In the last 12 years, funding for arthritis research has grown from 7.8 percent of the total NIADDK budget in 1970 to 16.9 percent in 1982. By comparison, in 1970 diabetes funding amounted to 5.5 percent of that Institute's budget, and by 1982 funding for diabetes research had grown to 35.3 percent of the NIADDK's total budget.

Although arthritis, musculoskeletal, and skin diseases afflict more than 14 percent of the total U.S. population, in 1982 just 1.7 percent of the entire NIH research budget was devoted to arthritis-related research. The Federal Government, through NIH, annually spends only $1.50 per person afflicted with arthritis in this country. Several hundred times that amount is spent per patient on cancer research each year.

The funding recommendations originally proposed under the national arthritis plan reflect the human and economic costs of arthritis and related diseases. To reduce those costs, we need to move far closer to the levels of support and national commitment called for in the arthritis plan.

Given the administration's shrinking budget for our overall Federal research effort, I believe we must develop policies for using limited financial resources more effectively and effi-

ciently so that we can gain the maximum benefits. By establishing a separate institute for arthritis, musculoskeletal, and skin diseases, we would provide arthritis-related disease issues with the greater visibility they should have at the national level and hence enable researchers in these areas to compete more successfully for increasingly scarce resources. A separate institute would have clear-cut advantages leading eventually to channeling additional, well-targeted funds into arthritis-related research as well as promoting better coordination for such research. These have been the results of the establishment of other institutes specializing in a one-family or other logical grouping of disorders such as the National Eye Institute and the National Institute of Aging.

Most important, the creation of a separate institue for arthritis-related research would attract new, high quality scientists and lead to an accelerated research effort into the causes, prevention, and treatment of arthritis. Thus, this amendment would facilitate the implementation of high-priority programs as authorized by the National Arthritis Act of 1974 and the national arthritis plan.

ORGANIZATION OF THE NATIONAL INSTITUTE OF ARTHRITIS MUSCULOSKELETAL, AND SKIN DISEASES

The statutory authority in S. 1939 as it would be amended for the establishment of the new National Institute of Arthritis, Musculoskeletal, and Skin Diseases would be patterned after that of other NIH research institutes. Thus, the new Institute would be directed to undertake research and demonstrations related to the causes, prevention, and treatment of arthritis and musculoskeletal diseases; to promote coordination of research programs in the public and private sector; to make grants for research; to establish an information clearinghouse; and to conduct research training. This is the same mandate that the current NIADDK has with respect to arthritis and musculoskeletal diseases. In addition, in very fitting recognition of the tremendous number of traumatic musculoskeletal injuries that Americans receive in sports and other recreational activities, the new Institute would include in its focus research on sports-related disorders.

The National Institute of Arthritis, Musculoskeletal, and Skin Diseases would receive its funding under the existing authority of section 301 of the Public Health Service Act, as is the case for other NIH institutes. Because the present organizational division pertaining to arthritis and musculoskeletal diseases within NIADDK is already autonomous in many of its functions, the benefits to be gained from the greater visibility for such research would more than compensate for any increase in administrative costs—which is likely to be very minor.

STUDY OF CURRENT NIH ORGANIZATION

Mr. President, I would like to note that I also support the provision in this amendment derived from a provision in H.R. 6457 requiring that a study be conducted of the effectiveness of the existing combinations of disease research programs within the individual institutes of NIH and of what standards should be followed in the future in establishing additional new institutes or realining existing institutes. I do not believe that the current structure of NIH provides adequate assurance of achieving the goal of making research funding allocations based on the level of economic, social, human, and scientific advances that reasonably can be expected to result from such funding. Through a more efficient and effective management structure involving a systematic grouping of related functions, such as this amendment would provide for arthritis, achievement of this important goal will be moved closer to reality.

CONCLUSION

Mr. President, we cannot ignore the need to find ways to improve the quality of life for those unfortunate individuals whom arthritis strikes so unfairly. An accelerated research effort in arthritis has great potential to bring us much closer to providing these millions of arthritis sufferers with relief from their pain and the potential for full participation in everyday activities without the constant frustration of restricted movement and crippling pain.

Thus, I urge my colleagues to support this important legislation.

Mr. SYMMS. Mr. President, I offer my strong support for S. 1939, a bill introduced by Senators GOLDWATER and CRANSTON, and which now has 53 cosponsors. This bill would establish a separate Institute for Arthritis and Musculoskeletal Diseases at the NIH.

The House of Representatives, on September 30 of this year, approved H.R. 6457, the Health Research Extension Act, which authorizes a separate Institute for Arthritis and Musculoskeletal Diseases.

The Labor and Human Resources Committee held a hearing on S. 1939 in July of this year, and testimony was received in support of the separate institute to reaffirm arthritis research as a national priority.

The 1974 National Arthritis Act recognized that the focus on arthritis should be sharpened. In 1976 the "Arthritis Plan" was submitted to the Congress after the National Commission on Arthritis and Musculoskeletal Diseases conducted nationwide hearings and investigations. This national commission recommended the establishment of a separate institute directed specifically toward the problems of arthritis and allied rheumatic diseases.

Unfortunately, the original intent of Congress and the focus on arthritis has been lost through the shifting of health priorities. I believe it is time we took a new look at the direction and focus on arthritis and musculoskeletal diseases, and made it a national priority. The establishment of a separate institute to address the problems of these crippling diseases would provide an environment to attract researchers to the field. By demonstrating the concern of the Federal Government, we would provide the incentive and encouragement to the private sector for financial support of research to complement the publicly funded research.

Arthritis is the major cause of disability in America, with over 7 million people severely disabled. The economic impact to our Nation is estimated to approach $30 billion a year—represented by medical care and treatment costs, disability payments, half of all workers compensation claims, lost earnings, and diminished tax revenues. This does not include the estimated $1 billion a year spent by the victims seeking relief through purchases of unproven or ineffective remedies, gimmicks or useless treatment.

The population at risk includes everyone, from infants to juveniles, to young adults, to our most elderly. And, unfortunately, the percent afflicted is growing, at the rate of 1 million each year, from 10 percent in 1969 to 16 percent today.

As we look at the number of sufferers, the growing incidence, and the economic impact on the families as well as the Government, we realize the significance of these devastating diseases and their effects—a diminished quality of life over entire lifetimes.

What is being done to help? Significant advances are being made in the treatment of arthritis. Surgery, pain-relieving drugs and physical therapy are helping to restore functioning to the disabled. Research is continuing, with important advances in identifying the causes of some of the more than 100 forms of arthritic conditions. Significant discoveries from grant-supported research are increasing our level of scientific knowledge about arthritis and related diseases. With accelerated effort, perseverance and determination, I believe the scientific community could make major advances in the prevention, treatment, and cure of this most widespread of chronic diseases afflicting Americans.

In my view and that of others, arthritis and musculoskeletal disease research has not received the focus and priority warranted. Part of the reason is that arthritis research has been lumped together in the current National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases (NIADDK). The 1982 revised operating plan for this Institute, totaling

$353 million in program funds allocates only 19 percent for arthritis, musculoskeletal and skin diseases research, while 46 percent is allocated for diabetes research.

We need the visibility, the focus, and the strength which a separate institute would provide to arthritis and musculoskeletal diseases. In removing this cluster from the NIADDK umbrella, this would at the same time give sharper focus to the remaining clusters: diabetes, digestive diseases, and kidney diseases.

Reestablishing a separate institute will not only restore the original intent of Congress, but will insure that adequate attention is focused on a disease that afflicts so large a segment of the population. Even with current budget restraints, the added focus on arthritis research will, at minimum, attract more established and experienced research scientists.

Our struggle with the economic problems of the country is painful right now, as we work to make the most of our limited tax dollars, but the high cost of human suffering caused by arthritis makes it imperative to devote more attention and rehabilitation of those afflicted by the Nation's No. 1 crippler.

I urge my colleagues to join me in placing a renewed emphasis on arthritis by approving establishment of this separate institute.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 1585) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The billing having been read the third time, the question is, Shall it pass?

So the bill (S. 1939) was passed.

Mr. BAKER. Mr. President, earlier we considered and passed S. 1939, I believe. I ask unanimous consent that the title be amended appropriately.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The title was amended so as to read: "A bill to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal and Skin Diseases."

TO PROVIDE FOR THE DISTRIBUTION OF WARM SPRINGS JUDGMENT FUNDS AWARDED IN DOCKET NUMBERED 198 BEFORE THE INDIAN CLAIMS COMMISSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Indian Affairs Committee be discharged from further consideration of H.R. 6243, and I ask for the immediate consideration of that measure.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6243) to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes

The Senate proceeded to consider the bill.

Mr. COHEN. Mr. President, H.R. 6243 is a bill to provide for the distribution of judgment funds awarded by the Indian Claims Commission in docket number 198 to members and descendants of one of the tribes occupying the Warm Springs reservation in the State of Oregon. At one time the distribution of this judgment was in dispute among the members of this tribe. However, in hearings before the House Interior and Insular Affairs Committee in this term of Congress there were no witnesses opposed to this bill and it appears that to the extent possible all differences have been resolved. A companion bill to H.R. 6243 was introduced by request by Senator HATFIELD (S. 2153). H.R. 6243 will resolve a long standing controversy at the Warm Springs reservation by providing for a final distribution of these funds.

The amendment I have sent to the desk adds title II for distribution of judgment funds awarded the Muscogee (Creek) Nation of Oklahoma by the Indian Claims Commission in dockets numbered 21 and 276 a number of years ago. I offer this amendment at the request of Senator NICKLES of Oklahoma. Mr. President, funds in satisfaction of the judgments entered in these dockets were appropriated by the Congress a number of years ago. The majority of the funds have already been distributed. However, a small portion of the funds were retained by the United States pending resolution of appeals of persons claiming to be entitled to share in the distribution. Over the years these funds have accumulated substantial interest and the funds now total approximately $800,000. This amendment will provide for final distribution of these funds.

This amendment also adds a new title III which is included on behalf of Senator DURENBERGER of Minnesota. This amendment adds additional provisions to H.R. 6243 to provide for the use and distribution of funds awarded the Red Lake Band of Chippewa Indians by the U.S. Court of Claims in docket No. 15-72. The funds which are the subject of this amendment total approximately $600,000. The provisions of this amendment track S. 2994 which was introduced in the Senate on September 30, 1982, by Senator DURENBERGER for himself and Senator BOSCHWITZ.

Finally this amendment adds a new title IV to provide for the use and distribution of judgment funds awarded the Cowlitz Tribe in the State of Washington. This title is added to implement a bill introduced by Senator GORTON for himself and Senator JACKSON. The Cowlitz Tribe is not presently recognized but is seeking recognition through an administrative process established within the Department of the Interior. This title will provide that 80 percent of the judgment funds awarded this tribe shall be distributed per capita to persons of one-sixteenth Cowlitz blood except those who have participated in or are eligible to participate in judgments recovered against the United States by another tribe. An exception to this limitation is made for members of the Yakima Tribe. One reason for this is because the members of that tribe who are of Cowlitz descent have supported the current Cowlitz tribe in its efforts to obtain this legislation in prior years. A second feature of this legislation is that it provides for 20 percent of the funds to be paid directly to the Cowlitz Tribe for their own use for tribal purposes and the acquisition of land in fee status. This will not extend Federal recognition to the Cowlitz Tribe and none of the funds which are the subject of this title will remain in any trust status. While this tribe does not yet have a federally recognized status there does not appear to be any reason why these funds cannot be paid out to the tribe for its own purposes to be governed under its own rules

Mr. President, in each of these cases the funds have previously been appropriated and are in fact funds belonging to the tribes or distributees. There is no cost to the United States in this legislation. I urge that the Senate adopt H.R. 6243 with this amendment.

Mr. NICKLES. Mr. President, the amendment offered by Senator COHEN at my request is the final step in satisfying a longstanding debt of the United States to the Creek Nation of Oklahoma.

Public Law 90-576 and Public Law 90-504, of September 21, 1968, provided for the disposition of judgment funds awarded to the Creek Nation of Indians in dockets 21 and 276. Per capita payments were made and a balance was held pending appeals for 6 years.

This legislation provides for the disposition of this balance to the Creek Nation of Oklahoma for tribal programs.

The Creek Nation of Oklahoma was the first Indian tribe to take over the administration of an Indian Health Service hospital which took place in the mid 1970's. On December 5 of this year, the tribe initiated the contracting of the services that have been provided by the agency office of the Bureau of Indian Affairs. I commend the diligence demonstrated by the tribal leadership in these giant strides toward self-determination.

These remaining funds will be used by the tribe to purchase farmland to enhance their cattle operation consisting of 250 head of dairy cattle and 150 head of beef cattle.

I am pleased to have the opportunity of sponsoring this legislation and urge my colleagues to accept my amendment.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

FOR THE RELIEF OF CYNTHIA GAMBON RABENA

Mr. BAKER. Mr. President, I now ask unanimous consent that the Senate proceed to the consideration of H.R. 2481, a bill for the relief of Cynthia Gambon Rabena.

The PRESIDING OFFICER. Is there objection?

Mr. MATSUNAGA. Mr. President, I join in the request.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (H.R. 2481) for the relief of Cynthia Gambon Rabena.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

FOR THE RELIEF OF DANA BRAFORD BARETTO

Mr. BAKER. Mr. President, I ask that the Committee on the Judiciary be discharged from further consideration of H.R. 5633.

Mr. President, I ask next that the Chair lay before the Senate H.R. 5633, a bill for the relief of Dana Braford Baretto.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5633) for the relief of Dana Braford Baretto.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

FOR THE RELIEF OF KIN CHI ENG SIMS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 4746 and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4746) for the relief of Kin Chi Eng Sims.

The Senate proceeded to consider the bill.

Mrs. HAWKINS. Mr. President, I rise to support this bill, H.R. 4746, a private immigration bill to permit Kin Chi Eng Sims to become a permanent resident of the United States. Kin Sims is the adopted son of citizens of the United States. His adopted parents are constituents of mine from Florida. He was 20 years old when he was adopted by Gerald and Patricia Sims, and as a result of his age there is no provision under the Immigration and Nationality Act to accord him a preference status to permit him to become a permanent resident of the United States.

I believe that there is unquestionably a longstanding parent-child relationship between Kin and his adoption parents. Kin was born in Hong Kong in 1957 and came to the United States on a student visa and lived with his aunt and uncle, also Florida residents, until 1975, at which time, due to marital problems Kin left his aunt and uncle's home and began to live with the Sims.

Kin was adopted by the Sims in 1976. He had become acquainted with the Sims family while living with his aunt and uncle, and during that time the entire Sims family grew quite fond of Kim.

Mr. President, I ask unanimous consent that a "home study" of the Sims family conducted by the Catholic Service Bureau be included in the RECORD at the end of my statement.

Mr. President, I concur with the House in finding this request for an exemption to the Immigration and Nationality Act meritorious, and ask my colleagues to support the passage of this bill.

The material follows:

HOME STUDY OF THE SIMS FAMILY BY THE CATHOLIC SERVICE BUREAU

At the request of Congressman Dan Mica our agency has completed a home study of the Gerald Sims Family.

Present situation: House Bill 4746 was introduced by Congressman Mica for the relief of Kin Chi Eng Sims. The present situation is that Kin, age 25, is the legally adopted son of Gerald and Patricia Sims. The adoption took place in Florida's Fifteenth Judicial Circuit on October 4, 1976. Kin had entered this country with a student status in 1967, and the Sims assumed that the adoption automatically changed Kin's immigration status. Their attorney never advised them that any other action was necessary. It wasn't until sometime later that the Immigration Office informed the Sims family that Kin would have to return to his country of origin, Hong Kong, upon completion of his education. Since that notification the Sims have made innumerable efforts to have Kin's status changed. They worked with former Congressman Paul Rogers, they were ill advised by the British Embassy to return to Kin's country of origin, Hong Kong, to pursue the change of status. Kin and Mr. Sims made this trip in August 1978. This trip interrupted a seven year continuous stay in the United States which would have been another way to change Kin's status.

The passing of H.R. 4746 will effect Kin's change of status and he will not have to return to Hong Kong.

Kin Chi: Kin Chi, age 25, was born in Hong Kong on October 21, 1956. He and his brother, Chow, now 30 years old, entered the United States with a student status in 1967. They both lived with their uncle, Gam Eng, the owner of a local oriental restaurant. While living with his uncle, Kin met Mr. and Mrs. Sims. Mr. Sims knew members of the Eng family as they worked for him at Kenny Davis Electric. Kin and Mr. Sims began their relationship in 1971–72 by playing chess together and also a common interest in fishing. As the relationship continued, Kin began spending the weekends over at the Sims home and finally moved in permanently in late 1974 or early 1975. Because of the close relationship that developed, Mr. and Mrs. Sims legally adopted Kin in 1976.

Kin has attended public school since living with the Sims. He attended Grove Park Elementary, Howell Watkins Junior High, Sun Coast High School, Palm Beach Junior College and Florida Atlantic College. Kin was graduated from Florida Atlantic in June 1981. Although Kin originally majored in pre-veterinary studies, he switched his major to elementary education. Kin has been a good student throughout his schooling and made the Dean's list on several occasions.

Kin's activities and interests over the years appear to be those of a normal young man. In high School Kin was a member of the Chess Club and the Key Club. He was on the school wrestling team and on a blowling team as well. In Junior College, Kin was a member of the science club. And at Florida Atlantic, Kin was elected to the student senate. Today Kin continues to enjoy the sports of tennis and bowling. He jogs on a regular basis. Kin also appears to have some artistic talent as he has decorated his bedroom with some of his work.

Kin is not employed because his immigration status does not permit work.

Kin socializes with several friends in the neighborhood, Chip Burch and Donnie

Moore. Kin dates regularly, but has no "special" girl at present.

Kin is 5'5½ inches tall and weighs 124 pounds. He has black hair and dark brown eyes. He is a nice looking young man who is quite personable. He is bright and well mannered and possesses a delightful wit. He appears to enjoy a positive relationship with his parents.

Kin sees members of his biological family on occasions. His cousins and Uncle Gam continue to live in the West Palm Beach area. His brother, Chow Eng, lives in Bradenton, Florida. Chow is a divorced man and has one child. He is employed as a chef and waiter at the China Plaza in Bradenton. They see each other maybe once a year. Kin's biological parents live in Hong Kong as does his younger brother, Kin Wag Eng. who is 23 years old. His brother Kin Wag is a surveyor for the government. His parents Kam Yuen Eng, age about 50, and Lau Chi Kam, about 48, both work in machine shops. Kin and his biological parents write to each other perhaps once or twice a year. He visited with his biological parents when he visited Hong Kong in 1978.

Mr. and Mrs. Sims Patricia and Gerald Sims, ages 48 and 51 respectively have been married for 32 years. The Sims have two daughters by birth—Gerri Lynne Butler, age 31 and Patricia Stanley Bolten, age 29. And one son, Kin, age 25, by adoption. Temporarily Patty Bolten and her two children, Brandi and Barry are staying with the Sims, as Mrs. Bolten's husband, Chester, is in the process of being reassigned. Gerri Butler and her two children Kelly, age 10, and Tracey, age 7, live in Palm Beach Gardens. She and her husband, Henry are separated. Mrs. Butler works for her father and Mrs. Bolten works for J. C. Penny.

When Mr. and Mrs. Sims were married, Mr. Sims was in the Army. He had joined at age 16 and completed his high school education in the Army. Mr. and Mrs. Sims spent 21 years in the service and retired in 1967. Mr. Sims was a member of the Green Baret—special forces. During Mr. Sims Army career, he served in Korea twice, from 11/46 to 1/48 and from 8/50 to 12/51. He served in Germany from 1952-1956 and from 1958-1961. Mr. Sims was in Viet Nam twice from 5/63 to 12/63 and from 11/64 to 10/65. Mr. Sims' family accompanied him to Germany from 1953 to 1956. Otherwise his family lived around this country at various bases where Mr. Sims had been assigned. They have lived in Fort Campbell, Kentucky (1949), Washington (1952), Carson in Colorado (1956), Fort Sill, Oklahoma (1961-62) and Fort Bragg, North Carolina (1962).

The family, after retirement, relocated in Junction City, Kansas where they remained until 1971 when they came to West Palm Beach. Mr. Sims was learning to be an electrician while living in Kansas.

Mr. Sims worked for Kenny Davis Electrical Contractors, Inc. until 1973 when he began his own business, Jerry's Electrical Contracting, Inc. His work consists primarily of new construction and he presently employs 12 people, although he has had as many as 22 employees.

Mrs. Sims has worked sporadically over the years. She is presently not employed but has worked as a clerk, waitress, telephone operator, factory worker and secretary.

Neither Mr. nor Mrs. Sims are participating members of a church. Mr. Sims is of the Baptist faith and Mrs. Sims is of the Catholic faith.

Mr. and Mrs. Sims are generally busy with work or family. For recreation, Mr. and Mrs. Sims attend monthly meetings of the Special Forces Association and functions of Viet Nam Veterans of America. Mr. Sims is active with other organizations in the community related to his trade. He is current president of Gulfstream Electrical Contractors Association. He is secretary-treasurer of the Internal Association of Electrical Inspectors.

Both Mr. and Mrs. Sims enjoy bowling and Mrs. Sims enjoys ceramics.

Background and Family Relations of Mrs. Sims: Mrs. Sims, age 48, is 5'½ inches tall and weighs 145 pounds. She has red hair, brown eyes and a fair complexion. Mrs. Sims' maiden name was Richetts and she was born in Uniontown, Kentucky. She moved to Morganfield, Kentucky at the age of 12 when her parents were divorced. Mrs. Sims' mother is now Rose Mathias, have remarried twenty-three years ago. She lives across the street from the Sims. Her sister, Delver Ann Segars, age 55, lives in West Palm also. Her father, Delver Richetts, lives in Junction City, Kansas.

Background and Family Relation of Mr. Sims: Mr. Sims, age 51, is 5'10½ inches tall and weighs 170 pounds. He has red hair, blue eyes and fair complexion. Mr. Sims completed high school while in the service and is now a master electrician with his own business.

Mr. Sims was born in Youngstown, Ohio and remained there until he joined the service.

Mr. Sims has two brothers and five sisters. His father died in 1961 and his mother, age 60, is living. His siblings who continue to live in Youngstown, Ohio are Maxine O'Neil, Ida Budrivick, Joann Kennedy, and Thomas Sims, Jr. Betty Tyndall, his sister lives in Los Angeles. Ruth Anderson lives in Idaho and his brother James lives in Lake Worth.

Health: Mr. and Mrs. Sims have had general physicals and are in very good health. Kin has always enjoyed excellent health.

Their home: Mr. and Mrs. Sims purchased their home in 1972. It has three bedrooms and one bath. Their home is well cared for, nicely furnished and comfortable to visit.

Finances: I have attached a copy of a financial information form that the Sims family completed for our agency.

Personal references: The three personal references given by the Sims have known the family between 5-10 years. They all speak in positive terms about the family. Kin is thought to be a bright and studious young man who is even-tempered and considerate. The family is thought to be responsible and caring.

Agency impressions: The Sims impress me as individually well adjusted people who enjoy a wholesome family life. They are cordial and intelligent and have a good sense of humor. They are successful and responsible.

Kin, too, is bright and likeable. He is well mannered and witty. He has never been in any difficulties with school or police and in fact, has developed and achieved in a very positive way.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

TO EXEMPT THE U.S. CAPITOL HISTORICAL SOCIETY FROM CERTAIN TAXES

Mr. BAKER. Mr. President, I ask that the Committee on Governmental Affairs be discharged from further consideration of H.R. 4491, Capitol Historical Society, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (H.R. 4491) to exempt the United States Capitol Historical Society from certain taxes.

The Senate proceeded to consider the bill.

Mr. MATHIAS. Mr. President, the U.S. Capitol Historical Society provides an invaluable service to the Congress and the people of the United States. Since its creation in 1962, the society has made the visit of thousands of tourists a more memorable and rewarding experience. Through educational publications, films, and symposiums the society has traced the history and importance of the U.S. Capitol, the Congress, and the many events which mark critical points in the 200 year history and origins of our Government. The society has been diligent in carrying out the objects and purposes set forth in its Federal Charter, namely:

(a) to encourage in the most comprehensive and enlightened manner an understanding by the American people of the founding, growth, and significance of the Capitol of the United States of America as the tangible symbol of their representative form of government;

(b) to undertake research into the history of the Congress and the Capitol and to promote the discussion, publication, and dissemination of the results of such studies;

(c) to foster and increase an informed patriotism of the land in the study of this living memorial to the founders of this Nation and the continuing thread of principles as exemplified by their successors; and

(d) to mutually cooperate with the standing committees of the Congress, the Library of Congress, the Architect of the Capitol, and relevant departments and agencies of the executive branch of the Federal Government in furthering the objectives of the corporation.

Its publication, "We The People," now in its 12th edition, is printed in French, 30,000 copies; Spanish, 30,000 copies; German, 60,000 copies; and Japanese 70,000 copies, for foreign visitors to the Capitol.

The board of trustees of the society includes the President of the United States, former Presidents, the Chief Justice of the Supreme Court, distinguished Members of Congress, and presidents of distinguished professional history associations.

Mr. President, I ask unanimous consent that the complete listing of the society's board of trustees appear at this point in the RECORD.

There being no objection, the listing was ordered to be printed in the RECORD, as follows:

HONORARY BOARD OF TRUSTEES

Gerald R. Ford, *Chairman:* President Ronald Reagan, Vice President George Bush, Chief Justice Warren E. Burger, Speaker Thomas P. O'Neill, Jr., Jimmy Carter, Walter F. Mondale, Richard M. Nixon, Sen. Howard H. Baker, Jr., Sen. Robert C. Byrd, Sen. Howard W. Cannon, Sen. Claiborne Pell, Rep. Lindy Boggs, Rep. James T. Broyhill, Rep. Augustus F. Hawkins, Rep. Robert H. Michel, Rep. John J. Rhodes, Rep. Charles Rose, Rep. James C. Wright, Jr., Daniel J. Boorstin, Marshall B. Coyne, Arthur S. Flemming, Mrs. Lyndon B. Johnson, Mary Regula, S. Dillon Ripley, Robert M. Warner, George M. White; and Presidents of the American Association for State and Local History, American Historical Association, American Political Science Association, Columbia Historical Society, National Trust for Historic Preservation, Society of American Historians, and Society of Architectural Historians; Chairman of the Committee on Historic Resources, American Institute of Architects; and Director of the National Park Service.

ACTIVE BOARD OF TRUSTEES

Lonnelle Aikman, Ralph E. Becker, Herbert Blunck, John Brademas, Robert L. Breeden, Sen. Robert C. Byrd, Mrs. Edward Clark, Hyman J. Cohen, Rep. Barber B. Conable, Jr., Robert E. Doyle, Leslie W. Dunlap, Rep. Bill Frenzel, Mrs. Saunders Gregg, Arthur B. Hanson, Bryce N. Harlow, Sen. Mark O. Hatfield, Brooks Hays, Alvin M. Josephy, Jr., Walter H. Judd, Sen. Charles McC. Mathias, Jr., Gene McGreevy, Robert Morgan, Ralph G. Newman, Rep. J. J. Pickle, Harold T. Pinkett, Forrest C. Pogue, Mrs. Richard Denny Shelby, Clement M. Silvestro, Charles J. Simpson, Mrs. Wakelee Rawson Smith, Robert G. Stephens, Jr., Florian H. Thayn, Rep. Guy Vander Jagt, Frank van der Linden, George M. White, and Ralph W. Yarborough.

Mr. MATHIAS. Among the more significant projects which the Capitol Historical Society has undertaken are:

Publication of "Magna Carta and the Tradition of Liberty," a book which describes the history of Magna Carta and its influence on the shaping of the American form of government.

Publication of a scholarly journal of history, politics, art, and architecture focusing on the Capitol and the Congress.

Oral histories by past and present Members of Congress recording their perspectives on the institution. This collection is stored at the Library of Congress for the benefit of scholars and students of history and political science.

Production of an award-winning film for the Bicentennial titled "City Out of Wilderness" which was presented hourly in the National Visitors Center. The film traced the history of the development of the Nation's Capital.

Funding contributions to the Maryland Historical Society for the editing and publication of the papers of Benjamin Henry Latrobe, who was charged with restoration of the Capitol Building after it was burned by the British in 1814.

Funding contributions to the American Institute of Architects Foundation editing and publication of the papers of William Thornton, original designer of the Capitol and Architect of the Capitol until 1802.

Funding contributions toward the painting of murals, ceilings, and other artwork in the Halls of the House side of the Capitol. Under the master guidance of the late Allyn Cox, two halls of magnificent murals have been completed: Capitol Hall, depicting the most important events in the history of the Congress; and Great Experiment Hall, portraying events in the growth of the republic.

Conducting annual symposiums at which scholars present papers on the American Revolution and Confederation era. Registration for these conferences ranges from 150–350. Symposia topics have included:

"Diplomacy and Revolution: The Franco-American Alliance of 1778,"

"Sovereign States in An Age of Uncertainty."

"Slavery in the Age of the American Revolution,"

"Arms and Independence: The Military Character of the American Revolution,"

"An Uncivil War: The Southern Backcountry During the American Revolution,"

"Peace and the Peacemakers: The Treaty of 1783."

A secondary school program which brings together high school students, teachers, and historians in seminars geared to making the legislative process and the history of the Congress and Capitol come alive.

I would note, Mr. President, that all of the items proposed for sale or distribution by the society are reviewed and approved by the Architect of the Capitol after consultation with the Committee on House Administration and the Senate Committee on Rules and Administration pursuant to the National Visitor Center Facilities Act of 1968, Public Law 90-264.

Title III of that act reads in pertinent part:

TITLE III—CAPITOL VISITOR CENTER

SEC. 301. Notwithstanding any other provision of law, the Architect of the Capitol, in consultation with the House Office Building Commission and the Senate Office Building Commission, is hereby authorized and directed to provide adequate space and facilities in the Capitol Building for an educational and informational center and information and distribution stations to afford visitors to the Capitol Building an opportunity to acquire (1) information relative to Congressional offices, (2) assistance relative to their visit to the Capitol, (3) pamphlets, books, drawings, slides and photographs, and related materials, and (4) information about the Capital and the history of the Capitol Building and past and present Congresses. All materials distributed by such educational and informational center and such stations shall first be approved by the Architect of the Capitol, after comsultation with the House Committee on House Administration, the Senate Committee on Rules and Administration, the United States Capitol Historical Society, and such other educational and historical groups as the Architect of the Capitol deems appropriate. The Architect of the Capitol is hereby authorized to enter into such agreements as may be reasonably necessary to operate such educational and informational center and stations.

Approved March 12, 1968.

Mr. President, such an agreement between the Architect of the Capitol and the society has been entered into annually since 1968.

The society has over the last several years become, with each succeeding year, a more integral part of the U.S. Congress in the Congress desire and responsibility to serve as the custodian and guardian of the U.S. Capitol and the various artifacts of national and historic significance contained in this Capitol Building.

Mr. President, I recite this background in order to emphasize that this legislation providing for the society's exemption from District of Columbia taxes is appropriate and in keeping with the intent of the Congress as to the role which the society plays. In providing this exemption for the society it is in no way the committee's intent to establish a precedent regarding the tax status of the other federally chartered organizations or institutions operating in the District of Columbia.

I am acutely aware of the potential negative impact that this widespread tax exemption could have upon the District of Columbia. It is, however, very clear to me that the U.S. Historical Society plays a unique role which is by and large performed within the U.S. Capitol's Buildings and Grounds.

I note that the Justice Department's Acting Assistant Attorney General for Tax Matters, in a March 3, 1981, letter to the Architect of the Capitol, concerning the attempt by the District of Columbia government to assess sales taxes against the society noted:

. . . the action of the District appears on the face of it an impermissable attempt to exert taxing authority within a federal enclave. Moreover, the defense of laches also must be considered, taking into account the fact that the proposed assessment runs back to 1967.

During its lifetime the society has, without the appropriation of funds from the U.S. taxpayers, performed an invaluable service for the Nation. It is undoubtedly the case that the work of the society would be both desirable and necessary even if the society did not exist, for we in the Congress clearly have a responsibility to foster a better understanding among citizens of the history of the Congress and the Capitol. I believe it is fair to say that

if there were no U.S. Historical Society it would, in all probability, have to be invented.

Mr. EAGLETON. Mr. President, the motion to discharge H.R. 4491 from the Governmental Affairs Committee when there has been no official committee review of the bill is a procedure to which I would normally object. I have not found that H.R. 4491—which exempts the U.S. Capitol Historical Society from the payment of District of Columbia sales tax, retroactive to 1964—is without controversy.

First, the issue is now on appeal before the U.S. Court of Appeals for the District of Columbia, and a strong argument can be made that Congress should not act before conclusion of the litigation. I have stated before my belief that the judicial system suffers when litigants believe that they can appeal to Congress rather than complete action in the normal judicial channels.

Second, the District of Columbia, which is seeking approximately $740,000 in back sales tax from the Society, has never testified on the matter before Congress. The House action took place in the House Committee on the Judiciary, not in the House Committee on the District of Columbia, and the city's view was not aired.

Third, the basic reason for exempting the U.S. Capitol Historical Society from District sales tax hinges on the fact that the group carries a Federal charter, operates within the confines of the U.S. Capitol, uses its resources to record and interpret the history of the U.S. Capitol, and has honorary and active boards of trustees whose interests and affiliations are overridingly Federal. These key Federal components have led both the House of Representatives and Judge Charles Richey of the U.S. District Court for the District of Columbia—in a decision rendered in September 1982—to conclude that the Historical Society is a Federal instrumentality which should not be liable for local taxes. After a review of the Society's functions, I find I agree that an overriding case can be made for the uniqueness of the Society and its designation as a Federal instrumentality.

However, I am concerned, Mr. President, that other groups—groups which also carry a Federal charter, and which also deal in Federal areas, and which also have boards of trustees with dominantly Federal backgrounds and interests—will also attempt, if it would help them financially, to obtain congressional exemption from District or other local taxes. They will come to us and cite the U.S. Capitol Historical Society exemption as precedent.

Senator MATHIAS, chairman of the Subcommittee on Governmental Efficiency and the District of Columbia, has acknowledged this concern in his statement and stated "it is in no way the committee's intent to establish a precedent regarding the tax status of the other federally-chartered organizations or institutions operating in the District of Columbia."

Mr. President, I certainly agree with Chairman MATHIAS and wish to emphasize that the possibility of other groups seeking such a congressional favor is not an idle threat. According to a Library of Congress study, there are more than 350 organizations, beginning in 1791, which have been chartered by the Federal Government. The list of these organizations, the history of Federal charters, and the official congressional position regarding Federal charters is available through Library of Congress publication HD2755, which I urge my colleagues to read.

It has been the congressional position since 1969 that Federal charters should be granted only when an organization meets standards demonstrating unique Federal ties. Nonetheless, scores of bills are introduced each Congress by groups seeking the prestige of such charters. I hope that none of these applicants take passage of H.R. 4491 as evidence that now there might be advantages to a Federal charter other than prestige, that is, the potential of District of Columbia or other local tax exemption.

Finally, let me comment on the loss to the District of Columbia of exclusion of such groups as the U.S. Capitol Historical Society from the city's tax base. Congressman WALTER FAUNTROY, who opposed H.R. 4491, estimates that the District loses nearly three-quarters of a billion dollars annually because of congressionally mandated tax exemptions. When Congress passes such exmptions, it must be fully aware that it has a responsibility to make up the losses suffered by the District through increases in the city's Federal payment—the lump sum paid to the city annually in lieu of the Federal Government paying property taxes, in lieu of Federal payment for city services, such as police and fire protection, and yes, in lieu of taxes from organizations exempted from the District of Columbia tax rolls by congressional action.

Mr. President, the concerns raised by H.R. 4491 are serious. However, a number of letters I have gathered from sponsors of the measure, plus a reading of Judge Richey's court decision and the House committee report, have convinced me that the U.S. Capitol Historical Society is unique. Therefore, I will not oppose the motion to discharge. So that others can also understand why this particular organization receives such special treatment, however, I ask unanimous consent to include some background information in the RECORD following my remarks.

Mr. President, I ask that the letters I have received on this issue, Judge Richey's court decision, the House Judiciary Committee report on H.R. 4491, and some background information on the Society itself be printed following this statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE
DISTRICT OF COLUMBIA,
Washington, D.C., December 16, 1982

Hon. THOMAS F. EAGLETON,
Subcommittee on Governmental Efficiency and the District of Columbia, Dirksen Senate Office Building, Washington D.C.

DEAR TOM: Please know that I strongly oppose H.R. 4491, a bill to exempt the Capitol Historical Society, United States, from certain District of Columbia taxes. When the bill was before the House Judiciary Committee, I wrote the Chairman of that Committee and others stating my opposition, but did not seek sequential referral to the D.C. Committee because:

(1) The matter was then before the Courts (and is now on appeal); and

(2) It was argued that this was a one-time unique situation.

When the matter reached the Floor of the House it was clear that further opposition would not be fruitful.

If this bill should become law, I hope that it will not be viewed as a precedent for exemptions for others.

Sincerely,

RONALD V. DELLUMS,
Chairman.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES
Washington, D.C., December 17, 1982

Hon. THOMAS F. EAGLETON,
Senator, U.S. Senate, Washington, D.C.

DEAR TOM: The issue of the Capitol Historical Society is clearly outlined in my attached statement.

I shall deeply appreciate your assistance in presenting the circumstances surrounding this matter on the Senate side of the Congress.

Sincerely,

WALTER E. FAUNTROY,
Member of Congress.

Attachment.

STATEMENT OF CONGRESSMAN WALTER E. FAUNTROY BEFORE THE U.S. HOUSE OF REPRESENTATIVES IN OPPOSITION TO H.R. 4491

Mr. Speaker—I rise in vigorous opposition to this proposed legislation. My opposition is twofold.

First, this bill, if enacted, well further erode the tax base of the Distict of Columbia. Secondly, it is in the nature of "special legislation" since it will singularly benefit a multi-million dollar private corporation doing business in the District.

H.R. 4491 is aimed at exempting the Capitol Historical Society from the payment of District of Columbia sales tax. The Society is a private corporation which was chartered in 1962.

This measure is before us today because its proponents have asserted that it is noncontroversial and have sought to quickly move it through this body.

The fact is that at issue is the threatened loss of some $800,000 in revenue which is currently owed to the District, and an incalculable amount of future revenue which will be lost. The fact is that the only witnesses called by the House Judiciary's Subcommit-

tee on Administrative Law and Governmental Relations have a direct or pecuniary interest in passage of this bill. Representatives of the District Government were not invited to testify. The Delegate from the District of Columbia was not even informed about this bill.

As a result of Congressionally mandated tax exemptions over the years, the District loses nearly three-quarters of a billion dollars annually. At a time when all levels of Government must make the best use of dwindling revenue sources, we should not force District residents to absorb another loss of revenue simply because a private corporation does not want to pay local taxes.

This private corporation maintains that it is doing a service for the United States Government by selling educational material to visitors to the Nation's Capitol—yet its sales of non-educational, general merchandise total more than a million dollars annually and exceeds educational sales by a four to one ratio. Moreover, the salaries of its officers and employees is in excess of $300,000 a year today as compared to $2,200 when the Society began operations.

The benefit of tax exemption will be for a few at the expense of many. This bill is private and special and has no real public interest.

Mr. Speaker, the Society competes with local merchants in its general merchandise sales. Thus, the revenue loss to the District will be more than the absence of tax payments from the Society. The loss will necessarily include lost sales by those competing merchants who do not enjoy as much price flexibility. The actual District revenue losses are and will be major and are not fully measureable.

The Society is an enormous business which pays sizeable salaries to Officers and Employees, conducts general merchandise sales which far outweigh its educational sales, and has a large, interest-collecting general investment fund. It is a big business.

Mr. Speaker, the Dsitrict of Columbia will never run its government right if the Congress continues to muscle in, on the whim or caprice of a few individuals.

Thank you.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., December 17, 1982.

Hon. THOMAS F. EAGLETON,
U.S. Senate, Dirksen Building,
Washington, D.C.

DEAR SENATOR: From the time of its inception in 1962, the U.S. Capitol Historical Society has been a truly unique organization. Its uniqueness has grown through the years. It was formed by the bi-partisan leadership of the Congress and historical scholars for the sole purpose of studying the history of the Capitol Building and the Congress as an institution. Thus, its charge has been to preserve the rich heritage of the Capitol's history and interpret to the American people the functions and role of Congress. Through the years, broad new responsibilities were given to the historical society. Under the authority of the National Visitor Center Facilities Act of 1968, the U.S. Capitol Historical Society was charged to operate the Capitol Information Center in the Capitol, under direction of the Architect of the Capitol and with Congressional authority.

With the incorporation and the granting of a Federal Charter on October 20, 1978 by the Congress and signed by the President, still broader authorities were extended to the Society. It was mandated to preserve and improve the Capitol, and in that light the Society, with full Congressional authority, has sponsored an extensive art program in the Capitol, which will provide inspiration to present and future generations. The Society was directed to "mutually cooperate with the standing committees of the Congress, the Library of Congress, the Architect of the Capitol, and relevant departments and agencies of the Executive branch of the Federal Government" in furthering its objectives. Toward that end, the Society develops projects and programs in cooperation with Federal agencies. But it is in the realm of the Society's constant work with the Committees of the Congress that its role as an arm of Congress becomes most clearly evident. Two such examples are 1. The "We the People" historical Calendar in which every step in the planning, design, selection of photographs is mutually worked out with the counsel and guidance of the Committee on House Administration and the Senate Committee on Rules and Administration and 2. When the Society acquires furnishings and works of art to be given to the Capitol, it works closely with the Architect of the Capitol and the Joint Committee on the Library—often responding to recommendations of the Architect of the Capitol. All members of the Congress are honorary members of the U.S. Capitol Historical Society and many take an active part in Society programs. Thus through membership alone, the Society is unique.

Consequently, the purpose of the Society, the requirements of its Congressional Charter of 1978, its authority to operate the Capitol Information Center for the Congress, and its unique working relationship with the Committees of the Congress all contributed to the ultimate finding of the House Committee on the Judiciary that "the Society is an instrumentality of the Federal Government." And such finding was further confirmed in a judgment given in the U.S. District Court for the District of Columbia, wherein his Honor, Judge Richey held that the Society was an instrumentality of the United States.

Therefore, because of the nature of its historical work, revolving solely around the Capitol and the Congress, its official responsibilities in the Capitol, and its responsive work and cooperation with the Committees of the Congress and the Leadership of the Congress on matters relating to the Capitol, the U.S. Capitol Historical Society is a unique organization. There are no other chartered organizations with any such duties involving the Capitol and the Congress, nor such use as an instrumentality of Government. Consequently, passage of H.R. 4491 would in no way set a precedent. There is but one U.S. Capitol Historical Society operating in the one Capitol, which belongs to all Americans.

Sincerely yours,

J. J. PICKLE.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., December 17, 1982.

Hon. THOMAS F. EAGLETON,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: I would like to ask your assistance to do everything possible to ensure that H.R. 4491 is considered by the Senate prior to adournment. As you know, that bill, which passed the House earlier this week, would amend the charter of the U.S. Capitol Historical Society to specify that the Society is not subject to the District of Columbia sales tax.

On November 6, 1981, the District of Columbia sued the Society, asserting an unpaid sales tax collection liability of approximately $750,000 from materials sold in the Capitol after August 1, 1966. Subsequently, upon the request of the Architect of the Capitol, the United States sued the District of Columbia in Federal Court on behalf of the U.S. Capitol Historical Society and denied the alleged tax liability.

The U.S. Capitol site has been the exclusive jurisdiction of the Federal Government since the land was acquired by the U.S. under proclamations by Presidents Washington and Adams in 1797 and 1798; Congress did not create the District of Columbia until 1800. The District does not have, nor has it ever had, jurisdiction over public activities in the Capitol building where all the sales of the Historical Society have occurred. In addition, the Society is an instrumentality of the Federal Government and, as such, is not subject to the District of Columbia sales tax.

Nothing in the record indicates that Congress has ever made any other assumption than that the U.S. Capitol Historical Society is an instrumentality of the Congress itself, subject to Congress' direct supervision and close association. Any activity over it, including the taxing power exercised by the District of Columbia, is intrusive.

The Society, which was chartered in 1962, is a nonprofit organization dedicated to the beautification and enrichment of the traditions of the Capitol. Since 1964, it has operated a visitor information center, which has also sold historical and souvenir items exclusively in the U.S. Capitol. Those items have never been subject to sales tax. Profit from such sales by the Society is required by law to be returned to the Capitol, through improvements and programs that promote an appreciation of the Capitol. Since it was chartered, the Society has received no Federal subsidies or reimbursement of any kind, yet it has returned to the Capitol hundreds of thousands of dollars in improvements, art works, antiques, and historic preservation. For example, the Society has made many contributions to the collections of the Capitol, including the sponsorship of recently dedicated murals of the late Allyn Cox in the House Corridors.

H.R. 4491 should never have been necessary. However, since the District of Columbia has tried to impose a sales tax as though the Society were a normal commercial institution operating on private property, a clarifying law has become essential. Without enactment of such legislation, the Society could be bankrupt and the American people would be left without the good works it has performed over the years. I hope you can make possible passage of this measure during the closing days of the 97th Congress.

Very truly yours,

BARBER B. CONABLE, Jr.

THE ARCHITECT OF THE CAPITOL,
Washington, D.C., December 17, 1982.

THOMAS F. EAGLETON,
Subcommittee on Governmental Efficiency and the District of Columbia, U.S. Senate, Washington, D.C.

DEAR SENATOR EAGLETON: In response to a recent request from your staff, I am pleased to advise that, for the reasons hereinafter detailed, I am in full support of H.R. 4491, a bill to exempt the United States Capitol Historical Society (Society) from certain

taxes, which, as you know was passed by the House of Representatives on December 13, 1982.

By way of background, the Society was originally chartered as District of Columbia non-profit corporation on August 8, 1962. In 1978 the Society was granted a federal charter pursuant to Public Law 95-493, approved October 20, 1978 (92 Stat. 1643, 36 U.S.C. 1201 et seq.). In my capacity as Architect of the Capitol, I serve as a member of the honorary board of trustees of the Society.

Pursuant to title III of the National Visitor Center Facilities Act of 1968, Public Law 90-264, 82 Stat. 46 (40 U.S.C. 831), the Architect of the Capitol is authorized and directed to provide space and facilities in the Capitol Building for an educational and informational center and information and distribution stations for the benefit of visitors to the Capitol. Pursuant to this mandate the Architect of the Capitol entered into an agreement with the Society on May 16, 1968, since renewed on an annual basis, to operate such a center and stations in the Capitol Building. The purpose of these facilities is to make available to visitors to the Capitol, information and assistance relative to Congressional offices and the Capitol and its history, as well as pamphlets, books, drawings, slides and photographs and related materials. All materials offered for sale by the Society are first approved by my office after consultation with the Committee on House Administration, the senate Committee on Rules and Administration and the Society.

In addition to these valuable public services, the Society, pursuant to its agreement with my office, utilizes a significant portion of the proceeds from the operation of the Capitol Visitor Center to fund the acquisition, subject to the approval of the Joint Committee on the Library, of works of art and objects of historical interest for display in the United States Capitol. One such program was the decoration of the first floor corridors in halls of the House wing of the Capitol by the late Allyn Cox, the noted American muralist.

The Government of the District of Columbia has asserted a sales tax collection liability against the Society in the amount of $743,228.61 with respect to sales approved materials in the United States Capitol made subsequent to August 1, 1966. On January 19, 1981, a "Notice of District Tax Lien" reflecting this asserted tax liability was filed with the Recorder of Deeds by the D.C. Government.

Because this action by the District of Columbia appeared, in my judgment, to be an impermissible attempt to assert local taxing authority within a federal enclave, by letter dated February 12, 1981, I requested, with the concurrence of the Chairman, respectively, of the Senate Committee on Rules and Administration and the Committee on House Administration, that the Department of Justice assume cognizance of the matter.

In the ensuing litigation, the Federal District Court for the District of Columbia on September 3, 1982, granted the motion of the United States and the Society for summary judgment in its countersuit against the District of Columbia, agreeing in its opinion with the contention that the Society is an instrumentality of the United States and, therefore, not subject to District of Columbia sales tax. On November 4, 1982, the District of Columbia filed its notice of appeal from this decision.

Although the specific issue of the Society's liability for the collection and payment of D.C. sales taxes is still in litigation, I do feel that I may properly state that it has always been my position that the District of Columbia Government lacks the authority to assert jurisdiction over any activities conducted within the United States Capitol buildings or grounds, whether for sales tax, or any other purpose.

The record clearly shows, as a matter of historical perspective, that the land upon which the U.S. Capitol stands was part of original Reservation Number Two (which, in its entirety, included the "Capitol Square and the Mall east of Fifteenth Street West"). Reservation Number Two was acquired by the United States as a site for the Capitol Building under proclamations of Presidents Washington and Adams, dated March 2, 1797 and July 23, 1798, respectively, whereas the District of Columbia was created by the Congress and became a federal district in the year 1800 pursuant to 1 Stat. 130 and 2 Stat. 103 (see generally District of Columbia Code, Vol. 1, p. XVII). In my view, therefore, it is abundantly clear that the Congress has, historically, had unbroken, exclusive jurisdiction over the land upon which the Capitol Building is situated, such as would not admit of any power in the District of Columbia to assert its taxing authority therein.

The exclusivity of federal jurisdiction on Capitol Hill is, in my judgment, further demonstrated by the fact that Congress has with great particularity established in law the geographical boundaries of the United States Capitol Grounds and has prescribed rules governing the public use of the grounds and the conduct of individuals therein (40 U.S.C. 193a-m). Further in this regard, Congress has acted to place responsibility for policing the United States Capitol Grounds exclusively in the Capitol Police under the direction of the Capitol Police Board. The Metropolitan Police force of the District of Columbia is authorized to act in the United States Capitol buildings and grounds only with the consent, or upon the request of the Capitol Police Board (40 U.S.C. 212a).

Likewise, Congress has seen fit to extend certain provisions of the District of Columbia Traffic Act to the United States Capitol Grounds (40 U.S.C. 212b), which, in my judgment, is inconsistent with the notion of any residual jurisdiction over the grounds inhering in the District of Columbia.

I appreciate the opportunity to comment on H.R. 4491 and shall, of course, be pleased to provide any additional information you may deem necessary.

Cordially,

GEORGE M. WHITE, FAIA.

[U.S. District Court for the District of Columbia, Civil Action No. 82-0923]

UNITED STATES OF AMERICA, PLAINTIFF, *v.* DISTRICT OF COLUMBIA, DEFENDANT

MEMORANDUM OPINION OF U.S. DISTRICT JUDGE CHARLES R. RICHEY

Appearances

Charles E. Stratton, *Department of Justice, Tax Division*, and John C. Martin, *Assistant United States Attorney*, for the United States.

Richard L. Aguglia, *District of Columbia Corporation Counsel*, and John C. Salyer, *Deputy General Counsel to the Architect of the Capitol* for the District of Columbia.

The Court has before it two motions: [1] (1) Defendant's Motion to Dismiss; and, (2) Plaintiff's Motion for Summary Judgment.[2] For the reasons stated herein, the Court denies Defendant's Motion to Dismiss and grants Plaintiff's Motion for Summary Judgment. These motions are decided without oral argument.

I. BACKGROUND

This is an action brought by the United States, seeking a declaratory judgment that the United States Capitol Historical Society ("USCHS") is a federal instrumentality and that the defendant, District of Columbia, has no power to tax sales by the USCHS. Alternatively, the United States seeks a declaration that USCHS is exempt from taxation because it operates in a federal enclave.

The USCHS is a nonprofit corporation organized under District of Columbia law and granted a federal charter in 1978. USCHS operates the Capitol Visitors Center on the United States' Capitol grounds as authorized by Title III of the Capitol Visitors Center Facilties Act of 1968. Pub. L. No. 90-624 (40 U.S.C. § 831). The Society produces a variety of books, pamphlets, brochures and general merchandise which are sold at the Visitors Center.[3]

In November 1981, defendant filed suit against USCHS in the District of Columbia Superior Court to collect $743,029.30 in sales taxes, penalties and interest. Defendant also sought a declaratory judgment to require the Society to collect sales taxes and file sales and use tax returns.[4] *District of Columbia* v. *United States Capitol Historical Society*, CA No. 81-3119 (hereinafter *"DC* v. *USCHS")*. A third party complaint was filed against the United States and the case was removed to federal district court. This Court dismissed the third party complaint and remanded to the Superior Court. Thereafter, the United States brought this action in federal district court and the motions pending before the Court were filed.

---

[1] A third motion was filed in this case—Plaintiff's Motion to Stay the Proceedings in *District of Columbia* v. *United States Capitol Historical Society* CA No. 81-3119 (*"DC* v. *USCHS"*) pending the resolution of the matter currently before the Court. However, on August 12, 1982, Superior Court Judge Carlisle E. Pratt stayed the proceedings in *DC* v. *USCHS* until this Court has ruled in this case. Therefore, Plaintiffs' Motion to Stay Proceedings is now moot.

[2] Defendant has not filed an opposition to Plaintiff's Motion for Summary Judgment. Pursuant to this Court's Order of June 4, 1982, defendant was given leave to respond to that motion 10 days after service upon defendant of an Order denying its Motion to Dismiss. However, because there are no disputed issues of material fact and because the Court believes that plaintiff is entitled to judgment as a matter of law, the Court grants summary judgment at this time.

[3] Defendant has never sought to tax sales of educational material. Rather, this dispute centers on taxation of items of general merchandise such as jewelry, slides and photographic supplies. Additionally, the status of the sales of the "We the People" calendar is in dispute because the District of Columbia has included such sales in its assessments. Ninety-three percent of calendar sales are to Members of Congress. These sales constitute a major portion of the sales made by the USCHS and a major part of the assessments levied by the defendant.

[4] In that suit the District of Columbia also sought to have the Court declare valid a lien it filed against the USCHS but this issue has no bearing on the matter before the Court.

II. DEFENDANT'S MOTION TO DISMISS IS DENIED BECAUSE THE UNITED STATES HAS STANDING AND THE SUIT IS NOT BARRED BY RES JUDICATA OR COLLATERAL ESTOPPEL.

Defendant moves to dismiss Plaintiff's Complaint for Declaratory Judgement on three grounds: (a) res judicate; (b) standing; and, (c) collateral estoppel.

(a) Defendant contends that because the instant case is virtually identical to the case of *DC* v. *USCHS*, this Court's remand of the latter case bars this action under the doctrine of res judicata. The Court disagrees. This Court's Order of March 22, 1982 struck the third party complaint filed by the USCHS against the United States and then remanded the case to the Superior Court because the grounds for removal were eliminated once the United States was no longer a party. The Order merely determined that USCHS had not filed a proper third party complaint against the United States under Rule 14(a) Fed. R. Civ. Pro., as the District of Columbia argued at that time.[5] At most, this Order could bar USCHS from refiling the third party complaint against the United States in the case of *DC* v. *USCHS* and again seeking removal. But it does not preclude the filing of the instant case which is a separate action brought by the United States to protect its sovereign rights.

In this action, jurisdiction is clearly conferred upon this Court by 28 U.S.C. § 1345. See *United States v. District of Columbia*, 669 F. 2d 738, 741-42 (D.C. Cir. 1981) (hereinafter *"US* v. *DC"*).

(b) The defendant alleges that the United States does not have standing to bring this complaint because, first, it has suffered no injury and second, the USCHS is not a federal agency. The Court rejects these arguments.

The requirements for standing in a suit brought by the United States are not the same as for a private person. *United States* v. *City of Jackson, Mississippi*, 318 F. 2d 1, 15 (5th Cir. 1963). The United States need not show that it has suffered pecuniary harm. *United States* v. *County of Arlington, Virginia*, 669 F. 2d. 925 (4th Cir. 1982); *United States* v. *Lewisburg Area School District*, 539 F. 2d 301 (3d Cir. 1976). Rather, the United States may sue to vindicate its own policies and authority, to enforce laws of the United States, and to protect its sovereign rights. *United States* v. *County of Arlington, Virginia, supra* at 928-29; *1 Moore's Federal Practice* ¶0.65 [1-1] n.2 at 700.81 (2d ed 1982). In this case, the United States is doing precisely that—it is suing to protect its sovereign right to be immune from taxation. If immunity from taxes imposed by the District exists, it is on behalf of the United States either because USCHS is a federal instrumentality or because it operates in a federal enclave. The USCHS' right to be free of the taxes is solely derivative. See *United States* v. *Bureau of Revenue*, 291 F. 2d 677, 679 (10th Cir. 1961). Thus, the United States is the real party in interest and clearly has standing to sue to enforce its sovereign rights.

(c) Finally, defendant argues that plaintiff is collaterally estopped from claiming tax immunity because it abandoned that argument at an early stage in *US* v. *DC*, 669 F. 2d 738 n.1 (D.C. Cir. 1981) and the Circuit Court rejected the argument. The Court finds, however, that collateral estoppel does not apply in this case because the issues presented here are not the same issues decided in *US* v. *DC*. Collateral estoppel only applies to issues actually raised and concluded in the prior action. *Brown* v. *Felsen*, 442 U.S. 127 (1979). The issues in the instant case are different from those in *US* v. *DC* in two respects. First, the United States did not argue that the organization in *US* v. *DC* was entitled to tax immunity as a federal instrumentality. Instead, that case focused on the legal incidence of the tax and statutory sections exempting sales *to* the United States. Second, this case asserts federal tax immunity by virtue of USCHS being located on the grounds of the Federal Capitol—a federal enclave. This question did not arise in *US* v. *DC*.

Thus, the United States does have standing to bring the above entitled action and its claim is not barred by either res judicata or collateral estoppel. Defendant's Motion to Dismiss is, therefore, denied.

III. PLAINTIFF'S MOTION FOR SUMMARY JUDGMENT IS GRANTED BECAUSE THE USCHS IS A FEDERAL INSTRUMENTALITY IMMUNE FROM TAXATION

The plaintiff presents two questions for decision on summary judgment. The first question is whether the USCHS is a federal instrumentality entitled to federal tax immunity under the Supremacy Clause. The second question is whether the District of Columbia is barred from imposing a sales tax on persons or organizations with respect to activities conducted on the Capitol Grounds because the grounds constitute a federal enclave within the federal government's exclusive jurisdiction. The Court grants plaintiff's motion because it holds that the USCHS is a federal instrumentality. The Court therefore finds it unnecessary to consider the second question presented.

There is no simple test for determining when an entity is so closely related to the government as to be a federal instrumentality immune from taxation. As noted by the Supreme Court, it often seems that "the line between the taxable and the immune has been drawn by an unsteady hand." *United States* v. *County of Allegheny*, 322 U.S. 174 (1944). *See also United States* v. *New Mexico*, 102 S.Ct. 1373, 1380-81 (1982) (Courts decisions in the area of tax immunity fail to speak with one voice). Yet, by examining the cases in which the Supreme Court has found that an entity is a federal instrumentality, it is possible to discern a number of factors that aid in making such a determination. The foremost cases in this area that are of use in the matter at hand are *Department of Employment* v. *United States*, 385 U.S. 355 (1966) in which the Supreme Court held that the American National Red Cross is a federal instrumentality and *Standard Oil Co.* v. *Johnson*, 316 U.S. 481 (1942) in which the Supreme Court held that army post exchanges are federal instrumentalities.

Applying the factors that the Supreme Court has relied upon in its federal instrumentality cases to the case at hand, the Court finds that the USCHS is a federal instrumentality entitled to tax exempt status. Like the Red Cross, the USCHS operates pursuant to federal charter and is audited by the federal government. It is subject to government supervision in that the items sold at the Visitors Center (including items of general merchandise) must be approved by the Architect of the Capitol in consultation with the relevant House and Senate committees. The day to day operations of the USCHS and the Visitors Center are not under direct government control. But the Supreme Court has noted that this fact does not mean that the organization in question is not a federal instrumentality. Neither the Red Cross in *Department of Employment* nor the post exchanges in *Johnson* were directly controlled by the United States, yet the Court found both to be federal instrumentalities.

Unlike the Red Cross, USCHS is not headed by a Presidential appointee. Nor is the President of USCHS a government employee as are the officers in charge of post exchanges. Rather, the USCHS is headed by a President elected by the membership. However, the USCHS does have an Honorary Board of Trustees. The President and Vice President of the United States and other distinguished government figures are members of the Board. This is an indication of the unusual relationship the USCHS has with the federal government.

Perhaps the most important factor in this Court's determination that the USCHS is a federal instrumentality is that all profits of the Society are dedicated to achieving its purposes: "to preserve and improve the Capitol, research, publish, create items, medals and materials of historical interest and to cooperate with congressional committees and federal agencies in the work of the Society and the distribution of its products." Congressional Charter for USCHS, Pub. L. No. 95-493 (October 20, 1978). None of the Society's profits inure to the benefit of its members. Instead, the moneys are used to advance a national cause.

The Supreme Court highlighted the important of this factor in *Johnson* where it pointed out that none of the profits from the post exchange went to individuals, rather, all earnings were used to add to the pleasure and comfort of the troops. 316 U.S. at 485. The Court further noted the importance of this factor in *United States* v. *Livingston*, 179 F. Supp. 9 (E.D.S.C. 1959), *aff'd* 364 U.S. 281 (1960), when it affirmed a district court's ruling that a private corporation that contracted with the government to perform services for one dollar was the alter ego of the government and thus tax immune. In that case the Court stressed the fact that the corporation was acting "out of a high sense of public responsibility." *Id.* at 23. *Cf. United States* v. *Boyd*, 378 U.S. 39 (1964) (contractors for profit held not federal instrumentalities—key element is use of property in connection with own commercial activities). Like the contractor in *Livingston*, the USCHS conducts all of the activities in which it engages as a patriotic service, with no prospect of monetary gain for any of the individuals involved. This factor weighs heavily in favor of finding that the USCHS is a federal instrumentality.

In considering cases in which an organization claimed to be a federal instrumentality, the Supreme Court has also focused on the financial relationship between the entity and the government. In *Department of Employment*, the Court cited as a factor in its decision the fact that the Red Cross receives substantial government contributions. Yet, in *Johnson*, the Court concluded that post exchanges were federal instrumentalities despite the fact that the government assumed none of the risk of their operation. Similarly, the USCHS bears all financial risk and burden of its activities. Yet, on the other hand, it is given substantial government assistance in the form of rent free space in the Nation's Capitol in which it op-

[5] Memorandum of Points and Authorities in Support of Plaintiff District of Columbia's Motion to Strike Third-Party Complaint and to Remand Case to the Superior Court of the District of Columbia at pp. 4-5 (February 16, 1982).

erates the Visitor's Center. Thus, the USCHS' financial relationship with the government demonstrates both the independence found in *Johnson* and the interdependence evident in the *Department of Employment.*

Another of the most significant factors in a determination that an entity is a federal instrumentality is that the entity performs an essential function for the government. The USCHS does perform such a function. It provides valuable services as the principal historian for the United States Capitol. The USCHS also provides services to Congress. A majority of the sales made by the USCHS are of the "We the People" calendar and 93% of these calendars are sold to members of Congress who give them to their constituents. Additionally, by operating the Visitor's Center the USCHS provides education, information and convenience to Congress and visitors to the Capitol. The Court finds that the USCHS is an "instrumentality so closely connected to the government that the two cannot realistically be viewed as separate entities, at least insofar as the activity being taxed [— here the operation of Capitol Visitor's Center—] is concerned." *United States* v. *New Mexico,* 102 S. Ct. 1373, 1382 (1982).

In arguing that USCHS is not a federal instrumentality the District of Columbia points to two provisions in the contract providing for operation of the Visitor's Center. These provisions state that the USCHS is not an agent of the United States and that the USCHS agrees to hold the United States harmless for any claims against the Society. But this argument confuses agency with federal instrumentality status. The federal government may not be liable for torts of employees of its instrumentalities but it is liable for acts committed by agents of the government. Thus, an entity need not be in an agency relationship with the United States to be a federal instrumentality. For example, the Red Cross is not an agency of the United States but it is an instrumentality. *Department of Employment* v. *United States,* 385, U.S. 355 (1966). See also *United States* v. *New Mexico,* 102 S. Ct. 1373, 1383 (1982) ("a finding of constitutional tax immunity requires more than the invocation of traditional agency notions"). Thus, although these contract provisions establish that USCHS is not an agent of the government they do not effect a finding that the USCHS is a federal instrumentality.

Having held that the USCHS is a federal instrumentality the Court necessarily must conclude that the USCHS is exempt from taxation.[6] "Under the Supremacy Clause, as interpreted in a line of cases dating to *McCulloch* v. *Maryland,* 17 U.S. (4 Wheat.) 316, 436-37 (1819), federal instrumentalities are immune from taxation by a State, unless such taxation is specifically authorized by Congress. *See e.g., First National Bank* v. *State Tax Commission,* 392 U.S. 339 (1968); *Smith* v. *Kansas City Title Trust Co.,* 255 U.S. 180, 212-13 (1921); *United States* v. *States Tax Commission,* 481 F.2d 963, 969 (1st Cir. 1973)." *United States* v. *Maine,* 524 F.Supp. 1056, 1058 (D. Me. 1981). The Court finds that Congress did not specifically authorize the District of Columbia to tax the USCHS. Although the District is regulated by Congress, Section 47-2605(m) of the D.C. Code limits the District of Columbia's taxing power to the same extent that the states are limited by the federal constitution. *United States* v. *District of Columbia,* 669 F.2d 738, 747 (D.C. Cir. 1981). Thus, because states would be barred from taxing a federal instrumentality—here the USCHS—the District of Columbia too is precluded from exacting such a tax.

An Order in accordance with the foregoing shall be issued of even date with this Opinion.

CHARLES R. RICHEY,
September 2, 1982.

[U.S. District Court for the District of Columbia, Civil Action No. 82-0923]

UNITED STATES OF AMERICA, PLAINTIFF, V. DISTRICT OF COLUMBIA, DEFENDANT

ORDER

Upon consideration of Plaintiff's Motion to Stay, Defendant's Motion to Dismiss and Plaintiff's Motion for Summary Judgment and the oppositions to these motions and the entire record in this case, it is, by the Court, this 2nd day of September, 1982, hereby,

Ordered that Plaintiff's Motion to Stay is dismissed as moot; and it is further,

Ordered that Defendant's Motion to Dismiss is denied; and it is further,

Ordered that Plaintiff's Motion for Summary Judgment is granted.

CHARLES R. RICHEY,
U.S. District Judge.

UNITED STATES CAPITOL HISTORICAL SOCIETY EXEMPTION FROM DISTRICT OF COLUMBIA SALES TAX

REPORT TO ACCOMPANY H.R. 4491

[Including cost estimate of the Congressional Budget Office]

The Committee on the Judiciary, to whom was referred the bill (H.R. 4491) having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass,.

The amendment is as follows:

On page 1, line 9, strike "the corporation" and all that follows thereafter and insert in lieu thereof: "or title 47, chapter 26 of the District of Columbia Code (1973), or any other provision of the District of Columbia Code, the corporation shall not be required to pay, collect, or account for any tax specified in such sections applicable to taxable events occurring within the United States Capitol building and grounds on or after January 1, 1964."

PURPOSE

The bill, as amended by the subcommittee, amends the charter of the United States Capitol Historical Society to make it clear that the Society is not subject to the District of Columbia sales tax.

STATEMENT

The Subcommittee on Administrative Law and Governmental Relations of the House Judiciary Committee held a hearing on the bill H.R. 4491 on December 9, 1981. At that hearing, the subcommittee heard testimony in favor of H.R. 4491 from the Honorable Frederick D. Schwengel, President of the United States Capitol Historical Society (hereinafter referred to as the Society), Mr. George M. White, Architect of the Capitol and Mr. Cornelius W. Heine, Executive Secretary of the Society.

The Society was chartered as a non-profit corporation in the District of Columbia in 1962. On January 1, 1964 the Society commenced operation of an information center which, among other activities, engaged in the sale of historical and souvenir items in the United States Capitol. The relationship between the Society and the Congress was formalized in 1968 with enactment of the National Visitors Center Facilities Act of 1968.[1]

Pursuant to this Act, the Architect of the Capitol is authorized and directed to provide space and facilities in the Capitol Building for an educational and informational center and information and distribution stations for the benefit of visitors to the Capitol. Pursuant to this mandate, the Architect of the Capitol entered into an agreement with the Society on May 16, 1968, since renewed on an annual basis, to operate such a center and stations in the Capitol Building. The purpose of these facilities is to make information and assistance relative to Congressional offices and the Capitol and its history, as well as pamphlets, books, drawings, slides and photographs and related materials available to visitors to the Capitol. In accordance with the Act, all materials offered for sale by the Society are first approved by the Architect of the Capitol after consultation with the House Committee on House Administration, the Senate Committee on Rules and Administration, and the Society.[2]

In addition to these valuable public services, the Society, pursuant to its agreement with the Architect of the Capitol, utilizes a significant portion of the proceeds from the operation of the Capital Visitor Center to fund the acquisition, subject to the approval of the Joint Committee on the Library, of works of art and objects of historical interest for display in the United States Capitol. One such program is the decoration of the first floor corridors in halls of the House wing of the Capitol by the noted American muralist, Allyn Cox.

The Society was granted a federal charter pursuant to Public Law 95-493, approved October 20, 1978.[3] One object of the Society set forth in the charter is "to mutually cooperate with the standing committees of Congress, the Architect of the Capitol, and relevant departments and agencies of the Executive branch of the Federal government in furthering the objectives of the (society)".[4]

---

[6] This case is different than other cases dealing with federal instrumentalities and tax immunity in that here the District seeks to tax sales *by* a federal instrumentality rather than *to* such an entity. However, the Court concludes that this distinction does not require a different result.

[1] 40 U.S.C. 831 (1976 ed., Title III, 82 Stat. 46, 1968).

[2] *Id.* "All materials . . . shall first be approved by the Architect of the Capitol after consultation with the House Committee on House Administration, the Senate Committee on Rules and Administration, the United States Capitol Historical Society and such other educational and historical groups as the Architect of the Capitol deems appropriate."

[3] 36 U.S.C. 1201 *et. seq.* (1976 ed., Supp. III).

[4] *Ibid.* § 1203(d). The other objects and purposes of the Society are as follows:

The objects and purposes of the corporation shall be—

(a) to encourage in the most comprehensive and enlightened manner an understanding by the American people of the founding, growth, and significance of the Capitol of the United States of America as the tangible symbol of their representative form of government;

(b) to undertake research into the history of the Congress and the Capitol and to promote the discussion, publication, and dissemination of the results of such studies;

(c) to foster and increase an informed patriotism of the land in the study of this living memorial to the founders of this Nation and the continuing thread of principles as exemplified by their successors; and

(d) to mutually cooperate with the standing committees of the Congress, the Library of Congress,

On November 6, 1981, the District of Columbia brought an action in the Superior Court of the District of Columbia against the Society and, in his representative capacity, its president, Mr. Frederick D. Schwengel, to recover unpaid sales taxes and for declaratory and injunctive relief.[5] On November 27, 1981, the Society answered the District's complaint and joined the United States as a third-party defendant in the suit. At the request of the Architect of the Capitol, the Department of Justice is representing the Society in this lawsuit.

The Government of the District of Columbia has asserted a sales tax collection liability against the Society in the amount of $743,228.61 with respect to sales of approved materials in the United States Capitol made subsequent to August 1, 1966. On January 19, 1981, a "Notice of District Tax Lien" reflecting this asserted tax liability was filed with the Recorder of Deeds by the D.C. Government.

Congress has provided the states and localities with authority to levy sales and use taxes in Federal areas within the jurisdiction of the states in the "Buck Act".[6] The provisions of the "Buck Act" are not explicitly applicable to the District of Columbia since the District of Columbia is not included within the definition of "state" in the Act.[7] The District of Columbia Government has alleged [8] that sales by the Society in the United States Capitol are subject to tax pursuant to the District of Columbia Code.[9]

Facts presented in testimony before the subcommittee and supported by historical research indicate that the Society should clearly not be subject to the taxing authority of the Government of the District of Columbia. The historical record reflects that the District of Columbia does not now have, nor has it ever had jurisdiction over the site of the United States Capitol Building where all of the allegedly taxable sales occurred. In addition, the course of dealings between the Architect of the Capitol and the Society pursuant to the National Visitors Facilities Act of 1968 indicate that the Society is an instrumentality of the Congress.

The record clearly shows, as a matter of historical perspective, that the land upon which the U.S. Capitol stands was part of original Reservation Number Two (which, in its entirety, included the Capitol, portions of the Capitol Grounds and the Mall east of Fifteenth Street West). Reservation Number Two along with sixteen other parcels within what is now the District of Columbia was acquired by the United States under proclamations of Presidents Washington and Adams, dated March 2, 1797 and July 23, 1798, respectively,[10] whereas the District of Columbia was created by Congress and became a federal district in the year 1800.[11] The texts of the proclamations by Presidents Washington and Adams are reprinted as Appendix 1. A map indicating those parts of the United States Capitol grounds which are a part of Reservation Number Two is reprinted as Appendix 2.

The seventeen parcels originally reserved for public use and placed under the control of the Federal Commissioners in 1797 are still public lands. Those original reservations are indicated on maps reprinted as Appendices 3 through 7. The National Capitol Parks Office of the National Park Service is the Federal agency with jurisdiction over most of the land [12] included in these seventeen reservations.[13] Other parcels are currently under the jurisdiction of the General Services Administration,[14] the United States Army,[15] the United States Navy,[16] the Smithsonian Institution [17] and the District of Columbia Government.[18]

The land comprising the site of the United States Capitol Building where the sales allegedly subject to the taxing authority of the District of Columbia government occurred is and has been an enclave subject to the exclusive jurisdiction of the Federal government since 1797, three years before the establishment of the District of Columbia.[19] Until 1828, the Architect of the Capitol exercised jurisdiction over the United States Capitol Building. The Commissioner of Buildings and Grounds assumed the duties of the Architect of the Capitol and the Office of the Architect was abolished in 1828.[20] The Chief of Engineers of the Army assumed the duties of the Commissioner of Buildings and Grounds including the jurisdiction over the United States Capitol Building, and the office of Commissioner of Buildings and Grounds was abolished in 1867.[21] In 1876, the duties of the Chief of Engineers of the Army relative to the United States Capitol Building were transferred to the Architect of the Capitol.[22] The name of the Office of Architect of the Capitol was changed to "Superintendent of the Capitol Building and Grounds" in 1902,[23] but the original appellation of the office was restored in 1922.[24] The current jurisdiction of the Architect, namely the United States Capitol Grounds is defined by statute [25] and includes the site of the United States Capitol Building.[26]

The exclusivity of the Federal jurisdiction over the Capitol is further demonstrated by the Federal statutes governing the conduct of individuals on the United States Capitol grounds. Such conduct as sales, pedestrian and motor traffic, advertising, solicitation, possession of weapons, parades, assemblages and concerts are governed by provisions of the United States Code.[27] Pursuant to Federal statute, the United States Capitol Police has exclusive jurisdiction over law enforcement on the Capitol grounds.[28] The only traffic laws promulgated by the District of Columbia in force on the streets within the United States Capitol grounds are those specifically enumerated by Federal statute.[29] The nature and extent of Federal statutes specifically defining the jurisdiction of the District of Columbia over the United States Capitol grounds are consistent with the legal status of the U.S. Capitol Building and grounds as a Federal enclave not subject to the jurisdiction of the District of Columbia.

The Committee concludes that the United States Capitol Building and grounds are within the exclusive jurisdiction of the Federal government and that the taxing authority of the District of Columbia does not and should not extend to sales within this Federal enclave.

In addition, the de jure and de facto relationship between the United States Capitol

---

the Architect of the Capitol, and relevant departments and agencies of the executive branch of the Federal Goernment in furthering the objectives of the corporation.

Historical Society and the Federal government indicate that the Society is an instrumentality of the Federal government and therefor not subject to the taxing authority of the District of Columbia government, if in fact that government has taxing authority over any Federal area pursuant to the "Buck Act".[30] Pursuant to the "Buck Act", inferior governments are authorized to assert their authority to levy sales tax on taxable events occurring in Federal areas within their jurisdictions. However, the provisions of the "Buck Act" specifically do not authorize the "levy or collection of any tax on or from the United States or any instrumentality thereof.[31]

Webster's defines "instrument" as "a means whereby something is achieved, performed, or furthered; one used by another as a means or aid".[32] Black's defines "instrumental" as "serviceable, helpful".[33] There is no doubt that the United States Capitol Historical Society has been of service and help to the United States in furthering, performing and achieving the functions mandated by title III of the National Visitors Center Facilities Act of 1968.[34] Title III provides as follows:

"Notwithstanding any other provision of law, the Architect of the Capitol, in consultation with the House Office Building Commission and the Senate Office Building Commission, is hereby authorized and directed to provide adequate space and facilities in the Capitol Building for an educational and informational center and information and distribution stations to afford visitors to the Capitol Building an opportunity to acquire (1) information relative to Congressional offices, (2) assistance relative to their visit to the Capitol, (3) pamphlets, books, drawings, slides and photographs, and related materials, and (4) information about the Capitol and the history of the Capitol Building and past and present Congresses. All materials distributed by such educational and informational center and such stations shall first be approved by the Architect of the Capitol, after consultation with the House Committee on House Administration, the Senate Committee on Rules and Administration, the United States Capitol Historical Society, and such other educational and historical groups as the Architect of the Capitol deems appropriate. The Architect of the Capitol is hereby authorized to enter into such agreements as may be reasonably necessary to operate such educational and informational center and stations."

The 1968 Act formalized a relationship between the Society and the Congress that had existed since 1964. Since 1968, the United States Capitol Historical Society had conducted its sales operation in the Capitol Building pursuant to contract with the Architect of the Capitol as authorized and directed by law. The sale of historical materials, relics, souvenirs, art and other items to visitors to the Capitol furthers the explicit goals of the Visitors Center Facilities Act in two ways. The sales facilitate the visitors' direct acquisition of available pamphlets, books, slides, photographs and related materials as well as information about the Capitol. Moreover, since the Society uses proceeds from the sales to improve the Capitol Building, to create new educational materials and to research the history of the Capitol, the sales indirectly further the goals of the Act by expanding the selection of available materials. Thus, sales by the Society are instrumental to the accomplishment of the tasks authorized and directed by the law of the United States, and the Committee concludes tht the Distrit of Columbia does not and should not have the authority to tax such sales pursuant to the "Buck Act".

CONCLUSION

For reasons enumerated above, the Committee on the Judiciary favors amending the Federal charter of the National Capitol Historical Society to make it clear that the Society is not subject to the District of Columbia sales tax, and recommends that this bill as amended to pass.

STATEMENTS UNDER CLAUSE 2(l)(2)(B), CLAUSE 2(l)(3)(A), CLAUSE 2(l)(3)(B), CLAUSE 2(l)(3)(D) AND CLAUSE 2(l)(4) OF RULE XI, AND CLAUSE 7(A)(1) OF RULE XIII

COMMITTEE VOTE

(Rule XI(2)(l)(2)(B))

On March 3, 1982, the full Committee on the Judiciary approved the bill, H.R. 4491, as amended, by voice vote.

OVERSIGHT STATEMENT

(Rule XI(2)(l)(3)(A))

The Subcommittee on Administrative Law and Governmental Relations of this Committee exercises the Committee's oversight responsibility with reference to Federal charter legislation in accordance with Rule VI(b) of the Rules of the Committee. The favorable consideration of this bill was recommended by that Subcommittee and the Committee has determined that the legislation should be enacted as set forth in this bill.

BUDGET STATEMENT

(Rule XI(2)(l)(3)(B))

The bill does not directly provide budget authority nor does it involve new or increased tax expenditures contemplated by Clause 2(l)(3)(B) of Rule XI.

OVERSIGHT FINDINGS AND RECOMMENDATIONS OF THE COMMITTEE ON GOVERNMENT OPERATIONS

(Rule XI(2)(l)(3)(D))

No findings or recommendations of the Committee on Government Operations were received as referred to in subdivision (D) of clause 2(l)(3) of House Rule XI.

INFLATIONARY IMPACT

(Rule XI(2)(l)(4))

In compliance with clause 2(l)(4) of House Rule XI, it is stated that this legislation will have no inflationary impact on prices and costs on the operation of the national economy.

COST

(Rule XIII(7)(a)(1)

The costs are those outlined in the cost estimate of the Congressional Budget Office included in this report.

ESTIMATE OF THE CONGRESSIONAL BUDGET OFFICE

(Rule XI(2)(l)(3)(C))

[The following estimate was received from the Director of the Budget Office:]

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 4, 1982.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed H.R. 4491, a bill to exempt the United States Capitol Historical Society from certain taxes, as ordered reported by the House Committee on the Judiciary, March 3, 1982.

This bill would exempt the activities of the Society from the District of Columbia sales tax. Based on this review, it is expected that no additional cost to the Federal Government would be incurred as a result of enactment of this legislation.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

RAYMOND C. SCHEPPACH
(For Alice M. Rivlin, Director).

CHANGES IN EXISTING LAW

In compliance with paragraph 2 of clause 3 of rule XIII of the rules of the House of Representatives, changes in existing law made by the bill are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

TITLE 36—PATRIOTIC SOCIETIES AND OBSERVANCES

* * * * *

(Public Law 95-493, 92 Stat. 1643, 1978)

AN ACT To incorporate the United States Capitol Historical Society

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following persons:

Honorable Fred Schwengel, Washington, District of Columbia;

Honorable Marguerite Stitt Church, Evanston, Illinois;

Doctor Melvin M. Payne, Washington, District of Columbia;

Carl Haverlin, Northridge, California;

Doctor Walter Rundell, College Park, Maryland;

Victor M. Birely, Washington, District of Columbia;

Arthur B. Hanson, Esquire, Washington, District of Columbia;

Mrs. Adlai Stevenson III, Hanover, Illinois;

Mrs. Florian Thayn, Washington, District of Columbia;

and their successors are hereby created and declared to be a body corporate of the District of Columbia having the name "United States Capitol Historical Society" (hereinafter the corporation"). The said corporation shall have perpetual existence and the powers, limitations, and restrictions herein contained.

COMPLETION OF ORGANIZATION

SEC. 2. The persons named in the first section of this Act are authorized to complete the organization of the corporation by the selection of officers and employees, the adoption of a constitution and bylaws, not inconsistent with this Act, and the doing of such other acts as may be necessary to carry out the provisions of this Act.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation shall be—

(a) to encourage in the most comprehensive and enlightened manner an understanding by the American people of the founding, growth, and significance of the Capitol of the United States of America as the tangible symbol of their representative form of government;

(b) to undertake research into the history of the Congress and the Capitol and to promote the discussion, publication, and dissemination of the results of such studies;

(c) to foster and increase an informed patriotism of the land in the study of this living memorial to the founders of this Nation and the continuing thread of principles as exemplified by their successors; and

(d) to mutually cooperate with the standing committees of the Congress, the Library of Congress, the Architect of the Capitol, and relevant departments of agencies of the executive branch of the Federal Government in furthering the objectives of the corporation.

POWERS OF THE CORPORATION

SEC. 4. The corporation shall have the power—

(a) to sue and be sued, complain, and defend in any court of competent jurisdiction;

(b) to adopt, alter, and use a corporate seal;

(c) to choose officers, managers, and agents as the business of the corporation may require;

(d) to charge and collect membership dues;

(e) to adopt, amend, apply, and alter a constitution and bylaws not inconsistent with the laws of the United States of America or any State in which the corporation is to operate, for the management of its property and the regulation of its affairs;

(f) to contract and be contracted with;

(g) to take hold by lease, gift, purchase, grant, devise, bequest, or otherwise any property, real, personal, or mixed, necessary or convenient for attaining the objects of the corporation, subject, however, to applicable provisions of law of any State (1) governing the amount or kind of real and personal property which may be held by, or (2) otherwise limiting or controlling the ownership of real and personal property which may be held by, or (3) otherwise limiting or controlling the ownership of real and personal property by, a corporation operating in such State;

(h) to transfer, lease, or convey real or personal property;

(i) to borrow money for the purposes of the corporation and issue bonds or other evidences of indebtedness therefor and secure the same mortgage or pledge subject to applicable Federal or State laws;

(j) to conduct campaigns for raising of funds and to accept contributions from individuals, corporations, and other bodies, foundations, and organizations;

(k) to print, to create and distribute commemorative medals, edit and publish, make, display, and sell books and magazines, pictures, slides, and cinemas, as may be necessary or desirable for the accomplishment of the purposes of the corporation;

(l) to buy, sell, and generally deal in appropriate and related souvenirs, commemorative medals, curios, momentos, and publications; and

(m) to do any and all acts necessary and proper to carry out the purposes of the corporation.

PRINCIPAL OFFICE; TERRITORIAL SCOPE OF ACTIVITIES; RESIDENT AGENT

SEC. 5. (a) The principal office of the corporation shall be located in Washington, District of Columbia, or in such other place as may later be determined by the board of directors, but the activities of the corporation shall not be confined to that place and may be conducted throughout the various possessions of the United States.

(b) The corporation shall have in the District of Columbia at all times a designated agent authorized to accept service of process for the corporation, and notice to or service upon such agent or mailed to the business address of such agent shall be deemed as service or notice upon the corporation.

MEMBERSHIP

SEC. 6. Eligibility for membership in the corporation and the rights and privileges of members shall, except as provided in this Act, be determined as the constitution and bylaws of the corporation may provide.

ACTIVE BOARD OF TRUSTEES

SEC. 7. (a) The control and management of the affairs and funds of the corporation shall be vested in its active board of trustees which, exclusive of ex officio and honorary members, shall consist of not more than forty active members and not less than twelve active members, one of whom shall be elected chairman.

(b) The term of an active trustee of the board shall be four years in duration and, exept by the unanimous vote of the members of the board of trustees present and voting, no active trustee may be reelected as an active trustee until after a lapse of one year from the expiration of his term as active trustee.

(c) The board of trustees shall meet not less than once annually in the Capitol of the United States at Washington, District of Columbia, and at such other times as may be determined by the chairman. No meeting of the board of trustees may be held except pursuant to a time and place stated in the bylaws or upon thirty days written notice in advance of any such meeting.

(d) Trustees of the corporation shall be elected by action of the active board of trustees. Trustees may be removed by the vote of two-thirds of the other active trustees at any time with or without cause.

OFFICERS OF THE CORPORATION

SEC. 8. (a) The officers of the corporation shall be a president, who shall be the chief executive officer, five vice presidents, a treasurer, and a secretary.

(b) During their respective terms of office, the officers of the corporation shall be ex officio members of the board with all the rights and privileges of a trustee including the right to vote. Officers may receive compensation or other remuneration for their services as determined by the board of trustees, and they may be reimbursed for their actual expenses.

(c) Officers of the corporation shall be elected annually by action of the board of trustees and shall continue in office at the pleasure of the board.

(d) The duties of the officers of the corporation shall be such additional duties as may be delegated by the board of trustees.

(e) The board of trustees may employ an executive secretary and such other paid personnel as may be needed to assist the officers and the board and to accomplish the programs and business of the corporation. The board shall fix the compensation and prescribe the duties of the executive secretary and such other paid personnel who shall serve at the pleasure of the board.

USE OF INCOME: LOANS TO OFFICERS, TRUSTEES, OR EMPLOYEES

SEC. 9. (a) No part of the income or assets of the Corporation shall inure to any of its members, trustees, or officers, as such, or be distributable to any of them during the life of the corporation or upon its dissolution or final liquidation. Nothing in this subsection, however, shall be construed to prevent the payment of reasonable compensation to officers or employees of the corporation or reimbursement for actual expenses in amounts approved by the board of trustees of the corporation.

(b) The corporation shall not make loans to its officers, trustees, or employees. Any director who votes for assets to the making of a loan or advance to an officer, director, or employee of the corporation, and any officer who participates in the making of such loan or an advance shall be jointly and severally liable to the corporation for the amount of such loan or advance until the repayment thereof.

LIABILITY FOR ACTS OF OFFICERS AND AGENTS

SEC. 10. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

PROHIBITION AGAINST ISSUANCE OF STOCK OR PAYMENT OF DIVIDENDS

SEC. 11. The corporation shall have no power to issue any shares of stock or to declare or pay any dividends.

BOOKS AND RECORDS: INSPECTION

SEC. 12. The corporation shall keep correct and complete books and records of account and shall keep minutes of the proceedings of its members, board of trustees, and committees having any authority under the board of trustees, and it shall also keep at its principal office a record of the names and addresses of its members entitled to vote. All books and records of the corporation may be inspected by any member entitled to vote, or the agent or attorney of such member, for any proper purpose, at any reasonable time.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 13. (a) The provisions of sections 2 and 3 of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1102, 1103), shall apply with respect to the corporation.

(b) The corporation shall comply with the provisions of Public Law 91-510, section 451, October 26, 1970.

USE OF ASSETS ON DISSOLUTION OR LIQUIDATION

SEC. 14. Upon dissolution or final liquidation of the corporation, after discharge or satisfaction of all outstanding obligations and liabilities, any remaining assets of the corporation shall be distributed in accordance with the determination of the board of trustees of the corporation and in compliance with the constitution and bylaws of the corporation and all Federal and State laws applicable thereto.

EXCLUSIVE RIGHT TO NAME, EMBLEM, SEALS, AND INSIGNIA

SEC. 15. The corporation shall have the sole and exclusive right to the name "United States Capitol Historical Society" and to have and use in carrying out its purpose, distinctive insignia, emblems, seals, description or designating marks, and words or phrases, as may be required in the furtherance of its functions. Nothing in this section

shall be construed to interfere or conflict with established or vested rights.

ACQUISITION OF ASSETS AND LIABILITIES OF EXISTING CORPORATION

SEC. 16. The corporation may acquire the assets of the United States Capitol Historical Society, a corporation incorporated under the laws of the District of Columbia. The United States Capitol Historical Society shall retain and maintain its existing status as a corporation incorporated under the laws of the District of Columbia or a State.

ANNUAL REPORT

SEC. 17. The corporation shall, as soon as practicable after the end of each fiscal year, submit a report to each House of the Congress with respect to the activities of the corporation during the preceding fiscal year.

RESERVATION OF RIGHT TO AMEND OR REPEAL ACT

SEC. 18. The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

EXEMPTION FROM CERTAIN TAXES

SEC. 19. Notwithstanding section 105 of title 4, United States Code, or title 47, chapter 26 of the District of Columbia Code (1973), or any other provision of the District of Columbia Code, the Corporation shall not be required to pay, collect, or account for any tax specified in such sections applicable to taxable events occurring within the United States Capitol building and grounds on or after January 1, 1964.

APPENDIX 1

ORIGINAL RESERVATION OF PUBLIC PROPERTY BY PRESIDENTS WASHINGTON AND ADAMS

GEORGE WASHINGTON, PRESIDENT OF THE UNITED STATES OF AMERICA

TO THOMAS BEALL OF GEORGE & JOHN M. GANTT:

You are hereby requested to convey all the streets in the City of Washington, as they are laid out and delineated in the Plan of the said City hereto annexed, and also the several squares, parcels, & lots of ground following, to wit:

First. The public appropriation beginning at the intersection of the south side of North H street, and at the west side of a street ninety feet in width, drawn parallel to the west side of square numbered two hundred and twenty-one, and running due south with the west side of said street until it intersects the south side of an east & west street, drawn parallel to the south front of said square, numbered two hundred and twenty-one, being ninety feet wide; thence east with the south side of said street until it intersects the west side of fifteenth street west; thence south with the west side of fifteenth street west until it intersects the north side of Canal street; thence westerly with the north side of Canal street until it intersects the east side of Seventeenth street west; thence north, with the east side of Seventeenth street west, until it intersects the south side of an east & west street of ninety feet wide, from the south side of square numbered One hundred & sixty-seven; thence east with the south side of said street until it intersects the east side of a north and South street of ninety feet wide, from the east side of Square numbered One hundred and Sixty-seven aforesaid; thence north with the east side of said street until it intersects the south side of North H Street; thence east with the south side of said street to the beginning.

Second. The public appropriation beginning at the intersection of the North side of an east and west street of ninety feet wide, from the north front of square numbered six hundred and eighty-eight, and the west side of first street east; thence west along the north side of said street until it intersects the west side of a north and south street, drawn at the distance of ninety feet from the west front of square numbered six hundred and eighty-eight; thence south with the west side of said street until it intersects the north side of South B street; thence west with the north side of south B street until it intersects the east side of first street west; thence north with the east side of first street west until it intersects the north side of Maryland Avenue; thence southwesterly with the north side of Maryland Avenue until it intersects the north side of south B street; thence west with the north side of south B street until it intersects the east side of fifteenth street west; thence north with the east side of fifteenth street west until it intersects the south side of Canal street, drawn at a distance of eighty feet, on the south side of said Canal; thence east with the south side of said street until it intersects the South side of Pennsylvania Avenue. Thence with the south side of Pennsylvania Avenue until it interesects the east side of first street west; thence north with the east side of first street west until it intersects the south side of North B street; thence east with the south side of North B street until it intersects the west side of a North and south street of ninety feet wide, drawn parallel to the west front of Square numbered Six hundred and eighty-seven; thence south with the west side of said street until it intersects the south side of an east & west street ninety feet wide, from the south front of Square numbered Six hundred and eighty-seven; thence east with the south side of said street until it intersects the west side of first street east; thence south with the west side of said street to the beginning.

Third. The public appropriation beginning at the intersection of the south side of Canal street, drawn on the south side of the Canal, and the west side of fifteenth street west. Thence south with the west side of fifteenth street west until it intersects the Potomac River. Thence northwesterly until it intersects the Canal; thence easterly with the Canal to the beginning.

Fourth. The public appropriation bounded on the north by the south side of north E street; on the east by the west side of twenty-third street west; on the west by the east side of twenty-fifth street west; and on the south by the Potomac River.

Fifth. The public appropriation bounded on the north by south T street; on the east by Canal street; on the south by the eastern branch, on Anacostia River; and on the west by the Potomac River.

Sixth. The public appropriation bounded on the north by north B street; on the west by twenty-first street west; on the east by twentieth street west; and on the south by the Potomac River.

Seventh. The public appropriation beginning at the intersection of the north side of the Canal street and the east side of ninth street west; thence north to the south side of an avenue, drawn in front of square numbered three hundred and eighty-two; Thence northeasterly with the south side of said Avenue until it intersects the south side of Pennsylvania Avenue; thence with the south side of said Avenue until it intersects the west side of Seventh street west; Thence with the west side of said street until it intersects Canal street; thence west with the north side of Canal street to the beginning.

Eighth. The public appropriation beginning at the intersection of the east side of ninth street west and the north side of an east and west street of One hundred feet wide, from the north fronts of squares numbered four hundred and six & four hundred and thirty; Thence north with the east side of said ninth street until it intersects the south side of an east and west street of ninety feet wide, from the south fronts of squares numbered four hundred and five and four hundred and twenty-nine; thence east with the south side of said street until it intersects the west side of seventh street west; thence south with the west side of seventh street until it intersects the north side of the east and west street first mentioned; Thence west with the north side of said street to the beginning.

Ninth. The appropriation beginning at the intersection of the east side of fifth street west and the south side of North G street; thence east with the south side of said G street until it intersects the west side of fourth street west; thence south with the west side of fourth street west until it intersects the north side of an avenue; Thence westerly, parallel with the north fronts of squares numbered five hundred and thirty-three and four hundred and ninety, until it intersects the east side of fifth street west, leaving the street equally wide; Thence with the east side of fifth street west to the beginning.

Tenth. The appropriation beginning at the intersection of the east side of four & a half street west and south side of North C street; Thence with the south side of said C street until it intersects the west side of third street west; thence south with the west side of said third street west until it intersects the North side of north B street; Thence west until it intersects the north side of Pennsylvania Avenue;

First. The public appropriation beginning at the intersection of the southside of North H street, and at the west side of a street ninety feet in width, drawn parallel to the west side of square numbered two hundred and twenty-one, and running due south with the west side of said street until it intersects the south side of an east & west street, drawn parallel to the south front of said square, numbered two hundred and twenty-one, being ninety feet wide; thence east with the south side of said street until it intersects the west side of fifteenth street west; thence south with the west side of fifteenth street west until it intersects the north side of Canal street; thence westerly with the north side of Canal street until it intersects the east side of Seventeenth street west; thence north, with the east side of Seventeenth street west, until it intersects the south side of an east & west street of ninety feet wide, from the south side of square numbered One hundred & sixty-seven; thence east with the south side of said street until it intersects the east side of a north and South street of ninety feet wide, from the east side of Square numbered One hundred and Sixty-seven aforesaid; thence north with the east side of said street until it intersects the south side of North H Street; thence east with the south side of said street to the beginning.

Second. The public appropriation beginning at the intersection of the North side of an east and west street of ninety feet wide, from the north front square numbered six hundred and eighty-eight, and the west side

of first street east; thence west along the north side of said street until it intersects the west side of a north and south street, drawn at the distance of ninety feet from the west front of square numbered six hundred and eighty-eight; thence south with the west side of said street until it intersects the north side of South B street, thence west with the north side of south B street until it intersects the east side of first street west; thence north with the east side of first street west until it intersects the north side of Maryland Avenue; thence southwesterly with the north side of Maryland Avenue until it intersects the north side of south B street; thence west with the north side of south B street until it intersects the east side of fifteenth street west; thence north with the east side of fifteenth street west until it intersects the south side of Canal street, drawn at a distance of eighty feet, on the south side of said Canal; thence east with the south side of said street until it intersects the South side of Pennsylvania Avenue; thence with the south side of Pennsylvania Avenue until it intersects the east side of first street west; thence north with the east side of first street west until it intersects the south side of North B street; thence east with the south side of North B street until it intersects the west side of a North and south street of ninety feet wide, drawn parallel to the west front of Square numbered Six hundred and eighty-seven; Thence south with the west side of said street until it intersects the south side of an east & west street ninety feet wide, from the south front of Square numbered Six hundred and eightyseven; Thence east with the south side of said street until it intersects the west side of first street east; Thence south with the west side of said street to the beginning.

Third. The public appropriation beginning at the intersection of the south side of Canal street, drawn on the south side of the Canal, and the west side of fifteenth street west. Thence south with the west side of fifteenth street west until it intersects the Potomac river. Thence northwesterly until it intersects the Canal; thence easterly with the Canal to the beginning.

Fourth. The public appropriation bounded on the north by the south side of north E Street; on the easy by the west side of twenty-third street west; on the west by the east side of twenty-fifth street west; and on the south by the Potomac River.

Fifth. The public appropriation bounded on the north by south T street; on the east by Canal street; on the south by the eastern branch or Annakostia River; and on the west by the Potomac River.

Sixth. The public appropriation bounded on the north by north B street; on the west by twenty-first street west; on the east by twentieth street west; and on the south by the Potomac River.

Seventh. The public appropriation beginning at the intersection of the north side of Canal street and the east side of ninth street west; thence north to the south side of an avenue, drawn in front of square numbered three hundred and eighty-two; Thence northeasterly with the south side of said Avenue until it intersects the south side of Pennsylvania Avenue; thence with the south side of said Avenue until it intersects the west side of Seventh street west; Thence with the west side of said street until it intersects Canal street; thence west with the north side of Canal street to the beginning.

Eighth. The public appropriation beginning at the intersection of the east side of ninth street west and the north side of an east and west street of One hundred feet wide, from the north fronts of squares numbered four hundred and six & four hundred and thirty; thence north with the east side of said ninth street until it intersects the south side of an east and west street of ninety feet wide, from the south fronts of squares numbered four hundred and five and four hundred and twenty-nine; thence east with the south side of said street until it intersects the west side of seventh street west; thence south with the west side of seventh street until it intersects the north side of the east and west street first mentioned; thence west with the north side of said street to the beginning.

Ninth. The appropriation beginning at the intersection of the east side of fifth street west and the south side of North G street; thence east with the south side of said G street until it intersects the west side of fourth street west; thence south with the west side of fourth street west until it intersects the north side of an avenue; Thence westerly, parallel with the north fronts of squares numbered five hundred and thirty-three and four hundred and ninety, until it intersects the east side of fifth street west, leaving the street equally wide; Thence with the east side of fifth street west to the beginning.

Tenth. The appropriation beginning at the intersection of the east side of four and a half street west and south side of North C street; Thence with the south side of said C street until it intersects the west side of third street west; thence south with the west side of said third street west until it intersects the North side of north B street; Thence west until it intersects the north side of Pennsylvania Avenue; Thence with the north side of said avenue until it intersects the east side of four and a half street west; Thence north with the east side of four and a half street west to the beginning.

Eleventh. The appropriation beginning at the intersection the east side of third street west and south side of north C street; thence east with the south side of said C street until it intersects the west side of second street west; thence south with the west side of second street west until it intersects the north side of north B street; Thence west with the north side of north B street until it intersects the east side of the third street west; Thence north with the east side of said third street west to the beginning.

Twelfth. The appropriation bounded on the North by B street north, on the east by second street west, on the southwest by Pennsylvania Avenue, and on the west by third street west.

Thirteenth. The appropriation bounded on the north by the south side of south B street, on the west by the east side of nineteenth street east, the south by the north side of south G street, and on the east by the eastern Branch, or Annakostia River.

Fourteenth. The appropriation bounded on the west by the east side of seventh street east, on the northwest by the south side of Georgia Avenue, on the north by the southside side of M street south, on the east by the west side of ninth street east, and on the south by the eastern Branch, or Annakostia River.

Fifteenth. The public appropriation bounded on the north by south K street, on the south by south L street, on the east by Sixth street east, and on the west by fifth street east.

Sixteenth. The public appropriation bounded on the north by K street south, on the south by L street south, on the west by Sixth street east, and on the east by an alley of Sixty feet wide, bounding square eight hundred & eighty.

Seventeenth. The appropriation beginning at the intersection of the west side of first street east and the south side of south E street; thence south with the west side of said street east until it intersects the south side of an east & west street, one hundred feet in width, from the south front of Square numbered seven hundred & thirty-six; thence east with the south side of said street until it intersects the west side of third street east; thence south with the west side of third street east until it intersects the north side of an east & west street, of One hundred feet in width, from the north front of Square numbered seven hundred & thirty-seven; thence west with the north side of said street until it intersects the west side of a north & south, street, seventy feet in width, from the west front of square numbered seven hundred & thirty-seven; thence south with the west side of said street until it intersects the north side of Canal street; thence with the north side of Canal street until it intersects the south side of south E street; thence east with the south side of said street to the beginning, as the same are also laid out and delineated on the said plan, to Gustavus Scott, William Thornton, and Alexander White, Commissioners, appointed under the Act of Congress entitled "An Act for establishing the temporary & permanent seat of the Government of the United States," to hold to the said Gustavus Scott, William Thornton, & Alexander White, & their Successors in Office, as Commissioners aforesaid, to the use of the United States forever, according to the tenor of the Act of Congress aforesaid.

Given under my hand & the Seal of the United States this Second day of March, in the Year One thousand seven hundred & ninety-seven.

[U.S. SEAL] By the President:
(Signed) GEORGE WASHINGTON.
TIMOTHY PICKERING,
Sec't'y of State.

JOHN ADAMS, PRESIDENT OF THE UNITED STATES OF AMERICA

TO THOMAS BEALL OF GEORGE AND JOHN M. GANTT;

Whereas George Washington, late President of the United States, by his Act bearing date the Second day of March, in the year One thousand seven hundred and ninety-seven, did request you, the said Thomas Beall of George and John M. Gantt, to convey all the streets in the City of Washington, as they are laid out and delineated in the plan of the said City, in the said Act mentioned, to be thereto annexed; and also the several squares, parcels, and lots of ground appropriated to the use of the United States, and particularly described in the said act, of Gustavus Scott, William Thornton, and Alexander White, Commissioners, appointed under the act of Congress entitled "An Act for establishing the temporary and permanent Seat of the Government of the United States," the annexing of which plan was at that time omitted: Now know ye, that I have caused the said plan to be annexed to the said Act of the late President of the United States, and to this writing. And I do hereby request you, the said Thomas Beall of George and John M. Gantt, to convey all the streets in the said City of Washington, as they are laid

out and delineated in the plan of the said City hereto annexed, and all the Squares, Parcels, and lots of ground described in the said Act of the late President of the United States as public appropriations, to the said Gustavus Scott, William Thornton, and Alexander White, and their Successors in Office, as Commissioners aforesaid, to the use of the United States forever, according to the tenor of the Act of Congress aforesaid.

Given under my hand and the Seal of the United States this twenty-third day of July, in the year One thousand seven hundred and ninety-eight.

[U.S. SEAL]

By the President:
(Signed) JOHN ADAMS.
TIMOTHY PICKERING,
Secretary of State.

WASHINGTON CITY,
March 30, 1854.

I, Joseph Elgar, late Commissioner of Public Buildings of the United States, do hereby certify and declare that at the time I was Commissioner the two papers hereunto attached, one dated March 2, 1797, and signed by George Washington, then President of the United States, and the other dated July 23, 1798, and signed by John Adams, then President of the United States, were attached to a certain manuscript plan of the City of Washington, and were detached therefrom by me.

I have this day identified said plan by subscribing my name to a certificate thereon written in the following words, viz:

"WASHINGTON CITY,
March 30, 1854.

"This plan of the City of Washington I recognize as the plan of the City to which were attached two papers, one signed by George Washington, March 2, 1797, the other by John Adams, July 23, 1798, which papers I have this day identified as having been attached to this plan, this being the plan referred to in the first paragraph of the paper first above mentioned. The said papers having become very much disfigured and torn by the unrolling and rolling up of the plan, I detached them in order to prevent their entire destruction."

(Signed) JOSEPH ELGAR.

DISTRICT OF COLUMBIA,
Washington County, to wit:

On this thirtieth day of March, eighteen hundred and fifty-four, the within-named Joseph Elgar, to me well known, personally appeared before me and made solemn oath on the Holy Evangelists of Almighty God that the foregoing certificate, by him signed in my presence, is true.

(Signed) B. B. FRENCH,
Justice of the Peace.

OFFICE OF PUBLIC BUILDINGS AND GROUNDS,
Washington, D.C., May 3, 1888.

I certify that the foregoing letters from George Washington, President of the United States, and from John Adams, President of the United States, and the affidavit signed Joseph Elgar, are true copies of the originals on file in this office.

JOHN M. WILSON,
Lieutenant-Colonel of Engineers, Colonel United States Army, In Charge of Public Buildings and Grounds.

It will be noted that James R. Dermott's name is spelled erroneously, Dermot, throughout the old manuscripts. I have followed the Dermott spelling throughout as given in his own signature.

The tracings of the Dermott Map of the City of Washington, in the District of Columbia, which have been prepared to be photolithographed, are as nearly exact copies as it is practicable to make. They have been carefully prepared under my personal direction by Mr. H. J. Schneider, and compared by Mr. E. A. Trescot, and the whole verified by Mr. A. Lindenkohl, Draughtsman, U.S. Coast and Geodetic Survey, and Acting Chief of the drawing Division of the Coast and Geodetic Survey Office. Nothing has been added and nothing has been omitted. I respectfully submit the whole for your approval for publication.

Yours respectfully,
B. A. COLONNA,
Assistant United States Coast and Geodetic Survey, In Charge of Office and Topography.
F. M. THORN,
Superintendent.

Approved for publication.

Film—"City Out of Wilderness: Washington"	480,000.00
U.S. Capitol Historical Society yearly calendars from 1969 to 1982 (11,455,074 X .30)	3,436,522.20

UNITED STATES CAPITOL HISTORICAL SOCIETY,
Washington, D.C., April 10, 1980.

Memorandum for: Arthur B. Hanson, Chief Counsel, U.S. Capitol Historical Society.

Subject: Facts about the U.S. Capitol Historical Society and specific contributions to the U.S. Capitol.

THE SOCIETY

Founded in Washington, D.C. in 1962 by the Honorable Fred Schwengel, then representing the First District of Iowa in the United States House of Representatives, the Society is still headed by Mr. Schwengel, now retired from Congress. Its main purpose is to encourage an understanding by the people of America of the founding, growth and significance of the Capitol of the United States as the tangible symbol of their representative form of government. Its offices are on Capitol Hill in Washington, D.C. at 200 Maryland Avenue, N.E.

The Society is chartered in the District of Columbia as a non-profit educational organization under the laws of the United States. Though not subsidized, it is recognized by the United States Congress under Public Law 90-264 which authorizes it to provide in the Capitol—under supervision of the Architect of the Capitol—an educational and information center affording visitors information relative to Congressional offices; assistance in their visit to the Capitol; pamphlets, books, drawings, slides, photographs and related materials; and information about the Capitol and the history of the Capitol Building and past and present Congresses.

All materials offered in the Capitol by the Society are first approved by the Architect in consultation with the House Administration Committee and the Senate Committee on Rules and Administration. All operations of the Society are audited annually by the General Accounting Office of the Comptroller General of the United States.

The National Geographic Society in 1962 provided help enabling the Historical Society to publish the first edition of its Capitol guidebook and this help has been generously continued in the form of technical advice and guidance. Today the Society is wholly self-supporting, maintaining itself and funding its projects through successful publications and the contributions of foundations, firms and individuals to specific projects and programs.

ITS MEMBERSHIP

Numbers more than five thousand but it is not supported by member dues. There are various classes of membership with a one-time entry fee ranging from five to one thousand dollars according to the generosity and interest of the individual member. The single fee in every case provides life

membership including a quarterly newsletter, The Capitol Dome, and an annual meeting in Washington to which every Society member is invited. All Members of Congress become members of the Society upon election to the Congress by the people of the United States.

ITS PUBLICATIONS

Most acclaimed and successful is the full-color guidebook, *"We the People:* The Story of the United States Capitol." With three and a half million copies in print, this book is kept current by succeeding editions of which there are presently ten. A complementary publication, Washington Past and Present, an illustrated historical guidebook to the city of Washington, was brought out in 1975.

Annually the Society produces a large-format historical calendar with full color photographs of Washington's best-known and best-loved buildings, scenes and monuments. The day-by-day historical information provided by this calendar is developed from research sources in the Library of Congress and private libraries. In addition to Society staff historians who conduct this research, the Society employs student interns for the task in the summer, frequently reinforced by other students whose college or university arranges with the Society for them to participate as part of their academic programs. The organization, content and illustration of the calendar is developed in full consultation with the leadership of the United States Congress and members of Congressional staffs to insure that the finished product is of highest quality and fully conforms to the standards of workmanship and production desired by the Congress.

For young visitors to the Capitol, the Society provides an inexpensive and enjoyable publication entitled "Our Nation's Capital Coloring Book" which is also revised from time to time.

On the occasion of the loan to the United States Capitol by the government and the people of Great Britain of one of the earliest extant copies of Magna Carta, the Society in cooperation with the American Revolution Bicentennial Administration and the Supreme Court Historical Society produced an impressive book, "Magna Carta and the Tradition of Liberty." With prefaces by the Lord Chief Justice of England and the Chief Justice of the United States, this book describes and illustrates the history of Magna Carta and its tremendous influence on the life and growth of the American people.

Twice a year, the Society publishes a scholarly interdisciplinary journal of history, politics, art and architecture, focusing on the Capitol and the Congress it houses. In the past five years, some of this country's foremost scholars have used the pages of Capitol Studies as a forum for their ideas. A year ago the journal began a special feature: the thoughts of a sitting Member of Congress on some aspect of American life and government. To date, Representative Charles Whalen (R, Oh) and Senator Dick Clark (D, Ia) have submitted articles to Capitol Studies. Acclaimed by students the country over, Capitol Studies is becoming an integral part of the burgeoning new field, Congressional studies.

Other Society publications include large prints of original water color paintings of the East and West Fronts of the United States Capitol by the noted artist, Paul Norton, and smaller Christmas cards reproduced annually from these prints. From the splendid illustrations of WE, THE PEOPLE—photographs taken by the skilled photographers of the National Geographic Society—the Society produces a variety of picture postal cards affording Capitol visitors mementos of paintings, statuary, chambers and activities in the Capitol Building.

CURRENT PROJECTS AND FUTURE PROGRAMS

The Medals Program.—Deemed of interest to visitors, and a special program to enhance history, include the Society's own medal created by the late Ralph Menconi, illustrating in deep relief the laying of the Capitol cornerstone in 1793 by President George Washington. Also provided are other officially approved medals: presidential, vice presidential and others of topical interest.

With the authority of the Congress, H.J. Res. 386 introduced April 6, 1977 by Members of Congress, the Society created and distributed, in 1978, its first national medal. This resolution, later culminated in Public Law 95-229 provides for striking by the U.S. Mint of the first of a series of national medals to be issued annually in commemoration of the bicentennials of outstanding historic events and personalities from 1777 to 1789. These medals will be distributed by the Society in conjunction with a series of thirteen annual historical symposia of distinguished scholars.

Our 1978 medal commemorated the adoption by the Continental Congress of the Articles of Confederation, the creation of the nation's first official stars and stripes flag and the heroism of the Continental Army during its bitter winter struggle of 1777-1778 at Valley Forge, Pa. In 1979 the Society created a John Paul Jones medal commemorating his leadership and identification with Bonhomme Richard.

Cox Artwork in the Capitol.—From its own resources and generous contribution from the Daughters of the American Revolution—the Society has provided more than two hundred and fifty thousand dollars to fund the splendid murals and art work being created in the halls of the House side of the Capitol by the noted American muralist, Allyn Cox. The eastern north-south corridor has been completed. Funds are in hand for completion of the main east-west corridor and scaffolding erected, Allyn Cox with his assistants are at work now on the ceiling of this corridor. A plan has been prepared and approved for the westernmost north-south corridor and a concept is being developed for murals in the House connecting corridor between the Hall of Columns and the central Crypt area.

Congressional Oral History.—This project is underway, launched by Society Board member, Frank Van der Linder, who has already recorded an interview with retired Senate Minority Leader Hugh Scott, Senate Chaplain Rev. Edward L. R. Elson, muralist Allyn Cox, and currently working on Senate Majority Leader Robert Byrd. This project, we hope, will eventually be expanded so that we will be able to record the experiences of other important people who are associated with the Congress. This will be an invaluable collection available to future scholars and students of history and political science. We have arranged to have this collection stored in the Library of Congress.

Congressional Studies.—In the fall of 1976 the Society, in cooperation with the Catholic University of America, inaugurated a program in Congressional Studies offering a Master's degree from the University—to the best of our knowledge, the only such degree offered in America. This program makes available a diversity of studies ranging from a two-semester course in the history and development of the United States Congress to a shorter intensive study of the role of Congress in the national budget-making procedure. Drawing on instructional talent both within and without the University, the program has assembled an outstanding faculty. With the related effectiveness of the Society journal, Congressional Studies, and the Master's Degree program of Congressional Studies, the Society has taken a major step toward its goal of informing the public about the history and activities of the United States Congress.

Speakers Bibliography.—The Society is compiling a comprehensive bibliography of material by and about the men who have served as Speakers of the House of Representatives and the position itself. Included will be published books and articles, unpublished theses and dissertations, and manuscript collections. The completed bibliography will include thousands of annotated entries. Already in progress for more than a year, it will not be completed for at least another year. Even at this early date, however, one major publisher has evinced an interest in its publication. It is hoped that the bibliography will stimulate students in both history and political science to embark on studies of an institution that has been sorely neglected and on some of the important men who served as Speakers but are virtually unknown today.

Sound and Light At The Capitol.—At the suggestion of Congressman Henry Reuss, the Society developed a concept for a Sound and Light production on the East Front of the United States Capitol. A bill authored in Congress by Gerald Ford and Thomas O'Neill was passed by the House and Senate directing the Society to conduct a feasibility study of the concept. The completed study, funded entirely by the Society, found the project both feasible and desirable. Detailed plans for a Sound and Light production entitled "Our Capitol: Freedom Speaks" have been approved by the Society's Board of Trustees, the Architect of the Capitol and the leadership of the House of Representatives. With the approval of the Senate Commission on Art and Antiquities, the project will be launched.

"Son et Lumiere" as it is called in Europe—Sound and Light as we know it here—is an exciting new art form proven successful at the Acropolis in Athens, the Tower of David in Jerusalem, Les Invalides in Paris, and Persepolis in Iran. It evokes history's great events on the actual sites where they occurred by playing not on a stage but on the structure itself and on the imagination of the viewer.

Sophisticated stereophonic loudspeakers and extensive lighting equipment will be installed completely out of view around the Capitol grounds. When the program begins, the "Son et Lumiere" effect seems to come from nowhere and everywhere. The music, light, and sound will evoke the spirit of history more surely than live actors could.

OTHER SOCIETY PRODUCTS

Recently produced by the Society with the talented help of Arch Lustberg is a handsomely jacketed long-playing phonograph record of dramatic incidents which have occurred in the Capitol throughout its history. With narration by Helen Hayes, E. G. Marshall and others and original music by John Cacavas, "The Voice of the People" has intrigued individual listeners and proved most useful to teachers at all levels as a classroom aid to instruction in the history of our country. Dore Schary was proj-

ect consultant during the development of this historically accurate dramatization of Capitol events and great debates.

Of special interest to children and their teachers are meticulously accurate pasteboard models of the Capitol Building to be cut out and assembled individually or as class projects. An advisory committee composed largely of the wives of Members of Congress has selected half a dozen famous decorative seals or architectural details from the Capitol interior which have been reproduced in transfer patterns for needlework and other crafts. Some of these are provided in complete kits containing much of the materials necessary to create most unusual and striking mementos of the Capitol by the artistry of the individual who acquires them.

PAST PROGRAMS

In 1973, after several years of preparation and research, the Society published an extensive, annotated bibliographical guide to published works concerning the development of the United States Capitol Building and the dramatic events which have occurred within it. "The United States Capitol, An Annotated Bibliography" provides a starting place in their search for information about the home of American government. Like most Society scholarly ventures, the Bibliography is of use to a wide range of students, including those interested in political history, art history, architectural history, and political science. An easily referenced guide, the Bibliography has already been cited in several important publications; a clear indication of its usefulness.

When the conversion of Washington's Union Station to a National Visitors Center began, the Society accepted the challenge and invitation of the National Park Service to produce a short film in color to be shown in the Center to visitors to the nation's capital city. More than two years in production; generously supported by the National Park Service, the National Endowment for Humanities, foundations, business organizations and public-spirited individuals; this magnificent film was completed by Francis Thompson, noted New York filmmaker, in late 1974. "Washington: City Out of Wilderness" had its first showing for President and Mrs. Ford and other government officials and legislators in January 1975 in the Kennedy Center for the Performing Arts in Washington. It was subsequently nominated for an award in the short documentary category by the Academy of Motion Picture Arts and Sciences; won a 1975 CINE Golden Eagle Award, a Chris Bronze Plaque at the Columbus International Film Festival and the FAC Cup at the 28th Salerno International Film Festival. More than seven hundred prints and movie strips of this film have been distributed.

The Society raised nearly four hundred thousand dollars to create this film which was presented hourly in the National Visitors Center. Witty and enjoyable, "City Out of Wilderness" opens in the lonely, verdent wilderness along the Potomac River; follows the growth of a riverside town as its temples rose from the mud, marches to war, celebrates peace, looks at the faces of great men and common folk as they built their city and their laws and their government. It speaks of hard work and fear and triumph; listens to the voices of protest, honors the dead and welcomes the living all in just under half an hour.

The film itself and less expensive filmstrips made from it have been made available to schools, colleges, libraries and organizations of every kind throughout the United States. Many congressmen have obtained prints of it to be shown in their home districts and states. It has proven a popular success which will apparently continue to receive wide acclaim both in Washington and throughout the nation.

The Maryland Historical Society has for some years been at work editing and preparing for publication the papers of Benjamin Henry Latrobe who, as Surveyor of Public Buildings in 1803, greatly influenced the design of the interior of the United States Capitol and was charged with repairing the building after the British burned it in 1814. The Society has contributed $24,000 to this project and on its completion, purchased and donated to the Capitol a complete microfiche edition of Latrobe's papers. Recently, the Society has pledged a contribution of $20,000 to the American Institute of Architects Foundation project to edit the papers of William Thornton, original designer of the Capitol and its Architect until 1802.

AN ADDENDUM REGARDING OTHER GIFTS

There are times when there is need for special contributions that we cannot finance from our own funds. So, therefore, the U.S. Capitol Historical Society becomes the agent to acquire money from other sources.

The film entitled "Washington, City Out of Wilderness" was produced at a cost of just under $500,000.00. This money came from foundations, corporations, individual people and special funds.

Recently we were made aware of an original Samual F. B. Morse painting of the old House Chamber. By negotiation, this office helped to acquire it at a cost of $35,000.00. The Cafritz Foundation, at our invitation, furnished the money for this.

THE U.S. CAPITOL HISTORICAL SOCIETY ANNOUNCES ITS SLATE OF OFFICERS FOR 1983

The Officers of the U.S. Capitol Historical Society for 1983 elected at the Society's Annual Meeting are the following: President, Fred Schwengel; Vice Presidents—Marguerite Stitt Church, Melvin M. Payne, Carl Haverlin, Hon. David Pryor, and Walter Rundell, Jr. (since election, Dr. Walter Rundell passed away); Treasurer, Hyman J. Cohen; Secretary, Joanne Hanson; and Treasurer-Emeritus, Victor Birely.

Newly elected to the Society's officers was Hyman J. Cohen as the Tresaurer. A graduate of Tufts University and the Harvard Law School (Class of 1931), Mr. Cohen has been a practicing attorney in Washington, D.C. and in Arlington, Virginia since 1947. Mr. Cohen has maintained a lifelong interest in history and cultural affairs. His memberships are most numerous and include the National Trust for Historic Preservation, the American Jewish Historical Society, and the Jewish Historical Society of Greater Washington.

New members elected for the first time to the Active Board of Trustees included Mrs. Mary Regula of Ohio, Miss Jean Jacobs, National Society, Daughters of the American Revolution, and the Hon. Jeseph M. Gaydos, Member of Congress from Pennsylvania.

The U.S. Capitol Historical Society was founded in 1962 as a nonprofit educational organization. It was chartered by the Congress in 1978 and given authorities to preserve the Capitol through historical research and publications. The well-known publication of the Society—the history book We the People—has sold over five million copies. The Society sponsors numerous scholarly meetings and seminars. Its activities include a Congressional Studies Program leading to a Master's Degree in cooperation with The Catholic University of America, and the publication of a bi-annual journal on "Congress and the Presidency" in cooperation with The American University.

MEMBERSHIP INFORMATION

The United States Capitol Historical Society is an educational organization incorporated under the laws of the District of Columbia in 1962 and chartered by the Congress of the United States in 1978. Its active membership is open to everyone in the United States and elsewhere who wishes to foster an informed understanding of the inspiration and promise of American history.

THE SOCIETY'S PURPOSE

From the time its cornerstone was laid on September 18, 1793 by the Nation's first Commander-in-Chief, George Washington, the Capitol became the center of our National Government. Symbolizing a Government founded on the principles "of the people, by the people, for the people," the Capitol became the workplace of the Congress—the arena where the people's representatives forged the laws and contributed to the programs that have moulded the national destiny for nearly 200 years.

To preserve the rich heritage of the Capitol and interpret to the American people the functions and role of the Congress, the U.S. Capitol Historical Society was formed in 1962. The Society operates the Capitol Visitor Center in the Capitol, where information on the Congress, assistance to visitors, and publications relative to the Capitol are provided throughout the year. The U.S. Capitol Historical Society is a unique historical organization, dedicated solely to recording and interpreting the history of the United States Capitol.

All members of the Congress are members of the Society. Upon their election they are presented their certificate of life membership. Congressmen call upon the U.S. Capitol Historical Society to assist constituents with historical information, and the Members utilize publications of the Society such as "We the People—The Story of the United States Capitol" and the "We the People" historical day-by-day calendar. The publications of the Society are sold at the Society's Capitol Visitor Center, or may be obtained by writing to the U.S. Capitol Historical Society.

The U.S. Capitol Historical Society and its Board of Trustees realize that as America moves into the future, there has never been a greater need for a spirited and informed body of citizens—both young and old. Americans need to know more about the history of their country and about their system of representative government. The Capitol is the ideal focus for this increased study—for it is the building, of which Alexander Hamilton said, "Here, sir, the people govern."

The U.S. Capitol Historical Society needs members who will actively support its educational programs in the Nation's Capital and in the respective States, with dedication and enthusiasm.

MEMBERSHIP

The United States Capitol Historical Society—patriotically motivated, and inspired by a profound sense of mission—looks to the Congress, to the Executive and Judicial branches of Government, and most of all to the American people for support.

There are several classes of membership with a one-time membership fee ranging from ten to one thousand dollars but each provides the same privileges: a quarterly newsletter, The Capitol Dome; an invitation to attend each annual meeting in Washington and a membership discount on the purchase of most Society publications and other products. If you wish to join us, simply determine from the membership application form which class of membership you would like to enter, fill out the form in accordance with your entry contribution (which is tax deductible) and send it to us with your remittance.

Write: United States Capitol Historical Society, 200 Maryland Avenue, Northeast, Washington, D.C. 20002, (202) 543-8919.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

TO MAKE CERTAIN TECHNICAL AMENDMENTS TO IMPROVE IMPLEMENTATION OF THE EDUCATION CONSOLIDATION AND IMPROVEMENT ACT OF 1981

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 7336, a bill making technical amendments to chapter 1 and chapter 2 of the Education Act.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7336) to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981.

Mr. STAFFORD. Mr. President, I move that the Senate take from the desk and pass H.R. 7336, making technical amendments to chapter 1 and chapter 2 of the Education Consolidation and Improvement Act.

As my colleagues recall, the changes which we made during last year's budget reconciliation resulted in the simplification of title I of the Elementary and Secondary Education Act, which provides compensatory education to disadvantaged children, and the creation of chapter 2, a consolidation of 28 separate educational programs into a new block grant, a program which has become exceedingly popular with our local school districts.

Yet, in the expedited budget process in which we were involved, certain technical errors were made in creating the Education Consolidation and Improvement Act that need correction. This legislation represents not only technical corrections in ECIA but also clarification of congressional intent in passing that law.

At the heart of H.R. 7336 is the reinstitution of certain provisions of the old title I which allowed local school districts flexibility in operating their programs. Understanding that the objective of chapter 1 was to provide flexibility for our schools, it makes eminent sense to reestablish those provisions of title I which accomplished this but were inadvertently dropped.

There are additional changes as well—clarification of the State's role in chapter 2, clarification of chapter 1's emphasis on economically disadvantaged children, and other proposals. It must be emphasized that this legislation was developed with the closest collaboration of Members on both sides of the aisle, on both sides of the Hill. In addition, most of the proposals made herein are applauded by the various national groups having a stake in the effective operation of ECIA.

Therefore, I urge the Senate to approve the motion and pass H.R. 7336.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

TO EXPRESS THE SENSE OF THE SENATE THAT THE SECRETARY OF AGRICULTURE USE HIS EXISTING AUTHORITIES TO EXPORT SURPLUS DAIRY PRODUCTS

Mr. BAKER. Mr. President, I send a resolution to the desk on behalf of the distinguished Senator from Minnesota (Mr. BOSCHWITZ) and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 524) to express the sense of the Senate that the Secretary of Agriculture use his existing authorities to export surplus dairy products.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. ROBERT C. BYRD. No objection.

The Senate proceeded to consider the resolution.

Mr. BOSCHWITZ. Mr. President, today I am offering a sense-of-the-Senate resolution to encourage the Secretary of Agriculture to export surplus Commodity Credit Corporation (CCC) dairy products onto the world market. I had originally hoped to offer legislation mandating that a minimum quantity of dairy products be exported in this and the next 2 fiscal years. However, my colleagues on the Agriculture Committee were reluctant to force the administration to take this action.

This reluctance was mostly due to a fear that the delicate balance struck in the United States-European Community (EC) bilateral meetings on December 9 and 10 might be upset. If someone has a more constructive approach for dealing with the EC than pressuring them with dairy products, I would be glad to hear of it. At any rate, there seems to be a glimmer of hope that we will not have to confront the EC quite as directly as had been expected.

If we set the EC issue aside, however, it soon becomes clear that the United States could export a substantial quantity without negatively affecting the world market. After all, in 1981 we sold 100,000 tons to New Zealand, which was handled very judiciously. It was absorbed into the world market without destroying the market. The United States could follow the same approach now, either selling to New Zealand or else directly to the final recipient countries in appropriate amounts.

Mr. President, selling some of our surplus dairy products has very broad support among farm groups in my State and all across the country. Just as two examples, my good friend Eugene Paul, president of the National Farmers Organization in Minnesota, has patiently but persistently advised me for several months to push the administration in this direction. Just recently the Blue Ribbon Export Committee of the National Council of Farmer Cooperatives adopted a resolution very similar to the one I have introduced. Involvement of the NCFC shows the importance of dairy exports to the country as a whole and not only to dairy States such as Minnesota.

In addition, many individual farmers asked me about this issue during 3 days of dairy hearings I held across Minnesota in July. There is a high level of awareness at the grassroots level that the administration is procrastinating on dairy export sales.

I sincerely hope that the administration will quickly show its good faith to the dairy industry. Congress has given the Secretary all the authority he needs. The next move is up to him. If nothing happens very soon, I will come back in the new Congress and offer legislation which would actually require that dairy products be exported.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 524) was agreed to.

The preamble was agreed to.

The resolution together with the preamble is as follows:

S. RES. 524

Whereas the Secretary of Agriculture has been given the authority under the Agriculture and Food Act of 1981 to export surplus Commodity Credit Corporation dairy stocks and has been urged to use that authority in both the Omnibus Budget Reconciliation Act of 1982 and the Agriculture Appropriations Act for Fiscal Year 1983; and

Whereas there is a tremendous surplus of dairy products, including butter, cheese, and nonfat dry milk in the United States being maintained at a considerable cost to the United States taxpayer; and

Whereas there currently is known demand for dairy products in the world market; Now, therefore, be it

Resolved, That the Secretary of Agriculture is strongly encouraged to use those authorities available to him to move surplus dairy products into the international market.

AUTHORIZING THE PRESIDENT TO PROCLAIM MAY 13, 1983, AS "AMERICAN INDIAN DAY"

Mr. BAKER. Mr. President, next I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Joint Resolution 459, American Indian Day.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 459) authorizing the President to proclaim May 13, 1983, as "American Indian Day."

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The question is on the third reading of the joint resolution.

The joint resolution was ordered to be read a third time, was read the third time, and passed.

PER CAPITA PAYMENTS TO INDIANS

Mr. BAKER. Mr. President, I now ask the Chair to lay before the Senate Calendar Order No. 949, H.R. 4635.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The Senate proceeded to consider the bill (H.R. 4365) to provide that per capita payments to Indians may be made by tribal governments, and for other purposes, which had been reported from the Select Committee on Indian Affairs with an amendment on page 2, line 20, strike "met.", and insert "met, including but not limited to, the protection of the interests of minors and incompetents in such funds."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

TEXAS BAND OF KICKAPOO ACT

Mr. BAKER. Mr. President, finally on my list of items to be passed by unanimous consent is Calendar Order No. 1017, H.R. 4496, and I ask the Chair to lay that measure before the Senate.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 4496) to grant Federal recognition of the Texas Band of Kickapoo Indians; to clarify the status of the members of the band; to provide trust lands to the band, and for other purposes,

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee (Mr. BAKER)?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Texas Band of Kickapoo Act".

CONGRESSIONAL FINDINGS AND DECLARATION OF POLICY

SEC. 2. (a) Congress finds that the Texas Band of Kickapoo Indians is a subgroup of the Kickapoo Tribe of Oklahoma; that many years ago, the Band was forced to migrate from its ancestral lands to what is now the State of Texas and the nation of

Mexico; that, although many members of the band meet the requirements for United States citizenship, some of them cannot prove that they are United States citizens; that, although the Band resides in the State of Texas, it owns no land there; that, because the Band owns no land in Texas, members of the Band are considered ineligible for services which the United States provides to other Indians who are members of federally recognized tribes because of their status as Indians except when the members of the Band are on or near the reservation of the Kickapoo Tribe of Oklahoma; that members of the Band live under conditions that pose serious threats to their health; and that, because their culture is derived from three different cultures, they have unique needs including, especially, educational needs.

(b) Congress therefore declares that the Band should be recognized by the United States; that the right of the members of the Band to pass and repass the borders of the United States should be clarified; that services which the United States provides to Indians because of their status as Indians should be provided to members of the Band in Maverick County, Texas; and, that land in the State of Texas should be taken in trust by the United States for the benefit of the Band.

DEFINITIONS

SEC. 3. For purposes of this Act—

(a) "Band" means the Texas Band of Kickapoo Indians, a subgroup of the Kickapoo Tribe of Oklahoma;

(b) "Tribe" means the Kickapoo Tribe of Oklahoma; and

(c) "Secretary" means the Secretary of the Interior.

ESTABLISHMENT OF BAND ROLL; CLARIFICATION OF UNITED STATES CITIZENSHIP

SEC. 4. (a) Within one year of the enactment of this Act, the Secretary shall, after consultation with the Tribe, compile a roll of those members of the Tribe who posses Kickapoo blood and who are also members of the Band. When said roll is complete, the Secretary shall immediately publish notice in the Federal Register stating that the roll has been completed. The Secretary shall ensure that the roll, once completed, is maintained and that it is current.

(b) If the Secretary does not compile the roll within the period prescribed in subsection 4(a), he shall submit a report to Congress setting forth the reasons he did not do so.

(c) For a period of five years after the publication of the Federal Register notice required under subsection 4(a), any member of the Band whose name appears on the roll compiled by the Secretary, may, at his option, apply for United States citizenship. Such application shall be made to the Immigration and Naturalization Service and, upon receipt of the application, citizenship shall promptly be granted to the applicant.

(d) Notwithstanding the Immigration and Nationality Act, all members of the Band shall be entitled to freely pass and repass the borders of the United States and to live and work in the United States.

LAND ACQUISITION; APPLICABILITY OF THE INDIAN REORGANIZATION ACT

SEC. 5. (a) The Act of June 18, 1934 (48 Stat. 984), is hereby made applicable to the Band: *Provided however,* That the Secretary is only authorized to exercise his authority under section 5 of that Act (25 U.S.C. 465) with respect to lands located in Maverick County, Texas.

(b) The Secretary is authorized and directed to accept no more than one hundred acres of land in Maverick County, Texas which shall be offered for the benefit of the Band with the approval of the Tribe. Nothing in this subsection shall be construed as limiting the authority of the Secretary under section 5 of the Act of June 18, 1934 (48 Stat. 985).

JURISDICTION

SEC. 6. The State of Texas shall exercise jurisdiction over civil causes of action and criminal offenses arising on the Band's trust lands in accordance with section 1360 of title 28, United States Code, and section 1162 of title 18, United States Code, as if it had assumed jurisdiction pursuant to sections 401 and 402 of the Act of April 11, 1968 (82 Stat. 78, 79). The provisions of section 403 of the Act of April 11, 1968 (82 Stat. 79), shall be applicable and available to the State of Texas.

PROVISION OF FEDERAL INDIAN SERVICES

SEC. 7. (a) Notwithstanding any other provision of law authorizing the provision of special programs and services by the United States to Indians because of their status as Indians, the Band and its members in Maverick County, Texas shall be eligible for such programs and services without regard to the existence of a reservation, the residence of members of the Band on or near a reservation, or the compilation of the roll pursuant to subsection 4(a) of this Act.

(b) In providing services pursuant to subsection (a), the Secretary and the head of each department and agency shall consult and cooperate with appropriate officials or agencies of the Mexican Government to the greatest extent possible to ensure that such services meet the special tricultural needs of the Band and its members. Such consultation and cooperation may include, whenever practicable, joint funding agreements between such agency or department of the United States and the appropriate agencies and officials of the Mexican Government.

The PRESIDING OFFICER. The bill is open to further amendment if there is no further amendment to be offered, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 4496) was read the third time, and passed.

Mr. BAKER. Finally, Mr. President, I ask unanimous consent that it may be in order to reconsider by one motion to reconsider en bloc all actions taken in the unanimous-consent file.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection to the order that there be one motion to reconsider en bloc all actions taken.

Mr. BAKER. Mr. President, I then move to reconsider en bloc the actions just taken.

Mr. ROBERT C. BYRD. Mr. President, I again have the last word. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, when the Senate reconvenes, it will do so at the hour of 12 noon on today. Mr. President, the adjournment resolution has been passed. I fully expect that we will be able to transact the business of the Senate today, and I hope that we will be able to accomplish a great deal. In any event, this day is over and I am grateful.

RECESS

Mr. BAKER. Mr. President, if there is no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 12 noon today.

The motion was agreed to; and at 2:07 a.m., the Senate recessed until Tuesday, December 21, 1982, at 12 noon.

HOUSE OF REPRESENTATIVES—*Monday, December 20, 1982*

(Legislative day of Sunday, December 19, 1982)

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 12 o'clock noon on Monday, December 20, 1982.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

As we prepare to celebrate this holy season and to recall the ways in which we have been blessed, we are conscious of people for whom times are difficult and for whom there is no holiday. We reach out in our prayer to those who live under tyranny and know not the liberty we cherish, for those nations for whom freedom is but a faint hope. We commend to You, O God, those who are hungry or alone or forgotten, even as we dedicate ourselves to use our resources to help those who need our care. Teach us, O God, that it is in giving of yourselves, and our gifts that we truly receive Your blessings and serve those about us. Amen.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6946) entitled "An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2623) entitled "An act to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to bills and a joint resolution of the Senate of the following titles:

S. 835. An act for the relief of Jerry L. Crow;

S. 1965. An act to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System; and

S.J. Res. 260. Joint resolution to designate the period commencing January 1, 1983, and ending December 31, 1983, as the "Tricentennial Anniversary Year of German Settlement in America."

The message also announced that the Senate agrees to the amendments of the House with amendments to a bill of the Senate of the following title:

S. 503. An act to authorize the purchase, sale, and exchange of lands by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation, N. Dak., and for other purposes.

The message also announced that the Senate recedes from its amendments numbered 2, 3, 4, 5, 6, and 7 to the bill (H.R. 2475) entitled "An act to modify a withdrawal of certain lands in Mono County, Calif., to facilitate an exchange for certain other lands in Mono County, Calif., and for other purposes."

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1501) entitled the "Educational Mining Act of 1982."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 9. An act to designate components of the National Wilderness Preservation System in th State of Florida;

H.R. 3731. An act to amend the Act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims;

H.R. 4566, An act to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes;

H.R. 7102. An act to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor and for other purposes;

H.R. 7154. An act to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes; and

H.R. 7159. An act to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 5002) entitled "An act to improve fishery conservation and management," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PACKWOOD, Mr. GORTON, Mr. STEVENS, Mr. HOLLINGS, and Mr. INOUYE to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 4566) entitled "An act to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. DANFORTH, Mr. HEINZ, Mr. LONG, and Mr. BENTSEN to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 1705. An act to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior;

S. 1963. An act to improve the internal security of the United States by clarifying the notification requirements for foreign agents under section 951 of title 18, United States Code, and to increase the penalties for failure to notify;

S. 1978. An act to quiet title and possession with respect to a certain private land claim in Livingston Parish, La.;

S. 2308. An act to direct the Secretary of Agriculture to convey certain property to the city of Show Low, Ariz.;

S. 2955. An act to establish the Cheaha Wilderness in Talladega National Forest, Ala.; and

S.J. Res. 155. Joint Resolution redesignating the St. Croix Island National Monument in the State of Maine as the "St. Croix Island International Historic Site."

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 631, FURTHER CONTINUING APPROPRIATIONS, 1983

Mr. WHITTEN submitted the following conference report and statement on the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes:

[The conference report referred to appears on pages 32983-33075 of today's RECORD.]

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

89-059 O-86-23 (Pt. 24)

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 631, FURTHER CONTINUING APPROPRIATIONS, 1983

Mr. WHITTEN. Mr. Speaker, I call up the conference report on the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER. The conference report is considered as having been read.

(For conference report and statement, see prior proceedings of the House of today, December 20, 1982.)

The SPEAKER. The gentleman from Mississippi (Mr. WHITTEN) will be recognized for 30 minutes, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on consideration of the conference report to House Joint Resolution 631, and that I may include extraneous and tabular matter.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

The SPEAKER. The gentleman from Mississippi is recognized.

Mr. WHITTEN. Mr. Speaker, I suppose in all sessions of the Congress there are times when a great amount of work has to be done in a very short order. I bring you this conference report and advise you that the conference was in session from 10 a.m. until 10 p.m. All 13 subcommittees were involved to one extent or another. Mr. Speaker, I am pleased to report that in that 10 hours we resolved all our differences without fanfare. We reached agreement on 133 amendments, including several extremely controversial issues.

Long difficult conferences are nothing new to Members of the House and Senate Appropriations Committees. We have had to meet until all hours of the night on several occasions. May I say that the diligence, the good humor and the high level of debate during our long conference made a difficult task much more tolerable.

I especially want to acknowledge the contribution of the distinguished Senator from Oregon (Mr. HATFIELD), the chairman of the Senate Appropriations Committee. He presided over this conference with his usual magnanimity and decorum. I also want to mention the special contribution of the ranking minority member of the House committee, the gentleman from Massachusetts (Mr. CONTE). It has been a great pleasure during the years to serve with him. His devotion to the causes he believes in and the tenacity he displays in his arguments—spiced with generous doses of humor—are tremendous assets during a arduous conference such as this.

The role played by every conferee was essential during this procedure. In order to streamline the conference, we broke up into subgroups which then made recommendations to the full conference. The cooperation of everyone—majority and minority—contributed to the final conference agreement.

I would like to take this time to pay tribute to the staff of our Committee on Appropriatons. Not only have they done a good job through the years, but also their being able to put all this material together, and all these figures in a short period of time is almost unbelievable.

I would like to advise the House that here we have in this conference report all these matters dealing with all phases of the Government, and yet we bring you a bill that is under the committee's section 302 allocation. Our committee has done a marvelous job throughout the year under very difficult circumstances, and we are hopeful that this is the last continuing resolution we will have to have. I have discussed it with my colleagues on the committee, and next year we hope to bring up our appropriations bills soon after May 15, and we hope we will not be faced with this type of situation.

Mr. Speaker, the resolution we bring before the House today provides funding authority for eight major appropriations bills for fiscal year 1983. Projects and activities carried in the Treasury, Postal Service, and General Government bill are provided for at the lower level of the House or Senate. Foreign assistance programs are provided for at a compromise rate contained in the conference report. The conferees also agreed—after much debate—on funding levels for the Department of Defense. The House position provided denying procurement funds for the MX missile. Research and development moneys are provided with certain restrictions. The Commerce, Justice, State, and Judiciary programs are provided for at the amounts contained under amendment number 13 as described in the joint explanatory statement.

The District of Columbia and Interior and related agencies appropriations bills are provided for at the rates, and under the terms and conditions set forth in the conference reports on H.R. 7144 and H.R. 7356, respectively. The conference agreements on these two bills have been adopted by both Houses of Congress and it is anticipated both bills will soon be signed into law.

Programs and activities carried in the Departments of Labor, Health and Human Services, and Education and Related Agencies bill are provided for as outlined in the joint explanatory statement under amendments 14 through 23.

The energy and water development bill is provided for at the current rate, with certain exceptions. In addition, the resolution provides approximately $9 billion for assisted housing programs which were deferred during consideration of the regular 1983 HUD Independent Agencies Appropriation Act.

The resolution also provides for a partial lifting of the cap on executive salaries. Although existing law would provide for an increase of 27.2 percent, the conference agreement allows an increase of 15 percent. Certain conferees, including myself, believe even this increase is too high in today's uncertain economic climate. The conference agreement excludes Senators from the salary increase. The conferees also agreed to delete the provision of the House-passed resolution which would have limited to 30 percent of salary outside earned income of all Members of Congress. The provisions of the House rules concerning outside earned income will not be affected by this action.

The termination date of the resolution is September 30, 1983, as proposed by the Senate, instead of March 15, 1983, as recommended by the House. Agreement having been reached on the major bills provided for in the resolution, the conferees decided a termination date of September 30, 1983, was the most practical.

One of the overriding concerns of the conferees was that the Attorney General's ruling requires the orderly shutdown of all nonessential Government activities if appropriations are not enacted. In a mutual realization that ideological differences should not result in the termination of many Government activities, the conferees, I believe, made extra efforts to reach accommodation.

Mr. Speaker, the House-passed resolution included $5.4 billion for productive employment in title II. The conferees deleted the entire title. Later in the debate I will explain the reasons for this action.

Mr. Speaker, I reserve the balance of my time.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, during my 24 years in this body, I have helped to bring hundreds of conference agreements to this floor.

Not a single one gave me the satisfaction I feel today.

Not a single one started so badly, and ended so well.

Forty-eight hours ago this Congress was staggering from comedy to farce. We did not know whether this resolution could even pass the other body, much less get through conference and be signed into law.

Twenty-four hours ago we went to conference on a resolution which left the House as a prime cut of veto bait, and was almost buried by special interests in the other body.

We disagreed on 133 separate amendmends, which covered thousands of individual line items, and included: Members pay, foreign aid, a complete defense bill, including the MX, and a jobs bill which the President promised he would veto.

This morning we bring you a responsible conference agreement that should be signed into law—a conference agreement made possible only by political statesmanship of the highest order.

I am proud of my House and Senate colleagues in the conference. And I pay a special tribute to my chairman, JAMIE WHITTEN, to the chairman of the conference, the Senator from Oregon, Senator HATFIELD and to the House conferees for the majority.

The major issues in disagreement were personally and politically troublesome for each of these men. Yet each and every one placed the interests of the country above his own and those of his party.

That is why I can say to all of my colleagues and friends in this House on both sides of the aisle that this conference agreement deserves your support.

Let me outline the most important agreements.

The jobs bill is out. Both the House and the Senate receded, and there is no title II, or "Jobs Title" in the conference agreement. The President stood firm on this issue, and had the votes to back him up. I am pleased that the majority conferees and the Senate conferees saw the wisdom of his position.

The resolution runs for the remainder of the fiscal year. The business of this Congress is now behind us, and the 98th Congress can start with a clean slate.

The conference agreement covers six bills for the entire fiscal year: Commerce-Justice, Defense, energy and water development, foreign aid, Labor-HHS, and Treasury.

We agreed on a complete defense bill, including an agreement on the MX missile that closely tracks the House position. There is no money for missile procurement, and research funds for basing are funded exactly as the House provided. A mechanism for further congressional action on the system is established.

We agreed on a complete Labor-HHS bill for the entire fiscal year.

The four other bills are continued as follows: Commerce-Justice is continued at the Senate rate, with many individual items specified in the resolution. Conferees agreed to extend certain FTC authorities, including the legislative veto, but did not agree to the Senate amendment which would have prohibited the FTC from invalidating State laws that establish licensure of professional and permissable tasks and duties.

For foreign aid, the conferees agreed to provide a total of $11.2 billion, compared to the Senate amount of $11.6 billion and the House amount of $11 billion. The administration's request was $11.2 billion, and the fiscal 1982 appropriation was $11.5 billion. The conference agreement is $8.6 million below the President's request.

Appropriations for energy and water development are continued at the current rate. The conferees agreed, over my strong opposition, to drop the House restrictions on Clinch River, the Garrison diversion project, and the O'Neill unit.

The rate for Treasury-Postal Service, which was not in conference, is the House or Senate amount, whichever is lower. Over my strong objections, the conferees agreed to strike the Ashbrook amendment which prohibits payments for abortions under Federal health insurance plans.

The conferees agreed to the House-passed relaxation of the pay cap on Members of Congress and other exective branch and judicial officials, with the exceptions, of Members of the Senate, who chose instead to retain their unlimited outside earnings. I strongly urge the House to accept this compromise.

Under the circumstances, this is an excellent conference report agreement.

I will vote for it and I urge you to do likewise.

The programs of the Departments of Commerce, Justice and State, the Judiciary and various related agencies are to be funded under the continuing resolution at the rates and under the terms of S. 2956, the Senate-reported appropriations bill for fiscal 1983, except in a large number of items on which the conferees adjusted the Senate numbers and provisons, as explained in the statement of the managers.

One item of special interest is the continued funding of the Federal Trade Commission, funding for which was left out of the House-passed resolution. The conferees have agreed to fund the FTC at a level of $63,638,000, and leave intact language in force prior to September 30, 1982 regarding public participation funding, the regulation of commercial advertising, trademarks, agricultural cooperatives and marketing orders, and the legislative veto. No language is included in the conference report regarding the regulation of professions.

The Legal Services Corporation is funded at $241 million, the same amount appropriated for fiscal 1982. Language is included governing the use of the funds for such activities as assistance to illegal aliens, local board composition, lobbying, class action suits, minimum access allocation of funding and the refunding of current grantees. Language is also included, as proposed by the Senate, to place restrictions on the compensation and contract terms of the Legal Services Corporation Board, officers and employees in view of recent allegations of misuse of such compensation and contracts.

If I might be permitted one reference to an item of special interest to my and me State of Massachussetts, I am pleased that the conferees have agreed to include $7.1 million for the replacement or repair of the Massachusetts Maritime Academy training ship, the *Bay State*. This fills a critical need in the education of the academy's students, and we have been working on this for some time.

ENERGY AND WATER

For programs funded through the energy and water development appropriations bill, the conferees generally provided for the continuation of activities at the current level, as provided in the fiscal year 1982 appropriations act.

Mr. Speaker, I was extremely disappointed by the action of the conferees in receding to the Senate position on the Garrision diversion unit, the O'Neill irrigation unit, and the Clinch River breeder reactor. Particularly in light of the vote margins on these issues during House floor consideration of the continuing resolution, I do not believe that the interests of the House are adequately represented by the conference agreement.

I continue to believe that the Garrision diversion unit is economically and environmentally unsound, and a threat to our relations with Canada. I will continue to oppose further funding for the project as it is now designed, and would encourage the appropriate authorizing committees to take a long hard look at this project as well.

With regard to the Clinch River breeder reactor, I was disappointed by the decision to continue funding at the 1982 level. Nevertheless, I am pleased by language in the statement of managers directing a reconsideration of the original cost-sharing arrangement to secure greater private sector participation in the project.

Although the House did not have an opportunity to vote on the Tennessee-

Tombigbee Waterway this year, the conferees did accept a Senate amendment prohibiting the use of funds for further study or construction of an extension of the Tennessee-Tombigbee project south from Demopolis, Ala.

The conferees agreed to provide a total of $11.2 billion for foreign assistance programs, compared to the Senate amount of $11.6 billion and the House amount of $11 billion. The administration's request was $11.2 billion, and the fiscal 1982 appropriation was $11.5 billion. The conference agreement is $8.6 million below the President's budget.

The conference report includes the House figures and terms for Israel and Egypt. Israel receives a total of $2.485 billion, of which $785 million is economic assistance under the Economic Support Fund, and $1.7 billion is foreign military credit sales, $750 million of which is forgiven. The total amount provided and the economic assistance portion are the same as the President's request. The amount of forgiven military credits is $250 million over the President's request. The Senate had provided a total aid package for Israel of $2.61 billion, of which $910 million is economic assistance and $1.7 billion is foreign military credit sales, $850 million of which would have been forgiven.

Egypt will receive a total of $2.075 billion, composed of $750 million in economic assistance under the Economic Support Fund and $1.325 billion in foreign military credit sales, $425 million of which is forgiven. The only change from the President's budget is the addition of $25 million in military credit sales, which are also forgiven. The Senate had provided the same amounts and terms as the President's request.

The Export-Import Bank is given direct lending authority of $4.4 billion, the same as in fiscal 1982, and guaranteed lending authority of $9.0 billion, a reduction of $220 million below 1982. The President's requests were $3.83 billion for direct loans and $8 billion for guarantees. The amounts in the conference report are the same as the Senate figures.

The International Development Association (IDA) will receive $700 million, since both the House and Senate bills included that amount and the figure was not subject to conference action. The United Nations development program gets $140 million, the Senate amount, compared to $134 million in the House bill. UNICEF receives $42.5 million, compared to $41.5 million in the House bill and $37 million in the Senate bill. The International Atomic Energy Agency receives $10 million, with a restriction that the funds are not available until the United States is assured that Israel is allowed to participate fully as a member nation in the activities of the Agency. The International Fund for Agriculture Development (IFAD) receives $24 million, compared to the President's request and House amount of $65.4 million and the Senate amount of $10 million. The Peace Corps receives $109 million, the Senate amount. The House had provided $105 million.

Military assistance grants are funded at $290 million. The President's request for this amount is $557 million, the House provided $176.5 million, and the Senate had $367 million. MAP funds are earmarked for key U.S. friends, such as Turkey, Portugal and Morocco. Military training is funded at $45 million, an increase over the House amount of $38.5 million and a reduction below the budget request and Senate amount of $53.7 million. Foreign military sales guarantees are limited to $3.638 billion, and earmarks are included in this account for Turkey, Portugal, Morocco and Spain.

The conferees have included an amended version of the Simon "Bread for the World" amendment requiring the President to attempt to provide not less than 40 percent of AID's development assistance funds for the absolute poor in fiscal year 1983, and requiring a report by the AID Administrator within 6 months on the practicality of such a provision, the types of projects which meet these guidelines, and the overall effect on AID's operations. By including this language the conferees hope that a clearer picture can be ascertained on this issue.

DEPARTMENT OF INTERIOR AND RELATED AGENCIES

Since the conference report on the regular fiscal year 1983 Interior and Related Agencies appropriations bill (H. Rept. 97-978) was agreed to in the House on Saturday, December 18, the programs of the Department of Interior and Related Agencies would be continued at that agreed-to conference level in this continuing resolution.

In addition, the conference agreement on the CR provides $3 million to permit the National Park Service to continue the construction of bridges on Grandfather Mountain in North Carolina, part of the Blue Ridge Parkway and $94,000 for the Fish and Wildlife Service to permit the Ennis National Fish Hatchery in Montana to remain open in fiscal year 1983 and $2 million to the Secretary of Labor.

I am also pleased to note that the conference agreement includes with modifications an amendment included by the Senate to make available a maximum of $200 million from petroleum violation escrow funds to the States for use in supplementing funds available for five energy conservation programs: low income weatherization, schools and hospitals weatherization, energy extension service, State energy grants and low-income fuel assistance. The distribution of these funds among the five eligible programs is left to the discretion of each State.

LABOR-HHS-EDUCATION

The House and the Senate went into the conference in disagreement over the formula to be used to fund programs in the Departments of Labor, Health and Human Services, and Education for fiscal year 1983. The House version of the continuing resolution called for the funding levels to be in accord with the levels set in H.R. 7205, as it passed the House on December 1, by a vote of 330—70. The Senate version called for funding levels to be in accord with the levels set in H.R. 7205, as reported by the Senate Committee on Appropriations on December 8. The conferees decided the only way to resolve this difference was to conference the items of disagreement within H.R. 7205, and incorporate the resulting agreement into the continuing resolution. In other words, we had a conference within a conference on the Labor/HHS/Education bill for fiscal year 1983.

Before I describe the highlights of that agreement, I would like to briefly touch on how we disposed of the numerous amendments relating to the departments of Labor, Health and Human Services and Education made in the continuing resolution.

Numerous amendment to the text of the continuing resolution were taken care of by coming to an agreement on H.R. 7205. These include refugee and entrant assistance, advances to States for unemployment trust funds, and PSRO's.

In addition, we took the following actions:

Adopted the Tauzin amendment relating to fuel assistance provided by utilties and other private parties;

Added $3.5 million for runaway youth programs;

Agreed to the Senate amendment relating to impact aid in Montana;

Agreed to the Heflin amendment relating to SSI pass throughs, to correct a particular problem in Alabama;

eEtended the President's Commission on Biomedical Ethics at no cost through March 31, 1983;

Agreed to two separate amendments adding a total of $125 million to low-income energy assistance;

Agreed to an amendment providing $25 million to fund the dislocated worker provisions of the Job Training Partnership Act.

With respect to resolving the differences between the House and the Senate with respect to funding levels in H.R. 7205, I would like to describe some of the highlights, and after my general statement, together with the distinguished chairman of the subcommittee, my good friend from Kentucky, Mr. NATCHER, I will endeavor to answer any questions you may have.

Four-million eight-hundred-thousand dollars in additional funds for title V, Senior Community Service Employment;

An additional $75 million in trust funds for unemployment insurance offices and employment services as a contingency for higher workloads;

Thirteen million dollars in additional funds over the House level for community health centers;

Retained $2 million as a separate line item for acquired immune deficiency syndrome, a very fatal disease spreading rapidly among our population;

Stayed within $2 million of the House level for the National Institutes of Health;

Added $7 million to the alcohol, drug abuse and mental health block grant and $3.5 million to mental health clinical training;

Added $125 million to title I, compensatory education for the disadvantaged;

Agreed to a $4.2 million reduction in the chapter 2, special education programs block grant, half the proposed Senate cut;

Added $12 million over the House level to college work study programs, and subtracted $13 million from State student incentive grants; and

Funded VISTA at the House level of $11.8 million.

One very important point to make is that we funded every entitlement at the best estimate of its actual cost for the fiscal year. That includes Guaranteed Student Loans at $3.1 billion and Title XX Social Services Block Grant at $2.45 billion. It is our earnest hope that this action will mean we will not have to come back for any large supplementals over the course of the year.

All in all, I think we did a good job. These programs are exceedingly important in this difficult economy. Many people will be relying on these programs for the first time in their lives, through no choice of their own. I urge you to support our actions on this section of the continuing resolutions.

LEGISLATIVE BRANCH

The conferees agreed to the House-passed relaxation of the pay cap on Members of Congress and other executive branch and judicial officials, with the exception of Members of the Senate, who chose instead to retain their unlimited outside earnings. I strongly urge the House to accept this compromise.

By a vote of almost 3 to 1 (303 to 109), the House voted to partially lift the pay cap which has been imposed on Members of Congress for over 3 years now. The raise allowed by the House is 15 percent, a significant reduction below the 27.2 percent to which Members are entitled under the law.

Under the law, and as stated in Executive Order 12387 of October 8, 1982, and as confirmed by the Comptroller General of the United States in a letter to Chairman Fazio dated December 10, 1982, the scheduled rate of pay for Members of Congress is now $77,300. The House amendment reduces this to $69,800, a pay cut of $7,500.

Frankly, I do not think we ought to take a cut below our statutory pay level at all. It is demeaning to the positions of U.S. Representative and U.S. Senator, and to the people holding those positions, to be paid less than the law provides.

For those who may be politically nervous about taking any raise, let us put these pay figures in perspective. Since 1977, more than 5 years ago, Members of Congress have taken one pay raise of 5.5. percent. That is an increase of about 1 percent a year for the last 5 years.

During those same 5 years, social security beneficiaries received cost-of-living annual increases of 6.5 percent, 9.9 percent, 14.3 percent, 11.2 percent, and 7.4 percent. That adds up to a 5-year increase in social security benefits of nearly 50 percent, even without compounding the effect of those annual increases. Members of Congress got 5.5 percent.

Also during the same 5 years, Federal employees, those not subject to the pay caps we imposed on ourselves, received pay raises of 5.5 percent, 7.02 percent, 9.11 percent, 4.8 percent, and 4 percent, adding up to more than 30 percent, again without compounding. Members of Congress got 5.5 percent.

Again during the same 5 years, private sector wages on an average went up 7.8 percent, 8.0 percent, 6.9 percent, 8.6 percent, and 7.5 percent, for a total of 39 percent. Members of Congress got 5.5 percent.

And finally, during those same 5 years, the Consumer Price Index, that index to which we tie so many Federal programs, went up by 9.8 percent, 13.3 percent, 12.4 percent, 8.9 percent and 6.97 percent. That is a total of 51 percent. Members of Congress got 5.5 percent.

If the salaries of Members of Congress had gone up at the same rates as Federal employees not affected by pay caps during the past 5 years, our pay would now be $82,995. If they had gone up the same as the private sector, our pay would be $89,979. If they had been tied to the Consumer Price Index, we would be paid $99,236 a year.

In these calculations I have used a 5-year period, but the comparisons do not look any better over a longer time period. If you compare increases since 1970, under the Federal employee raises, we would be getting $92,675; with the private sector, we would get $101,781; and under the Consumer Price Index, $113,253.

All of these figures are included in the information package which I will place in the RECORD, together with endorsement of the congressional pay increase by such diverse interests as the New York Times, the AFL-CIO, Common Cause, the National Association of Manufacturers, all of the reporters on "Agronsky and Company," the Business Roundtable, the Washington Post, and the United Auto Workers.

Note that last one: the United Auto Workers. We heard arguments in the House that certain Members could not support this increase at a time when so many people were unemployed. Listen to this paragraph from a letter dated December 13, from the legislative director of the United Auto Workers:

> As a Member of Congress, you are familiar with arguments for a congressional salary increase. None is more persuasive to us than the need to set salaries at a level which will permit men and women of modest means who may not have accumulated independent wealth to aspire to such offices. We must attract more than just the wealthy and near-wealthy to serve in Congress, and the salaries should be sufficient to assure that it is not necessary to augment them in ways that detract from the full-time job of legislating and representation.

That is a very enlightened point of view, as usual, from the United Auto Workers.

ASSISTED HOUSING

The conference agreement includes $8.65 billion for assisted housing programs. Action on these programs was deferred when Congress acted on the regular fiscal year 1983 HUD/independent agencies bill (Public Law 97-272). The recommended new budget authority level of $8.65 billion together with estimated carryovers and recaptures would provide a total fiscal year 1983 program level for assisted housing of approximately $15.6 billion.

The conference agreement provides that the new budget authority be used to fund an estimated 14,000 units of section 202 housing for the elderly and handicapped; 2,000 Indian housing units $2.5 billion worth of public housing modernization and continued conversions of 65,000 Section 23 and rent supplement units to section 8. Out of carryover funds and the anticipated recapture of approximately $4.6 billion, the Department of Housing and Urban Development would fund 15,000 section 8 moderate rehabilitation units and 67,000 section 8 units. The conferees also agreed to the House provision making available $500 million in mortgage purchase authority for the Special Assistance Fund of Ginnie Mae. Of this $500 million, $250 million shall be available for the targeted tandem program with the remaining $250 mil-

lion available for partially assisted section 8 projects.

The conferees also agreed to Senate language increasing the FHA limitation on guaranteed loans by $6.1 billion to $45.9 billion. This increase is necessary to reflect the current level of activity in the FHA insurance program which has increased as interest rates have fallen. The conference agreement also includes Senate language permitting an increase in the multifamily mortgage ceiling in highest cost areas.

Mr. Speaker, there were very few differences between the House and Senate versions of the continuing resolution for programs funded through the Transportation appropriations bill. I am pleased to note that the regular fiscal year 1983 bill was signed into law on December 18, thereby eliminating the need to establish a rate of funding for transportation programs in the continuing resolution.

The Senate had included in its version of the continuing resolution, and the conferees accepted, an amendment that would put employees of Conrail who are adversely affected as a result of Amtrak's direct operation and control of intercity rail passenger service on an equal footing with other Conrail employees who are affected by changes in Conrail's freight and passenger operations.

The Senate also included an amendment withdrawing a section of Interstate Route 95 and Interstate Route 295 in New Jersey from the Interstate System. I know that this was of interest to my friends from that State, especially the gentlewoman from New Jersey (Mrs. ROUKEMA), and I am therefore happy to report that the conferees agreed to that amendment.

TREASURY-POSTAL SERVICE

Mr. Speaker, the Treasury-Postal Service-General Government portion of this continuing resolution conference agreement contains funds for the treasury department operations, the U.S. Postal Service, activities of the Executive Office of the President and various independent agencies such as the General Services Administration.

Part of the Treasury Department operations, as Members know, cover the area of law enforcement. This conference report provides a specified amount of $235 million for the Secret Service for the hiring of 200 new agents. Although not at conference, I note that both House and Senate continuing resolutions provide funds for the Bureau of Alcohol, Tobacco and Firearms to continue to carry out its mission.

In addition to funding for these two law enforcement elements, funding at a level of $553.7 million is provided for the Customs Service to allow them to adequately enforce our international traffic and trade laws. Within this figure, we provided extra funding to customs to allow for an expansion of Project Exodus, a program to counter and prevent Soviet efforts to illegally export or divert U.S. manufactured or designed critical materials and high technology items to the Soviet Union and her allies.

In the December 14 edition of the Washington Post, there was a report that a Federal investigation has uncovered a plot to illegally export U.S. military equipment to Iran, following the discovery by a Customs officer of a folder inside the briefcase of a Pakastani national. The source for the story spoke of the role that Project Exodus played in the discovery.

At this point, in talking about the Customs Service, I would like to mention that the conferees intended that the language in both House and Senate reports accompanying respective continuing resolution versions, directing Customs to vacate a rulemaking proposal to establish a schedule of fees on commercial aircraft, be adhered to.

Also, regarding Customs plans to close and/or consolidate offices, programs, functions or personnel, including personnel relocations, the conferees intend that restrictions in both House and Senate versions of the continuing resolution and

Accompanying reports remain in place for now, to include restrictions on transferring import specialists from San Antonio, Tex. to Laredo, Tex. However, the conferees also intend that during fiscal year 1984 appropriations hearings, Customs concerns over restrictions and their effects should be thoroughly discussed. In other words, the managers statement language expresses the view that the need for savings should be balanced with local and area economic interests, and this is what we hope to explore in the hearings.

Two other Treasury entities worth noting, though not at conference, relate to the importance both bodies have placed on a specific funding level of $248 million for the Bureau of Government Financial Operations in their respective continuing resolution versions. The $248 million level has been provided to insure orderly and timely issuance of social security checks in the absence of a specific authorization allowing a reimbursement from the Social Security Administration to the Bureau of Government Financial Operations for check issuing services.

The second item within the Treasury section, of concern to many Members, and of great importance to untold thousands of taxpayers, deals with the various taxpayer assistance services provided by the Internal Revenue Service. These services include toll-free telephone assistance to taxpayers, and tax counseling for the elderly. The administration proposed a $50 million reduction for these services with a corresponding reduction in the scope of services available. The House and Senate versions of the continuing resolution restore these funds, and contain a provision which mandates fiscal year 1982 operating levels for the various taxpayer assistance programs. Language in each version prohibits a personnel reduction level in these services below the 1982 level.

For the Postal Service, Mr. Chairman, the conference report provides for the continuation of 6-day delivery of mail, as well as rural delivery.

In addition, the conferees agreed that rates for preferred-rate mailers should not rise above the step 14 level. This means that revenue foregone, those funds appropriated to the Postal Service to make up for lost revenues resulting from preferred-class service, will be funded at an annual level of $789 million rather than $708 million had the step 14 rate not been specified.

Conferees felt that with economic times as they are now, the burden of rising postal rates on charities, nonprofit organizations, libraries, et cetera, would entail too much cost for these entities to offset. Therefore, in the interest of the work many of the preferred-rate mailers perform, we agreed to fix the step increase at step 14 and the higher subsidy rate.

For Independent Agencies, the conference report provides that funds made available to the General Services Administration Federal Building Fund may be used to start up or otherwise proceed with projects which have been approved by the House and Senate for construction. This category also includes repair, alteration and renovation funds for improving Federal facilities in such areas as handicapped aids, energy conservation efforts, and safety modifications.

Also, regarding GSA, conferees have included a provision for the GSA in general which prohibits funds from being used to contract out certain veterans- preference jobs in GSA facilities which would, without the prohibition, be contracted out pursuant to an OMB directive. These jobs consist of building security, custodial, and messenger positions which are filled by veterans. To allow them to be contracted out now would go back on past congressional intentions to assist veterans.

Mr. Speaker, let me say this: Yesterday, the press grabbed me. The TV cameras were there, and the reporters said, "Hey, the jobs bill is going down. This is a great victory. This is a great victory for the President of the United States."

I say before all my colleagues that this is no victory for the President of the United States, it is no victory for the House of Representatives, and it is no victory for the Senate. Everyone

who was involved in this had to compromise.

I hope that the President is going to compromise on the MX missile. No one won on this issue. Everyone was a loser. Everyone walked away disgruntled, hoping that they had something else. But, Mr. Speaker, let me tell the Members one thing: It is the best thing in town today, and we had better vote for it.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I would like to commend the gentleman in the well for his leadership, particularly on the Garrison diversion project, and ask just a question about the statement the gentleman has just made.

These are difficult times and difficult days, and yet last week the House of Representatives gave its will on the Clinch River and on the O'Neill project and on the Garrison diversion project. Yet, the conference agreement comes back, and none of those projects are impacted significantly except for a small reduction in Clinch River. Could the gentleman just take a moment just to explain the reasoning why none of the House positions on those issues prevailed?

Mr. CONTE. Certainly. First, the Senate struck all of the three provisions that the gentleman mentioned, and then we went into conference and we debated the issues in the conference, and after we debated the issues in conference, I think Mr. COUGHLIN asked for a vote on Clinch River. We lost on that vote on our side.

Then, we had a vote that I asked for on the Garrison diversion project, and we lost on that on a rollcall vote. But, I think the gentleman has to look at the whole picture. There was an amendment in there that the Senate put in regarding silver. I had an interest in it. We battled that, battled with with Senator MCCLURE for about an hour, and we had a rollcall on the thing.

What I am trying to say is, after 10 hours you have to look at the entire package. Do you want the entire package? Do you want to bring the Government to a standstill? Do you want to bring the Government to its knees for your particular interest in that package? I would make one suggestion, and one suggestion alone, and I have told that to my good friend from California on the way over here.

□ 1215

I think we learned a lesson. I think we all get smarter the more we go through these things. We got good healthy votes here in the House on Clinch River, and over in the Senate it lost by one vote. We got good healthy votes on the Garrison diversion project.

I think next year if we get into the same problem and the same issue, either on the continuing resolution or on the water and energy bill, we are going to take some different action than we took this year.

Mr. EDGAR. Like binding the conferees?

Mr. CONTE. Like instructing the conferees.

Mr. EDGAR. Mr. Speaker, I have just one followup question.

Does the gentleman know if any additional projects were added to this bill in the water area that have not been discussed?

Mr. CONTE. Not in title II. There was money in title II for the Corps of Engineers for Tennessee-Tombigbee and several other projects. Those were dropped in title II. There were two small projects added to title I.

Mr. EDGAR. Mr. Speaker, I appreciate the gentleman's work and his leadership, and I wish him a happy holiday.

Mr. CONTE. I thank the gentleman very much. I appreciate that.

Mr. COUGHLIN. Mr. Speaker, will my colleague yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Speaker, I want to congratulate the distinguished ranking minority member of the Appropriations Committee, as well as the chairman of the committee. I think it resolve all the myriad of issues that are involved in this absolutely mammoth bill is a miracle second only to the miracle of Christmas. It was a miracle that it was all put together and that we have a package that is a good package.

I regret the Clinch River decision, as the ranking minority does, and the Garrison diversion and the O'Neill projects, but overall to try to resolve all the issues involved in this continuing resolution is nothing short of a miracle ranking with the miracle of Christmas.

Mr. Speaker, I congratulate the distinguished ranking minority member on a great accomplishment.

Mr. CONTE. Mr. Speaker, I thank the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, may I say at this time I wish to thank my colleague, the gentleman from Massachusetts (Mr. CONTE), for his fine statement, and I call the attention of the Members again to the fact that when we are in trouble, it is time to unite and pull together. That is what we did, I think, in conference. I think we recognized reality.

I wish to thank all the members of the Committee on Appropriations on both sides of the aisle and especially the conferees for the work they did in bringing this complicated legislation before the House.

Mr. Speaker, I yield such time as he may require to the gentleman from Kentucky (Mr. NATCHER).

Mr. NATCHER. Mr. Speaker, I am inserting in the RECORD at this point a table showing the amounts provided in the joint resolution for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year 1983, along with appropriate comparisons, as follows:

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I want to thank and commend the gentleman from Mississippi (Mr. WHITTEN), the chairman of our committee, and the ranking minority member, the gentleman from Massachusetts (Mr. CONTE), and all the conferees for the support they gave me as far as the defense appropriations bill is concerned. With their support we were able to bring back to the Congress almost the same bill that left the House.

Mr. Speaker, the entire defense appropriations bill for fiscal year 1983 has been incorporated into the conference report on the continuing resolution. It appropriates $232 billion in total funding availability, including $231.6 billion in new budget authority and $423.2 million in transfers of unobligated balances to the current fiscal year. This is a massive sum and is more than I feel is needed for national defense at a time when we are facing significant deficits. There is little doubt this defense bill will have a great impact on our economy and the people of this Nation.

There are probably Members who are not entirely happy with the outcome of the conference. Nevertheless, I believe the bill does represent the best possible resolution of a very difficult conference. I believe the managers on the part of the House did a superb job in achieving an accommodation on the defense bill under extremely trying circumstances.

The Senate was $3.2 billion over the House figure, and in the conference, the Senate receded on about $1.8 billion, and the House receded on nearly $1.4 billion. The managers on the part of the Senate acted diligently and with statesman-like qualities when faced with very difficult options, even after many days of almost around the clock debate on the continuing resolution. I salute them, and the managers on the part of the House, who spent most of the day and evening yesterday in working out our differences.

The conference agreement is $18 billion under the revised budget estimate. I predict that next year, and the years to follow, continuing high deficits will force larger reductions in the defense budget. It may be that the next Congress will find it necessary to terminate a number of very costly programs that are not absolutely essential to our national defense, such as nuclear carriers and B-1 bombers.

The defense appropriation bill, as reflected in this conference report, is by no means a rubberstamped bill. The stamp of Congress has been firmly placed in the bill.

While the bill funds two nuclear-powered aircraft carriers and the B-1B bomber, production funds were not agreed to on the Pershing II and MX missiles. The so-called Jackson and Hart amendments adopted in the Senate were deleted from MX procurement and attached to the research and development portion of the bill pertaining to the MX. In essence, the Pentagon will be able to spend in fiscal year 1983 a total of $1.7 billion developing the MX missile, and $215 million in research on a basing mode. A total of $560 million for full scale engineering development of the permanent basing mode cannot be spent, and flight testing of the MX missile cannot proceed until all the requirements of the Jackson amendment are met. The conferees agreed that in the event of an ultimate successful flight test program on the MX missile, the Pentagon will be permitted to deploy developmental MX missiles if the President deems that to be necessary. Both Houses of Congress must approve the basing mode before affirmative actions relating to the MX can be taken by the President.

Now let me highlight some of the conference agreements that were achieved.

CIVILIAN AND MILITARY PERSONNEL

In the personnel area, the conferees included the fiscal year 1983 pay raise for both civilians and the military, but required DOD to absorb 25 percent of the cost.

The conferees also agreed to limit the number of U.S. military personnel stationed onshore in Europe to the planned 1982 level. Of course, the President was given authority to waive this limitation in the event of an overriding national security requirement. In addition, the conferees agreed to place a floor on the number of military technicians based upon the September 30, 1982, levels, preventing the planned conversion of 1,200 additional technicians.

Due to the continuing absence of an authorizing pay bill, the conferees extended the expiration date of the military enlistment and reenlistment bonus programs to March 30, 1983. This will provide ample time for the authorizing committees to act if they desire this program to continue.

Finally, a general provision was included which prohibits placing a civilian personnel ceiling on DOD industrially funded activities. Since funding for these activities is dependent directly upon customer workload, the conferees believe that removal of this artificial ceiling will increase productivity.

OPERATIONS AND READINESS

The conferees agreed upon several initiatives which will improve the readiness of DOD.

A total of $150 million was added above the budget for the maintenance of real property. This will continue the congressionally directed initiative to improve the facilities where our troops live and train both in the United States and overseas.

The conferees also increased Marine and Navy flying hours by $25 million above the budget to insure that our sea services are able to train to the extent of their logistics support capability.

Finally, the bill approves a $240 million initiative to replace obsolescent equipment at our DOD-owned industrial activities. Over a period of years, this investment will be repaid many times over through productivity increases as well as improved readiness of our maintenance and logistics pipeline.

PROCUREMENT

For the procurement appropriations, the conference agreement includes $80,710,866,000 in total funding, an increase of $370,661,000 above the House figure, and a decrease of $2,647,933,000 below the Senate figure. Significant items resolved in the conference agreement include: A total of $125 million was provided for procurement of Guard and Reserve equipment; $1,939,500,000 was made available for procurement of 855 M-1 tanks; $21 million was provided for procurement of 12 C-12 aircraft; $30 million was made available for two KC-130 tankers for the Marine Corps Reserves; $229,800,000 was recommended for the Tomahawk missile; Funds for the third battleship reactivation were not provided; $173 million for one T-AO fleet oiler was recommended; $100 million was provided for one MCM mine countermeasure ship; The conference recommended $179 million for eight C-130 aircraft, including 4 ski-equipped planes; $244,900,000 was recommended for 1,355 infrared Maverick missiles.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

The conference agreement on funding for the research, development, test and evaluation (RDT&E) accounts is $22,704,284,000, an increase of $590,230,000 above the House figure, and a decrease of $172,700,000 below the Senate figure. Significant RDT&E items resolved in the conference agreement include: $42 million for Army's high-energy laser technology; $73,811,000 for the Army helicopter improvement program; $58,365,000 for the Navy's advanced lightweight torpedo; $24,628,000 for the Navy's Mark 92 fire control system, which includes $15 million for the phased array radar; $38,254,000 for the Air Force's engine model derivative program; $78,859,000 for the precision location strike system; and $10 million for short wavelength laser.

Mr. Speaker, it is rare to find a conference agreement that will please ev-

eryone. This one is no exception. But we did the best we could under the circumstances.

In closing, I want to compliment our extremely capable staff for the untiring assistance they rendered to the committee that permitted us to bring this bill to conference and successfully conclude the agreement. They often worked around the clock, and on behalf of the committee, I want to thank them for their efforts.

Mr. Speaker, the following table outlines the results of the conference agreement:

[1] Includes supplemental. [2] As amended by H. Doc. 97-206 and H. Doc. 97-248. Also reflects an $109 million adjustment from O&M, Navy, to the Department of Energy budget, and adds $4,030,173,000, the amount anticipated to have been submitted for pay costs in the fiscal year 1983 pay supplemental. Note: Request includes $4,030,173,000 (budget authority) and $3,910,272,000 (outlays) for pay costs. Recommended includes $1,702,413,000 (budget authority) and $1,651,340,000 (outlays) for pay costs. These amounts are reflected in the mandatory totals.

Mr. EDWARDS of Alabama. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Alabama.

Mr. EDWARDS of Alabama. Mr. Speaker, I thank the gentleman for yielding.

I want to commend the gentleman from New York (Mr. ADDABBO) for the work he did on the conference, as well as all the conferees, and I wish to engage in a short colloquy, if I may, on the subject of the MX.

It is my understanding that we need to look at the bill language or the conference language on the MX as well as the conference report language, but what we have done is to provide in round numbers $2.5 billion for research and development on the MX missile, of which $560 million has been fenced until such time as the basing mode is in fact approved by the Congress pursuant to the language which we generally call the "Jackson language" and which was made a part of the conference language; is that correct?

Mr. ADDABBO. That is correct. It is also in accordance with the Hart language, which also fences part of the research and development.

Mr. EDWARDS of Alabama. But it is correct that the amount fenced is $560 million?

Mr. ADDABBO. The gentleman is correct.

Mr. EDWARDS of Alabama. Mr. Speaker, I thank the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. The $560 million is the exact figure in the House-passed bill as it left the House.

Mr. DAN DANIEL. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Virginia.

Mr. DAN DANIEL. Mr. Speaker, will the subcommittee chairman advise the

gentleman as to what happened to the funds for the Pershing missile?

Mr. ADDABBO. Mr. Speaker, on the Pershing II missile, the Senate receded to the House position. There were no production funds in the bill. But the conferees agreed to put $30 million in O&M for the training of Pershing I troops to operate the Pershing II missile, to refurbish missiles for training, upgrade Pershing I fire units to accommodate the Pershing II missile, and for engineering services to get ready for Pershing II deployment.

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman from New York (Mr. ADDABBO).

Mr. CONTE. Mr. Speaker, I yield myself 2 minutes.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I just wanted to check on a couple of things where it is not clear from the volume of paperwork we have before us as to whether or not they were retained.

Was the Hyde amendment regarding abortion retained in the language of the continuing resolution?

Mr. CONTE. Yes, the Hyde language was retained.

Mr. WALKER. Mr. Speaker, I thank the gentleman.

Was the language with regard to the Department of Education and school prayer retained in the language of the continuing resolution?

Mr. CONTE. Mr. Speaker, that was the amendment offered by the gentleman from Pennsylvania (Mr. WALKER) and it was retained. That was section 307 of the 1983 Labor-HHS bill which says that no funds appropriated under the act may be used to prevent implementation of programs of voluntary prayer and meditation in the public schools.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and will the gentleman yield further?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

The other concern I have about the bill is the fact that we are going clear through until September 30, so we are going to have a full year of operations under a continuing resolution. I realize that the committee worked hard and did the very best it could under very difficult circumstances, but I think as a matter of policy we are making very basic decisions about a lot of programs, sending them all through for the full year with no chance to come back and review them in the next Congress. That does give this gentleman some pause, that we are operating in such a way on $450 billion in spending.

I also have real concerns about the salary provisions that were adopted in the bill. I would say to the gentleman that I am pleased that we have retained the school prayer language and the abortion language as he has indicated.

Mr. Speaker, I thank the gentleman very much for yielding.

The SPEAKER. The time of the gentleman from Massachusetts (Mr. CONTE) has expired.

Mr. CONTE. Mr. Speaker, I yield myself 2 additional minutes.

Mr. Speaker, let me tell the gentleman from Pennsylvania, first of all, that I appreciate his cooperation. Second, let me say that I could not agree with him more on the continuing resolution. Members have heard me on the floor time and time again say that this is a poor way to run the Government. I hope that we do something with regard to the Budget Act. This committee was ready with bills, and we could not report these bills because the budget resolution had not been adopted.

Unless something is done, Government is going to be paralyzed and be brought to its knees. But there is one good thing about extending the resolution to the end of the year. As I said in the well of the House, on the defense portion of this bill, the gentleman from Alabama, Mr. JACK EDWARDS, the gentleman from New York, Mr. JOE ADDABBO, and TED STEVENS in the Senate, went through the defense bill item by item, so the bill that is in the continuing resolution would be exactly the same defense bill that would have been passed had it been approved by the House and the Senate.

Mr. HYDE. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Illinois.

Mr. HYDE. Mr. Speaker, I thank my colleague for yielding.

I want to take this opportunity to congratulate him and the gentleman from Mississippi (Mr. WHITTEN) and all the conferees for doing one of the most thankless and yet one of the most important jobs in this entire Congress. When nobody is satisfied, you can be reasonably sure that you have done a good job because compromises work out that way.

I want to express my disappointment that the Ashbrook amendment fell in the conference. I know that the gentleman from Massachusetts (Mr. CONTE) and others committed themselves to fight for it. The damage was done in the other body, and I regret that. It lost by one vote.

I simply want to say that this issue is not one that will go away. The House has established the policy, and it has been followed by the other body, that no Federal funds should go to pay for abortions, and because this Government is technically shut down as we debate and because we are in the afternoon of the first day of no funding for the Government, it would be a very difficult situation to seek to force the defeat of the conference report on that single issue, and thus bring Government to a halt. But I suggest that that issue will not go away, and it will be rebattled and refought in the next Congress.

Mr. Speaker, I just want to express my appreciation for the steadfastness of the conferees on this important issue—I know they did all they could under the circumstances. We will do better next year.

The SPEAKER. The time of the gentleman from Massachusetts (Mr. CONTE) has expired.

Mr. CONTE. Mr. Speaker, I yield myself 2 additional minutes.

I want to take this opportunity to thank the gentleman from Illinois (Mr. HYDE), who is my good friend, for his fairness in being reasonable about this whole issue. The gentleman is absolutely right, we did fight, and if the Members will read the report, they will find where the gentleman from Pennsylvania, Mr. JOE MCDADE and others have taken exception to that particular amendment. Unfortunately, as they say back home, "you can't win them all," but there are other avenues, not only for that issue, but for some other issues here that are very dear to my heart. There are other avenues, and there are going to be other opportunities when we get back next year. There will be supplementals and other bills up here where can take those issues and we will be fighting with the gentleman side by side.

Mr. MILLER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Mr. Speaker, I yield to my friend, the gentleman from Ohio.

Mr. MILLER of Ohio. Mr. Speaker, I thank the gentleman for yielding.

From what I understand from the colloquy between the gentleman from Massachusetts (Mr. CONTE) and the gentleman from Illinois (Mr. HYDE), the conference report language allows payments for abortions under the Federal employees health plan benefits; is that correct?

Mr. CONTE. That is right.

Mr. MILLER of Ohio. Also I understand that the cap was removed for the pay for the House?

Mr. CONTE. Yes, it was.

Mr. MILLER of Ohio. Therefore, Mr. Speaker, I oppose the conference report and would request a no vote.

Like everyone else here, I would like to go home for Christmas. The easiest way to be able to go home for Christmas would be to approve this conference report and send it on its way. But I am going to vote against it, and I urge my colleagues to do the same.

Let us not forget the Christmas present for Members of Congress that is allowed in this bill. The House and Senate will not now be receiving the

same present, but that does not alter the fact that there is handsome gift for Senators and Congressmen in this measure.

Members of the House could receive the 15-percent increase which I opposed earlier. Senators will forgo the pay increase in exchange for being granted the opportunity to obtain unlimited amounts of outside income.

So in effect, Members of the House will enrich themselves at taxpayer expense, while Members of the Senate will be given the opportunity to use their public office and position of public trust to enrich themselves by engaging in activities for which they were not elected—activities which might well involve them in conflicts of interest.

When the pay increase was being discussed in the House, it was alleged that the American people want us to have a pay increase. Anyone who really believes that is dreadfully out of touch with the American people.

The American people are not stingy or mean spirited. But they quite correctly feel that Members of Congress, who daily claim to be concerned about the plight of those who are going through difficult economic times, ought to be willing themselves to make some sacrifices for the common good. If we are not willing to make some sacrifices ourselves, all these speeches about our concern and all our hand-wringing amount to nothing more than empty gestures.

Do you really want your constituents to know that you care about them and about our Nation's economic difficulties? Then vote against this conference report which allows the congressional pay increase. Actions speak louder than words.

Now let me bring to Members' attention an item that is not in the conference report. This is an item which should be of interest to a majority of Members of the House. Contrary to the provisions of the House-passed Treasury/Postal appropriation bill, the conference report allows payment for abortions under Federal employees health benefit plans. Last year an amendment denying abortion coverage under Federal employees health benefit plans was offered on the House floor, and passed by the overwhelming vote of 253 ayes to 167 noes. This year this provision was included in the bill as reported from the Appropriations Committee. Even opponents of the measure acknowledged that the provision had strong support in the House, and would simply be added on the floor if not included at the outset. Now, however, the provision has been knocked out in conference, and the Members of the House will not even have an opportunity to vote separately on this matter. The will of the House has been thwarted, and we are prevented from doing anything about it—unless we disapprove the conference report as a whole. I urge a no vote on this conference report.

Mr. CONTE. Mr. Speaker, I reserve the balance of my time.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may require to the gentleman from Massachusetts (Mr. BOLAND), the ranking member of the committee.

Mr. BOLAND. Mr. Speaker, as I reminded the House a few days ago when we passed the continuing resolution, the 1983 HUD appropriation bill, which was signed into law on September 30, deferred action on four accounts. The thrust of those accounts involve the subsidized housing programs.

Because we recognized that it was very unlikely a housing authorization bill would be signed into law this year—we provided a total of $9.7 billion for subsidized housing programs in the resolution. That amount included approximately $9.2 billion for the annual contributions account and $500 million for the Ginnie Mae tandem account.

The comparable Senate figure contained only $5.7 billion for the annual contributions account. That represented a difference of $3.5 billion. The conference agreement which we have before us today brings back a total of $8.7 billion. That level of funding is $530 million below the House figure but nearly $3 billion above the Senate allocation.

So, Mr. Speaker, I believe that the House can look upon this agreement as being a very good compromise. In fact, it is estimated that the conference report will fund approximately 173,000 units of subsidized housing. That compares with only 118,000 units carried in the Senate version of the continuing resolution and 159,000 carried in the House version.

The fact is this conference agreement supports more subsidized housing units than either the House or Senate version.

Summarizing, the resolution includes the following; 2,000 units of Indian housing construction; 14,000 units of section 202 housing for the elderly and handicapped; 67,000 units of section 8 existing housing; 15,000 units of section 8 moderate rehabilitation; and 65,000 units of section 8 authority that will be allocated for conversion of units from the rent supplement and section 23 programs.

In addition, and this is something I think the House conferees can be truly proud of, we also provided $2.5 billion for the public housing modernization program. Every dollar of that $2.5 billion will be derived from new budget authority. Those funds will help rehabilitate up to 100,000 units of public housing—many of which are unoccupied—and which can be made habitable for low-income families. There are a number of public housing projects—particularly in the older cities of the upper Midwest and the East—that desperately need rehabilitation moneys. The amount provided in this resolution—the full $2.5 billion—represents a strong commitment from the committee and the Congress to help revive some of these projects. And, not insignificant, is the fact that these funds will provide upward of 90,000 jobs.

Finally, Mr. Speaker, on the plus side, the Senate yielded to the House and we have included in this resolution $500 million for the Ginnie Mae tandem program. Of the total, the conferees agreed that $250 million would be allocated to the targeted tandem program. Those funds are to be distributed on the basis of the chronological firm commitment date to those projects that participated unsuccessfully in the March 1982 distribution of funds. The other $250 million is made available for partially assisted section 8 projects and can be allocated at the discretion of the Department.

Now, of course, like almost every conference that I have been involved in—we did not get everything we wanted. The biggest disappointment was that we could not get the Senate to yield on providing any new public housing units. I believe, however, that we do have an agreement—which if the Department gets busy and does the kind of a job it should for the public housing program—will result in providing new budget authority for this program in 1984.

The Senate felt strongly that until some beginning had been made to clean out the public housing new construction pipeline—it was inappropriate to provide additional budget authority in fiscal year 1983. In that connection, I want to make clear that both the bill and report language are constructed so as to insure that HUD gets moving and permits every reasonable, viable new public housing project—regardless of how long it has been in the pipeline—to go to construction as soon as possible. What we want to do is let the viable projects succeed and get rid of the deadwood.

I also want to point out to the Department the language in the statement of the managers which directs HUD to implement an emergency effort to bring to the construction stage those public housing projects currently reserved for new construction. The statement requires the Department to report on the progress of this effort within 90 days of the enactment of this resolution. We will be keeping an eye on that on that effort, and I will report back to the House as soon as we have some firm data.

There is no other program in the subsidized housing area which prob-

ably has been more maligned than the public housing program. But in my view—it has been a very successful program—housing over 3,000,000 low-income American families in more than 1.2 million units. I do not intend to see this program killed—and I want HUD and the Congress to know that I will work to see that it is not killed.

Finally, Mr. Speaker, the Senate yielded on another item of concern to the committee involving the Veterans' Administration medical computer system. I spoke about this issue when the continuing resolution was before the House last week. I only want to add that I am very pleased that the Senate yielded to our language—and I believe that there is now nothing that should impede the Veterans' Administration from beginning to install a workable medical computer system in its 172 hospitals.

Thank you, Mr. Speaker.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Speaker, this post-election session met with high hopes. The Nation on November 2 that it wanted action to combat the worst unemployment we have seen since the Great Depression.

The outyear deficits had to be brought until control if interest rates were to be brought down. Programs for public works, housing, and jobs had to be put on the books if unemployment was to be countered.

Today, with the Federal establishment shut down, the session draws to a close. The outyear deficit still runs out of control, with the hemorrhage of military spending and revenue losses unabated. The public works and jobs programs have been stricken from the continuing resolution.

And passage of the 5-cent gasoline tax increase scheduled for April 1, which will cause additional unemployment, seems assured.

The President and Congress gazed eyeball to eyeball, and Congress blinked. The last word from the White House was that it was not sure whether Congress offer of unconditional surrender would be accepted.

□ 1230

We may not even be allowed to keep our horses for the spring plowing.

Never was a prayer more in order. We have left undone those things we ought to have done. We have done those things we ought not to have done.

There is no health in us.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Speaker, the House position on the Clinch River breeder reactor is strongly in favor of termination. In the Senate, the project only survived by one vote. Any compromise lanuguage should be in the true spirit of the word "compromise."

During debate on this issue the fact was brought our that the authorization for the project has not been considered by the Congress. I do feel that this issue would best be resolved by the authorizing committee and strongly urge the appropriate authorizing committees, as is stated in the report language, to consider this issue early in the 98th Congress. We have been denied this opportunity by the provisions of the Gramm/Latta bubget which authorized Department of Energy programs for 3 years. Nevertheless, the Science and Technology Committee on which I serve voted to terminate the Clinch River project the last time it was up before us.

I believe that the Members of Congress who voted in a majority to terminate Clinch River, as well as the members of the authorizing committees, will be looking forward to the March 15 report by the Department of Energy exploring possible cost-sharing arrangements that will require greater participation by the private sector and reduce Federal expenditures on this project. I would like it to be made clear that this report to Congress ought to be more than an accounting of what is already owed the Government by the private sector. I am very familiar with the requirements of the current contract, as are many of my colleagues, I am sure. This report ought to explore the extent of the private sector's interest in participation in the Clinch River breeder reactor. Even if current requirements are met, the private sector's contribution will only amount to approximately 7 percent. The original cost-sharing scheme called for 50/50 cost sharing. I certainly would like to see at least a minimum of 30-percent cost sharing by the private sector, as I believe was recently agreed to by utilities in Germany.

Report language states that "the Department will not initiate construction of any permanent facility structures or place any additional major equipment orders during the period of this resolution." This would indicate, although not explicitly stated in the fiscal year 1983 resolution, that it is the intent of Congress that fiscal year 1982 funding shall not be used for these purposes either. Furthermore, while the report language permits the ongoing activities related to the Nuclear Regulatory Commission licensing process, this should not be interpreted to mean that if a construction license is obtained that construction shall begin. The language is explicit in stating that funds shall not be used for construction of permanent facilities. Neither should this language be interpreted as an endorsement of the NRC's actions last year granting an emergency licensing exemption permitting site clearance at Clinch River. In fact, I believe that Members of Congress and the public can insist on a normal licensing procedure for this first-of-a-kind project.

Finally, the language clearly states that the current rate of Federal funding shall be determined so as to take into account the anticipated $19 million available from non-Federal contributions. Of the original $200 million in the continuing appropriations this indicates that only $181 million can actually be appropriated.

Am I correct in this, Mr. Speaker?

Mr. WHITTEN. Will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman.

Mr. WHITTEN. May I answer briefly and then I hope the chairman of the Energy and Water Development Subcommittee, the distinguished gentleman from Alabama (Mr. BEVILL), will respond in more detail. I call my friend's attention to the fact that we met with the other body with the threat of the Government coming to a standstill. The conference actually began after the expiration of the earlier continuing resolution. In this instance, they took one position and we took another. So on all of these subjects we ended up with a compromise which is necessary to bring the two sides together.

Mr. BEVILL. Will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from Alabama.

Mr. BEVILL. This language is a compromise. It was worked out with the Department of Energy and the interested Members on both sides. The new Secretary of Energy is anxious to look at some other arrangements on funding of the Clinch River.

He wants to see if he can get the private industry more involved and other alternatives.

Mr. BROWN of California. I thank the gentleman for that response. I am sure that a larger participation by private industry would certainly help in many ways to assuage the fears of some Members of Congress.

The other aspect of the language that I wanted to ask about is the language that the conferees strongly urge the authorizing committee to consider this issue early in the 98th Congress. Is that the language of the report?

Mr. BEVILL. That is the language in the report.

Of course it will be necessary for the authorizing committee to make this decision. Additional participation would require the authorizing committee to act on it.

Mr. BROWN of California. I thank the gentleman for that information.

Of course I will urge on at least one of the authorizing committees prompt

action in the next Congress to resolve this.

I thank the gentleman very much.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. I commend the distinguished chairman of the Appropriations Committee and his colleagues who have served the House so ably as conferees for their cooperation and assistance to those of us who were concerned with matters relative to legislation added the other body in the continuing resolution. Clearly, there must be a reasonable solution to bringing to a halt this practice of the Senate curcumventing the House legislative committees.

The conferees on the part of the House have certainly labored hard and effectively and well, and with remarkable sensitivity for the concerns of those of us who are interested in these legislative matters under circumstances which would be violative of the rules of the House.

I would like especially to commend my friends from Illinois, (Mr. YATES), Mr. CONTE and Mr. MCDADE and the other House conferees. They have done an outstanding job on behalf of the House and I express to them my personal thanks and commendations.

Also, Mr. Speaker, this is rarely said, my thanks to the very able staff of the Appropriations Committee who we all owe a debt of thanks. I particularly single out Mr. YATES' staff, Mr. Neil Sigmon, Mr. Fred Mohrman, and Mrs. Kathy Johnson.

Mr. Speaker, included in the continuing resolution is a revision of the so-called Warner amendment, which was worked out, with the cooperation of the distinguished gentleman from Illinois (Mr. YATES) between Senators WARNER, JOHNSTON, and HATFIELD and Congressmen OTTINGER, SHARP, and myself. I especially want to express my appreciation to Chairman YATES and all of the House conferees for their help and cooperation with our committee on this matter.

My appreciation also goes to the distinguished Senators I have just mentioned, and their staff, for their help and cooperation in developing a more acceptable alternative.

As indicated in the correspondence which follows these remarks, I support the provision as the best alternative. I am, however, concerned, as I have also indicated in my letters to the Appropriations Committee. Also, I refer my colleagues to my remarks of December 18, 1982, at page 32388 of the CONGRESSIONAL RECORD.

The provision is a one-time provision. It should not be viewed as a precedent. It does not confer on DOE any new restitutional or remedial authority or imply that the DOE has such authority. It is a very limited provision aimed at helping people. It is, I stress, an exclusive, one-time disbursement authority.

The situation is that, as a result of DOE settlements of alleged petroleum pricing and allocation violations which generally resulted in customers of refined petroleum products being injured, escrow or suspense accounts at the DOE were established for some of these funds. The DOE was supposed to proceed through regulations of the Office of Hearings and Appeals to identify the overcharged customers, including bulk users, and disburse the funds to them. To the extent that the bulk users passed the costs through to their customers, they are supposed to pass the recovered funds through also.

Unfortunately, because DOE officials were more bent on dismantling the DOE, including the Economic Regulatory Administration and the Office of Hearings and Appeals. The OHA petition process under the regulations was largely ignored, until recently, by DOE during the Reagan administration. This has caused consternation for all, including this committee, who are interested in overcharged customers being made as whole as possible, as quickly as possible. Delay is in no one's interest.

This has caused many in Congress and the National Governors' Association to seek legal ways to provide for disbursement of this growing trust account of non-Federal funds. Under prior GAO opinions, it was clear that the DOE lacked authority to provide such disbursement to other than the overcharged customers, although I understand that officials at DOE have wasted many man-hours trying to devise schemes to turn over the trust funds to the States as energy grants. I strongly oppose such gifts on the basis that the DOE lacks authority to make such grants to the States. The GAO has supported that view. This amendment in this continuing resolution does not affect that view. In fact, it tends to bolster it.

The amendment limits the DOE to using not more than $200 million of the trust funds in the escrow account on December 17, 1982, for disbursement to the States. It is my understanding from various information provided to me that this amounts to about $490 million. All, but about $275 million, of this sum is pledged to the OHA procedure. Of the remainder, about $80 to $90 million relates to the first sale of crude oil. It is the remainder of these funds that presumably would be considered for disposal under this section.

At this juncture, it is important to stress the purpose of the new section as follows:

It is the purpose of this section to provide the Secretary of Energy the exclusive authority for the disbursement of the designated petroleum violation escrow funds for limited restitutional purposes (1) which are reasonably expected to benefit the class of persons injured by such violations, and (2) which, based on information previously provided to Congress by the Secretary of Energy, are likely not to be, through procedures established by regulation, otherwise refunded to injured persons because the purchasers of the refined petroleum products cannot be reasonably identified or paid or because the amount of each purchaser's overcharge is too small to be capable of reasonable determination.

In regard to clause (2), I want to make it clear that it is the intent of Congress that the DOE only utilize funds that the DOE can honestly conclude are not likely to be refunded to injured persons because such injured persons cannot be readily identified or paid, or if identity is poscible, the amount involved is too small to be capable of reasonable determination. I understand that the DOE has made some presumptions concerning these injured people and amounts which my subcommittee is now examining with the help of the GAO to determine whether or not they are valid.

In providing funds under this section to the States, I expect the DOE to provide for the pro rata distribution from all of the settlements, consistent with the requirements of this section. In all cases the DOE can only use funds for disbursement where such use is consistent with the remedial order or consent order under which such funds were covered into the trust account.

Under the section, the funds will be disbursed to the States under a formula set forth in the section which is intended to provide an equitable distribution to all of the States and not tilt the distribution too heavily in favor of the heavy driving States. The formula does not include the term "price controlled refined petroleum products" in the Senate amendment, but instead refers to "refined petroleum products" which is a defined term. It retains, however, the same period; that is, 1973–81. I understand that the DOE's Energy Information Administration has reliable consumption data for the defined products for each State. However, to the extent such data is not readily available and reliable, the DOE is directed to use estimates from reasonably available EIA information. Clearly, the intent is to use the best data possible so all States are treated fairly, but not to delay disbursement unduly.

Once received by the States, the Governors are authorized to distribute the funds in accordance with the conservation programs listed in the section. The Governors would do this as if the funds were received under one or more of these energy programs. Thus, the rules and regulations applicable to these programs would apply to these funds as well.

Mr. Speaker, our intent here is to benefit people, just as we would do if the money were provided directly to injured persons. Thus, we provided that none of the funds should be used for administrative expenses. This is intended to be reviewed broadly. For example, we would not want to see these funds used to pay salaries or other expenses of those administering these programs, although we recognize that direct labor costs for installing weatherization or the other materials would, of course, not be precluded. Under these programs, low-interest loans might be possible. I again stress the people objectives of this provision.

Mr. Speaker, I reiterate my earlier cautions about this program. Still I support this alternative adopted by the conferees, which we jointly developed, over the Senate amendment. I also join my colleagues in urging that it be promptly, but properly implemented by the DOE and the Governors.

My Subcommittee on Oversight and Investigations will be examining the DOE's handling of this section, as well as the actions of the States in implementing this one-time program.

The pertinent correspondence follows:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C., December 19, 1982.

Hon. JAMIE L. WHITTEN,
Chairman, Committee on Appropriations, the Capitol, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is a copy of my December 17, 1982 letter to you concerning the so-called "Warner amendment" to the Continuing Resolution scheduled for House-Senate Conference today. Since then, my Committee staff has met with staff representatives of Senators Warner and Hatfield and the Senate Energy Committee to discuss this amendment.

While the staff has jointly developed vastly improved legislative language which is enclosed, I would strongly support you, Subcommittee Chairman Yates, and other House Members of the Conference in insisting that no legislative provision on this matter be adopted by the Conferees.

While there is a great temptation to complain that the Department of Energy has for too long delayed disbursement of the funds covered by the legislation, and that the funds could be used for good public purposes at this time, the fact remains that these are trust funds, and not Federal funds, and thus should not be disposed of through the whims of the Executive or Legislative branches. The funds derive from oil companies settling alleged oil pricing and allocation violations. They are held in escrow by the Department, pursuant to consent agreements, pending their disbursement to identifiable overcharged customers. Unfortunately, the Department has been slow to develop procedures under its existing regulations to provide for such dispersal—although I have repeatedly requested that this be done. Thus, the funds grow dust and earn interest.

The Warner amendment and the enclosed alternative draft both seek to break the trust and disburse funds to the States for "energy purposes." Neither the Senate-passed amendment nor the staff's draft would assuredly cut off possible future attempts to claim the trust funds by yet unidentified persons who claim to be overcharged customers, such as oil jobbers, bulk users and individuals. If those claimants were to be successful, and if the escrow account were already spoken for, the United States Treasury could well be held liable for the funds disbursed by this hastily considered legislation. That only would ensure another debacle such as we saw in the Swine Flu vaccination program. Moreover, it is even possible that the Secretary of Energy could be personally liable.

I do recognize that the House Conferees must reach quick agreement on the Continuing Resolution, and may not be able to refuse to accept any provision relative to this matter. With that in mind, I reluctantly support adoption for this Conference of the enclosed draft alternative, which was negotiated by Members of my Committee and our staff in discussions with Senators and their staffs. If, however, the President were to veto this Continuing Resolution, I would oppose any language dealing with oil overcharges in any other Continuing Resolution to be considered in this Congress.

I can support this provision only because it is a one-shot approach; it does not confer broad remedial or restitutional authority on the Department of energy; it limits the funds to a maximum of $200 million; it makes clear that only funds that are not subject to proceedings before the Office of Hearings and Appeals or judicial proceedings can be disbursed (so long as permitted by the applicable consent orders); it restructures the distribution formula in more equitable fashion than contained in the Senate amendment; it precludes use by the Department and the States of the funds for administrative purposes and, most importantly, it limits the States' discretion in using the funds to specified energy conservation programs and low income energy assistance. Those uses are clearly more closely akin to the purposes for which these funds were collected.

I appreciate your cooperation and that of Subcommittee Chairman Yates in this matter.

Sincerely,

JOHN D. DINGELL, *Chairman.*

DECEMBER 19, 1982

That the House recede from its disagreement to the amendment of the Senate numbered —, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

SEC. —. (a) It is the purpose of this section to provide the Secretary of Energy the exclusive authority for the disbursement of the designated petroleum violation escrow funds for limited restitutional purposes (1) which are reasonably expected to benefit the class of persons injured by such violations, and (2) which, based on information previously provided to Congress by the Secretary of Energy, are likely not to be, through procedures established by regulation, otherwise refunded to injured persons because the purchasers of the refined petroleum products cannot be reasonably identified or paid or because the amount of each purchaser's overcharge is too small to be capable of reasonable determination.

(b) As soon as practicable, the Secretary of Energy shall disburse designated petroleum violation escrow funds to the Governors of the States in accordance with the formula set forth in subsection (d).

(c) Amounts disbursed to the Governor of any State shall be used by the Governor as if such funds were received under one or more energy conservation programs. The Governor shall identify to the Secretary within 1 year after the time of disbursement the energy conservation program or programs to which the funds are or will be applied. Funds disbursed under this section shall be used to supplement, and not supplant, funds otherwise available for such programs under Federal or State law.

(d) The disbursement by the Secretary of Energy to each State shall be based on the ratio, calculated by the Secretary, which—

(1) the volume of refined petroleum products consumed within that State during the period beginning September 1, 1973, and ending January 28, 1981, bears to

(2) the volume of refined petroleum products consumed within all States during such period.

Calculations made by the Secretary of Energy under this subsection shall be based upon estimates by the Secretary from reasonably available information.

(e) For purposes of this section—

(1) The term "designated petroleum violation escrow funds" means amounts (not in excess of $200,000,000) which are derived from: settlements from alleged petroleum pricing and allocation violations generally resulting in overcharges to purchasers of refined petroleum products and held in trust accounts administered by the Department of Energy on December 17, 1982, and which—

(A) are not likely to be required for satisfying claims of potential claimants identified in of the Office of Hearings and Appeals initiated prior to December 17, 1982, or identified in judicial proceedings initiated prior to such date; and

(B) the use of under this section would be consistent with the remedial order or consent order covering such funds.

(2) The term "energy conservation programs" means—

(A) the program under part A of the Energy Conservation and Existing Buildings Act of 1976 (42 U.S.C. 6861 and following);

(B) the programs under part D of title III of the Energy Policy and Conservation Act (relating to primary and supplemental State energy conservation programs; 42 U.S.C. 6321 and following);

(C) the program under part G of title III of the Energy Policy and Conservation Act (relating to energy conservation for schools and hospitals; 42 U.S.C. 6371 and following);

(D) programs under the National Energy Extension Service Act (42 U.S.C. 7001 and following); and

(E) the program under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 and following).

(3) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

(4) The term "Governor", when used with respect to any State, means the Governor or the chief executive officer of that State.

(5) The term "refined petroleum product" means gasoline, kerosene, distillates, (including Number 2 fuel oil), LPG (other than ethane), refined lubricating oils, diesel fuel, and residual fuel oil, but does not include refinery feedstocks.

(f) No funds disbursed under this section may be used for any administrative ex-

penses of the Department of Energy or of any State, whether incurred in connection with any energy conservation program or otherwise.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C., December 17, 1982.

Hon. JAMIE L. WHITTEN,
Chairman, Committee on Appropriations, the Capitol, Washington, D.C.

DEAR MR. CHAIRMAN: It is my understanding that today the Senate amended the continuing resolution adding legislation to provide that $200 million of the funds collected by the Energy Department, in settlement of cases involving oil company overcharges and held in escrow pending disposition in accordance with the DOE regulations, shall be made availabel to the States for energy purposes. This is the Warner amendment.

As you know, I supported efforts by your Committee in passing this resolution with funds appropriated from general revenues for weatherization, State EPCA and ECPA conservation grants, and low income energy assistance. Such funding through appropriations from the general fund is essential and should be a part of the budget. Supporting those needed programs through raids on DOE non-government escrow accounts is an attempt to circumvent the budget and should be avoided.

I am particularly disturbed because the amendment would, as I understand it, allow the States unlimited discretion to utilize the funds for energy purposes, which could include many energy activities that are unrelated to the persons overcharged, such as farmers, school districts, small businesses, and other citizens. The Governor could even use the money to fund the State energy program and pay fat salaries. That will hardly help low income families who need money for fuel during the winter.

Further, I understand that the funding formula in the Warner amendment differs from the carefully considered formula established in current law for low income energy assistance programs. It would also allow the Energy Department to circumvent its own regulations which require that the DOE try to identify the overcharged customers entitled to these funds.

Subcommittee Chairman Yates and I have been vigorous in our efforts to insist that the DOE quickly resolve these overcharge cases without amnesty and distribute the funds to the overcharged citizens. This hastily drawn amendment will undercut that effort and establish a precedent for further Senate raids on the escrow funds, which are not limitless, for various other purposes.

The Congressional Budget Office informs me that the escrow funds are in a special deposit or suspense account administered by the DOE Comptroller, because they are non-government funds. Many citizens have a claim against these monies because they were unlawfully overcharged by the oil companies. This amendment would wipe out many of those claims.

I proposed that the house can resolve this matter simply by providing this funding through general revenues and only for specifically authorized programs. The result will be the same and will not require any legislation in an appropriation act. This is, in fact, the approach taken in the House-passed resolution, as I have noted above. The House position should be maintained.

Subcommittee Chairmen Ottinger and Sharp, and myself want to cooperate with your Committee. We are aware of the importance and urgency of the continuing resolution. However, we are also most familiar with the details of the DOE oil overcharge program and the other relevant DOE programs. We therefore urge that we and our staff participate in the consideration of this matter, as well as other legislative matters that are added by the Senate to this resolution which fall within our jurisdiction.

I am sending a copy of this letter to the Speaker requesting that Members from our Committee be added to the Conference to deal solely with the matters relating to our jurisdiction. You might, however, prefer a less formal approach which would assure our participation regarding matters under our jurisdiction and we would be pleased to cooperate with you.

Sincerely,

JOHN D. DINGELL, *Chairman.*

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Speaker, I do not intend to support this conference report as it partially lifts the 1979 freeze on the cost-of-living increases for Members of Congress. Even though the amount contained in the conference report is approximately one-half of what Members would be entitled to if it were completely removed, I still am opposed to any increase at this time. I, therefore, shall vote "no" on the conference report.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to my friend, the gentleman from Pennsylvania (Mr. MCDADE).

Mr. MCDADE. Mr. Speaker, I rise in support of this conference report. I have been privileged to be a Member of this body for 20 years and a member of the Committee on Appropriations for 18 years. I do not believe I have ever engaged in a more arduous exercise than the one we were compelled to engage in on this continuing resolution.

I want to offer my commendation to the distinguished gentleman from Mississippi, the chairman, Mr. WHITTEN, and the other conferees, and to my friend from Massachusetts, the ranking minority member, Mr. CONTE, and assure my colleagues that I do not believe anybody is happy with the results of the work product that we have to bring you.

None of us want to proceed on a continuing resolution but this is where we are.

All of us know that if we had our druthers we would have the individual bills here. But we do not.

I hope when you vote you will keep some things in mind. I hope you will keep in mind that the entire defense bill for the next fiscal year for the Department of Defense is contained in this piece of legislation. I hope you will keep in mind that our friends on the Defense Subcommittee, headed by the able gentleman from New York (Mr. ADDABBO) and my good friend from Alabama (Mr. EDWARDS), did yeoman work to try to bring together the differences, and there were enormous differences that existed between the House and Senate versions on this bill, and to present to the body a piece of legislation agreed to by both sides of the House, both the House and the other body, in a form that can be, I believe, accepted by the administration and make sure that the vital security interests of our Nation are protected around the world.

I want to say it has been a pleasure to work with my dear friend from Illinois (Mr. YATES) on the Interior title. We made some significant changes in the continuing resolution from our regular bill that will also impact on the people of this Nation, particularly with respect to making sure that those who are forced to live on low income and meet rising fuel costs will have some kind of assistance and protection against the threat of shutoffs.

We have had estimates that as many as 300,000 individuals, people in terrible dire circumstances, will have literally their heat turned off unless some assistance is provided.

As the body will recall, we have a fund in the Interior Department, Department of Energy appropriation, that contains some $200 million in recoupment from the oil industry that was recaptured because of overpayments that they had made during the period of the oil embargo, and which was recaptured after a thorough investigation and court proceedings. We will attempt to make that money available through the Governors of the various States to try to make sure that no citizen of this country in these difficult times will face that kind of problem.

This was difficult to work out. Happily we were able to.

Mr. Speaker, I hope that all of us will recognize the practicality of the situation and the reality of where we are and vote this with a resounding vote of confidence.

I yield back the balance of my time.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to my good friend, the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I am pleased to hear that an amendment has been added to the continuing resolution which helps the recipients of SSI who are the beneficiaries of private, nonprofit charity.

Throughout this year, I have served on the President's Task Force on Private Sector Initiatives. My task was to identify legal impediments and barriers to the fullest use of private problem solving in this country. As part of this effort, I asked Members of Congress to inform me of any such impediments they had come across in the course of their casework or correspondence. Several responded by pointing to the impact of SSI rules on

discouraging charitable groups from assiting the aged, blind, and disabled. The task force included this impediment to private sector initiative in its report listing specific items which ought to receive legislative attention.

The amendment I have mentioned temporarily addresses this problem. However this amendment will expire along with the continuing resolution next March 15. I agree with the chairman of the Committee on Ways and Means, Mr. ROSTENKOWSKI, and the chairman of the Subcommittee on Public Assistance and Unemployment Compensation, Mr. FORD, that legislation needs to be enacted making permanent changes in the law as it is currently administered. The present law and regulations distort patterns of charitable assistance based on need. Because SSI recipients have their benefits reduced by the amount of charitable assistance they receive, organizations attempting to help them find that they are, in effect, subsidizing the Federal Government rather than helping needy individuals. They frequently decide, therefore, to help others who do not receive SSI, even though their needs may not be as great. I support this amendment to deal with this situation and hope that it will be contained in the final version of this bill and that a similar, permanent change will be enacted early next year.

I would like to insert, at this point, the section of the report on impediments submited to the Task Force on Private Sector Initiatives dealing with this issue.

CONTRIBUTIONS TO SSI RECIPIENTS

IMPEDIMENT

In most circumstances, recipients of Federal Supplemental Security Income (SSI) lose a dollar of Federal support for every dollar of private assistance they receive. This discourages charitable groups from providing assistance to these aged, blind or disabled individuals, even though they may have needs which exceed Federal assistance.

DISCUSSION

The Federal SSI program began in 19~4 paying a guaranteed minimum income to desperately needy elderly, blind and disabled individuals whose income and assets were low enough to meet very strict Federal requirements. In 1976, the program was amended to permit SSI recipients to receive additional assistance from State and local government agencies without losing any of their Federal benefits.

However, under the current program, SSI recipients lose a dollar of Federal support for every dollar of private or charitable assistance they receive.[1] This occurs when they receive cash assistance or in-kind help from churches or other organizations in their communities.

This requirement of the law has the effect of discouraging charitable groups from assisting SSI recipients, even though these individuals may have needs far in excess of other non-SSI recipients who have been identified as potential beneficiaries. By helping SSI recipients, the charitable organizations are in effect helping the Federal government, since the SSI recipient is no better off as a result of the charitable assistance. Therefore, they often choose to help less needy non-SSI recipients instead. Examples of this situation are common.

Independent Living for the Handicapped, a nonprofit organization in California, uses donations from private sources to help individuals establish themselves in independent living situations rather than being forced to depend on others for their most basic needs. However, any aid they provide for SSI recipients is offset by a dollar-for-dollar decrease in the SSI benefit. The Mount Pleasant Church of the Brethren in rural Virginia decided to aid the poor and elderly in their area with cash assistance to be used toward their rent. However, the result of this assistance was no net improvement in the circumstances of those receiving assistance who were also SSI recipients.[2]

One of the reasons this dollar-for-dollar offset was included in the SSI program was to provide equal assistance to individuals in comparable circumstances. When one person is receiving regular or irregular assistance from some source, that person is better off than someone with no source of income whatsoever. Paying identical SSI benefits to individuals who have varying amounts of outside assistance breaches this notion of horizontal equity.

PROPOSAL

Charitable organizations have suggested that occasional assistance, particularly aid of an in-kind nature such as fuel, food, clothing or transportation assistance, not be deducted from individuals' SSI benefits so long as this help is not provided on a permanent, regularly recurring basis.

REPERCUSSIONS

It is not expected that this change in the law would have any impact on the Federal budget since charitable groups have hitherto been discouraged from providing assistance to SSI recipients. However, the benefits to the aged, blind and disabled individuals would meet very severe needs and would do so outside government channels and funding.

A policy which did not "count" gifts made to SSI recipients by private individuals might encourage an abuse of the program by families who wish to supplement their support of elderly or disabled dependents with government funds. A policy which permitted the "non-counting" of assistance provided by charitable tax-exempt organizations, however, would not lead to such a situation.

However, permitting some individuals who receive charitable assistance from an organization to receive the same SSI benefit as other individuals who have only SSI benefits upon which to rely might be viewed as inequitable, particularly by individuals who do not receive additional outside assistance. Therefore, it might be wise to limit the liberalization of the treatment of charitable assistance to occasional, or non-recurring assistance, or assistance provided on a regular basis but only for meeting some unusual need relating to the recipient's handicap, living situation, or the like.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, it is very difficult to take a document of this size and review it in the very few minutes that we have to review the legislation and make a decision as to whether you are for it or against it.

I would like to simply say that I think that the conference committee had a very difficult task. While I am disappointed at their decision on the Clinch River breeder reactor, while I am disappointed in the way in which they handled the O'Neill project and the Garrison diversion project, and while I feel that we as a House should have had an opportunity to deal constructively with the energy and water parts of this bill, I am prepared to support this continuing resolution.

I think we made the right decision on the MX. I think also that the pressure of this resolution should lead all of us to carefully consider and deal with the issue of jobs.

Mr. Speaker, I would just like to ask my colleagues on both sides of the aisle, in light of the fact that this compromise was made primarily on the jobs portion of the continuing resolution versus the MX decision, to commit ourselves to coming back in on January 3 to work carefully and constructively on a jobs bill that will help to deal with the issues of the 10.8-percent unemployment.

Mr. Speaker, I hope we can have opportunities in the authorizing committees to shape that jobs bill, to put Americans back to work.

Unfortunately, the provisions of the House-passed concurrent resolution have not been agreed to in the conference with the other body. It will however, provide us the momentum to move toward a national capital budget and repairing the basic infrastructure of our society. Let us use this time to draft a careful jobs bill which addresses the many issues involved in putting people back to work. Many of us are ready to work on this issue now.

Mr. WHITTEN. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I wish to draw attention to the joint explanatory statement of the managers in connection with amendment No. 133—title II of the resolution. We have respectfully requested the President to review the economic situation and include funding in his fiscal year 1984 budget submission for programs such as those in title II which will improve the economic situation and contribute to the country's real wealth.

As indicated in the statement of the managers, Government cannot solve the many problems facing the country by itself. It will take a coordinated effort with business and industry to restore the Nation's financial vigor.

There is a growing awareness in the Congress and in the country that we have neglected certain problems for

[1] Sec. 1612(a)(2) of the Social Security Act, as amended.

[2] Remarks by Rep. Panetta in Congressional Record, October 1, 1982.

too long. Many of our highways are in poor repair. Bridges have been allowed to deteriorate to a dangerous extent in many places. We are not taking adequate precautions to preserve and conserve our parks and recreational facilities.

If we will take care of the real wealth of the country, it will help to restore our financial might. It will generate productive employment—not make work—dead end jobs. At the same time, we must not forget those who are trying without success to find employment. Title II of the House resolution would have increased opportunities for small business. It would have increased assistance for the unemployed through employment services. It would have provided additional employment and training assistance. All these areas need to be addressed. It is hoped the President will review these programs carefully and request funding accordingly in his 1984 budget submission.

May I repeat here, in my judgment title II as passed the House was a fine piece of legislation. What we did was call on the various subcommittees of the Appropriations Committee for those projects that have been advocated and sponsored and supported in their committee but which had not been funded. So it had a sound basis to start with. But we were faced here with the statement that there was to be a veto and we were faced with the fact that the Government would come to a halt. So I think we handled it very well indeed and I think everybody realizes that with all of the things facing us that we had to delay it briefly. But we do think it is sound. Of course, it is open to the new Congress to take such action as it may desire.

Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Speaker, I express my support for this conference report.

The conference report on the continuing resolution contains a legislative provision that states that commuter authorities operating commuter service transferred from Conrail pursuant to the Northeast Rail Service Act (NERSA) shall be subject to applicable laws. The statement of managers indicates it is up to the authorizing committees to clarify any ambiguities. As chairman of the subcommittee with jurisdiction over NERSA and other railroad laws, I want to make it clear that there are no ambiguities in existing law.

It was clearly the intent of Congress in enacting NERSA that laws such as the Railroad Retirement Act, the Railroad Retirement Tax Act, the Railroad Unemployment Insurance Act, and the Railway Labor Act apply to the commuter authorities affected by NERSA. Thus, these laws would apply to the commuter authorities after they take over the commuter service from Conrail on January 1, 1983. Since the provision in the continuing resolution indicates that these commuter authorities are subject to applicable laws, it merely affirms the clear intent of Congress in enacting NERSA.

Mr. CONTE. Mr. Speaker, I yield myself so much time as I may require.

As most of my colleagues know, the conferees agreed last night to delete title II from the continuing resolution. This was not an easy decision for the conferees to make. While that decision makes the way clearer for signature of this continuing resolution downtown, it should not and cannot be regarded as a victory for any one side.

At a time of 10.8-percent unemployment, with more than 12 million people looking for work, and another 2 million that have given up on the job search, any attempt to provide relief and jobs is not to be dismissed lightly. At a time when our industrial capacity is functioning at its lowest level since the Great Depression, any attempt to turn the downward spiral around is not to be disregarded.

The decision made by the conferees was not a decision to dismiss the national tragedy of our unemployed or to disregard their plight. The decision was a realistic appraisal of what could be accomplished in the framework of an emergency bill designed to keep the Government running, and within the short time period we had to enact a bill.

In my opinion, the decision was also an honest realization that the approach taken in both the House and the Senate versions of title II was problematic, both in terms of how fast and how many people would be put to work, and in terms of the potential negative impact on economic recovery.

But let me make it very clear. I do not regard the deletion of title II as a victory. With so many of our people out of work, there simply are not victories, and no winners or losers. We are all in the same boat, and we sink or swim together. The only victory there can be is turning our economy around and putting our people back to work.

The decision that was made last night was a decision only to delay action, if our economy does not turn up immediately, until a more reasonable approach to putting people to work can be found. I will be working to find that approach, and I urge my fellow colleagues to work together, in a bipartisan fashion, toward that goal. Partisan politics deserve no place in consideration of this national crisis, and I hope we have all learned a lesson from the way title II was handled.

I want to commend the chairman of the Appropriations Committee, JAMIE WHITTEN, the chairman of the Senate Appropriations Committee, MARK HATFIELD, and all the conferees for their deliberations on this issue. The conference yesterday proved over and over again how high is the price of leadership, and how circumstances can require action that may be personally difficult, if not unpalatable, in the interest of the whole.

Finally, I would like to recall, as the holidays approach, under the Christian teachings, the story of Christmas, when Mary and Joseph found no room in the inn. The biggest danger inherent in the exercise of power is insensitivity. As long as I stand on my two feet, I shall fight to prevent our Government from becoming insensitive to the needs of our people. We will be back here in the New Year, and I hope we will seek a reasonable and effective way to address the needs of the unemployed, and to continue to do our best to bring our economy back to life.

□ 1245

The gentleman from New York (Mr. FISH) has a little Christmas gift in this continuing resolution. We prevailed over the Senate and we provided that money for that little hamlet outside of West Point. May they all have a joyous Christmas out there.

I now yield such time as he may consume to the gentleman from Illinois, Mr. MICHEL, the minority leader.

Mr. MICHEL. Mr. Speaker, for our colleagues who may not yet be present on the floor of the House but who are in their offices, or wherever, I would urge them to come in and help us establish a firm quorum here in the House. It is much better that we do it in that informal way than in a formal call of the House. I know of several Members who, for no reason other than family considerations, had to leave because of the urgency of the holidays, families, children, and having to go by automobile rather than by plane. So it would help considerably not to be in the kind of position of putting Members unduly on the spot by not being here for a critical rollcall.

Having said that, I hope Membrs who are doing nothing other than watching the proceedings here in their offices would get themselves over here to the floor of the House.

Now, may I say to my friend, the gentleman from Massachusetts (Mr. CONTE) and to my distinguished friend, the gentleman from Mississippi (Mr. WHITTEN) how much I personally appreciate what they did, along with their contemporaries, in meeting during all hours of the day and night over this past weekend to fashion this compromise. There were considerations from downtown, as the Members very well know. The President made his position clear on several significant items here, and I think all of us were out to make certain that we

got a resolution fashioned here that would pass muster down with the President as we are coming into the closing days of this session.

I feel rather good about the way this package was put together, and that it will pass muster when the appropriate time comes. I do understand that the President would still like to have, the CBI and, of course, the highway bill, which we have already considered over here in this body. Hopefully, the other body will join us in that effort in the remaining hours of this session.

I just want to thank each and every one of the Members for what they did by way of giving and taking and compromising, to give us this kind of an agreement that we have before us.

Mr. WHITTEN. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I wish to thank my friend and colleague, the gentleman from Illinois (Mr. MICHEL), the minority leader, for this kind statement and for the support we have had from the Members of Congress on both sides of the aisle. We appreciate it very, very much. We are proud of our work that we did. It took us a long time, about 12 hours. But we resolved all our differences and we are proud of the conference agreement we bring before the House today.

Mr. Speaker, at this time I yield 1 minute to the gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. I thank the gentleman for yielding.

Mr. Speaker, I rise in reluctant support of the provisions of this conference report which relate to the Clinch River breeder reactor. My reluctance is, in no way, a reflection on the diligence, ingenuity and abilities of the conferees. They have labored hard to bring us a genuine compromise.

At this point, the Congress has invested nearly $1.5 billion on the Clinch River breeder reactor. Under the terms of the conference agreement, a reduction in the proposed fiscal year 1983 funding level of nearly $40 million is provided together with a prohibition on construction activities during the course of the continuing resolution, which will last for the remainder of the fiscal year. These two modifications will add to the ultimate cost of the project, and I would call this fact to the attention of those who have opposed the project on the basis of its escalating cost. Approximately $900 million of the additional cost of this project is attributable to the delays enforced on the project by the continuing policy debate. I also wish to advise the Members of the letter which I have received from the Secretary of Energy regarding that Agency's willingness to explore alternative financing arrangements for the project with a view toward reducing, and I would hope substantially reducing, the Federal Government's financial commitment to this project.

THE SECRETARY OF ENERGY,
Washington, D.C., December 17, 1982.

Hon. MARILYN LLOYD BOUQUARD,
Chairman, Subcommittee on Energy Research and Production, Committee on Science and Technology, House of Representatives, Washington, D.C.

DEAR MADAM CHAIRMAN: You have inquired regarding the Department's undertaking preliminary reviews of mechanisms for enhancing private sector involvement, especially financial, in the Clinch River Breeder Reactor Project.

I have requested Dr. Shelby T. Brewer, Assistant Secretary for Nuclear Energy, to pursue such reviews.

It is my intention to provide the results of these reviews to the Congress so that they could be utilized in deliberations regarding the project early in the 98th Congress.

With best wishes,

Sincerely,

DONALD PAUL HODEL.

It is clearly possible that we will not be able to force a separate vote on the issue of congressional pay raises in this conference report. I want simply to indicate for the record that there is much in this bill to commend it, the CRBR provisions, the antibusing provisions, the prayer in school provisions, the defense funding provisions, and the fact that the total funding is below the section 302 budget ceilings; but, I also want to emphasize that I continue to object to the pay raise provisions of this bill. Mr. Speaker, I would say to those Members of the House who, along with me, voted against the pay raise provisions and in favor of reimposing the pay cap last Tuesday, that we have fought the good fight. It is unfortunate that our position did not prevail. Nonetheless, we can take considerable satisfaction from having been able to achieve recorded votes on this matter and thus, we have provided our constituents with a clear indication of our position on the matter of pay raises.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. DAN DANIEL).

Mr. DAN DANIEL. I thank the gentleman for yielding.

Mr. Speaker, the most serious domestic problem facing the American people is the absense of jobs. The greater challenge facing the 98th Congress is the creation of an economic climate in which jobs will be created in the private sector.

No issue is of greater concern to the Congress at this time than jobs for the large number of unemployed men and women in this Nation today. Nor should there be. Unemployment is at a post-World War II high, and the prospects for the immediate future are less than rosy. Congress obviously recognizes the need to take action, but the proposals which have been made to provide jobs are mere band aids, and offer no long-term solutions.

Public jobs can only be paid for with taxpayer's money which is either taxed away or borrowed. If it is taken through taxes, the individual is denied the opportunity to spend money on goods and services which are the basis for private sector jobs. If it is taken through borrowing, the individual is denied credit for purchases, and business is denied credit for investment.

Unemployment does not just happen. It is caused. And it is not caused because there are people of ill will out there in the marketplace deliberately withholding employment opportunities.

So what causes our present level of unemployment?

Perhaps the largest share of the blame goes to the loss of our competitive edge. At first, it was only foreign markets we lost to international competitors; now, even within our own country, foreign manufacturers are out-selling domestic ones. They are in many cases turning out a better product, at a better price, than we are doing here at home. As an example, a Member of Congress recently cited his own experience: In the belief he should put his money where his national spirit was, he bought an American car. In this $16,000 automobile, there were 16 defects in the hood alone. From my own experience, just last weekend my son and I went shopping for a fairly expensive item. No one seemed excited about waiting on us.

A second big cause is that we have completely lost touch with the work ethic. Now, work ethic does not necessarily mean working hard; it does mean working proud—proud of what we do and our ability to do it. In our own district, 1,300 Mexicans were brought in to work on farms, while there were an even greater number of unemployed. When asked why they neither sought nor accepted these jobs, some of the unemployed replied the work is undignified. Booker T. Washington said, "There is as much dignity in tending the fields as in writing a poem."

This same false sense of dignity has resulted in another inconsistency. There are, I have been told, about the same number of job openings in this country as there are unemployed. Many of these jobs require skills the unemployed do not possess, it is true. And it is in part a fault of our education system, which has failed to see the career paths of the future, and prepare young people for them. But a great many of these openings are in jobs which require minimum or no skills, and they are simply scorned by those who feel such work as undignified. Certainly, I have not always held the job that I wanted. However, like many others I took what was available

until I could prepare for something better.

A complicating factor has been near-hysterical reporting by some of the national media. Many in this professsion operate on the theory that "good news is no news," and so if there is a peril to be found, they will exploit it in the name of a good story. Consider a few examples.

On October 25 of this year, Wall Street experienced "its worst day since the last Monday in October of 1929"—a direct quote from a metropolitan daily. The commentators made much of this, since the next day was "Black Tuesday," October 29, 1929, the beginning of the stock market collapse and the forerunner of the Great Depression.

What the reporters did not tell us was that the 30-point drop in 1929 was at a time when the Dow Jones average was only 300; the 36 point drop in 1982 was from an average more than three times greater. It made a catchy story, but the perspective was lousy.

Again, we are repeatedly told that each month's unemployment statistics are the "worst since * * *" Yet in 1932, one of the worst years of the Depression, unemployment was 12 million, just like today; the unemployment rate was 23.6 percent—more than twice as high as today.

The unemployment figures of today, while unacceptable, do not have the same economic impact as in the 1930's. During that era few women and teenagers had entered the work force in what is now called the private sector, then referred to as public work. Generally, there was only one bread earner in a family. Perspective again is important for objective comparison.

Is there any wonder that the people of this country, even those who are employed in relatively safe jobs, are afraid to spend money and buy the things which will get industrial wheels turning?

Unemployment exacts an enormous cost to the Nation. In the second quarter of 1982, the annual deficit ran at $120 billion. If we had enjoyed full employment, it would have amounted to $9 billion, an easily managed amount.

But the cost to the Nation is as nothing to the cost to the individual who is unemployed. No Member of Congress feels more compassion for the jobless than I. The idea of being unemployed is not something I merely think about; unlike most others, I can remember it. I have been without work, without food, without a roof for my head. And while I do not recommend it to anyone, I know it is a state which can be survived.

And I know as well that it is within the capability of this Nation to find the solution to this problem, once we accept some hard truths, and get about the world's work.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the conference report on the continuing resolution and I ask permission to revise and extend.

The overwhelming reason for approving this conference report, Mr. Speaker, is that without it, our Government will come to a crashing halt. Unless we approve this resolution, thousands of Federal offices will close and tens of thousands of people will be put out of work.

This is not a perfect bill. I have reservations about the congressional pay raise. I did not support the pay raise nor did I support raising the cap.

Nevertheless, this matter has gone before both the House and Senate and now agreement has been reached in the conference committee.

I think the Members of Congress deserve a pay raise, Mr. Speaker. While I did not support a raise in this amount or removal of the cap, the issue has been debated in an open and straightforward manner and the majority has spoken. Despite my reservations, I think we should approve this resolution at this time.

I thus support the pay raise position though I have differed in the past with my leadership on this and I urge approval of the continuing resolution.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. WRIGHT), the majority leader.

Mr. WRIGHT. Mr. Speaker, surely the contents of this conference committee report are not wholly pleasing to anybody. But worse than any of our individual objections would be the consequences of our failure to pass it.

We need to concentrate on the consequences of such a failure. If we were to permit our personal pique over our individual failure to get our way in various matters to create a precarious game of brinkmanship between the White House and the Congress, just think of the consequences to the American people, those whom we are sworn to serve.

If this bill does not pass, then the men and women of our armed services will face payless paydays.

If this bill does not pass, the Defense Department will not be able to buy fuel for its planes and ships and tanks.

If this bill goes down, 36 million social security beneficiaries will be denied the timely receipt of their monthly checks.

Many employment offices would be shut down, and the services that they provide for the unemployed would be terminated.

Possible layoffs in the postal ranks if this bill does not pass could hopelessly delay the delivery of mail in this busiest season of the year, to the detriment of all Americans.

Six of the departments of Government would close down completely.

I do not think any of us wants to be responsible for those results.

Quite frankly, there are those on the Democratic side—I among them—who are bitterly disappointed over our inability to get any money included in this bill to initiate jobs to put Americans back to work. We have tried faithfully, and the House three times this year has passed significant jobs initiatives. The housing initiative was passed by the other body also and then vetoed by the President. We did not muster the votes to override the veto. In the summer we passed a modest public works jobs bill, and it was not taken up in the other body. Earlier this month we passed a $5 billion public works jobs bill to stimulate employment, to do the things that need to be done for America and employ some of America's unemployed. The other body trimmed it down to $1.2 billion, and finally abandoned it entirely in the face of a Presidential veto threat.

So be it. In the words of Disraeli, we appeal to history. Let us take some consolation on this side in the fact that that history is only 1 month away, when a new Congress can take up once more the imperative demands to get this economy moving again. But for now we have the responsibility to keep the Government functioning. Let us face that responsibility and do our duty and vote for the bill.

Many on the other side, including the President, are disappointed because the bill does not contain money for funding now of the building of the MX missile, although it does contain money for the research and development. Perhaps some good will flow from that. Perhaps a better basing mode will result. Or we may even achieve a break through in our negotiations with the Soviet Union to make the production of the missiles unnecessary. In this lull perhaps we both may contemplate those words that were spoken 22 years ago by President Dwight D. Eisenhower who said:

> What can the world or any nation even hope for if no turning is to be found? The worst is a total war. The best would be this: A life of perpetual fear and tension, a burden of arms draining the wealth and labor of all people . . .

So nobody has been a complete winner in this matter, not Democrats, not Republicans, not the House, not the Senate. But the American people clearly would be the losers if in childish obstinacy we were to stamp our feet and hold our breath and in our petty pique refuse to pass the bill because it does not reflect all that is in each of our own wish lists. No one of

us can create legislation totally in his or her own image.

So today let us join together, disappointed though we may be individually in the contents of this legislation, and resolve that we shall do the responsible thing for the American Nation. Let us keep the American Government functioning and vote aye on this bill today, and then resolve in our hearts that we shall come back in January and together find the ways to make this American economy move forward, put the American jobless back to work and revitalize and revive America's industry, to the end that the coming year may be a year of expansion and not another year of retraction.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. FAZIO).

Mr. FAZIO. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of this conference report. It does not solve all the problems we set out to deal with but it is the best we could do under the circumstances.

I would like to outline the conference agreement on the cost-of-living adjustment issue. Over 32,000 senior-level Government employees will be affected. This is only the second cost-of-living adjustment that the most senior people in Government—Cabinet officials, Members of Congress, heads of other agencies, deputy and some assistant secretaries—have had since 1975. During this same period, all other general schedule employees have received over 40 percent in cost-of-living increases, while the senior people will have received about 20 percent if this conference agreement is approved.

The agreement provides the following:

Salary effective December 18, 1982

Executive level:	*Amount*
I (includes Cabinet)	$80,100
II (includes Members of Congress except Senators)	69,800
III	68,400
IV	67,200
V	63,800

Senators were excluded from this adjustment at the request of the Senate conferees. For the past several years, however, Members of the Senate have had no ceiling on their outside earned income—while Members of the House are limited by the Rules of the House. Thus, there has been inequity for a long time in the allowable income of Senators and House Members. The Senate has enjoyed a much higher income level potential, and that will remain the case even under the new salary schedule.

The conferees also agreed that Federal judges and Justices of the Supreme Court are entitled to the October 1982 cost-of-living adjustment of 4 percent, which had previously been capped because of section 140 of Public Law 97-92. Language has also been added so that Senate staff salary limits will be pegged at the new salaries of a Member of Congress, as if Senators received the increase.

It is worthy to note, Mr. Speaker, that as of midnight Friday, the salary of Members of Congress was raised to $77,300. This is based on the operation of normal, uncapped cost-of-living adjustments based on the Executive Salary Cost-of-Living Act of 1975, and the December 10, 1982, decision of the Comptroller General regarding the legal interpretation of section 130(c) of Public Law 97-51.

So, by our action here, we are reducing salaries of Members from $77,300 to $69,800. I hope the Members and public understand that.

On another matter, Mr. Speaker, the conferees reached a compromise on the very complex question of the Copright Royalty Tribunal's recent decision on cable system rates paid into the copyright owners fund.

There was some concern about the timing of this decision and the Senate provision was based upon that concern. The conference agreement delays the effective date of the Tribunal's October 20, 1982, decision with respect to rates charged to cable system operators for certain broadcast signals until the U.S. Court of Appeals for the District of Columbia renders a final decision or March 15, 1983, whichever occurs first. The accrual of liability for copyright royalty fees is similarly delayed. The conference agreement also includes a proviso to insure that in the meantime the Copyright Office and the Library of Congress may continue to perform routine business except as solely and specifically related to the subject decision.

Mr. Speaker, I support the conference report, and I urge the Members to approve it.

Mr. Speaker, I am happy to report that in the statement of the managers accompanying this continuing resolution (H.J. Res. 631) the Congress clarifies its intent that funds approved for the Sacramento Municipal Utility District's photovoltaic project should be provided by the Department of Energy at a rate sufficient to enable the utility to maintain its proposed schedule for the project's second phase. I would like to submit for the record a pair of letters; one from the utility, the other from representatives of the Acurex Corp., which set forth the schedule SMUD hopes to maintain for phase II. The reference in the statement of managers will thus be unambiguous, and the schedule to be met hereby defined.

SACRAMENTO MUNICIPAL
UTILITY DISTRICT,
Sacramento, Calif., December 1, 1982.

Re SMUD photovoltaic project.

Hon. VIC FAZIO,
House of Representatives,
Washington D.C.

In your letter of November 22, 1982, you asked for a description of our program plan for the first and second megawatts of this project.

The purpose of this letter is to outline to you the District's plans for overcoming some of the near-term barriers to cost-efficient use of photovoltaic generation by utilities during the design and construction of the first two megawatts. In addition, I have included a brief description of how we plan to approach development of the project beyond the first two phases.

PHASE I—PROOF-OF-CONCEPT AND SYSTEM DESIGN

SMUD views the first one-megawatt phase of the project as a benchmark of current technology. Amongst the claims of capability and potential is a need to show where the industry stands in relation to the fundamental requirements of a utility. The objectives of Phase I are, therefore, to:

Provide a large-scale, grid-interactive system to obtain needed experience in central-station structures, power conversion, grounding, and dispatching of a photovoltaic generation source.

Demonstrate that the photovoltaics industry has the technical and manufacturing capabilities to meet utility standards of performance, delivery, and reliability at a price which indicates progress towards cost-effective power generation.

The challenge of Phase I is to design a complete fully-integrated system which addresses these critical central-station objectives. The procurement of the entire quantity of photovoltaic devices from a single source gives us the best opportunity for economies-of-scale in module production and balance-of-system installation.

PHASE II—EXTENSION OF PHOTOVOLTAIC MODULE TECHNOLOGY

Current photovoltaic module technology does not allow SMUD to purchase technically-appropriate, cost-effective equipment for the entire 100MW project. The photovoltaic modules purchased for Phase I will not be the long term solution. In Phase II, SMUD needs advanced technology.

If we are to stay on our original project plan, more effective photovoltaic modules are required. For example, central-station modules should be capable of operating at a level of at least 1000 volts relative to ground. Furthermore, because SMUD anticipates purchasing large quantities in the near future, we see the need for the industry to establish and adhere to module performance and configuration standards specifically for central-station applications.

If a sufficient number of vendors can respond during Phase II, we anticipate the purchase of standardized modules from several vendors for qualification and comparison. These qualification arrays, which will operate at the 1000 volt condition, may represent 10 to 30 percent of the one megawatt system contemplated for Phase II. A qualification array purchase from an individual vendor may be as large as 100KW. This approach will enable SMUD to extend what will be learned from Phase I while still providing an increase in our generating capability commensurate with ratepayers investment. Our ability to purchase from multiple

vendors depends on the photovoltaic industry's willingness to standardize their modules and share some of the risks of developing a utility-quality product.

FUTURE PHASES—COST EFFECTIVE PHOTOVOLTAIC POWER

The development of standardized modules in Phase II will significantly enhance our ability to carry this project to completion. Starting in Phase III, we will begin to install capacity in ever large increments. The availability of several photovoltaic module suppliers is the key to the success of this strategy. Many issues will remain to be resolved in the future phases of our 100-MWe project. Further module price reductions, large scale DC-AC inverter qualification, automated installation, and balance-of-system cost reductions have all been specifically identified as areas needing attention. The successful resolution of these issues will place heavy demands on all elements of the photovoltaic industry. Our project is multi-phased to remain open and flexible to be able to assimilate new developments as the industry brings them to commercial readiness.

We, at SMUD, have great expectations for photovoltaic generation and appreciate the effort made to bring the industry to its current level. We enlist your continued effort so that we may all span the gap between our first megawatt of generation and the future of central-station photovoltaic power.

JOHN J. MATTIMOE,
General Manager.

ACUEX CORP.,
MOUNTAIN VIEW, CALIF.,
December 1, 1982.

Re: SMUDPV, Phase II budgetary estimate and timing.

Hon. VIC FAZIO,
U.S. House of Representatives,
Washington, D.C.

At SMUD's request, Acurex has prepared a budgetary estimate and rough schedule to implement the programmatic approach discussed in the letter to you from SMUD, dated December 1, 1982.

PROJECT APPROACH

An objective of Phase II is to install 1MW of photovoltaic power generation using technology which will be more representative of the eventual utility application than is available for the Phase I system. SMUD, with industry involvement and hopefully, with guidance from the Department of Energy laboratories at JPL and Sandia will prepare specifications and procure "standardized" photovoltaic devices. Currently no such industry wide standard exists. As many as four vendors will be identified to provide up to 100 kilowatts each with the remainder of the 1MW purchase going to the best of the vendors. 100 kilowatt procurements are needed to achieve representative utility operating conditions.

Although the primary approach is to install utility-standard, flat panel devices, other techniques (such as photovoltaic concentrators) may be included if cost, delivery and performance constraints can be satisfied.

SCHEDULE

The goal of the SMUD PV project is to install a second 1MW field one year after installation of Phase I.

Rapid initiation of Phase II is necessary to provide time for industry interchange, procurement, installation and comparison of the 100 kilowatt subfields prior to full system purchase. Assuming initial Phase II funding in May 1983, the 100 kilowatt subfields will be installed by May 1984. A draft Phase II project schedule is enclosed for your information. The key element is commitment of funds in December 1983 to several PV vendors, an event which must occur prior to the time that FY 84 funds would become available.

BUDGETARY ESTIMATES

Although the Phase II costs are highly dependent on the response from the PV industry, Acurex has prepared Phase II budgetary estimate under two funding scenarios: (1) Full Phase II funding in FY '83, and (2) minimum required funding. Exhibit A provides the breakdown.

The major impact of partial funding will be to alter the PV panel procurement leverage. With full funding, the 100 kilowatt purchases could include a commitment to the subsequent 600 kilowatt purchase for the top supplier. We anticipate much lower prices from all vendors under this scenario. Overall additional cost of the partial funding approach will be roughly $1.5 million.

Allowing for the appropriations process, allocation by OMB, and contracting by DOE, one must assume that FY '84 funds will not be available to the project before May 1984. Government share by this time will exceed $3 million by either funding approach.

If you have questions regarding the enclosed information, please give me a call.

Very truly yours,

MITCHELL WOOL,
Project manager.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Speaker, I rise in support of the conference agreement on the continuing appropriations resolution. I was proud to serve as a House conferee and while none of us is totally satisfied by the agreement we have reached, I believe it represents a fair and supportable resolution of the differences we had to resolve.

I want to focus on two particular aspects of the conference report. First, I am disappointed that the imminent threat of a Presidential veto forced us to delete the title II jobs program. The unemployment problem in the Nation is totally unacceptable, and I, for one, strongly believe the Government has a responsibility to take affirmative steps to help address the problem. I am happy to note that the conferees of the other body have agreed to join us in urging the President to include a positive jobs program in his fiscal year 1984 budget submission.

Second, let me discuss the agreement we have reached on the MX issue. I believe it combines the most positive elements of both the House and Senate positions. First, the House held firm to its position that we should not approve procurement funding for the MX missile at a time when it is obvious that a majority in Congress, and a wide range of experts in the arms field do not support the basing mode proposed by the President. It is just commonsense not to commit to missile production until we can be assured that a survivable and effective basing mode is available.

It should also be noted that recent court decisions bring into question the constitutionality of all forms of congressional veto, and an effort to "fence" procurement funds could lack legal standing and be challenged in the courts by an aggrieved party.

The agreement also includes the language added in the other body that requires the President not only to submit a detailed technical assessment of Dense Pack and any modifications to it, but also an assessment of alternative basing modes, alternative missiles, and alternative programs. These alternative programs include acceleration of the Trident II, enhancements and improvements to Minuteman, a road mobile missile and a common missile for land and sea deployment. This assessment will provide the Congress the opportunity to examine all our options and reach an informed decision on this aspect of our strategic modernization program.

The agreement also gives the President the accelerated time schedule for congressional action. He would then have the ability to submit a supplemental request tailored to the position that the administration and the Congress agree upon. In order to preserve this flexibility, research and development funds for full scale development of Dense Pack and for missile R&D to initiate flight tests is also held back until the agreement on basing and missile options is resolved. Missiles acquired for the test program would be available for deployment if the Congress approves them.

This is certainly a compromise that the President should accept. It keeps the opportunity for deployment of MX in the stated timeframe if a suitable basing mode can be found, and if Dense Pack does in fact prove unacceptable, it gives us the mechanism to fully examine a better course in a timely fashion.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. DIXON).

Mr. DIXON. Mr. Speaker, my support for this conference report is tempered by true sadness and deep regret.

Although the basic components of this agreement represent a balanced compromise, the glaring exclusion of any funds for the title II jobs program will have tragic consequences.

After much talk and promises, it seems the 97th Congress will end with our tail between our legs, and no funding for this important jobs stimulus package.

Because of the Senate's filibuster, there is understandable reluctance to send the President a resolution he would be inclined to disapprove. Such a veto could seriously disrupt our

country due to the lack of time to draft another resolution.

Yet this conference report backs down from the President's challenge, and dashes the hopes of Americans who believed Congress would prevail so that we might begin the new year by putting hundreds of thousands of men and women back to work.

This disappointment will be felt nowhere more deeply than among black Americans, who have borne the brunt of joblessness—a record 20-percent joblessness for black adults, and 50 percent among black teenagers.

When the American people spoke in November, their call was for a change.

A new direction for our country, and positive action to restore the economy and create jobs.

When the new Congress convenes in January, I ask that the leadership again make this legislation the first priority, and that we not delay action while this body organizes.

The American people look to us for representation and action. This setback must only strengthen our resolve and commitment for a major job stimulus program to put America back to work.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. BEDELL).

Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland (Mr. LONG).

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Speaker, I am hesitant during this holy season to Christian and Jew alike to speak on a piece of legislation which brings saddness to the Nation, to this House and to me personally. The manner in which we have considered and by which, I believe, we will adopt House Joint Resolution 631 represents a failure of our legislative process.

In the normal course of House consideration of appropriation bills, each Member would have an opportunity to weigh carefully the provisions of the legislation and to make contributions to items which that Member felt were not in the interests of the country. By lumping not only appropriations but many authorizations into one omnibus piece of legislation we have removed that careful oversight. Even as a member of the conference committee, I was unable to monitor all of the miniconference and private negotiations through which decisions were made. Several items in which I had a distinct personal interest were decided and included in the final legislation while I worked on the legislation for the subcommittee on which I serve.

Legislating in this manner does not serve the people well. This is the peoples' branch of the Government and I believe that the people we serve expect and deserve better than we are giving in House Joint Resolution 631. I compliment the chairman and ranking member for their hard work, patience, and dedication. I respect them very much.

Sadly, I must oppose approval of this legislation. After long consideration, with a full understanding of the implications of defeating this bill and sending our committee back to the drafting stage, I did not sign the conference report. I wish that I had been able to sign and support the conference report, because I know it was the result of much dedication and hard work on the part of all concerned. But I declined to sign, because I have serious reservations about key aspects of this legislation, as it impacts on the national security of the United States.

So I rise in opposition to this bill. I think that it will pass. But my purpose in speaking and voting against this continuing resolution is to increase the awareness of my colleagues of the state of our legislative process and the ramifications of this legislation.

I speak out not in anger but in sadness to express my opposition to this continuing resolution.

In this single bill, the Congress has zeroed funding for the production of the only two land-based ballistic missiles proposed for deployment by this country since the détente era dawned: The MX ICMB and the Pershing II IRBM.

These two programs are at the heart of our Nation's defense and negotiation strategy. The national security of the United States depends upon a secure deterrent and a viable forward defense in Europe. With this bill, in a single stroke, we are severely undercutting the President's national security policy and his ability to negotiate with the Soviets at Geneva.

Following the House vote on the MX, President Reagan said:

> I had hoped that most of the members in the House had awakened to the threat facing the United States. That hope was apparently unfounded.

By action of this continuing resolution, we have negated any incentive that the Soviets may have had to negotiate an arms control agreement in good faith. Why should the Soviets be interested in agreeing to reduce their arms, if the United States is practicing what amounts to a large measure of unilateral disarmament?

Let us face facts. There is no way to obtain an arms control agreement that would serve the security interests of the United States, that would enhance stability or preserve the peace, if the Soviet Union sees that we are not going to take the minimal steps necessary to offset their enormous military buildup of the past decade.

I do not believe that any of us would want to see the United States attempt to negotiate with the Soviets from a position of weakness. Unless this action is reversed, we no longer will have any reason to continue with strategic arms reduction talks in Geneva.

Our allies also look to the actions of this Congress as evidence of our national determination—or failure of will—to respond to the severe and unprecedented growth of the Soviet military threat to peace.

The governments of our NATO allies, for the most part, recognize the urgent need to modernize our defenses in Europe. Indeed, just this month the NATO ministers issued a communique expressing their support for the modernization of U.S. land-based strategic forces, as essential to the security of Western Europe, while reaffirming their commitment to Pershing II and GLCM deployment. But how are they to explain to their citizenry why they should support a new generation land-based missile in Western Europe if we refuse to support a new land-based missile in this country? And how are they to explain the pressing need to modernize NATO defenses when this Congress decides to shutdown Pershing production lines that were just started up last year?

The allies have emphasized the importance of the intermediate range force negotiations in Geneva and the promise of those talks for eliminating the unstable balance of forces in Europe. The U.S. position, which NATO has steadfastly supported, is that we will desist from deploying Pershing II if the Soviets will dismantle their vast SS-20 force now targeted on our NATO allies.

But his bill has eliminated production funds for Pershing II. As a consequence, the credibility of our negotiating position is called sharply into question. In fact, without an ongoing Pershing production line, I fear that the INF talks are doomed to fail.

It seems to me that to continue the negotiations without funding for Pershing II would be little more than an exercise in self-delusion.

Sadly, I have reluctantly concluded that this country cannot expect to achieve worthwhile arms control agreements with the Soviet Union unless the flaws in this continuing resolution are rectified. Unless production funds for the MX and Pershing II are restored, I believe that President Reagan should consider telling our negotiators to stay out of the negotiations until Congress repairs the damage to our position at Geneva.

I am also dismayed by the broad-stroke cuts we have taken in our defense and military assistance budgets. This continuing resolution cuts our ability to meet our security assistance requirements by $700 million. This cannot help but have a negative impact on this country's ability to secure its interests in many parts of

the world. In particular, I am concerned about our ability to secure access to needed facilities in the vital Persian Gulf region, where countries which were to receive needed military assistance will now be shortchanged. I hope that the most egregious shortfalls can be compensated through supplemental funding.

In defense, by this bill we have cut the President's request by almost $20 billion. I fear that we have ignored President Kennedy's admonition when he said:

> Let us put an end to this policy of deciding our fiscal requirements and then trimming our defenses to meet them. Let our dangers decide our defense requirements—and then fit our fiscal policies to meet them.

President Reagan's efforts to redress our serious defense deficiencies across the spectrum deserve more support from this Congress than is reflected in this continuing resolution.

Let me turn to an area of the legislation with which I had more direct responsibility, that of foreign operations.

The conferees agreed to provide a total of $11.2 billion for foreign assistance programs, compared to the Senate amount of $11.6 billion and the House amount of $11 billion. The administration's request was $11.2 billion, and the fiscal 1982 appropriation was $11.5 billion. The conference agreement is $8.6 million below the President budget.

The conference report includes the House figures and terms for Israel and Egypt. Israel receives a total of $2.485 billion, of which $785 million is economic assistance under the economic support fund, and $1.7 billion is foreign military credit sales, $750 million of which is forgiven. The total amount provided and the economic assistance portion are the same as the President's request. The amount of forgiven military credits is $250 million over the President's request. The Senate had provided a total aid package for Israel of $2.61 billion, of which $910 million is economic assistance and $1.7 billion is foreign military credit sales, $850 million of which would have been forgiven.

Egypt will receive a total of $2.075 billion, composed of $750 million in economic assistance under the economic support fund and $1.325 billion in foreign military credit sales, $425 million of which is forgiven. The only change from the President's budget is the addition of $25 million in military credit sales, which are also forgiven. The Senate had provided the same amounts and terms as the President's request.

The Export-Import Bank is given direct lending authority of $4.4 billion, the same as in fiscal year 1982, and guaranteed lending authority of $9 billion, a reduction of $220 million below 1982. The President's request were $3.83 billion for direct loans and $8 billion for guarantees. The amounts in the conference report are the same as the Senate figures.

The International Development Association (IDA) will receive $700 million, since both the House and Senate bills included that amount and the figure was not subject to conference action. The United Nations development program gets $140 million, the Senate amount, compared to $134 million in the House bill. UNICEF receives $42.5 million, compared to $41.5 million in the House bill and $37 million in the Senate bill. The International Atomic Energy Agency receives $10 million, with a restriction that the funds are not available until the United States is assured that Isreal is allowed to participate fully as a member nation in the activities of the Agency. The International Fund for Agriculture Development (IFAD) receives $24 million, compared to the President's request and House amount of $65.4 million and the Senate amount of $10 million. The Peace Corps receives $109 million, the Senate amount. The House had provided $105 million.

Military assistance grants are funded at $290 million. The President's request fo this account is $557 million, the House provided $176.5 million, and the Senate had $367 million. MAP funds are earmarked for key U.S. friends, such as Turkey, Portugal, and Morocco. Military training is funded at $45 million, an increase over the House amount of $38.5 million and a reduction below the budget request and Senate amount of $53.7 million. Foreign military sales guarantees are limited to $3.638 billion, and earmarks are included in this account for Turkey, Portugal, Morocco, and Spain.

The conferees have included an amended version of the Simon "Bread for the World" amendment requiring the President to attempt to provide not less than 40 percent of AID's development assistance funds for the absolute poor in fiscal 1983, and requiring a report by the AID Administrator within 6 months on the practicality of such a provision, the types of which meet these guidelines, and the overall effect on AID's operations. By including this language, the conferees hope that a clearer picture can be ascertained on this issue.

Finally, I would like to comment on one other feature of this legislation. I am concerned about the provisions in this continuing resolution concerning the Legal Services Corporation. Particularly, I am concerned that the provision that requires that all of last year's grantees and contractors be funded at the same level as last year until Board members who have been confirmed by the Senate can make funding decisions may be misinterpreted. I would like to make clear my understanding, as a conferee on the resolution, that this language limits the Board only in deciding upon levels of funding, but in no way limits the Board's authority to issue regulations, policies, or in other ways to require grantees and contractors to comply with Board regulations and policies.

I am also concerned that this provision may be unconstitutional, in that it purports to limit a constitutional power of the President to make recess appointments.

Finally this provision violates the spirit of the Legal Services Authorization Act, which set up the Corporation to be free of political interference in individual funding decisions from both the executive branch and the Congress.

Mr. SMITH of New Jersey. Mr. Speaker, from listening to some of the accolades and praises this afternoon being lavishly heaped upon the conferees—and frankly, I, too, admire and respect the herculean effort made by the conferees—I reluctantly rise to sound a note of discordance.

I rise to point out to my colleagues that the conferees yesterday rejected the House position on barring funding of abortions under the Federal employees health benefits program.

This, Mr. Speaker, was a grave mistake. In our rush to adjourn, the conferees rejected another necessary ban on abortion funding.

As I am sure many Members know, the continuing resolution that expired on December 17 contained the so-called Ashbrook amendment to prohibit this unconscionable funding.

Mr. Speaker, I am sad to say that the conferees action was directly contrary to the sentiment of this body. On three separate occasions, this body has overwhelmingly expressed its will and desire to end these abortion subsidies: 228 to 170 in August 1980; 242 to 155 in May 1981; and 253 to 167 in July 1981.

These are hardly close votes—and I for one thought the message was quite clear: Get the Government out of the abortion business, we clearly do not want to subsidize the demise of the unborn.

The other body's conferees—with a 49-to-48 landslide mandate to back them up—prevailed in forcing the House to recede from its position. So much for majority rule.

Mr. Speaker, when all the arguments concerning the advisability of legislating on appropriations or the argument that the physical destruction of an unborn child is somehow an "earned" benefit are stripped away, we are faced with the real issue—and that is whether or not abortion denies fundamental human rights to a helpless minority—very young children.

Mr. Speaker, I know that abortion is controversial and divisive. I know

there are some in this Chamber who object to consideration of this issue. "Oh, that again," some in this Chamber say. "Let's do something more substantive," others say. We have no time for the social agenda—besides its Christmas, time to go home.

But let me point out, Mr. Speaker, this issue is literally a life or death proposition for tens of thousands of infants. The office of personnel management reports that in 1980, over 17,000 abortions were paid for under the Federal employees health benefits program. Therefore, this is no minor detail.

Mr. Speaker, over the last 2 years, I have often marveled over the priorities of this Chamber. We "agonize" over a pay raise, time and time again. Both parties engage in continuious one-upsmanship.

And meanwhile, every 30 seconds—because of our inaction, apathy and ignorance—a baby dies a violent death owing to our enlightened abortion policy.

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in total support of the position taken by the gentleman from Massachusetts (Mr. BOLAND) with respect to the Veterans' Administration medical computer program.

Mr. BOLAND, in his capacity as chairman of the Independent Agencies Subcommittee on Appropriations, has done an excellent job in attempting to assist the Veterans' Administration by providing direction with respect to computer capability. In many respects, the VA is behind the private sector in the use of computers for admission to hospitals, discharge from hospitals, in pharmacy, and in other matters. They need to move into the future and the action of Mr. BOLAND and his subcommittee will be extremely helpful in this regard.

I am pleased that they are holding firm in their position in conversations with the other body.●

● Mr. MONTGOMERY. Mr. Speaker, when the House recently passed the continuing resolution, I complimented the distinguished chairman of the Subcommittee on HUD-Independent Agencies, Mr. BOLAND, and other members of the committee, for the language contained in the resolution that would assure the early implementation of a computer capability within the Department of Medicine and Surgery of the Veterans' Administration.

I am delighted that the other body has receded and has accepted the House provision. I compliment the committee for holding firm to our position. Veterans everywhere will benefit greatly from our action. The quality of veterans' health care will be enhanced in every VA medical center. It will also mean that physicians will have a tool not now available to assist them in saving lives. In addition, giving VA hospitals computer capability will mean that veterans will not be required to wait long periods of time to see a physician or to get his or her prescription filled at a VA pharmacy.

Mr. Speaker, this is a very important decision by the Congress. The Veterans' Administration has wasted years because of its inability to make a decision on the kind of computer system to be installed in VA hospitals. Computer capability is desperately needed if the VA is to provide the quality of care veterans expect to receive.

The language contained in the resolution is unusual. We do not like having to make decisions like this, but veterans have waited long enough for this important ADP component to be placed in VA hospitals.

Mr. Speaker, I compliment the conferees for standing firm with the other body and congratulate the distinguished gentleman from Massachusetts (Mr. BOLAND) for his leadership on such an important veterans' health-care issue.

Now, Mr. Speaker, let me make a few brief remarks about another provision contained in the continuing resolution.

On June 2, 1982, I introduced H.R. 6527, the Military Widows and Surviving Children Benefits Restoration Act. This bill was introduced to restore benefits to widows and children of certain veterans who were killed on active duty in the Armed Forces or who died from service-connected disabilities related to their military service before August 13, 1981. These benefits were terminated last year under the Budget Reconciliation Act of 1981. Prior to the enactment of the Reconciliation Act, these benefits were available to the widows and children of veterans through the social security trust fund.

The legislation I introduced was in response to the request of a group of military widows led by Madeline Van Wagenen of California. This group of dedicated and determined women came to Washington early this year to make certain that Congress was made aware that termination of social security benefits last year had a tremendous adverse impact on the lives of many military families. These widows felt compelled to get personally involved in this issue. They felt the Department of Defense had assured their husbands, while serving on active duty, that certain social security benefits would be provided to members of their families were they to lose their lives in defense of their country. To put it another way, Mr. Speaker, these widows felt that a contract existed between the Department of Defense and the service member and that families relied on such an agreement in planning for the future. Although no such contract existed in a legal sense, I agree with them that our country did make a firm commitment that these benefits would be provided, and for that reason, I agreed to sponsor the legislation.
